VYAPAR-RATAN (The Jewel of Trade)

A wonderful treatise for knowing the booms and slumps (bull and bear phases) of shares, the stock market, gold, silver and other commodities

[Diagram: "Rise and fall of prices through the planets" - a chart plotting price movement against the days of the week, marked with planet initials.]

Bharatiya Lakshmi-Parashari Jyotish - an unprecedented work

Pt. Hardev Sharma Trivedi, Jyotishacharya (Master of Astrology)

and

Pt. Gopeshkumar Ojha, M.A., LL.B.

Shri Yantra Helps in Profiting from Business Booms and Slumps

In today's economy, business booms and slumps play a special role. In the industrialised nations of the world, wherever open-market business practice prevails, the stock exchange holds particular importance. Because of this, while shrewd bulls and bears (those who foresee rises and falls) profit overnight, simple, straightforward traders are sometimes reduced to dust overnight. While all this today provides the key to understanding widespread speculation, spiritual means, that is, the grace of the Lord, also inspires a trader to take the right step at the right time. The Shri Yantra has been worshipped in India since time immemorial by good householders and by devotees of Lakshmi. Even today, traders in various regions assess their business future by means of the "Shri Yantra," the "Lakshmi Yantra" or the "Kubera Yantra," and so on. Among all yantras, the Shri Yantra is considered the chief; and if it is properly engraved on metal combined with seed-mantras (bija mantras), and is purified and consecrated at an auspicious moment, then worship of it gives the desired results.

As for the play of booms and slumps in trade, if shrewd traders prepare in advance and conduct their work accordingly, they profit even during a slump. If someone is passing through a bad planetary period and trades in gold and silver, and a slump is under way, such a trader should first install a large-sized "Shri Yantra" in his home, shop or business establishment. After that, as instructed, he should worship the "Shri Yantra" every morning and evening. If he cannot do this himself, he should have a qualified priest or scholar do it for him. After that, if he trades while watching the current of time, he will never suffer a loss. If good planetary periods are running, one has the right understanding, and a person of faith practises with the "Shri Yantra," then it is like fragrance added to gold. This is a very famous king of yantras (Yantraraj).

— Source PDF page 3 —

An ordinary devotee may have this yantra made on a copper plate and consecrated for daily worship. Afterwards, he should worship it daily with faith and devotion and chant the mantra. This removes all troubles. The yantra should be worshipped with the mantra "Om

Hrim Shodashyai Namah." This is also known as Mahatripurasundari.

Taking the sacred water (charanamrita) of the "Shri Yantra" and having its sight (darshan) are also supremely meritorious. These same instructions should be understood to apply to the yantras of all deities.

The fruit of beholding a duly consecrated Shri Chakra that is worshipped daily is great. By drinking the sacred water of the Shri Chakra, one obtains the merit of bathing at a thousand crore holy places. For those who worship Goddess Tripurasundari, both worldly enjoyment and liberation are possible. Legend has it that in the underground vault of the famous Somnath temple in Saurashtra, Shri Yantras were engraved on golden slabs. That is why unmatched wealth rained there constantly. It is said in the Brahmanda Purana that the good fortune of worshipping Shri Vidya comes only to one who has performed a great deal of spiritual practice over many births. This yantra is called the crest-jewel of yantras. If it falls on a Sunday on Diwali, Dhanteras, Navaratri, Basant Panchami, or the Sankranti of the month of Pausha, worship of this yantra is considered especially fruitful.

Introduction (Arambhika)

> *(Invocation) Victory to Gajanana (Ganesha), who gladdens the lotus-like face of the Mountain's Daughter (Parvati) as the sun gladdens the lotus, and who bears the digits of the moon, lord of the twice-born. We worship that divine, imperishable abode of Sarasvati, by whose grace the dense darkness of delusion dissolves.*

In Indian literature the Vedas hold the highest place, and because Jyotish-shastra (astrology/astronomy) serves as the "eye" of the six limbs (Vedangas) of the Vedas, it holds an important position. It is said:

> *The other scriptures are not directly verifiable; in them there is only dispute. Jyotish is the directly verifiable science, of which the Moon and the Sun are the witnesses.*

That is: "In all other sciences there is only the establishment or consideration of words, and because they discuss prior and opposing positions, they are full of dispute only; so their excellence cannot be shown directly by any example. But Jyotish is such a science that its predicted results can be directly experienced, and the Sun and Moon are witnesses to its excellence." The point is that Jyotish-shastra alone is a science capable of determining directly the results of the past, future and present. Jyotish-shastra itself has three main divisions:

> *Having the form of Siddhanta, Samhita and Hora, it consists of three branches (skandhas). Jyotish, the stainless science, is the pure eye of the Veda.*

That is: Jyotish-shastra is divided into these three parts: 1. Siddhanta, 2. Samhita, 3. Hora. The part in which one learns the motion, rising, setting, eclipses and so on of the planets is called "Siddhanta." The part from which one can gain knowledge of omen-related matters, such as the results of the planets, meteors, solar ingress (sankranti), rainfall, dearness (high prices), and cheapness (low prices), is called "Samhita." And the part by which, through the immediate position of the planets, one can correctly determine the happiness and sorrow, gain and loss of living beings according to place, and what will happen and when,

— Source PDF page 5 (book page 6) —

is called "Hora." In the main, two divisions can be spoken of: mathematical (ganita) and predictive (phalita).

Predictive Astrology and the Science of Omens (Nimitta-shastra)

As we said above, Jyotish has mainly three branches. Of these, one branch is called "Samhita" or "Nimitta-shastra." Because it is more directly connected with practical signs than the other branches, this part is more useful and important. A special point is that, with comparatively little effort and understanding, the certain and unerring results this branch gives are altogether astonishing. Nimitta-shastra also has many divisions or parts, among which one is called the "Arghavibhaga" (division on prices and values). There is hardly any need to say how important this is.

Among the four goals of human life, "artha" (wealth) comes right after "dharma," and in today's purely materialistic age, only one who has wealth is able to put wealth to good use or to misuse it. If the life of a man without wealth is called "wasted," it would be no exaggeration. Not only in this age but in ancient times too, the glory of wealth has been written about:

> *One who has wealth has friends; one who has wealth has kinsmen. One who has wealth is a "man" in this world; one who has wealth is a scholar.*

The great poet Magha (as the author attributes it) has also written:

> *Let one's caste sink to the netherworld, and let the host of virtues sink even lower. Let good conduct fall from the cliff-edge, and let noble family be burnt by fire. Let a thunderbolt swiftly strike heroism, the enemy. Let us have wealth alone, without which all these virtues are mere scraps of straw.*

Through the "Arghakanda" or "Arghaprakarana," "trade" (vyapar), the very root form of this system of wealth, is considered. "What is trade?" Its correct definition has become so complex in the modern age, because of its many forms, that it cannot be bound by any set words. Trade is always before all people. The spirit of exchange is the image of voluntary will, which

— Source PDF page 6 (book page 7) —

Of the "trading profession" (vyapar-vritti), the oldest form is the Upanishadic saying "Ekoham bahusyam" ("I am one; let me become many"), or "Ye yatha mam prapadyante tamstathaiva bhajamyaham" ("As people approach Me, so do I reciprocate"); from such statements the Supreme Person, the playful Lord, appears as the very first and foremost world-trader. Although people today may use the word "trade" with a sense of contempt, ancient political thinkers used this word in its meaning of the proper use of a commodity. According to grammar, the word "vyapara" is derived thus: "vi" meaning "specially," "a" meaning "wholly," and "parayati" (to bring across): "vyaparo'syasti iti" (by the Nini affix). In ancient times, "vyapara" and "vanijya" were synonymous words. The word "banya" as a form of "vanik," used for the Vaishya, came later. In the Vedic period the word "vanijya" is found rarely and, in the period after it, in a special form. By the time of the Mahabharata it had become very common. In the Gita, "krishi-gorakshya-vanijyam vaishyakarma svabhavajam" lists "commerce" (vanijya karma) among the natural duties of the Vaishya. Along with it, the words "vipani," "apana," "panya" and "panyajivi" also came into widespread use. For the

Vaishya the words "nirmut," "panyajiva" and "chanjjula" began to be used around the time of Vikrama. A well-known maxim says:

> *One who, thinking "I have obtained my position," fears disputes, who endures the censure of others, and whose learning serves only his livelihood, him they call a merchant of knowledge.*

Thus we can say that the ancient origin of professional activity and process lies right here, and that other countries received training in this art, with various disciplines, in this very land. Vishnu Sharma has written rightly that no other means of earning wealth is better than trade: "Na manye vanijyat kimapi param vartanam iha" ("I do not think there is any livelihood here better than trade"). He goes on to write that for the acquisition of wealth, trade in the form of stocking goods fit for sale is the best of all means, and that everything else is uncertain:

> *Among all means, the means is the stocking of saleable goods. For the sake of wealth it is praised; all else is doubtful.*

— Source PDF page 7 (book page 8) —

The art of commerce arose at the very beginning of creation; without the mutual giving and taking of goods, no work can be accomplished. So when, in very ancient times, coinage was not yet in use, trade and business were carried on by the exchange of goods. After metals such as gold became available and coinage was introduced, trade also advanced as prosperity grew. Just as today, in forward trading (vayda) or speculative betting (satta), one rupee can be turned into many, so in ancient India the trade in fragrant substances (perfume, "itra") was especially active, and in it one could gain a hundredfold or more. Among such trades, Vishnu Sharma wrote that the perfumer's trade is even more profitable than trade in gold and similar goods:

> *What can other merchandise matter against the perfumer's wares, such as gold and the like? What is bought for one coin is sold for a hundred.*

In the ancient seers' texts, among the methods for limiting the balance of commodities (extremely high or low prices), a procedure of fire-offerings (havan-yajna) with the use of mantras has been described. For whichever commodity one wishes to bring into the desired balance, one is to perform the havan of that very commodity with the proper mantras, following the prescribed rite. This subject is very long, so here we will say only this: by all these proofs the antiquity and importance of commerce and business are well established.

The Science of Trade and Astrology

We stated above that India was the chief place of origin of trade, and that its inhabitants were fully skilled in this art. Just as the Sun and other planets have a complete bearing on human life, in the same way the influence of planets works on the scarcity or abundance (dearness or cheapness) of every commodity. In the practice of trade, merchants carry goods that are scarce in one place to another place where they are abundant and sell them there. So if a trader learns in good time when, in which place, where, how much, and which grain will be produced in lesser or greater quantity, or if his estimate turns out correct, he can succeed in making a profit. Jyotish-vigyan (the science of astrology) guides man precisely in this direction.

— Source PDF page 8 (book page 9) —

Since ancient times, traders have been taking the help of this very science in various forms, and still do. That is why, in ancient Jyotish-shastra, the tradition of examining the "Arghakanda" (the section on prices) through auspicious moments for buying and selling and through various kinds of procedures has come down to us.

Just as ancient scriptures contain the demonstration and consideration of various methods, so modern Western scholars have also researched commendable methods in this direction on the basis of the transit of planets (gochara), aspects from central points and triangles by degree, latitude and declination of planets, etc. (The essence of all that has been given in simple language, very beautifully, in the second part of this book by my very dear friend, Jyotish-kala-nidhi Pt. Gopeshkumar Ojha, M.A., LL.B.) Just as, seeing the changing trend of the market, a shrewd trader cannot make a successful "deal" by imitating some old pattern, in the same way an astrologer cannot make a definite prediction of future dearness or cheapness (mahargh-samarth) on the basis of only one ancient method. This subject is as important as it is laborious. Today, in line with place, time and changed circumstances, what is needed is that more and more study and research be devoted to this subject.

The ancient works on dearness and cheapness, or on booms and slumps ("tejee-mandee"), are either in Sanskrit or, in modern times, in English. After Hindi was accepted as the national language, it has become necessary that the literature of this language be enriched with all subjects. In Hindi, books fully based on both Eastern and Western methods are almost non-existent. The few that exist are based only on old methods of "boom and slump," and they have not thrown full light on the condition of modern trade and business from a scientific viewpoint. Therefore many of my affectionate friends and traders wished that I write a book on this subject, based on the principles of ancient Jyotish-shastra and on new research, that would be equally useful for everyone. But with the work of editing, printing and publishing my "Shri Vishvavijay Panchang," and earlier "Shri Svadhyaya" and now "Jyotishmati" magazine,

— Source PDF page 9 (book page 10) —

and many other activities besides, I could not find free time. So even though I could not fully satisfy the repeated insistence of Shri Kailashchandraji, the enthusiastic director of Goyal & Company, he began this work by having it started through our long-time friend Shri Pt. Gangaprasadji, and then forcibly placed on me the heavy responsibility of completing it, editing it and revising it. This time we could not turn down his affectionate insistence and the wish of the public, and considerable time had to be given to editing this book, "Vyapar-Ratan." By churning the ocean of all available ancient Samhitas and works on Arghakanda, this book, true to its name, "Vyapar-Ratan," has been written in simple, easily understood language. In it are described methods by which even an ordinary Hindi-educated person can easily profit through trade.

In editing this book I received full and good counsel from the learned, senior and respected Shri Pandit Motilalji Nagar, Arghakanda-Vachaspati, a connoisseur of the science of Arghakanda; and I also received sufficient material from your printed and written works. For this reason we are specially indebted to Panditji.

How good this book is will be told only by the experienced persons concerned who come forward; but if readers benefit even a little from it, the labour of writing will be deemed successful. If, perchance, some error has remained, as human nature goes, then I request kind and learned readers to be gracious enough to correct and inform me so that it can be

improved in the next edition.

> *Whether through laziness or through lack of intelligence, faults may well remain here and there; yet I have no worry whatever. For the natural power of the virtuous, skilled in discerning merit, always triumphs on earth.*

Respectfully yours,

Hardev Sharma Trivedi

Jyotishmati Niketan, Solan (Shimla)

Table of Contents (Vishay Suchi)

Part One (Pratham Khand)

Chapter 1: Business Success and Astrology (pp. 17-28)

Forward trading - essential rules to keep in mind when trading - features of forward trading - the close relationship of astrology with forward trading - the root basis of rises and falls in the forward market - qualifications of the forecaster and the astrologer - what kind of almanac (panchang) should it be? Which almanacs to trust.

Chapter 2: Knowing the Business Future through the Sarvatobhadra Method of Vedha (pp. 29-52)

The complete method of vedha (planetary "piercing") of the Sarvatobhadra Chakra - construction of the chakra with reasons, and its uses - knowing the direction of vedha from the motion of planets - corner-vedha - knowledge of vedha by unmarked letters - essential rules regarding names - types of retrograde and other motions of planets - knowledge of the almanac by place, time and the varna (class) of the commodity - the chakra for knowing which planets are friends, neutrals or enemies according to the view of Narapati Acharya - knowledge of the planets' own, friendly and neutral signs - discrimination of the planets that are lords of place, time and commodity - exaltation and debilitation degrees, gentleness and cruelty of planets - determination of the lord - consideration of strength of a sign - the results of vedha based on the aspect of the vedhaka (piercing) planet such as the lord - the chakra showing the aspect-quarters of planets - reliable determination of vedha-results and its chakra - the real method of knowing booms and slumps - knowledge of booms and slumps from the piercing of the planets on the nakshatras (lunar mansions).

Chapter 3: Means of Experience-Proven Unfailing Chances (pp. 53-101)

Description of commercial commodities under the nine planets and twelve signs beginning with Aries - the true key to knowing booms and slumps - the matchless method for knowing the next day's boom or slump from the closing rates of the market - results of aspect relationships and an example of them - how much boom and slump will there be in the month? - estimation of the month's boom and slump, with an example, on the basis of high-to-higher and low-to-lower rates occurring on the days of the almanac - knowledge of daily booms and slumps through panic (ghabrahat) and auspicious moments, with examples - the rise and fall of the tithi (lunar day), and daily booms and slumps of the prices of goods from the bhadra (inauspicious period) of heaven, the netherworld and the mortal world - daily booms and slumps through Rahukala.

Basic Means of Knowing Booms and Slumps

Detailed consideration of booms and slumps through the day of the week, tithi, month, Shukun, the year's king, minister, Sasyesh, Dhanyesh, Meghesh, Rasesh, Nirasesh, Phalesh, Dhanesh and Durgesh - consideration through the pillars of the year and through the nakshatras of the Sun and Moon - consideration through the almanac - consideration of booms and slumps through the Dhruvank table - other methods of knowing booms and slumps - knowledge of the day-long ups and downs in rates.

Chapter 4: Consideration of Booms and Slumps through Sankranti and Sight of the Moon (pp. 102-137)

Duration of the days of Sankranti (solar ingress) - 15, 20, 45 muhurtas - description of the rise and fall of goods from indications such as standing, sitting, or sleeping - muhurta of Sankranti, direction of movement, direction of sight, and influence on commodities - the name and result of the Sankranti by weekday and nakshatra - the table (koshthak) for knowing the Sankranti's vehicle etc. from the karanas - the effect on markets of the Moon-results by sign, such as Aries, at the time of entry of the various Sankrantis, and of the sight of the Moon - consideration through the Moon's horn-elevation (shringonnati) - consideration through the Aries etc. Sankrantis falling on particular weekdays - results of Sankranti entry on Amavasya (new moon) and Purnima (full moon) - results of the Moon-sightings in the signs from Aries - consideration through Moon-sightings in various directions in relation to the Sun and other planets and nakshatras such as Ashwini - the table of moonrise.

Chapter 5: Influence of Eclipses on Markets (pp. 138-146)

Definition of eclipse - mathematical principles and Puranic views regarding eclipses - how long the influence of eclipses lasts - results of eclipses occurring on the seven weekdays beginning with Sunday and in the twelve months beginning with Chaitra - the effect of solar and lunar eclipses in the twelve signs from Aries and the twenty-seven nakshatras from Ashwini - the special effect on markets of an eclipse that begins at rising or setting (grastodaya or grastasta).

Chapter 6: Rise and Fall of Rates Through the Planets' Movement through Signs and Nakshatras (pp. 147-214)

By the movement of the Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu and Ketu through the twelve signs from Aries and the twenty-seven nakshatras from Ashwini, the booms and slumps of commercial commodities - and the turmoil in markets through the rising, setting, retrograde and direct motion of Mars, Mercury, Jupiter, Venus and Saturn. Even a lone Mercury, when set (combust), can make a man rich.

Chapter 7: Tested and Unfailing Combinations for Gold, Silver, Cotton, Jaggery, Guar, Peas, Mustard, etc. (pp. 215-249)

Mixed combinations of rise and fall - combinations of boom and slump for cotton, gold, silver; jaggery and sugar (khand), groundnut, linseed, castor, mustard, Ordinary and Ayron (iron) shares, and grains such as wheat, barley and gram.

Chapter 8: Proven Remedies for the Rise of Fortune and the Attainment of Desired Wealth (pp. 250-256)

Yantra for awakening the fortune of persons afflicted by losses - the poverty-destroying ring (mudrika) - experiments for success in work and release from debt from Tulsidas's Ramayana - yantra for removing planetary affliction - wearing gems for planetary pacification - pacification of inauspicious planets through roots and herbs - the Ikkisa (twenty-one-square) yantra that removes Saturn's affliction.

Chapter 9: Appendix (Parishisht) (pp. 257-272)

Experienced combinations for effortless acquisition of wealth - which person will become very rich through trade in which commodity - sudden acquisition of wealth through speculation - rises and falls of the share market: when to buy shares and when to sell - when there will be profit or loss in forward deals - knowledge of booms and slumps through daily ascendants (lagnas) - the method of knowing booms and slumps through the ascendant - consideration of results by "Gurra" - when and why there is a difference between the rates of forward and ready goods - the scriptural and scientific method of knowing fortnightly or weekly rate fluctuations.

Part Two (Dwitiya Khand)

Consideration of Booms and Slumps through 2,500 Mutual Aspect-Combinations of the Planets

(A New System)

Chapter 1: Distance of the Planets and Predictions for Business (pp. 273-286)

Sayana and nirayana calculation - method of converting nirayana planets to sayana - aspects of planets - kinds of angular (degree-based) aspects - the angular difference between planets - symbols and the names of aspects - the strength-degrees (dipansh) of aspects - differing views about aspect strength-degrees - the effect of aspect strength-degrees - the general nature of booms and slumps according to time, planets and signs.

— Source PDF page 13 —

Chapter 2: The Relationship between Planets and Commodities (pp. 287-300)

A detailed relationship with the various planets is given for these commodities: grains, linseed, Ordinary shares, wool, glass items, paper, cloth, groceries, black pepper, cotton, khand (raw sugar), jaggery, wheat, ghee, silver, rice, tea, sugar, gram, leather, barley, jewels, zinc, jute, jute goods, tin, oilseeds, oil, tobacco, copper, wardana (?), electrical goods, machinery, groundnut, cotton, rubber, tin (ranga), iron, shares, gold, mustard, cement, yarn, lead, turmeric, and so on.

Chapter 3: Results of the Mutual Conjunction of the Planets (pp. 300-319)

Commodities related to the Sun, and the conjunction of the Sun with other planets - commodities related to the Moon, and the results of the Moon's conjunction with other planets - commodities under Mars's lordship and the results of Mars's conjunction with

various planets - commodities of Mercury's group and the effect of Mercury's conjunction with other planets - substances related to Jupiter, and the effect of Jupiter's conjunction with other planets on the commercial world - commodities related to Venus, and the effect of Venus's conjunction with other planets - commodities related to Saturn, and the effect of Saturn's conjunction with Herschel (Uranus), Neptune and Pluto, and with Rahu-Ketu - the effect of Rahu-Ketu's conjunction with other planets - the effect of Herschel's conjunction with Neptune and Pluto - the Neptune-Pluto conjunction.

Chapter 4: Latitude (Shara) and Declination-Parallelism (Kranti-Samya) (pp. 320-327)

What is called "shara" (celestial latitude) - definition of declination (kranti) - a picture of the sky - an example of the difference between latitude and declination - diagram of sayana Aries - diagram of sayana Libra - the name "shara" itself means "projection (kshepa)." The maximum limits of latitudes - the effect of declination-parallelism on the business world - the greatest effect of change in latitude on the market - the mean value of the planets' northern latitude - the mean value of the planets' southern latitude - the effect - a method of knowing the time, with examples.

Chapter 5: Various Boom-Causing Aspects and Their Importance (pp. 328-337)

An aspect of 120 degrees (angular), an aspect of 60 degrees, an aspect of 30 degrees - when the planets are 150 degrees apart - a difference of 36 degrees - an aspect of 72 degrees - if there is a difference of 144 degrees - if there is declination-parallelism in two different directions - declinations of one direction - the conjunction of navamsha (ninth-divisions) - the effect of conjunction in the navamsha of different planets.

— Source PDF page 14 —

Part Three (Tritiya Khand)

The Sarvatobhadra Chakra (pp. 353-398)

The author's pledge; the commentator's invocation of auspiciousness; a detailed procedure for constructing the Sarvatobhadra Chakra; relevant scriptural consideration of two interpolated verses; the procedure of vedha (piercing) in the chakra through the aspects of planets; the five "star planets" beginning with Mars - the arrangement of aspects of planets - the arrangement of aspects of the remaining four planets; what is the difference between aspect and vedha? Knowledge of the rising of the planets and of the time of retrograde and setting; the types of planetary motions; the mean motion of the five planets beginning with Mars in terms of kala (minutes of arc) and so on; the approximate measure, in kala and so on, of the fastest motion of the five planets beginning with Mars; scriptural consideration on middle vedha; the special rule of vedha for vowels placed in the corners of the chakra; knowledge of the vedha of unstated letters such as gha, nga, chha etc. in the chakra; knowledge of the vedha of letters pronounced in the regional languages; for the purpose of considering vedha, which things are to be taken as "pierced"? Differences of country, differences of time, differences of commodity; knowledge of the five-fold (panchaka) divisions of country by varna and so on; knowledge of the panchaka of the varna etc. of the commodity; knowledge of the panchaka of the varna etc. of time; some necessary rules regarding names; knowledge of the nakshatra of the varna; the varna-vowel chakra, the tithi-varna-vowel chakra; the planet that is lord of the three divisions of country

(desha-trika); the planet lord of the three divisions of time (kala-trika); the planet lord of the three divisions of commodity (panya-trika); the male-female-neuter classification of planets; the planet lord of colour; the procedure for determining the lord; the basis for the completeness of the strengths such as that of retrogression; the difference between the amount of the above strengths and their basis, from the higher strength; the planets' strength by sign (kshetra-bala); knowledge of the planets' own signs; knowledge of planetary friends, neutrals and enemies; the planetary-friendship chakra; the planets' highest exaltation and debilitation degrees; the use of the lords of country and so on, once determined; the extent of the results of vedha by a benefic planet; the extent of the results of vedha by a malefic planet; the validity of the aforementioned auspicious and inauspicious vedha results by means of aspect; difference of opinion; the validity also by means of the aspect in the navamsha; knowledge of navamsha-vedha; the aspect on the tithi (lunar day); the difference in the results of tithi-vedha in the bright and dark fortnights; the arrangement of aspect in sthitija vedha (vedha by position); the supplement to the section on determining price; the auspicious and inauspicious planetary results by means of vedha and aspect; ways of knowing results and neglectors (vishepaka) in the absence of full vedha and full aspect; the procedure for constructing the result-neglectors; the future duty; the real method of knowing rise and fall.

— Source PDF page 15 —

Appendix (Parishisht) (pp. 399-444)

What the almanac (panchang) should be like for predicting results; table of strength by sign (kshetra-bala); results by degree (amsha-phala); results by minutes (kala-phala); the method for determining sign-strength; an example of sign-strength; a convenient way of determining sign-strength; the table of navamsha-strength; results by kala; results by vikala (seconds of arc); the method of determining navamsha-strength; an example of navamsha-strength; method of determining exaltation-strength, with an example; determining retrograde-strength and rising-strength; an example of retrograde-strength; an example of rising-strength; special considerations about vedha; special considerations about strength; necessary indications regarding the subject of vedha; the table of neglectors (vishepaka) of a benefic planet; the table of neglectors of a cruel (malefic) planet; the nature of the method of knowing booms and slumps; an example, with discussion, of the booms and slumps of the Bombay silver market for seven days, from 12/5/51 to 19/5/51; conclusion of the book.

The Key to the Sarvatobhadra Chakra (pp. 445-466)

Vanijya Sarvasva (The Whole of Commerce) (pp. 467-542)

[Translator's note: The contents page lists pages up to 542, but the uploaded PDF has only 336 pages. Part of the book may be missing from the scan, or the later parts may be printed in a compressed layout. This will be checked against the page numbers as the translation proceeds.]

Vyapar-Ratan (Part One)

Chapter One

Business Success and Astrology

The Spread of Forward Trading (Vayda-Vyapar):

Ever since the use of currency spread in human society, the practice of trade has also grown. As man made progress in producing the means to meet his needs, so he gradually increased his main means of livelihood, trade, as well. While this human being has invented many things for his own convenience, and has found various means to make his life happy in every way, it has also become extremely necessary for him to equip the conduct of his trade with very simple and easily available means. In such a situation it was thought that some convenient method should be found by which, in the shortest time and by investing the least money, the most money could be earned. For this purpose, the all-round, excellent means that became available to people's understanding was given the name "Vayda-Vyapar" (forward trading).

This forward trading, in every commercial centre (mandi), according to the place's

— Source PDF page 17 (book page 18) —

is conducted according to the rules of the institutions set up by traders and known as the "Chamber" or "Association." In general, the rules of all those institutions are almost alike; but in some places there is some difference in certain rules because of the local situation, the traders' circumstances and government control. The arrangement of buying and selling in deals for delivery on dates fixed by those trading institutions is also called "forward trading" (vayda-vyapar). The trader who correctly judges the future trend (expectation) of deals for delivery on those fixed dates earns greater profit from this trade.

Forward trading is affected by many events: political and social events, and those related to plenty and famine. Besides this, the traders' mentality also keeps changing with conditions such as the output, consumption, import and export of trade goods, which also affects this trade. For when the mentality changes, the trader falls into buying or selling. If the number on one side grows, that is, if buyers are more numerous, a boom emerges in the market; and if sellers are more numerous, a slump emerges in the market.

To achieve success in forward trading, it is necessary to keep full knowledge of the related situation. Therefore the following points should always be kept in mind:

(1) Trade only in small amounts according to your own financial position. Always trade hoping for only as much profit as the amount of loss you can normally bear.

— Source PDF page 18 (book page 19) —

(2) Instead of making a thousand deals, make just one or two. But do so within your own capacity, which you can manage.

(3) When the market goes against you, you should not make any deal at random out of panic; rather, keep your mind steady with patience.

(4) For the commodity in which you trade forward, you should be fully familiar with its production, consumption, stock, import, export and foreign demand, and with the climate, seasonal and political conditions of the place where that commodity is produced in greater quantity, or you should keep means by which you keep receiving knowledge of the above matters from time to time.

(5) From time to time you should keep taking the advice of experts in economics. You should never trust the advice of friends who give some advice or other out of their own selfishness, or who have no vision.

(6) Always move with the times, with the trend of the market. Time itself is the chief means of a trader's success.

(7) You should never fall into the cycle of "unfailing chances," even if Brahma himself has given you an unfailing chance in a dream. Even so, do not make deals beyond your means. Always accept the advice of an astrologer whose predictions you have tested and found correct.

(8) You should trade at a time when the market is moving in one direction. At such a time there is no likelihood of loss.

— Source PDF page 19 (book page 20) —

(9) The commodity whose stock is larger than last year (which can also be known from the government gazette) - buy in deals of that commodity; and sell less of the commodity whose stock is smaller than demand. If, because of some unknown circumstances, the market goes against you, you should take a small risk and close out the deal.

(10) If the bought deals start to move in favour of a boom, or the sold deals toward a slump, you should certainly "double" the deal, at intervals, according to your calculation, in that situation in which your estimate of a good boom or good slump is right and the market is moving in the same direction in which your deals lie. In that situation the doubled deals should be closed out before the definite boom or slump you expected, because the wheel of boom and slump can turn back quickly.

(11) When a good boom has come in the market, everyone's attention is on the boom, the cry of "I'll eat it up, I'll eat it up" (eager buying) is loud in the market, and by planetary motion too the boom trend is coming to an end - then it is profitable only to sell goods. And when the market is in a good, more-than-necessary slump, the cry of "sell, sell" is loud all around, and by planetary motion too the slump is coming to an end - at such a time it is profitable only to buy deals.

(12) If repeated dealing according to your own opinion brings loss, or if circumstances arise that bring only loss, then at such a time stop dealing for some period

— Source PDF page 20 (book page 21) —

and then, after some time, consider your auspicious time, or learn your auspicious time from some learned astrologer, and when the market's trend becomes steady, deal again.

(13) A long-trending line of boom and slump is something you will yourself come to know through experience, from place, time and the many circumstances described above. Even so, you should take the advice of a good astrologer.

(14) You should not think that on whatever day you go to the market you must certainly make a deal; rather, after understanding the market's trend well, begin dealing on the day when you have full confidence that the line of the trend is about to turn.

(15) You should cultivate the habit of not closing out deals as soon as there is only a little profit. You should make it your habit to wait in profit; not to get entangled in the trouble of small reversals (reactions); to keep increasing your deals when the market moves in your favour; and to take advantage of the big swing.

(16) You should remember that rises and falls in the market do not go on every day; rather, for many days, even weeks or many months, the rates keep moving within a limit.

(17) Also keep in mind that just as a newspaper is a help for politics, so money is a help for forward trading. Therefore, only after profit is obtained, do not spend that money on raising your standard of living or on needless expense; rather

— Source PDF page 21 (book page 22) —

keep it for future trade. In time, that very money proves helpful. Suppose some line or your own judgment made the market run for a month or two so that you obtained ten or twenty thousand rupees or a lakh; now for two or three months the market went against you, or you were unable to understand the market's trend, and for this reason you could not earn any income. Therefore, after income is obtained, keep your mind steady.

(18) You should also keep an eye on the dealings of big speculators or traders who earn large profits. But you should not lean toward their dealings; rather, keep watching them and form your own opinion, or by identifying the market's trend from the way they deal, try to profit from that market.

(19) Remember that profit can be made only from the helplessness of others. So do not miss such an opportunity.

The above 16 rules (sic: the book says "16" although 19 are listed) have been given for achieving success in forward trading. With a view to making this forward trading even easier, and so that a person of small capital can earn more profit by it, the offering of boom-and-slump forecasting has also been given a place in it.

The best and simplest means for carrying on trade is "forward trading" alone. In it there is no need to adulterate goods, to tell lies, to give short weight, to bribe anyone, to store goods, or to have many persons. Rather, once this boom and slump begins to run,

— Source PDF page 22 (book page 23) —

once one becomes well acquainted with its principles and takes to heart the principle of making deals, even an ordinary, modestly educated person of small capital can support himself and his family and find time to serve others. But this will be possible only when forward trading is well understood. In any case, even the best of things is sometimes misused and becomes harmful through unknown causes. Goodness or badness lies not in a thing or a principle, but in the manner of using it. Therefore, when forward trading is put to good use, it can never prove harmful.

The Close Relationship of Astrology with Forward Trading:

Every trader has this ambition: "What will the state of the market be, and when, and what should I do at such and such a time?" For this he keeps making every possible effort. But the true and complete knowledge of this can be had only from certain chosen rules of Jyotish-vidya (astrology). The reason is that place, time and every commodity have a very deep relationship with the circle of planets and signs (graha and rashi-mandala). It is through this that, in different places and at different times, the origin, dissolution and existence of all inanimate and animate things of the world keep taking place. By means of the God-given, other-worldly power of the planets and signs, change is taking place every moment in all things. All worldly inanimate and animate things are included within the signs beginning with Aries. Even the circle of the planets, taking refuge within these same twelve signs, keeps moving according to its own motion,

— Source PDF page 23 (book page 24) —

casting, in due time, a good or bad influence, in lesser or greater measure, on the things within its own domain. That influence also bears on the forward market.

The Root Basis of Rises and Falls in the Forward Market:

For all things of the world there are planets that take them, or seize them, or hold them under control. And there are signs that are the collectives, the storehouses, or the gatherers that contain all things within themselves. When a planet, in its motion, is enjoying a sign (passing through a sign), the effect of its every condition falls upon every thing. For at that time those things remain under that planet's control. By "effect" is meant the change (rise and fall) that occurs in the price and so on of a thing, which we may also call boom and slump.

From the above discussion of planets and signs we reach the fact that Jyotish-shastra has a deep relationship with forward trading. As long as you cannot gain knowledge of Jyotish-shastra, you will remain, in a way, ignorant in this forward trading. Therefore, we consider it necessary here to describe some aspects of Jyotish that have a bearing on forward trading.

Today it is seen, or heard, that in some commercial centre, a certain trader, who did not have a fistful of grain in his shop, is buying or selling lakhs of tons in the cash market (galla bazar), and within a day becomes a lakhpati (millionaire) or loses everything he has. This is what people nowadays call "satta" (speculation). Satta means forming an expectation about what lies ahead.

— Source PDF page 24 (book page 25) —

In the big cities there are many institutions, such as associations and chambers, regarded as eminent, which are functioning regularly under capable managers. Thousands of traders, themselves or through their representatives, commission agents, brokers and so on, keep buying and selling there continually, and as a result the prices of trade goods keep rising and falling. In this matter, people generally believe that when the number of buyers of a commodity in the market is greater, its price rises, and when the sellers of that commodity are more numerous, its price falls. But the reality is exactly the opposite. For all the actions of every human being take place through his power of will. Whatever a man thinks in his mind, he says with speech, and with the help of the other senses he carries it out. The fruit of this action is happiness or sorrow, or loss or gain. Therefore it is clear that the mind (the sense-organ that itself produces loss and gain) is possessed by all men, and through it every man trades and reaps loss or gain. The rising of any thought in the mind, and acting accordingly, also happens because of the planets' authority over men. Not only that, the planets have an intimate relationship with our soul, mind, the organs of action such as hands and feet, and the organs of knowledge such as eyes and ears. The sages who originated Jyotish-shastra have said that what people call the "soul" (atma) is, in the terminology of Jyotish-shastra, the Sun, through which one can investigate whether any human being is virtuous or sinful, of good conduct or bad conduct,

— Source PDF page 25 (book page 26) —

In Jyotish-shastra, the mind is referred to by the word "Moon" (Chandra). Therefore, through the Moon, men's mental thoughts can be known. In the same way, planets such as Mars are said to hold sway over the substances in the body such as blood, flesh and marrow. That is about our body; but these same planets, the Sun and others, also have independent

authority over trade goods, through which trade goods rise and fall. Therefore, at the time of the rise and fall of these trade goods, the correct estimate, or knowledge, of the rise and fall, in proportion, can be made from the motion of these planets.

Qualifications of the Forecaster and the Astrologer:

It is almost impossible for every trader to become well acquainted with Jyotish-shastra. We have already said that planets and signs are in such a mutually dependent relationship that, through it, change continually takes place in all animate and inanimate things of the world; that is, the effect arises only through the mutual relationships of these two. Therefore, to know "on which things, and when, and how much, the effect of both will fall," knowledge of Jyotish will surely be required. So the forecaster, whether the person himself or the astrologer, should be well versed in Jyotish-shastra, should know the special features of the ascendant chart (lagna-kundali) well, and should also be well acquainted with the nature, qualities and so on of the planets and signs. By means of planetary calculation, he should construct the mutual aspect-relationships of the planets and, in judging their auspiciousness or inauspiciousness accurately,

— Source PDF page 26 (book page 27) —

he should be skilled; and he should be adept, without anyone's help, at determining questions such as: which planet is entering which sign at what time, what and how much effect it will have on which commodity, and which trade is conducted in what way. Otherwise, a forecaster who is ignorant of these matters, or one who takes advice from a fortune-teller and then trades, is only pushing himself toward loss.

What Should the Almanac (Panchang) Be Like?

In our country today hundreds of almanacs are published, because it has great importance in social life. Tithi (lunar day), festivals, fasts, births, marriages and many such matters are decided according to the almanac. For the construction of an almanac there are at present two systems: the first is nirayana (sidereal) and the second is sayana (tropical). In India the nirayana system is generally the one in use everywhere, and in Western countries the sayana system is used freely. Whether an almanac is made by the sayana or the nirayana system, what should its mathematical method be like? On this the great sages who founded Jyotish-shastra and experienced, high-class scholars hold one single opinion: "That calculation alone is true and confirms the truth of the results, which matches exactly with the planets, nakshatras and so on situated in the sky, and on the basis of which the time of the results determined is also correct down to the pala and vipala (the finest units of time)." Therefore it is beyond dispute that, for predicting results, only the exact planetary calculation established by means of various instruments should be used. Hence one should always use only that almanac whose calculation is correct.

— Source PDF page 27 (book page 28) —

In our country there is a shortage of well-equipped, high-class observatories with modern instruments. Even so, some almanac-makers have, by their effort and planetary calculation, made accurate almanacs whose agreement with the planets, nakshatras and so on in the sky is correct. In addition, they have given in them the daily true positions of the planets, the enjoyment of signs (rashi-bhoga) by the planets, the enjoyment of latitude (shara-bhoga) and of declination (kranti-bhoga), the motion of the planets, and, besides aids for determining changes in the planets' latitude and so on, the mutual aspect-relations of the planets separately. From these it becomes clearly known, for any date of any month, at what time

what kind of angular aspect-conjunction a certain planet is making with another. There is then no need to construct the aspect-relationships by calculation.

For extremely fine and responsible work relating to trade, among the almanacs that are well verified at present are Bombay's "Janmabhumi Panchang," published in Gujarati (and now also giving place to the national language, Hindi), the "Vyaparik Mahalakshmi Panchang" of Murar (Gwalior), and the "Shri Vishvavijay Panchang," published from Delhi and edited by Jyotish-Martand Pandit Hardev Sharma Trivedi, which have proved especially trustworthy and mathematically correct.

On the basis of the highest observatory of the globe, Raphael's Ephemeris (the English almanac) is also highly useful for work on booms and slumps.

Chapter Two

Knowing the Business Future through the Sarvatobhadra Method of Vedha

The Complete Vedha Method of the Sarvatobhadra Chakra:

In the very ancient Vedic age, the first thing was to conceive of auspicious days (auspicious times) with the help of the nakshatras (lunar mansions) in the sky and the Moon. Extraordinary research was done on the auspiciousness and inauspiciousness of the nakshatras, and accordingly, on those days, a wide arrangement was made for the performance of Vedic rites such as sacrifices. Later, the great sages who founded Jyotish-shastra on this earth, and the acharyas (teachers) who followed them, made still deeper inquiry into the qualities, natures and mutual relations of the nakshatras and planets, as a result of which the "science of results" (phalit-shastra) arose. The point is that, in this predictive part of Jyotish-shastra, the mutual relation of nakshatras and planets attained the place of greatest importance. In the present "Sarvatobhadra Chakra," this inseparable relation of the nakshatras and planets, which is like that of the bodice and the skirt (choli-daman), has been arranged so beautifully that the statement of an astrologer or forecaster who declares results through this chakra will be correct in the highest degree; his word is never false.

— Source PDF page 29 (book page 30) —

The Sarvatobhadra Chakra (the 81-square diagram)

[Chart transcription. The original is a 9 x 9 grid mixing nakshatra (lunar mansion) names, sign names, tithi-group names and Devanagari letters. Each cell is given below in Latin letters, row by row from the top, left to right. "(?)" marks a cell whose letter is hard to read in the scan. The marginal letters printed outside the grid on the top, left, right and bottom edges are too small to read reliably and are omitted.]

Row 1	a(?)	Kri(ttika)	Ro(hini)	Mrig(ashira)	Ardra	Pun(arvasu)	Pushya	Aa(?)	Aa(?)
Row 2	Bha(rani)	U	A(?)	Va	Ka	Ha	Da	U (long)	Magha
Row 3	A(?)	La	Li(?)	Vrishabha (Taurus)	Mithuna (Gemini)	Karka (Cancer)	Lri(?)	Ma	Pu. Pha(lguni)
Row 4	Re(vati)	Cha	Mesha (Aries)	A(?)	Nanda	Au(?)	Simha (Leo)	Ta	U. Pha(lguni)
Row 5	U. Bha(drapada)	Da	Meena (Pisces)	Rikta	Purna	Bhadra	Kanya (Virgo)	Pa	Hasta
Row 6	Pu. Bha(drapada)	Sa	Kumbha (Aquarius)	Ah(?)	Jaya	Am(?)	Tula (Libra)	Ra	Chitra
Row 7	Shat(abhisha)	Ga	E	Makara (Capricorn)	Dhana (Dhanu, Sagittarius)	Vrishchika (Scorpio)	E(?)	Ta	Swati
Row 8	Dhani(shtha)	Ri(?)	Kha	Ja	Bha	Ya	Na	Ri(?)	Va
Row 9	I	Shra(vana)	Abhi(jit)	U. Sha(dha)	Pu. Sha(dha)	Mula	Jye(shtha)	Anu(radha)	I(?)

This chakra has three names: 1. Trailokyadipak ("lamp of the three worlds"), 2. Sarvatobhadra, and 3. Ekashitipada chakra (the "81-square" chakra). Of these, the name "Sarvatobhadra" is the one popular among the public. This chakra has been constructed with such excellence that through it the future of all animate and inanimate things of the three worlds, that is, of men, animals, birds, countries, cities, villages, plenty, famine, rain, excessive rain, drought, and national upheaval, and also the proper time and so on for the boom or slump of all commodities that are bought and sold, together with the correct auspicious or inauspicious result, can be known and stated.

— Source PDF page 30 (book page 31) —

The use of this chakra is on the five-fold sets (panchaka) of varna (letter-class) and so on (1. varna, 2. nakshatra, 3. rashi, 4. vowel (svara), 5. tithi) made from the first letter of the name of a thing, and it works by the planets' left, front and right vedha (piercing). "Vedha" means: looking with a deep eye at one of the five parts (angas) of a thing's varna and so on. A planet seated on a nakshatra, according to its own motion, makes vedha in this chakra sometimes to the right, sometimes to the left, and sometimes to the front; this is the basic definition of "vedha." There are nine planets. Of the five planets Mars, Mercury, Jupiter, Venus and Saturn, whichever one is "vakri" (retrograde) pierces, from the nakshatra in which it sits in this chakra, the varna and so on lying to its right. When one of them is swift (atichari), it pierces the varna and so on lying to the left of its place; and when one of them is of middle motion (madhyachari), it pierces in this chakra the varna and so on lying in front. The motion of these five planets keeps changing from time to time, and so the vedha also keeps changing. Rahu and Ketu are always retrograde, and the Sun and Moon are always of direct motion (margi). No change ever occurs in the motion of these four; therefore the vedha of these four planets always takes place in all three directions (left, front, right).

Corner Vedha (Kona-vedha):

In the four corners of this chakra there are two nakshatras each: in the north-east (Ishana) corner, Bharani and Krittika; in the south-east (Agni) corner, Ashlesha and Magha; in the north-west (Vayavya) corner, Vishakha and Anuradha; and in the south-west (Nairritya) corner, Shravana and Dhanishtha. When any planet reaches the fourth and the first quarter (charan) of these nakshatras, it pierces the vowels, "a" and so on, situated in that corner.

— Source PDF page 31 (book page 32) —

This vedha does not depend on motion. On the basis of retrograde and other motions, there is no need here to consider the direction of the vedha.

Knowledge of the Vedha of Unwritten Letters:

When the letter "ka" written in the chakra is pierced by a planet, the three letters "gha, nga, chha" are also taken to be pierced; by the vedha of the letter "pa," the letters "sha (retroflex), na (retroflex), tha"; by the vedha of the letter "bha," the letters "dha, pha, ddha"; and by the vedha of the letter "da," three letters beginning with "tha" (the printing of the last two is unclear in the scan) are also taken to be pierced.

Necessary Rules about Names:

If the beginning of a name has conjunct letters, the varna-panchaka and so on should be made from whichever of them is spoken first.

Wherever most of the inhabitants pronounce a thing by a given name, construct the varna-panchaka and so on from the first letter of that very name.

If one thing has many names, then the varna-panchaka and so on should be made from the first letter of whichever name is the most recent (the latest in usage).

Types of Retrograde and Other Motions of the Planets:

Although in the ancient seers' Siddhanta texts eight kinds of planetary motions are described, in this Sarvatobhadra chakra Narapati Acharya treats a planet of retrograde (vakri), very retrograde (ativakri) or crooked (kutila) motion as "vakri"; treats a swift or very swift (atichari) planet as "shighri" (swift); and treats a planet of slow, middle or equal motion as "madhyachari." He has declared them fit to pierce toward the left, the front and the right.

— Source PDF page 32 (book page 33) —

The Mean Motion, in Kala (Minutes of Arc) and So On, of the Five Planets Beginning with Mars

Planet	Mars	Mercury	Jupiter	Venus	Saturn
Kala (minutes)	31	59	5	59	2
Vikala (seconds)	26	8	0	8	0

The Ending Point of Swift Motion of the Five Planets Beginning with Mars

Mars 36 (minutes) 1 (second); Mercury 104 (minutes) 46 (seconds); Jupiter 12 (minutes) 22 (seconds); Venus 73 (minutes) 43 (seconds); Saturn 7 (minutes) 27 (seconds).

Knowledge of the Very-Swift (Atichari) Motion of the Five Planets Beginning with Mars

Planet	Mars	Mercury	Jupiter	Venus	Saturn	Unit
Beginning of very-swift motion	36 / 1	104 / 46	12 / 22	73 / 43	7 / 27	kala / vikala
Extreme very-swift motion	46 / 11	113 / 32	14 / 4	75 / 42	7 / 45	kala / vikala

[Reading note: in the last table each cell shows minutes of arc / seconds of arc of daily motion. The values for the "beginning" row are identical to those in the line above the table, which the book heads

"*ending point (samapti-kala) of swift motion*". *The book does not explain the difference in wording, so both are given as printed.]*

— Source PDF page 33 (book page 34) —

Knowledge of the Varna-Panchaka (the five-fold set based on the letter) and So On

Chakra for Knowing the Vowel and Tithi from the First Letter of a Name

Tithi group name	Nanda	Bhadra	Jaya	Rikta	Purna
Vowel	a	i	u	e	o
Letters (tithi 1-5)	ka, nga(?)	kha, ja	ga, jha(?)	gha, ta (retroflex)	cha, tha (retroflex)
Tithi	1	2	3	4	5
Letters (tithi 6-10)	da (retroflex), dha	dha (retroflex), na	ta, pa	tha, pha	da, ba
Tithi	6	7	8	9	10
Letters (tithi 11-15)	bha, va	ma, sha	ya, sha (retroflex)	ra, sa	la, ha
Tithi	11	12	13	14	15 (full moon) / 30 (new moon)

[Reading note: letters are given in Latin script as read from the scan; "(?)" marks cells that are hard to read. Where the same consonant exists in dental and retroflex forms, the retroflex form is marked "(retroflex)".]

With the help of the chakra given above, one can easily find out that, in whatever cell of this chakra the first letter (syllable) of the name falls, the tithi and vowel written above it are the tithi and the vowel of that letter. For example, if one wants to know the vowel and tithi of "gud" (jaggery), the first letter of "gud" is "ga." In this chakra, in the cell above "ga" are written the vowel "u" and the tithi "Jaya,"

— Source PDF page 34 (book page 35) —

so the vowel of the letter "ga" is "u" and its tithi is "Jaya." In the same way, in "silver" (chandi), the letter "cha" has the vowel "o" and the tithi "Purna." In this chakra, the full set of tithis beginning with Pratipada (the first day) is not written in the cells; only their group names, Nanda and so on, are written. When these are pierced (vedha), the tithis beginning with Pratipada are also pierced.

Knowing the Nakshatra from the First Letter of a Name

No.	Nakshatra	Four syllables (one per quarter)
1	Ashwini	chu, che, cho, la
2	Bharani	li, lu, le, lo
3	Krittika	a, i, u, e
4	Rohini	o, va, vi, vu
5	Mrigashira	ve, vo, ka, ki
6	Ardra	ku, gha, nga, chha
7	Punarvasu	ke, ko, ha, hi
8	Pushya	hu, he, ho, da (retroflex)
9	Ashlesha	di, du, de, do (all retroflex)
10	Magha	ma, mi, mu, me
11	Purva Phalguni	mo, ta, ti, tu (retroflex)
12	Uttara Phalguni	te, to (retroflex), pa, pi

No.	Nakshatra	Four syllables (one per quarter)
13	Hasta	pu, sha (retroflex), na (retroflex), tha (retroflex)
14	Chitra	pe, po, ra, ri
15	Swati	ru, re, ro, ta
16	Vishakha	ti, tu, te, to
17	Anuradha	na, ni, nu, ne
18	Jyeshtha	no, ya, yi, yu
19	Mula	ye, yo, bha, bhi
20	Purva Ashadha	bhu, dha, pha, dha (retroflex)
21	Uttara Ashadha	bhe, bho, ja, ji
22	Abhijit	ju, je, jo, kha
23	Shravana	khi, khu, khe, kho
24	Dhanishtha	ga, gi, gu, ge
25	Shatabhisha	go, sa, si, su
26	Purva Bhadrapada	se, so, da, di
27	Uttara Bhadrapada	du, tha, jha, nya
28	Revati	de, do, cha, chi

Taking Abhijit along with them, from Ashwini to Revati, in the 28 nakshatras, whatever vowel-bearing letters there are in each quarter (charan), all of these in this chakra

— Source PDF page 35 (book page 36) —

are written. The vowel pairs a-aa, i-ee, u-oo, e-ai and o-au are, in each pair, equal (the same). Whether the vowel after the letter in a name is short or long, in both cases the nakshatra will be the same as that of the letter joined with the short vowel in this chakra. For example, gram (chana) and silver (chandi) will both be of Revati nakshatra. In "gud" (jaggery), the letter "ga" with the short vowel "u" lies in the third quarter of Dhanishtha nakshatra; therefore the nakshatra of "gud" will be Dhanishtha. In the same way, the nakshatras of other things should also be understood.

Knowing the Sign (Rashi) from the First Letter of a Name:

Sign	Syllables
Aries (Mesha)	chu, che, cho, la, li, lu, le, lo, a
Taurus (Vrishabha)	i, u, e, o, va, vi, vu, ve, vo
Gemini (Mithuna)	ka, ki, ku, gha, nga, chha, ke, ko, ha
Cancer (Karka)	hi, hu, he, ho, da, di, du, de, do (retroflex da-series)
Leo (Simha)	ma, mi, mu, me, mo, ta, ti, tu, te (retroflex ta-series)
Virgo (Kanya)	to, pa, pi, pu, sha, na, tha, pe, po (sha, na, tha retroflex)
Libra (Tula)	ra, ri, ru, re, ro, ta, ti, tu, te (dental)
Scorpio (Vrishchika)	to, na, ni, nu, ne, no, ya, yi, yu (dental)
Sagittarius (Dhanu)	ye, yo, bha, bhi, bhu, dha, pha, dha (retroflex), bhe
Capricorn (Makara)	bho, ja, ji, ju, je, jo, kha, khi, khu, khe, kho, ga, gi
Aquarius (Kumbha)	gu, ge, go, sa, si, su, se, so, da
Pisces (Meena)	di, du, tha, jha, nya, de, do, cha, chi

— Source PDF page 36 (book page 37) —

According to the View of Narapati Acharya: Chakra for Knowing the Friends, Neutrals and Enemies of the Planets

Planet	Friends	Neutrals	Enemies
Sun	Moon, Mars, Jupiter	Mercury	Venus, Saturn, Rahu (printed "Ra", cut off)
Moon	Sun, Mercury	Mars, Jupiter, Venus, Saturn	Rahu, Ketu
Mars	Sun, Moon, Jupiter	Venus, Saturn	Mercury, Rahu, Ketu
Mercury	Sun, Venus	Mars, Jupiter, Saturn	Moon, Rahu, Ketu
Jupiter	Sun, Moon, Mars	Saturn	Mercury, Venus, Rahu, Ketu
Venus	Saturn, Mercury	Mars, Jupiter	Sun, Moon, Rahu, Ketu
Saturn	Mercury, Venus	Jupiter	Sun, Moon, Mars, Rahu, Ketu
Rahu	Ketu	(none)	Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn
Ketu	Rahu	(none)	Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn

Knowing the Planets' Own, Friendly, Neutral and Enemy Signs

[Transcription note: the book prints each sign with its number (Aries 1 … Pisces 12). Sign names are given here; numbers are omitted. The printed table contains apparent misprints (for example, a number that does not match the sign beside it, and Mercury's own sign Virgo listed again under its enemy signs). Entries are given as printed, with the doubtful ones marked.]

Planet	Own signs	Friendly signs	Neutral signs	Enemy signs
Sun	Leo	Cancer, Aries, Scorpio, Sagittarius, Pisces	Gemini, Virgo	Taurus, Libra, Capricorn, Aquarius, Virgo, Pisces
Moon	Cancer	Leo, Gemini	Aries, Scorpio, Sagittarius, Pisces, Taurus, Libra, Capricorn, Aquarius	Virgo, Pisces
Mars	Aries, Scorpio	Leo, Cancer, Sagittarius, Pisces	Taurus, Libra, Capricorn, Aquarius	Gemini, Virgo, Pisces
Mercury	Gemini, Virgo	Leo, Taurus, Libra	Aries, Scorpio, Sagittarius, Pisces, Capricorn, Aquarius	Cancer, Virgo (sic), Pisces
Jupiter	Sagittarius, Pisces	Leo, Cancer, Aries, Scorpio	Capricorn, Aquarius	Gemini (printed with number 6), Virgo, Taurus, Libra, Virgo (repeated), Pisces
Venus	Taurus, Libra	Gemini (printed "Si. 3"), Virgo, Capricorn, Aquarius	Aries, Scorpio, Sagittarius, Pisces	Leo, Cancer, Virgo, Pisces
Saturn	Capricorn, Aquarius	Gemini, Virgo, Taurus (printed no. 1), Libra (printed no. 6)	Sagittarius, Pisces (printed no. 2)	Leo, Cancer, Aries, Scorpio, Virgo, Pisces
Rahu	Virgo	Pisces	none (marked X)	Leo, Cancer, Aries, Scorpio, Gemini, Virgo, Sagittarius, Pisces, Taurus, Libra, Capricorn, Aquarius (all twelve)
Ketu	Pisces	Virgo	none (marked X)	Leo, Cancer, Aries, Scorpio, Gemini, Virgo, Sagittarius, Pisces, Taurus, Libra, Capricorn, Aquarius (all twelve)

— Source PDF page 38 (book page 39) —

Special Note:

Mercury is lord of the sign Virgo, and Rahu is as well. At the time for which you wish to know the boom or slump, whichever of the two is the stronger will be considered the lord of Virgo.

The Highest Exaltation and Debilitation Degrees of the Planets

Planet	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn	Rahu	Ketu
Exaltation sign	Aries	Taurus	Capricorn	Virgo	Cancer	Pisces	Libra	Gemini	Sagittarius
Highest exaltation (degrees)	10	3	28	15	5	27	20	15	15
Debilitation sign	Libra	Scorpio	Cancer	Pisces	Capricorn	Virgo	Aries	Sagittarius	Gemini
Deepest debilitation (degrees)	10	3	28	15	5	27	20	15	15

Knowing the Gentle (Benefic) and Cruel (Malefic) Planets:

The Moon, Mercury, Jupiter and Venus: these four planets are gentle (saumya), or benefic. The Sun, Mars, Saturn, Rahu and Ketu: these five are considered cruel (krura), or malefic. Among the benefic planets, Mercury becomes cruel when it is in the same navamsha (ninth-division) as any cruel planet; and the Moon becomes cruel by waning, from the eleventh (ekadashi) of the dark fortnight to the fifth (panchami) of the bright fortnight. On the remaining days, the Moon is benefic by being full.

Discrimination of Place, Time and Commodity:

Place, time and commodity: these three kinds of distinction are accepted by the ancient teachers for knowing the boom and slump of trade goods. By "place" is meant: 1. a region (pradesh) or province, 2. a mandal or district, 3. a village or city, that is,

— Source PDF page 39 (book page 40) —

a place (sthan). By "time" is meant: 1. year, 2. month, 3. day. By "commodity" (panya) is meant: 1. metal (dhatu), 2. root (mula), 3. living being (jiva). Keeping these three kinds of distinction in mind, the estimate of boom and slump can be made correctly. Which commodity is produced in which region at what time, to which regions it goes, and in what situation its price may be, and when and how, on these matters one should deliberate well through worldly means, such as telegram and telephone, and only then form an idea of the boom or slump.

The ancient astrologers (daivajna acharyas) have defined year, month and day as follows: the time that Jupiter takes, after entering a sign, to enter the next sign is one "year"; as long as the Sun stays in one sign is one "month"; and the time from one sunrise to the next sunrise is one "day."

All things that arise from the earth, from gold down to clay (the mineral substances), are given the name "dhatu" (metal); all vegetable products arising from the earth, from trees down to blades of grass, are called "mula" (root); and all creatures from man down to insects are called "jiva" (living being). These three are the commodities (panya). Whatever buying and selling takes place, it is of metal, root and living beings alone.

The lord of place is chosen from among Jupiter, Saturn and Rahu; the lord of the district (mandal) from among the Sun, Venus and Ketu; and the lord of the locality (sthan) from

among the Moon, Mars and Mercury. Whichever of them is strong at the time is accordingly regarded as the lord of the place (desh), district (mandal) and locality (sthan), respectively.

— Source PDF page 40 (book page 41) —

The lord of the year (varshadhipati) is chosen from among Jupiter, Saturn and Ketu; the lord of the month (masadhipati) is chosen from among Mars, Mercury, Venus and the Sun. Whichever planet among these is strong is chosen, respectively, as lord of the year and lord of the month; and the lord of the day is always the Moon.

Mars, Saturn and Rahu are considered the lords of metal (dhatu). The Moon, Mercury and Jupiter are considered lords of living beings (jiva), and the Sun, Venus and Ketu are considered lords of roots (mula). Whichever of these planets are strong are chosen, respectively, as the lord of metal, the lord of living beings and the lord of roots.

The planets of masculine designation are Rahu, Ketu, the Sun, Jupiter and Mars. Among them the strong one is chosen as the authority. The planets of feminine designation are Venus and the Moon. Among these the strong one is considered the authority, and the planets of neuter designation are considered to be Saturn and Mercury. Among them also, the one that is strong is considered the authority.

The lords of the white colour are the Moon and Venus; the lords of the red colour are Mars and the Sun; the lords of the yellow colour are Mercury and Jupiter; and the lords of the dark (shyam) colour are considered to be Rahu, Ketu and Saturn. On the basis of the above designations, male, female and neuter, and white, red and so on, whichever planet comes to be the authority under a given designation, if it is growing in strength, that is, becoming powerful, then the commodities of that designation also increase; and if it is becoming weak, then those commodities suffer loss, that is, there is a shortfall in their production.

— Source PDF page 41 (book page 42) —

Selecting the Authority: Determining the Lord

Consideration of Sign-Strength (Kshetra-bala):

When a planet is situated in its own sign (kshetra), and its position is exactly at the middle of the sign (at 15 degrees), it gives full strength, that is, four quarters (padas). If a planet is exactly at the middle of the sign of a friendly planet, that planet gives three-quarters, that is, three padas of strength. In the middle of the sign of a neutral planet it gives half (two padas), and in the middle portion of the sign of an enemy planet it gives only a quarter, that is, one pada. Here it should be remembered that only when the planet is situated at exactly the middle of the sign (at 15 degrees) does it give the full, three, two or one pada of sign-strength, as stated. If it is beyond or short of 15 degrees, then by the method of the rule of three (proportion), whatever strength the planet obtains is that planet's sign-strength.

A Simple Method for Finding Sign-Strength:

Whether it is a benefic or a cruel planet, the degrees, minutes and seconds (up to 15 degrees) it has in the sign of its enemy are its sign-strength.

In the sign of a neutral planet, the degrees, minutes and seconds (up to 15 degrees) are doubled, and the result in kala (minutes) and so on that is obtained is the sign-strength.

In the sign of a friendly planet, the degrees, minutes and seconds (up to 15 degrees) are tripled, and the result in kala and so on that is obtained is the sign-strength.

In its own sign, the degrees, minutes and seconds (up to 15 degrees) are multiplied by four, and the result in kala and so on that is obtained is the sign-strength.

— Source PDF page 42 (book page 43) —

If the degrees, minutes and seconds are more than 15 degrees, then subtract them from 30 degrees, and the degrees and so on that remain should be made into sign-strength in the manner stated above, according to whether it is the sign of a friend and so on.

Consideration of Retrograde Strength (Vakra-bala):

For however many days any one of the five planets beginning with Mars remains retrograde, those days should be counted by the Sun's degrees or by the English (calendar) date. At the middle portion the planet's retrograde strength is full. By the rule of three, as far as one moves ahead of or behind the middle portion, so much retrograde strength is obtained; that much is the planet's retrograde strength.

Consideration of Rising Strength (Udaya-bala):

Like retrograde strength, the days of rising should also be counted. Of however many days they are, at the middle of that period the rising strength is full, and ahead of or before that, by the rule of three, it is less.

Consideration of Exaltation Strength (Uchcha-bala):

When a planet is in its sign of exaltation at its highest exaltation degrees, its exaltation strength is full; and when a planet is in its sign of debilitation at its deepest debilitation degrees, its exaltation strength remains half. Exaltation strength is never less than this. Between the deepest debilitation degrees and the highest exaltation degrees, by the rule of three, whatever strength is obtained should be understood as the exaltation strength.

Thus, among the lords of place, time and commodity, the planet that is the strongest is considered the lord of the place, the time and the commodity.

— Source PDF page 43 (book page 44) —

After the lords of place and so on have each been determined separately, in the manner described above, one should see what relationship of friendship and so on the vedha-making planets (vedhakarta), which are different from the lords, have with these lords. There should be no mistake in this.

If the planet making vedha on the varna-panchaka and so on of the place and so on is benefic, it gives an auspicious result in the order written further on. If the vedha-maker is itself the lord, it gives the full quarter-measure (pada) of vedha result; if it is a friend of the lord, three-quarters; if it is neutral to the lord, half; and if it is an enemy, a quarter.

If the planet making vedha on the varna-panchaka and so on of the place and so on is cruel, it gives an inauspicious result in the order written further on. If the vedha-maker is itself the lord, it gives a quarter; if it is a friend of the lord, half; if it is neutral to the lord, three-quarters; and if it is an enemy, the full measure of the vedha result.

If the vedha-making planet pierces any one of the varna-panchaka and so on, and looks with full aspect at the sign of the pierced letter and so on, then the planet that is the lord, friend

and so on gives, in the order of quarters, the entire result of the vedha described above. If it does not look with full aspect but looks with three, two or one quarter, then it gives, accordingly, three-quarters, half or a quarter of the vedha result, as will become clear from the chart on the next page.

— Source PDF page 44 (book page 45) —

Vedha Results Based on the Aspect of the Vedha-Making Planet, Such as the Lord

[Reading note: each cell in the first table shows two numbers, printed one above the other (read here as "first / second"). The book does not state the unit on this page.]

Aspect	Benefic: lord	Benefic: friend	Benefic: neutral	Benefic: enemy	Cruel: lord	Cruel: friend	Cruel: neutral	Cruel: enemy
Full aspect	20 / 0	15 / 0	10 / 0	5 / 0	5 / 0	10 / 0	15 / 0	20 / 0
Three-quarter aspect	15 / 0	11 / 15	7 / 30	3 / 45	3 / 45	7 / 30	11 / 15	15 / 0
Half (two-quarter) aspect	10 / 0	7 / 30	5 / 0	2 / 30	2 / 30	5 / 0	7 / 30	10 / 0
One-quarter aspect	5 / 0	3 / 45	2 / 30	1 / 15	1 / 15	2 / 30	3 / 45	5 / 0

Chart Showing the Aspect-Quarters of the Planets

[Reading note: the numbers in the cells are houses counted from the planet. For example "3 | 10" means the 3rd and 10th houses. The printing of two cells is faint; they are marked.]

Aspect	Sun	Moon	Mars	Mercury	Jupiter	Venus	Saturn	Rahu	Ketu
One-quarter	3, 10	3, 10	3, 10	3, 10	1(?), 10 (faint; probably 3, 10)	3, 10	3, 10	3, 10	3, 10
Half (two-quarter)	5, 9	5, 9	5, 9	5, 9	0, 0 (none)	5, 9	5, 9	5, 9	5, 9
Three-quarter	4, 8	4, 8	0 (none)	4, 8	4, 8	4, 8	4, 8	4, 8	4, 8
Full	7	7	7, 4, 8	7	7, 5, 9	7	7, 3, 10	7	7

— Source PDF page 45 (book page 46) —

Because the planet aspects the sign, its aspect is also considered to fall on the varna (letter) and so on. And for the letter belonging to a tithi, if the vedha-making planet has an aspect on the sign of that letter, the aspect is also considered to fall on the tithi.

Whether the vedha-making planet is benefic or cruel, if a tithi is pierced in the bright fortnight (shukla paksha), the result of that vedha is full, and in the dark fortnight (krishna paksha) it is half.

A planet always has a full aspect on its own navamsha. If the vedha-making planet makes a vedha but has no aspect, then that vedha has no result at all.

Determining the Vishwas (Units) of the Vedha Result:

If the vedha-making planet pierces all five (letter, vowel, tithi, nakshatra and sign) and looks with full aspect at their sign, then a benefic planet gives 5 vishwas and a cruel planet 4 vishwas of result. The reason is that vishwas are reckoned as 20 in all, and the benefic planets are 4 in number. So in the share of each benefic planet there are 5 vishwas each. In

the same way, the cruel planets are 5 in number; in their share there are 4 vishwas each. Altogether they, too, make 20 vishwas.

Of letter, vowel, tithi, nakshatra and sign, the vishwas of the vedha result should be fixed according to how many quarters (padas) of these five are pierced and how many quarters of aspect fall on their sign.

[Note: this passage explains that the figures in the page-44 table are "vishwas" (units out of a total of 20). The book gives no further explanation on this page of the fractions printed beneath the whole numbers.]

— Source PDF page 46 (book page 47) —

Knowing the Vishwas through the Quarters of Vedha and Aspect

[Reading note: each cell has two numbers, printed one above the other: whole vishwas, then a fraction in sixtieths. For example, "0 / 45" means 45/60 of a vishwa (three-quarters), and "1 / 15" means 1 and 15/60 (one and a quarter). This also explains the pairs in the page-44 table. Column headings mean "for one", "for two", "for three", "for four", "for five" of the five divisions (letter, vowel, tithi, nakshatra, sign) that are pierced.]

Aspect	BENEFIC: 1 pierced	BENEFIC: 2	BENEFIC: 3	BENEFIC: 4	BENEFIC: 5
Full	1 / 0	2 / 0	3 / 0	4 / 0	5 / 0
Three-quarter	0 / 45	1 / 30	2 / 15	3 / 0	3 / 45
Half	0 / 30	1 / 0	1 / 30	2 / 0	2 / 30
One-quarter	0 / 15	0 / 30	0 / 45	1 / 0	1 / 15
Aspect	CRUEL: 1 pierced	CRUEL: 2	CRUEL: 3	CRUEL: 4	CRUEL: 5
Full	0 / 48	1 / 36	2 / 24	3 / 12	4 / 0
Three-quarter	0 / 36	1 / 12	1 / 48	2 / 24	3 / 0
Half	0 / 24	0 / 48	1 / 12	1 / 36	2 / 0
One-quarter	0 / 12	0 / 24	0 / 36	0 / 48	1 / 0

In the manner stated above, for the varna-panchaka and so on of the place, time and commodity, write down separately the vishwas obtained according to the vedha-quarters and aspect-quarters of both kinds of planets, benefic and cruel. Then, from the side that has more vishwas, subtract the side that has fewer. If the remaining vishwas belong to the benefic planets, the result is auspicious (a slump, mandi), and if they belong to the cruel planets, know it to be a boom (teji).

For complete knowledge of the prices of any commodity over the year, month or day, namely, what the price of which commodity will be in the year, in the month or on the day, and how much it will rise and fall, this "vishopaka-bala" (strength in units) of the planets is of great importance.

In the section on booms and slumps, the ancient authorities have taken the start of the year from the Sankranti (entry) of Jupiter, the start of the month from the Sankranti of the Sun, and the start of the day from sunrise. Therefore, of year, month and day, whichever

— Source PDF page 47 (book page 48) —

of whichever commodity's time you wish to know the boom or slump, take the price of that commodity at the time of entry of the year, month or day, and imagine it as 20 vishwas, that is, 20 parts. Take the remaining vishopakas (vishwas) obtained at that time, by the method stated earlier, as equal to 1 part. If the remaining vishwas belong to benefic planets, add

them to the present price of that commodity; and if they belong to cruel planets, subtract them from it. In this way, as many vishwas as there are in excess of 20, that many vishwas of slump are to be understood in that commodity; and as many vishwas as there are fewer, that many vishwas of boom, in sequence until the end of the year, month or day.

[Translator's note: as printed, this rule appears to conflict with the previous page, where benefic planets indicate a slump and cruel planets a boom. The wording is translated as printed. Examples later in the book should show how the author applies it.]

Knowing Boom and Slump through the Vedha of Planets on the Nakshatras

Keeping in mind these three, place, time and commodity, the boom or slump is also determined through the vedha of the planets on the nakshatras. By the vedha of benefic planets on the nakshatras a slump occurs, and by the vedha of cruel planets a boom occurs. So here we are explaining, from the vedha on which nakshatra, where, for how long, and what effect falls on what commodity. The reckoning of the planetary periods (dashas) begins from the nakshatra Krittika, and the arrangement of vedha in this Sarvatobhadra chakra has also been made from the nakshatra Krittika; therefore we too are starting the sequence from the nakshatra Krittika.

(1) If there is a vedha of benefic planets on the nakshatra Krittika, then in grains such as rice, barley, wheat and peas; metals such as gold and silver; gems such as diamond, emerald, topaz and ruby; and in oilseeds such as sesame and oil, a slump comes in the southern regions within eight months; and if there is a vedha of cruel planets,

— Source PDF page 48 (book page 49) —

then in the above commodities a boom comes in the southern regions within eight months.

(2) When there is a vedha of cruel planets or benefic planets on the nakshatra Rohini, then boom and slump come, in order, in all grains, all juices (rasa), all metals and old woollen cloth, in the eastern direction within seven days.

(3) By the vedha of benefic planets on the nakshatra Mrigashira there is a fall in the prices of animals in the northern direction, and by the vedha of cruel planets, dearness comes. In the same way, the effect of the vedha of benefic or cruel planets also falls on grains, gems, lac and liquid substances.

(4) By the vedha of benefic or cruel planets on the nakshatra Ardra, an effect falls within one month, in the western direction, on salt, alkali and juice-type substances, and on oils and the like; that is, a slump through the vedha of benefic planets and a boom through the vedha of cruel planets.

(5) In relation to vedha on the nakshatra Punarvasu, an effect falls within 60 days, in the northern direction, on grains, metals, thread, cotton, raw cotton, jute, sacking cloth (bardana), juices and similar substances. By the vedha of cruel and of benefic planets, understand boom and slump respectively.

(6) By the vedha of cruel planets on the nakshatra Pushya, there is a boom in gold, silver, juices and the like, grains, oil, asafoetida, vegetables, mustard, salt, alkali and similar commodities; and by the vedha of benefic planets, a slump, within eight months, in the northern direction.

(7) By the vedha of cruel and benefic planets on the nakshatra Ashlesha, within one month, in the western direction, jaggery, khand (raw sugar), sugar, grains,

rice, chillies, dry ginger, long pepper, madder (majith) and the like, boom and slump come in order.

(8) By the vedha of planets on the nakshatra Magha, an effect falls on commercial commodities in the southern direction within eight months; that is, understand a boom through the vedha of cruel planets and a slump through the vedha of benefic planets.

(9) By planetary vedha on the nakshatra Purva Phalguni, an effect falls on grain, blankets, sesame, oil, woollen and cotton cloth, grains and the like, in the southern direction within eight months. A boom comes through the vedha of a cruel planet and a slump through the vedha of a gentle planet.

(10) By vedha on the nakshatra Uttara Phalguni, an effect falls on commercial commodities in the northern direction within two months.

(11) By vedha on the nakshatra Hasta, an effect falls only on grocery (kirana) goods, in the northern direction within two months; that is, a slump through the vedha of benefic planets and a boom through the vedha of cruel planets.

(12) By the vedha of benefic and cruel planets on the nakshatra Chitra, a slump and a boom come, in order, in metals and in quadrupeds, in the northern direction within two months.

(13) By the vedha of benefic or cruel planets on the nakshatra Swati, a slump and a boom come, in order, in commercial commodities in the northern direction within seven days. Because the nakshatra Swati belongs to the sign Libra, its influence falls especially on grocery goods.

(14) By the vedha of benefic planets on the nakshatra Vishakha, a slump comes in grains and the like in the southern direction within eight months, and by the vedha of cruel planets a boom comes.

(15) On the nakshatra Anuradha, in the eastern direction within seven days, in grain only, a boom comes through the vedha of cruel planets and a slump through the vedha of benefic planets.

(16) On the nakshatra Jyeshtha, in guggul (gum resin), lac, shellac (chapda), camphor, mercury, asafoetida, bell-metal and the like, within seven days, in the eastern direction, a slump comes through the vedha of benefic planets and a boom through the vedha of cruel planets.

(17) By the vedha of benefic planets on the nakshatra Mula, a slump comes within one month, in the western direction, in grains and the like, juices and the like, and thread and the like; and a boom comes by the vedha of cruel planets.

(18) By the vedha of cruel planets on the nakshatra Purva Ashadha, a boom comes in commercial commodities in the western direction within one month, and by the vedha of benefic planets a slump comes.

(19) On the nakshatra Uttara Ashadha, in quadrupeds, metals and the like, and juices and the like, within seven days, in the eastern direction, a slump occurs through the vedha of benefic planets and a boom through the vedha of cruel planets.

(20) By vedha on the nakshatra Abhijit, an effect falls within seven days, in the eastern direction, on grocery goods such as betel nut, cardamom, nutmeg and dry ginger; that is, a boom through the vedha of cruel planets and a slump through the vedha of benefic planets.

(21) On the nakshatra Shravana, a slump through the vedha of benefic planets and a boom through the vedha of cruel planets occurs in grocery goods within seven days, in all directions. In particular, a special effect falls in the eastern direction.

(22) By vedha on the nakshatra Dhanishtha, in metals, gems and the like,

— Source PDF page 51 (book page 52) —

an effect falls within seven days in the eastern direction.

(23) By the vedha of benefic planets on the nakshatra Shatabhisha there is a slump, and by the vedha of cruel planets a boom, in the following commodities, within one month, in the western direction: amla (gooseberry), bark, betel nut, roots of trees, liquor, oil and the like.

(24) By the vedha of benefic planets on the nakshatra Purva Bhadrapada, a slump comes in grocery goods, metals, grains and all medicinal herbs in the southern regions within eight months, and by the vedha of cruel planets a boom comes.

(25) By the vedha of cruel planets on the nakshatra Uttara Bhadrapada, a boom comes, within one month in the western direction, in grains, jaggery, sugar, oilseeds such as mustard, oilcake, rice, ghee, metals and the like; and by the vedha of benefic planets there is a slump.

(26) By vedha on the nakshatra Revati, an effect falls on grocery goods in the northern direction within two months; that is, a slump and a boom occur, in order, by the vedha of benefic and of cruel planets.

(27) By the vedha of a planet situated in the nakshatra Ashwini, an effect falls on quadrupeds, grass and the like, and grains and the like, in the northern direction within two months.

(28) By the planetary vedha on the nakshatra Bharani, in grass, grains and the like, leather (printed "charma"; the first letter is smudged) and the like, and grocery goods, within eight months, in the southern direction, a boom comes by the vedha of cruel planets and a slump by the vedha of gentle planets.

[End of Chapter Two (Sarvatobhadra method of vedha), book pages 29-52.]

— Source PDF page 52 (book page 53) —

Chapter Three

Means of Experience-Proven, Unfailing Chances

Commodities of the Sun

The Sun is the lord of pearls, gems, gold, copper, silk, weapons, leather, husked-type grains (tush-dhanya), trees, bitter things, government coinage, fire-producing things, poison, seeds, all kinds of pod-grains (koshadhanya), mustard, red-coloured substances, oily substances, juices (ras), and every kind of fragrance.

Commodities of the Moon

The Moon is the lord of honey, fruits, flowers, substances born of water, rice, barley, wheat, juices, pearls, sugarcane, conch shells, egg-born things, silver, white cloth, salt, and the like.

Commodities of Mars

Red-coloured fruits and flowers, jaggery, liquor, pungent substances, mercury, realgar (manashil), lentils (masoor), copper, red-coloured metals and things, weapons, coral, goats, and the like.

Commodities of Mercury

Mercury is the lord of green gram (moong), sorghum (jowar), peas, pigeon pea (arhar), pulses, vegetable ghee/plants (vanaspati), green-coloured things, oilseeds (seeds from which oil is extracted), bitter things, fragrance (printed "mrigandh", probably "sugandh"), green-coloured cloth, birds, green gems, and the like.

— Source PDF page 53 (book page 54) —

Commodities of Jupiter

Turmeric, jatamansi (spikenard), tagar (Indian valerian), wax, yellow-coloured things, rock salt (saindha), things born of creepers (vines), mustard, wheat, barley, sugarcane, horse, camphor, cow, and the like.

Commodities of Venus

Silk cloth, blankets, bleached silk cloth, cotton cloth, gems, diamond, ornaments, oily/fatty substances (sneh), mixed grains, varied and assorted goods, silver, aquatic things, crystal (sphatik), triphala, cinnamon (dalchini), chobchini (china root), liquor, Pathani lodh (lodhra bark), nutmeg, agar (aloeswood), bach (sweet flag) and similar grocery goods, cotton, and the like.

Commodities of Saturn

All bitter and pungent things, buffalo, donkey, camel's young, gram, peas, kangni (foxtail millet), kodo (millet), sesame, urad (black gram), wind-producing (vatakarak) substances, wool, leather goods, indigo, black salt, and all black-coloured things.

Commodities of Rahu and Ketu

Coins, lead, iron, coarse grains (kudhanya), blue-coloured things, hessonite (gomed), bone, marrow, kodo, kangni, sesame, urad, goat, camel, pig, donkey, and the like.

Commodities of the Sign Aries (Mesha)

Cloth, he-goat and she-goat, animals, blankets, wool, pashmina, shawls, kutup (blankets made of goat hair, and jars for keeping ghee and oil), lentils (masoor), red wheat, ral (resin), barley, herbs growing on land, copper, gold, red mustard, gums of every kind, red sandalwood, and, by the new modern view, iron, machinery and Iron shares (printed "Ayron share").

— Source PDF page 54 (book page 55) —

Commodities of the Sign Taurus (Vrishabha)

Salt, flowers, barley, white wheat, shali (a type of rice), sugar, buffalo, ox, milk, ghee, cotton cloth, thread, and so on. People of the new school also count cotton (rui) here.

Commodities of the Sign Gemini (Mithuna)

Goods produced in the autumn season (sorghum, pearl millet (bajra), maize, guar, green gram (moong), moth (a pulse), urad, groundnut, toriya (a rapeseed), and the like), rice, cotton, binola (cottonseed), jute, sacking (bardana), creepers, lotus, kumkum (vermilion), roots, saffron, musk, turmeric, ground tubers (zamin-kand), vidari-kand (a tuber), and the like. By the new school: railways, books, and the publication of newspapers and periodicals.

Commodities of the Sign Cancer (Karka)

Tubers, roots, onion, fruit, banana, mocharas (silk-cotton gum), kodrava (kodo millet), durva grass, tejphal, cinnamon, the bark of all kinds of trees, grocery goods, silver, mercury, and the like.

Commodities of the Sign Leo (Simha)

Juices of every kind, husked-type grains (those with chaff), gram, lion, tiger, deer, deerskin, jaggery, and red-coloured things. By the new school: gold.

Commodities of the Sign Virgo (Kanya)

White wheat, green gram (moong), moth, kulthi (horse gram), sorghum, peas, pigeon pea (arhar), linseed, khand (raw sugar), sugar, and green urad. By the new school: cotton farming and the labouring class.

Commodities of the Sign Libra (Tula)

Barley, wheat, urad, gram, peas, coconut, cotton, silk, rice,

— Source PDF page 55 (book page 56) —

mustard, and the like. By the modern view: wheat, gram, rice, all foodstuffs, cotton, and the price of cotton.

Commodities of the Sign Scorpio (Vrishchika)

He-goat, she-goat, sheep, sugarcane and other juicy substances, jaggery, sugar, sweets, iron, linseed, castor, sesame, all black things, shellac (chapda), fragrant substances, perfume (itra), and the like. By the new school: kakra turmeric (printed "kakada haldi").

Commodities of the Sign Sagittarius (Dhanu)

Grains, sesame, roots, salt, potato, cloth, all substances of alkaline juice, weapons, horse, silk cloth (pat), jute (paat), white grains, rubber, and the like. By the new school: marine (sea-borne) products and the like.

Commodities of the Sign Capricorn (Makara)

Sugarcane, gold, iron, shrubs, creepers, leaves, fruit, tubers, trees, and the like. By the new school: coal, zinc, tin, bell-metal, copper, glass, and the like.

Commodities of the Sign Aquarius (Kumbha)

Fruit, flowers, gems, substances of varied form and colour, things produced from water, conch, shells, grocer's (pansari) goods, artificial silk, black urad, sesame, oil, and iron. By the new school: electrical goods and Deferred shares.

Commodities of the Sign Pisces (Meena)

Gems and jewels produced from the skull (such as gajamukta, the "elephant pearl," and gorochan, bezoar), diamond and the like produced from water, liquid substances, ghee, oil and the like, substances of varied forms, things produced from fish. By the new school: fish, and war material.

Note (by the author): In the world there are countless commodities suitable for trade. For commodities other than those named above, under the domain of the signs given, the sign in whose domain the first letter of the commodity's name falls should be taken as the sign of that commodity.

— Source PDF page 56 (book page 57) —

The True Key to Knowing Booms and Slumps

Before knowing the boom or slump of commodities, it is very necessary for a trader to know that all things of trade are divided into three kinds, as metal (dhatu), root (mula) and living being (jiva). All mineral substances, from gold down to clay, are called "dhatu." Trees, fruits, grains and the like, which are produced from the soil, are called "mula." And creatures that move in water, on land and in the sky are called "jiva." The lords of metals are Saturn, Rahu and Mars; the lords of roots are Ketu, Venus and the Sun; and the lords of living beings are Mercury, the Moon and Jupiter. The lords of white-coloured things are Venus and the Moon. The lords of red-coloured substances are the Sun and Mars. The lords of yellow-coloured commodities are Mercury and Jupiter, and the lords of black-coloured things are considered to be Saturn, Rahu and Ketu.

Of the lords of metal, root and living being given above, and of the planets said to be lords of things of the various colours: when those planets lose strength, a boom comes in those things, and when they gain strength, a slump comes. Suppose the lords of the yellow-coloured commodity "gold" are Mercury and Jupiter. Then when Jupiter is exalted, in its own house, in its own navamsha or in a friend's sign, or when Mercury likewise is exalted, in its own house, in its own navamsha or in a friend's sign, a slump certainly comes in gold, because at that time Jupiter or Mercury is gaining strength. If Mercury or Jupiter is in a sign of debilitation, or in an enemy's sign, then a boom certainly comes in gold at that time, because Jupiter or Mercury is losing strength. This method is the true key to knowing "boom and slump"; it has been tested thousands of times. In the order stated above, the trading class

— Source PDF page 57 (book page 58) —

will, by determining the proper time and so on for the boom and slump of each and every thing through the loss and gain of strength of the lord planets of each commodity, and then trading, doubtless gain complete satisfaction and good profit. It will also be proved that "in the work of trade, this Jyotish-shastra of ours is a supreme help, like a stick to support an old man."

A Matchless Method for Knowing, from the Closing-Market Rate, the Next Day's Boom or Slump in the Closing Market

Whatever the rate of a commodity in the closing market, if it is stated in rupees, annas and pai, then convert it all into pai; and if, according to the currency currently in use under the government, it is stated as rupees and new paise, then convert it into new paise. Divide that number by 12, and take the number that remains as a sign (rashi). Then, with great care, determine what aspect-relationship the lord of that remaining sign has, at that time, with the lord of the commodity. The aspect-relationships are of the following kinds:

(1) Sahavasthana (being together: any two planets in one sign).

(2) Dwirdwadash (2nd-12th: one planet is in the second or the twelfth sign from the other).

(3) Tritiya-ekadash (3rd-11th: one planet is in the third or the eleventh sign from the other).

(4) Kendra (angle: one is in the fourth or the tenth sign from the other).

(5) Trikona (trine: one is in the fifth or the ninth sign from the other).

(6) Shadashtak (6th-8th: one is in the sixth or the eighth sign from the other).

— Source PDF page 58 (book page 59) —

(7) Pratiyoga (opposition: one is in the seventh sign from the other).

Results of the Aspect-Relationships Stated Above

(1) Sahavasthana (together): according to the nature of the planets.

(2) If one is in an even (sama) sign and the other is in the odd (vishama) sign ahead of it, boom; otherwise, slump.

(3) Tritiya-ekadash (3rd-11th): boom.

(4) Kendra (angle): slump.

(5) Trikona (trine): boom.

(6) Shadashtak (6th-8th):

Result	Pairs of signs
Boom	Aries-Scorpio; Taurus-Libra; Gemini-Capricorn; Cancer-Sagittarius; Leo-Pisces; Virgo-Aquarius
Slump	Aries-Virgo; Taurus-Sagittarius; Gemini-Scorpio; Cancer-Aquarius; Leo-Capricorn; Virgo-Aries (as printed)

(7) Pratiyoga (opposition): according to the nature of the planets.

Special note: Among the planets forming the aspect-relationship, if any planet is retrograde, in a sign of debilitation or in a debilitation navamsha, or is afflicted by the fault of combustion (asta-dosha), it produces the opposite result; that is, in place of a boom it brings a slump, and in place of a slump it brings a boom. If both of the aspecting planets are retrograde, situated in a debilitation sign or an enemy's sign, or in the state of combustion, they produce a greater opposite result.

For example, on Saturday, 21 December 1957, at the "Punjab Exchange, Delhi," the closing-market rate of jaggery for Phalgun forward delivery was 14.12. When this is divided by 12, 8 remains. Taking this number as a sign, it was the sign Scorpio. Its lord is Mars, and

[Translator's note: the rates appear to be in rupees and new paise (the book says on the next page that the price rose by "two new paise" from 14.12 to 14.14). Read as 1412 new paise, the division by 12 leaves 8, which agrees with the book.]

— Source PDF page 59 (book page 60) —

the lord of the commodity (jaggery) is also Mars. Therefore when the lord's own sign remains as the remainder, a boom takes place. So on the next day, Monday 23-12-1957, the closing-market rate of jaggery for Phalgun forward delivery was 14.14 (it had risen by two new paise). In the same way, dividing 14.14 by 12, 10 remains. The lord of this sign (Capricorn) is Saturn. Saturn and Mars, the lord of the commodity, are both in one sign, and

so they were forming a sahavasthana relationship. This relationship was not good; therefore, from the rate of Monday 23-12-1957, the rate of jaggery fell to 14.02 on Tuesday 24-12-57. In the same way, the rate for Wednesday, from Mars's 14.02, on dividing by 12 left only 10 again; so, as on the first day, on that day also the rate of jaggery fell from 14.02 to 13.63.

[Translator's note: the last figure is printed "13.63" and is hard to read; the date and weekday of the final day are as given by the book (Wednesday, 25-12-1957).]

How Much Boom and Slump Will There Be in the Month?

In some earlier age, just as the experienced traders of India used to make a correct estimate of the boom and slump of trade goods for a whole month from the sighting of the Moon on the second day (dwitiya) of the bright fortnight, in the same way, on the days of the almanac, they used to learn in advance the boom and slump of a month through the highest-of-high and lowest-of-low rates of a commodity. The estimates of those seasoned traders only rarely failed, and only through unknown causes. Even now there are some traders who know how to use this method and take full profit by it. For the information of our readers, we are disclosing such a profitable method together with examples, which those famous traders

— Source PDF page 60 (book page 61) —

forgetting, do not like to tell even to anyone close to them.

For a commodity whose future trend for one month you wish to know, write down correctly, by finding out accurately, its highest-of-high and lowest-of-low rates from the time the Panchak (the five-day period in the almanac) begins to the time it ends. Then subtract the lowest-of-low rate from the highest-of-high rate and find the difference between the two. The rate formed by adding that difference to the highest-of-high rate will be the highest-of-high rate in that month (until the end of the next Panchak). And the rate formed by subtracting the same difference from the lowest-of-low rate will be the lowest-of-low rate in that month. But it is sometimes seen that this difference may increase or decrease to double or even triple. A wise trader should, if the rate of that commodity begins to move up or down by more than the difference found, double that difference, add or subtract it, and imagine that the high or low rate may go as far as that. If the rate falls or rises even more than this, form the idea that a triple high or low rate may be reached. By way of example:

On Saturday, 7 September 1957, the Panchak began at 12 noon, and on Thursday, 12 September 1957, it ended at 1 p.m. In between, at the "Lakshmi Exchange, Delhi," the highest-of-high rate of silver for Asoj (Ashwin) forward delivery was Rs. 183.37 and the lowest-of-low rate was Rs. 181.81. When 181.81 was subtracted from 183.37, the difference obtained

— Source PDF page 61 (book page 62) —

was Rs. 1.56 new paise. When this was added to the highest-of-high rate of 183.37, it came to 184.93. But on 14 September 1957, when the rate went even higher than this, up to 185.87, then, according to the rule stated above, the difference was again added to this rate of 184.93, giving 186.49. Then on 16 September 1957, the rate of silver for Asoj forward went up to 186.44. It was short by only 5 new paise. From there the rate could not go higher again. Fluctuating slowly up and down, once more, on 19 September 1957, the rate became 184.64. In this month no lower line formed. Had there been planetary combinations for the

downside, then, in the same way, by subtracting that difference once or twice, lower rates could have been reached.

Knowing Boom and Slump from the "Ghabad" Muhurta

In the state of Maharashtra, this "Ghabad" muhurta (a time of confusion or panic) is regarded especially as one that gives success to desired undertakings on a journey. But the effect of this "Ghabad" muhurta has also been seen on the prices of trade goods. By nature, this muhurta brings a slump. By coincidence, sometimes the market keeps the trend (boom or slump) with which it opened, in its own time.

Knowing the "Ghabad" Muhurta

Take the nakshatra on which the Sun stands, and count from that nakshatra to the nakshatra of the Moon; multiply the number obtained by three. Then, to it, add the tithi number obtained by counting the tithis in order from the bright fortnight. After that, divide that total by 7; if 3 remains, it is the "Ghabad" muhurta.

— Source PDF page 62 (book page 63) —

For example: on Thursday, 26 December 1957 (Samvat 2014, Pausha, bright fortnight, 5th), the Panchami tithi lasted until 3 hours 58 minutes in the afternoon. After that the sixth (Shashthi) began. On that day the Moon's nakshatra was "Shatabhisha" throughout the day. The Sun at that time was on the nakshatra Mula. Now, counting from the Sun's nakshatra Mula to the Moon's nakshatra Shatabhisha, it came to 6. Multiplied by three, it made 18. To this the number 6 of the sixth tithi following Panchami was added, making 24. Dividing this by 7, 3 remained. On that day, after 3:58 in the afternoon, the "Ghabad" muhurta began. In Delhi, almost all markets began to fall from that very time.

The Rise and Fall of the Tithi, and Rises and Falls in the Prices of Goods from the Bhadra of Heaven, the Netherworld and the Mortal World

Many traders, and astrologers too, generally believe that in the fortnight in which a tithi increases (vriddhi), there is a boom throughout that fortnight, around that tithi or from it onward, and that when a tithi is lost (kshaya), there is a slump in all things. But it has been seen many times that this opinion fails. In our understanding, the reason is this: if at that time the position of the commodity's sign and of its lord-planet, and the aspect-relationships formed with other planets, are boom-producing, and if the Sun and Moon are under the auspicious aspect of Jupiter or some other benefic planet, or are in conjunction with it, then when the tithi increases a boom occurs according to the length of time over which the above auspicious aspect-combinations hold their effect. Otherwise, even when the tithi increases, those that are with the cruel planets

— Source PDF page 63 (book page 64) —

aspect-combinations are in an unfavourable condition, and a slump comes about. The same should be understood when a tithi is lost (kshaya). For the difference between the Sun and the Moon is itself what is regarded as the "tithi."

In the same way, some people also estimate the boom or slump of trade goods from the Bhadra of heaven, the netherworld and the mortal world. They too sometimes take a heavy beating, a deep loss, when the market moves in a bad way against their judgement. In connection with Bhadra also, consideration should be given according to the rule stated above, because Bhadra is only half of a tithi.

Daily Booms and Slumps through Rahukala

The people of Kerala believe that every day, at some one time during the day, "Rahukala" (Rahu's period) also comes. The effect of this Rahukala is that even when the market is running in a full boom, a slump certainly comes in the market at that time.

Knowing Rahukala

Day	From	To
Sunday	4:30 p.m.	6:00 p.m.
Monday	7:30 a.m.	9:00 a.m.
Tuesday	3:00 p.m.	4:30 p.m.
Wednesday	12:00 noon	1:30 p.m.
Thursday	1:30 p.m.	3:00 p.m.
Friday	10:30 a.m.	12:00 noon
Saturday	9:00 a.m.	10:30 a.m.

[The book prints these times on a 24-hour clock, for example "16-30 to 18-0" for Sunday; they are shown here in 12-hour form.]

— Source PDF page 64 (book page 65) —

Basic Means of Knowing Booms and Slumps

Consideration by the Day of the Week:

Ravi (Sunday), Som (Monday), Mangal (Tuesday), Budh (Wednesday), Guru (Thursday), Shukra (Friday) and Shani (Saturday): these are the seven days of the week. Their names are based on the planets. In Jyotish-shastra, however, there is no mention of boom and slump through the days of the week. But the opinions of big forward-trading merchants and speculators have certainly been heard and seen, and they agree to a certain extent. I too have had the chance to test some of their opinions, and they proved correct. Whatever opinions have been collected, we are giving here in order.

(1) A commodity that is in boom on Monday will be in slump on Tuesday; and a commodity in which there is a slump on Monday gets a boom on Tuesday.

(2) If a sudden boom comes in a commodity on Monday, that boom lasts until Tuesday noon.

(3) If a slump comes in a commodity on Monday, and there is a slump on Tuesday too, then the slump continues until noon on Wednesday and a boom comes by Thursday; that is, the boom or slump that came on Monday lasts until Wednesday noon.

(4) Some speculators are also of the opinion that sometimes the boom or slump that began on Monday lasts until Thursday.

(5) If there is a slump in a commodity on Tuesday, a boom comes in that commodity after 12 o'clock noon on Wednesday.

— Source PDF page 65 (book page 66) —

(6) If a commodity is in boom on Tuesday, that boom lasts until 12 o'clock on Wednesday. Afterwards a slump comes.

(7) If a boom comes in a commodity on Tuesday, and there is a boom on Wednesday too, then in that commodity there is a boom once on Thursday, and later a slump comes.

(8) A boom or slump that began on Tuesday lasts until 1 o'clock in the afternoon on Thursday.

(9) Sometimes a boom or slump that began on Tuesday lasts until Friday.

(10) If a boom or slump begins in a commodity on Wednesday, that boom or slump will end by 12 o'clock on Friday.

(11) If a boom or slump of a commodity starts on Friday, that boom or slump lasts until Saturday.

(12) If a commodity goes into boom on Thursday, it will go into slump after noon on Friday.

(13) If the slump of a commodity ends on Thursday and a boom starts, a good boom comes in that commodity.

(14) The boom and slump of Friday are unstable. If a boom or slump comes in a commodity on Friday, it ends very soon.

(15) If a boom comes on Friday, a slump comes on Saturday; and if a slump comes on Friday, a boom comes on Saturday.

(16) Sometimes a boom, running only very slightly, from Friday

— Source PDF page 66 (book page 67) —

or slump ends on Monday.

(17) If a boom runs in a commodity on Saturday, that boom lasts for a week, and if a slump runs, that slump stays for a week.

(18) A boom or slump that started on Saturday keeps running until 12 o'clock noon on Tuesday.

(19) Whatever highest-of-high or lowest-of-low rate a commodity makes on Saturday, on Monday one of the two, that is, either a highest-of-high or a lowest-of-low rate, will certainly come.

(20) If the cycle (vakra) of trade in a commodity is of boom, then higher rates than Saturday's rate will come in that commodity on Monday; and if the cycle is of slump, then rates lower than Saturday's rate will form in that commodity on Monday.

(21) A boom that started on Saturday keeps running until Tuesday, and if it goes still further, it ends on Saturday itself.

(22) Sometimes a boom or slump ends on the very same day of the week from which it rose.

(23) A boom will certainly come on Saturday in a commodity in which a boom came on Thursday and a slump set in after 12 o'clock on Friday.

Note: If a one-sided line of boom or slump is running in a commodity, it cannot be said with certainty on which day the reaction of slump within the cycle of boom, or of boom within the cycle of slump, will form.

— Source PDF page 67 (book page 68) —

The weekdays are reckoned as seven. Taken together, these seven days make one week, and 30 days make one month. Therefore in one month there are 4 weeks and 2 days; that is, each of the seven weekdays certainly comes 4 times in a month, and because two days are

left over, any two weekdays (in a month in which there is no rise or fall in the tithis) come five times. Thus, in any month, some weekday or other comes five times. What effects they have is given here:

(1) If five Sundays fall in a month, then in that month, even though it is the rainy season, there will be no rain, and if rain does fall, it will be quite ordinary. Mutual differences among the public and in the government increase. The shortfall of rain has a bad effect on agricultural production, and the public suffers more from disease, unrest, fear and the like.

(2) In a month in which five Mondays fall, the rains are excellent, agricultural production is also good, and there is an increase of grain. In commercial goods, along with good rises and falls, the trend of slump remains strong, and it is a time that brings about a slump.

(3) In any month in which there are five Tuesdays, there is agitation among the public, mutual quarrelling and unrest, and loss through blood disorders; smallpox among children, and blood disorders and the disease of pradara (abnormal vaginal discharge) among women spread more. Red-coloured things and grain are high in price.

(4) In a month in which there are five Wednesdays, rain is very good in some places and, in others, as per ordinary need. The prices of grain and the like remain even, with neither a good boom nor a good slump. The time is auspicious. Peace and happiness increase among the public.

— Source PDF page 68 (book page 69) —

(5) In a month in which five Thursdays fall, there is political strife and unrest in the Western countries. In commercial goods, along with rises and falls, the trend is only of slump. Only in juice-type substances do boom rates run.

(6) In a month in which there are five Fridays, the rains are good. Feelings of friendship awaken more among the public, and happiness and peace increase. In commercial goods too, after rises and falls the trend remains only of slump, and a slump also has its effect in juice-type substances.

(7) If a month has five Saturdays, then in that month there is an effect of lawlessness, unrest and the like among the public, and the people are afraid of disease, theft and the like. In every commodity the boom exerts its strong effect, and agriculture suffers damage from some cause or other.

Consideration through the Tithis (Lunar Days):

In one month two fortnights (pakshas) are reckoned: the dark fortnight (krishna paksha) and the bright fortnight (shukla paksha). In each fortnight there are 15 tithis. Sometimes there is also a gain (vriddhi) or a loss (kshaya) of tithis. In this way sometimes a fortnight has 16 days and sometimes only 14 or 13 days remain.

The tithis are as follows: 1. Pratipada, 2. Dwitiya, 3. Tritiya, 4. Chaturthi, 5. Panchami, 6. Shashthi, 7. Saptami, 8. Ashtami, 9. Navami, 10. Dashami, 11. Ekadashi, 12. Dwadashi, 13. Trayodashi, 14. Chaturdashi, 15. in the dark fortnight Amavasya (new moon) and in the bright fortnight Purnima (full moon). They are estimated from the motion of the Moon. The gain or loss and so on of these tithis also has an effect on commercial goods.

— Source PDF page 69 (book page 70) —

In the dark fortnight, if a tithi is lost, then before or after it a slump comes in cotton and a boom in silver. But the slump in cotton is unstable. The prices of ghee and the like also tend downward. If a tithi increases, a slump comes in cotton, silver and the like, and there is an unstable boom in ghee, grain and the like. If the fortnight is of 14 days, an ordinary boom will come in silver, and if the fortnight is of 13 days, the prices of grain and the like will be high and there will be a special boom in the prices of gold and silver. And if the fortnight is of 16 days, there will be a slump in commercial goods.

What effect arises from the loss or gain of which tithi of the dark fortnight, or from its falling on which weekday, we give below:

(1) If Pratipada of the dark fortnight falls on a Wednesday, a slump comes in silver, cotton and the like; and if Dwitiya also falls on a Wednesday, cotton, silver and the like remain in a slump. But if Dwitiya falls on a Sunday, an ordinary boom, that is, a boom of 4 to 5 per cent, comes in cotton and the like.

(2) If the sixth (Shashthi) of the dark fortnight is repeated, that is, there are two Shashthis, a boom comes in the prices of cotton and the like; and if the Shashthi is lost, a boom comes as well. If the Shashthi is of two ghadis (a ghadi is about 24 minutes) up to five ghadis, a slump comes; and if it is less than two ghadis, still understand a slump, that is, a slump of up to 10 per cent. And if Shashthi falls on a Sunday, ghee, grain and the like, and the prices of cotton, will show a boom.

(3) If a boom stays in cotton and the like from the Saptami (seventh) to the Ekadashi (eleventh) of the dark fortnight, then from Dwadashi (twelfth) to Amavasya the trend is of slump.

(4) If the Dashami (tenth) is lost in the dark fortnight, a boom comes in ghee, cotton and the like; and if Dashami is repeated, a slump comes in cotton and ghee and the like.

— Source PDF page 70 (book page 71) —

And if Dashami falls on a Thursday or Sunday, a boom comes in grain, ghee and the like and a slump in cotton; but if it falls on a Tuesday, a boom comes in jaggery, khand and the like.

(5) In the dark fortnight, if any tithi from Dashami to Amavasya is lost, a boom comes in cotton and the like; but if Ekadashi, Dwadashi and Trayodashi are lost, only an ordinary boom comes; and if any tithi increases, a slump comes.

(6) If the Chaturdashi (fourteenth) of the dark fortnight falls on a Sunday, a boom comes in wheat, gram, barley and the like. And if it falls on a Sunday for only a short time (a few ghati-pal), and Amavasya arrives on that same day, a boom comes in cotton and the like; but if the Amavasya grows and runs on to Monday, understand a slump in cotton and the like. This slump goes up to 20 to 25 per cent. If Chaturdashi is longer than the ghati-pal of Amavasya, a boom comes in cotton and the like, and if shorter, a slump comes in cotton and the like.

In the dark fortnight, if there is a boom in cotton on Chaturdashi and Amavasya, a slump will come after ten days; and if there is a slump, a boom comes after ten days; and if Chaturdashi and Amavasya become one (coincide), understand a boom in cotton and the like.

(7) In the dark fortnight, if Amavasya is lost, a boom occurs in ghee, cotton and the like; and if Amavasya is repeated, that is, two fall, a slump comes in cotton, silver, ghee and the like.

If Amavasya is of up to 10 ghatis, the boom in cotton and the like remains in the bright fortnight; and if Amavasya is more than 10 ghatis and less than 30 ghatis, and less than the ghatis of Pratipada, a slump remains in cotton and the like, or

— Source PDF page 71 (book page 72) —

if Amavasya falls on a Sunday or Tuesday, even then a slump comes in cotton, ghee, silver and the like; but if Amavasya falls on a Tuesday, an ordinary boom comes in wheat, gram, barley and the like. But if Amavasya falls on a Wednesday, a slump comes in these commodities. If Amavasya is on a Monday, a slump comes in cotton, silver, ghee and other white commodities; and if on Sunday both Trayodashi and Chaturdashi occur and Amavasya is on a Monday, then a slump of 30 to 35 per cent comes in cotton alone. If Amavasya on a Monday has the Moon in Cancer, a slump comes in gold and silver as well. If Amavasya falls on a Thursday, an ordinary slump comes in cotton and the like; and if Amavasya falls on a Friday, an ordinary boom comes in silver, grain and the like, and in cotton the trend, with rises and falls, moves toward a boom. And if Amavasya falls on a Saturday, there is a future profit from stocking wheat, gram, barley, green gram and the like, because the trend will turn to boom later.

(8) If Pratipada of the bright fortnight falls on a Monday, and the sighting of the Moon is also on that very day, a slump comes in cotton and the like. If it falls on a Tuesday, and the Moon is not sighted on that same day, a boom occurs in cotton, silver and the like. If it falls on a Wednesday, a slump occurs in cotton, silver, ghee and the like. If it falls on a Thursday, there is a slump in gold, silver and the like and a boom in cotton and the like. And if it falls on a Friday, and the Moon is also sighted on that same day, a boom comes in cotton and the like; and if Pratipada falls on a Saturday and Dashami on a Sunday, a boom comes in wheat, gram and the like; and if on a Saturday the nakshatra is Rohini and on this same day, that is on the Saturday itself, the full moon falls, a slump comes in cotton and the like.

— Source PDF page 72 (book page 73) —

If the Pratipada of the bright fortnight falls on a Saturday, and from it the Dwitiya of the bright fortnight of the next month falls on a Friday, and the Tritiya of the bright fortnight of the month after that on a Thursday, and in this way, in each following month, the Chaturthi, Panchami, Shashthi and Saptami of the bright fortnight fall, in order, on Wednesday, Tuesday, Monday and Sunday, then a boom will keep coming in cotton and the like.

If the nakshatra on the Pratipada of the bright fortnight is Chitra, a slump comes in cotton, silver and the like. If the ghati-pal (duration) of the Pratipada's nakshatra is greater than the ghati-pal of the nakshatra of Purnima, a slump comes in cotton and the like; and if it is less, a boom comes.

(9) If the Dwitiya of the bright fortnight falls on a Sunday, Tuesday or Saturday, a boom comes in cotton and the like; and if the sighting of the Moon also takes place on that same day, an even greater boom comes. And if it falls on a Monday, Wednesday, Thursday or Friday, a slump comes in cotton, silver and the like; and if the Moon is also sighted on that same day, the slump comes within 4 days.

(10) In the bright fortnight, if the Tritiya or the Chaturthi falls on a Monday, Tuesday or Saturday, a boom occurs in cotton, silver and the like.

(11) If the Panchami of the bright fortnight falls on a Tuesday, a boom will come in cotton, silver and the like within 10 days.

(12) If the Shashthi of the bright fortnight falls on a Saturday, the prices of cotton, rice, raw cotton (kapas), ghee, thread, grain and the like are high. If it falls on a Monday, Tuesday or Wednesday, a boom comes in mustard, wheat, gram, jaggery, linseed and the like. If it falls on a Thursday or Friday, within two months

— Source PDF page 73 (book page 74) —

a boom will come in all commodities; and if it falls on a Saturday, a boom comes in wheat, jaggery, mustard, linseed, cotton, silver and the like. If on the Shashthi of the bright fortnight a slump comes in the prices of gold and silver, this slump lasts for 15 days.

(13) If the Saptami of the bright fortnight falls on a Monday and the Trayodashi on a Saturday, a boom comes in all grains; and if this combination falls in the rainy season, a shortfall of rain will certainly come; and if the Saptami falls on a Thursday, a boom will come in silver, cotton, ghee and white commodities from seven days beforehand. This boom lasts until Dwadashi.

(14) If the Ashtami of the bright fortnight falls on a Monday, Wednesday, Thursday or Friday, there are rises and falls in grain and the like; and if both Ashtami and Navami fall on a Thursday and the Dashami on a Friday, a boom of 15 to 20 per cent comes in cotton and a boom of 2 to 3 per cent in silver.

(15) If the Navami of the bright fortnight falls on a Sunday, Tuesday or Saturday, the prices of grain and the like are high.

(16) If the Dashami of the bright fortnight falls on a Saturday or Sunday, a boom comes in cotton and the like; and if the nakshatra Mula falls on that same day, understand it as a good boom. If it falls on a Thursday and on that same day there are the nakshatra Dhanishtha and the Dhruva yoga, a sudden boom of up to 50 to 60 per cent comes in cotton.

(17) If the Ekadashi of the bright fortnight falls on a Monday and on that same day there is the Vaidhriti or Vyatipata yoga, a slump of 5 to 7 per cent comes in cotton. If it falls on a Friday, a slump comes in cotton, silver and the like.

— Source PDF page 74 (book page 75) —

(18) If the Dwadashi of the bright fortnight is repeated, that is, there are two, a boom of up to 25 to 30 per cent comes in cotton; and if the Dwitiya or the Dwadashi of the bright fortnight falls on a Friday, a slump comes in cotton, silver and the like.

(19) If the Trayodashi of the bright fortnight is lost, a boom comes in cotton, silver and the like.

(20) If the ghati-pal (duration) of Purnima is greater than the ghati-pal of the bright Chaturdashi, a slump comes in silver, cotton, ghee and the like; and if it is less, a boom comes in silver, cotton, ghee and the like.

(21) If the Purnima of the bright fortnight is of less than 10 ghadis or more than 30 ghadis, a boom comes in cotton, silver and the like. If it falls on a Sunday, there is a boom in wheat, jaggery and the like, a slump in linseed and the like, and rises and falls in cotton and the like. If it is a Monday, and Saturn is in retrograde motion, and in this same fortnight some one tithi has been lost, there is certainly a boom in cotton, silver, ghee and the like; and if it is a Monday but on that day the Vyatipata or Vaidhriti yoga falls, a slump comes in cotton, silver and the like. If it falls on a Tuesday, a slump comes in all commodities, but understand

a boom in cotton and the like. If it falls on a Wednesday, a boom comes in linseed, mustard and the like, and a slump in cotton and the like. If it falls on a Thursday, a boom comes in oils and the like; and if it falls on a Friday or Saturday, a slump comes in cotton and the like, and a boom in shares, silver and the like.

If on the Purnima of the bright fortnight there is any one of the nakshatras Shravana, Dhanishtha, Punarvasu or Swati, a boom comes in jaggery, khand, ghee, oils and the like. The Purnima of the bright fortnight and the Amavasya of the dark fortnight, both

— Source PDF page 75 (book page 76) —

fall on a Monday, and in the time between these two Saturn is moving in a retrograde condition, then the boom remains in cotton and similar commodities. If the ghati-pal of Amavasya is less than that of Purnima, a slump comes in cotton and the like; and if it is more, a boom comes in cotton, oil, khand, jaggery and the like; and if the Purnima is of fewer ghati-pal than the nakshatra of that day, a slump comes in grain and the like.

(22) On the Purnima of the bright fortnight of the month of Ashadha, at the time of sunset, if the wind of the eastern direction blows, there will be good rain. If the wind of the south-east (Agni) corner blows, grain and the like will be high in price, and the public will be afflicted by disease and many other causes. If the wind of the south blows, a boom comes in coconut, betel nut, dates and fruits, and rainfall is low. If the wind of the south-west (Nairritya) corner blows, rainfall will be moderate, grain production will be ordinary, and a slump comes in grain and the like. If the west wind blows, rainfall will be heavy; sorghum, pearl millet, green gram, moth, maize, urad and the like will be low in price. If the wind of the north-west (Vayavya) corner blows, rainfall will be low and, because needs are not met, grain production will be moderate and the prices of grain and the like will be high; and if the wind of the north blows, the earth will be full of grain. If the wind of the north-east (Ishana) corner blows, rainfall will be heavy, the prices of grain and the like will remain low, and the public will be joyful.

Consideration through the Month-Omens (Masa-Shakun):

(1) The rain of the month of Chaitra is not good. If it rains in the month of Chaitra, there will be no rain in the month of Shravan; for this reason grain and the like become high in price. If in the bright fortnight of Chaitra, on the fifth, rain

— Source PDF page 76 (book page 77) —

falls, even then there will be no rain in the month of Shravan. Grain and the like of all kinds become high in price. And if, on this same fifth, the nakshatra is Rohini, on the seventh Ardra, on the ninth Pushya, and on Purnima Swati, the rain is extremely excellent.

(2) In the month of Vaishakh, if the seventh of the dark fortnight falls on a Saturday and the planet Mars is on any one of the nakshatras Bharani, Krittika, Rohini or Mrigashira, then peepal (long pepper), coconut, copper, bell-metal, betel nut, red cloth and the like become high in price. If the thirteenth of the dark fortnight falls on a Tuesday or Saturday, a boom comes in jaggery, khand, nagarpan (probably betel leaf), rock salt, red sandalwood and the like; and if the nakshatra on Amavasya is Revati, the year will be excellent. If the nakshatra is Rohini, the public will suffer and the prices of grain and the like will be high. If the nakshatra is Ashwini, the year (samvat) will be even, and the prices of all commodities will stay in rises and falls. If the nakshatra is Bharani, the public will be afflicted by fear, disease and the like; and if the nakshatra is Krittika, there will be little rain and the possibility of

war between two countries will arise.

In the month of Vaishakh, if on the third of the bright fortnight the wind blows from the east, the rain will be excellent; if a north wind blows, the rain will also be excellent; if the wind of the south or south-west blows, there will be no rain; and if a west wind blows, the rain will be good but the production of grain and the like will be low.

(3) In the month of Jyeshtha, if the first (Pratipada) of the dark fortnight falls on a Sunday, many events such as fires occur; if it is a Monday,

the rain from the month of Shravan to the month of Ashwin is good; if it is a Tuesday, the rain is excellent; if it is a Wednesday, frost and the like cause damage to agriculture; if it is a Thursday or Friday, the rain is good; and if it is a Saturday, understand that there is a full possibility of famine, and the prices of grain and the like will be high.

(4) In the month of Shravan, if the Pratipada of the dark fortnight falls on a Thursday, a boom comes in urad, sesame, oil and the like. If on the Ekadashi of the dark fortnight the nakshatra is Rohini, the prices of grain and the like rise or fall according to the ghati-pal (duration), the year (samvat) is excellent and the rain is good; if the nakshatra is Krittika, the year is moderate; and if the nakshatra is Mrigashira, the rain is low and the possibility of famine should be understood; and if there is rain on Amavasya, all living beings are happy.

If there is no rain at sunset on the Saptami of the bright fortnight of Shravan, some omen-readers hold the view that a catastrophe will come soon. If on the morning of the Ashtami the Sun is covered by clouds, the rain is excellent. If the Dashami falls on a Saturday and the Sun is in the sign Leo, grain production is good. If on Purnima the nakshatra is Shravana and it rains in that nakshatra, the production of grain and the like is good; and if on the day of Purnima the Moon rises in a sky covered by clouds, the rain is most excellent and the public is happy.

(5) If the Amavasya of the dark fortnight of Bhadrapada falls on a Sunday, barley, wheat, gram and fodder grass for animals become high in price from that very month; and if the Panchami of the dark fortnight of Bhadrapada falls on a Thursday, Saturday or Sunday

falls, and that day the nakshatra is Rohini, then profit can be made, only in the last days of the month, by stocking wheat, peas, barley, gram and the like.

If the Ashtami of the bright fortnight of Bhadrapada falls on a Monday or Sunday and on that same day the nakshatra is also Mula, a boom comes in milk, curd, cow, ox, hemp (san), thread, cloth, binola (cottonseed), gold, silver, white cloth, ghee, jaggery, sugar and the like.

(6) If on the Dwadashi of the dark fortnight of the month of Ashwin the sky is covered with clouds, there will be no rain in the month of Kartik and a boom comes in wheat, gram, barley and the like; and if in this fortnight some tithi increases, a boom comes in grain in the month of Agahan (Margashirsha).

(7) In the month of Kartik, if on the Pratipada of the dark fortnight or the Pratipada of the bright fortnight a ring (halo) is seen around the Sun on all sides, a boom comes in sesame, oils and the like.

(8) In the month of Margashirsha, if on the Chaturthi of the dark fortnight the nakshatra is Magha and the sky is covered with clouds or it rains, all grains become slack in price, and in the month of Ashadh the rain is good. If on the Panchami the sky is covered with clouds, there is special rain, and even in the cold season excess rain damages agriculture, because of which grain and the like become high in price; and if on the Shashthi the nakshatra is Purva Phalguni, then in the bright fortnight of the month of Ashadh the rain for three days and nights is good and the production of food grain and the like is also good.

(9) If the Panchami of the dark fortnight of the month of Pausha falls on a Tuesday and there is also rain on that day, the production of food grain and the like in that year will be good

— Source PDF page 79 (book page 80) —

and a slump also comes in grain and the like, but a boom comes in red-coloured things and in linseed, ghee, madder (majith) and the like. If the Trayodashi of the dark fortnight falls on a Tuesday, Friday or Saturday, the rain on those days is good and good profit comes from stocking wheat and the like, because the boom in wheat and the like comes in this very month. If the nakshatra on Amavasya is Jyeshtha, a boom soon comes in animal fodder and grain and the like; and if the nakshatra is Mula, a slump comes in all grains.

If on the Saptami of the bright fortnight of the month of Pausha the nakshatra is Revati, on the Ashtami Ashwini and on the Navami Bharani, and the sky is covered with clouds that thunder, and lightning flashes, then in that very year the rain will be good, the prices of grain and the like will be low, production will be good, and the public will be happy.

(10) In the month of Magha, if on the Saptami of the dark fortnight, on the dark-fortnight Dwitiya of the months of Phalgun and Chaitra, and on the Pratipada of the dark fortnight of the month of Vaishakh, the sky is covered with clouds, lightning flashes, and it rains, all grains and the like become high in price.

In the month of Magha, if it rains on the Pratipada of the bright fortnight and the wind blows, the price of ghee, oils and the like is slack; if there is no cloud on the Tritiya, a boom comes in wheat and the like; if on the Chaturthi there is thunder of clouds, rain and flashing lightning, a slump comes in betel leaf (paan), coconut and the like; and if the Navami falls on a Sunday and the nakshatra is Pushya, a boom comes in grain and the like.

(11) On the Amavasya of the dark fortnight of the month of Phalgun, if the clouds

— Source PDF page 80 (book page 81) —

thunder, the price of grain (galla) and the like goes high and the public suffers.

If it rains on the Saptami or Trayodashi of the bright fortnight of the month of Phalgun, a boom comes in all grains and the like; and if the Purnima falls on a Sunday or Tuesday, grain and the like are also high.

Note: The omens of the month of Ashadh are not given in this section, because, according to the omen-readers, whatever the situation is on the Purnima of Ashadh (which we gave under number 22 in "Consideration through the Tithis"), the same situation on any day of the month of Ashadh will have the same effect as the situation on the day of Purnima.

Consideration through the King of the Year:

At the beginning of Chaitra Sudi (the bright fortnight), the weekday that falls is the king of the year. According to the regional opinion of Gujarat, the weekday that falls on the

Amavasya of the dark fortnight (badi) of Chaitra is considered the king.

If the Pratipada of the bright fortnight of Chaitra falls on a Sunday, the king of the year will be the Sun, and the rain will be low, there will be distress among animals, the production of grain and fruits will be low, the troubles from thieves and fire will be greater, the public will suffer from disease and the like, and a slump remains in grain and the like.

If the king of the year is the Moon, auspicious and festive works take place, the rain is timely, the production of wealth and grain remains good, the public gets happiness, the ruler of the state rises in fortune, and the prices of grain and the like remain low.

If the king of the year is Mars, outbreaks of fire are greater, the public suffers greater loss and remains in sorrow, there is fear of thieves, political strife,

— Source PDF page 81 (book page 82) —

agriculture is damaged by hail and the like, there is a boom in grain and the like, in some places there is famine as well, and there is a lack of rain.

If the king of the year is Mercury, the rain is excellent. The production of grain is good, and living creatures find happiness. There is an increase of cattle such as cows and oxen. In juice-type substances there is a boom at the beginning of the year and a slump afterwards; and the public is rid of disease and illness.

If the king of the year is Jupiter, a slump remains in all commodities. The rain is also good. There is an increase of cattle as well. Festivals and the like increase. Jupiter being the king is auspicious.

If the king of the year is Venus, the rain is good, the production of grain is very good, there is an increase of fodder (food for animals), fruit grows more on trees, living creatures are happy, and the price of grain remains low.

If the king of the year is Saturn, the public remains in sorrow from many kinds of troubles, there is a lack of rain, grain production is low, agriculture is damaged by hail and the like, in some places the possibility of famine also remains, and a boom comes in black-coloured things. The possibility of political strife or political change remains.

Consideration through the Minister of the Year:

The lord of the weekday on which the Sankranti of Aries (Mesha) falls is the minister of the year.

If the minister of the year is the Sun, the public fears government, disease, thieves and the like, the production of grain is excellent, and a slump also comes in food items.

— Source PDF page 82 (book page 83) —

If the minister of the year is the Moon, the rain is good, the production of grass and white things is greater, and a slump remains in cotton, raw cotton, silver, wool, sesame and white cloth. The public gets happiness.

If the minister of the year is Mars, the menace of thieves grows, there is a lack of rain, the production of grain is low, and there is a shortage of milk.

If the minister of the year is Mercury, the rain is excellent, the production of grain and the like is good, and a slump remains in grain and grocery goods. Luxury and pleasure-seeking increases among women, and the public remains happy.

If the minister of the year is Jupiter, the rain is excellent, the production of grain is good, trees flower and bear fruit more, and religious works such as sacrifices increase. A slump remains in dry fruit, fruit, grain and the like. The public remains happy and joyful. The year is excellent.

If the minister of the year is Venus, the calamities to crops (iti-dosha) increase. The fear of locusts, rats and wild animals also increases. The rain is good, the price of grain remains low, and the production of coconut, dates, walnut, dry fruit and the like remains good.

If the minister of the year is Saturn, there is a shortage of rain. Unruliness increases among the people, disturbances are greater, the fear of famine remains, and a boom remains in the price of grain.

Note: If the planet that is king is friendly with the planet that is minister, then when both are benefic planets a slump comes in the year (samvatsar); when they are cruel planets a boom comes. Even when the cruel planets are in friendship among the authorities, no special slump comes. If one is a benefic planet and the other a cruel planet, the prices remain even.

— Source PDF page 83 (book page 84) —

Consideration through the Sasyesh (Lord of Crops):

The weekday on which the Sankranti of Cancer (Karka) falls gives the Sasyesh.

In the year whose Sasyesh is the Sun, there is a lack of rain, grain production is low, grain prices are high, the public is frightened by disease and thieves, and the possibility of war between two countries remains.

In the year whose Sasyesh is the Moon, the rain is good, agricultural production is good, milk increases, the honour and standing of the twice-born (Brahmins) remain good, and the public is happy.

If the Sasyesh of the year is Mars, there is a lack of rain. Farming of wheat, rice and the like suffers damage. Disease increases among animals, and the prices of grain remain high.

If the Sasyesh of the year is Mercury, the rain is good, agricultural production remains excellent, the prices of grain and the like remain low, the public lives in happiness and peace, and religious activity increases.

If the Sasyesh of the year is Jupiter, the rain is excellent and timely; grain, ghee and milk increase, and a slump remains in all commodities. Happiness and peace remain among the public in good measure, and there is an abundance of religious works and festivals.

If the Sasyesh of the year is Venus, the rain is good and the year remains auspicious. The production of rice, sugarcane, paddy and the like is good, there are more fruits and flowers on the trees, and the public remains happy.

If the Sasyesh of the year is Saturn, there is a lack of rain. Because of damage to the farming of wheat, barley, gram and the like, production is low, and the public

— Source PDF page 84 (book page 85) —

suffers from government and from diseases and the like, disturbances increase, and the influence of wicked people is greater.

Note: "Sasya" means grain, and "dhanya" also means grain. The grain produced by the crop of Vaishakh and the like (the spring harvest), such as wheat, barley and gram, is named "sasya." The grain produced by the crop of Kartik (the autumn harvest), such as sorghum, pearl millet, green gram, urad, moth and the like, is named "dhanya." In this way they have been divided into two parts. The results of the Sasyesh have been stated above. Now we will state the results of the Dhanyesh.

Consideration through the Dhanyesh (Lord of Autumn Grain):

The lord of the weekday on which the Sankranti of Sagittarius (Dhanu) falls is called the Dhanyesh.

If the Dhanyesh of the year is the Sun, the production of green gram, moth, sorghum and pearl millet is low, and a boom remains in them. The public remains afflicted by fever and the like. Mutual dishonesty between two countries increases.

If the Dhanyesh of the year is the Moon, the production of wheat, mustard and the like is excellent. Cow's milk increases. The public lives in happiness and peace. There is no possibility of any kind of disturbance.

If the Dhanyesh of the year is Mars, a boom comes in rice, sugarcane, ghee, oil and the like, and in some places there is a lack of rain.

If the Dhanyesh of the year is Mercury, the rain is good and agricultural production is also good. Grain prices remain low, but there is a shortage of rain in Punjab and Sindh.

— Source PDF page 85 (book page 86) —

If the Dhanyesh of the year is Jupiter, the rain is timely; the production of wheat, rice and the like remains good, the twice-born (Brahmins) remain devoted to performing sacrifices, and welfare increases among the public.

If the Dhanyesh of the year is Venus, the rain remains ordinary, the production of green gram, moth, pearl millet and sorghum is low, cow's milk decreases, and grain prices remain low.

If the Dhanyesh of the year is Saturn, there is a lack of rain, the production of grains is low, greater economy in the government's funds (dravya) is practised, and the public remains fearful of disease and the like.

Consideration through the Meghesh (Lord of the Clouds):

The lord of the weekday on which the nakshatra Ardra falls is the "Meghesh" of that year.

[Translator's note: the book says "the weekday of the nakshatra Ardra"; the usual meaning, in this tradition, is the weekday on which the Sun enters Ardra. The book does not say so on this page.]

If the Meghesh of the year is the Sun, the production of barley, gram, sugarcane, rice and the like remains good, and there is happiness and peace among the public.

If the Meghesh of the year is the Moon, the quantity of milk in cattle such as cows, buffaloes and goats increases, fruits and flowers on trees increase, the production of grain remains good, and there is happiness and peace among the public.

If the Meghesh of the year is Mars, rainfall remains in excess in some places and deficient in others, and feelings of an unrighteous and wicked nature increase among the public.

If the Meghesh of the year is Mercury, the rain is greater, the production of wheat and barley is greater, and many kinds of festivals increase.

If the Meghesh of the year is Jupiter, the rain is excellent, agricultural production remains good, religious inclination among the public increases, and they live well in happiness and peace.

— Source PDF page 86 (book page 87) —

If the Meghesh of the year is Venus, the rain is good, production remains excellent, democratic works increase in the government, and the public is happy.

If the Meghesh of the year is Saturn, there is a lack of rain in some places, there is turmoil in the political situation, and many kinds of disturbances keep occurring among the public.

Consideration through the Rasesh (Lord of Juices):

The lord of the weekday on which the Sankranti of Libra (Tula) falls is the Rasesh.

If the Rasesh of the year is the Sun, there is a lack of rain, juice-type substances, cloth, ghee, milk and oil run short, a boom comes in mustard and the like, and democratic works are absent on the part of the government.

If the Rasesh of the year is the Moon, the rain is good, the production of juices, astringent substances and grain remains excellent, weddings and other auspicious festivals increase, and women's wishes are greater.

If the Rasesh of the year is Mars, there is a lack of rain, a boom comes in juices, astringent substances and the like, and the ruling class keeps a harsh attitude toward the public.

If the Rasesh of the year is Mercury, the rain is good, grain is produced well, and the public remains happy. Those of good conduct remain joyful.

If the Rasesh of the year is Jupiter, the rain is excellent, the government and the public are well provided with wealth, grain, vehicles and the like, the production of grass remains good, and respect for learned people grows.

If the Rasesh of the year is Venus, the rain is good, there is plenty of food, the public remains eager to perform and officiate at sacrifices, to serve, to hold festivals and so on, the government's policy remains firm on truthfulness, and peace and order remain in the country.

If the Rasesh of the year is Saturn, there is a lack of rain, cows, oxen,

— Source PDF page 87 (book page 88) —

horses, elephants, camels, donkeys and similar animals perish, disease and the like increase among the public, and unrest reigns.

Consideration through the Nirasesh (Lord of Dry or Juiceless Substances):

The lord of the weekday on which the Sankranti of Capricorn (Makara) falls is the "Nirasesh" of the year.

If the Nirasesh of the year is the Sun, copper, red sandalwood, ruby and pearls and the like increase.

If the Nirasesh of the year is the Moon, a slump remains in silver, white cloth and other white things.

If the Nirasesh of the year is Mars, a slump comes in jaggery, red sandalwood, red cloth and the like.

If the Nirasesh of the year is Mercury, a slump remains in pictures, varied cloth, conch, sandalwood and the like.

If the Nirasesh of the year is Jupiter, the prices of turmeric, yellow cloth, yellow-coloured things, gold and the like remain slack. Mutual love increases among the public and happiness and peace remain.

If the Nirasesh of the year is Venus, the prices of gold, cloth, camphor, agar (aloeswood), tagar, fragrant substances and pearls and the like remain slack.

If the Nirasesh of the year is Saturn, the prices of black cloth, black urad, iron and black-coloured things remain slack.

Consideration through the Phalesh (Lord of Fruit):

The lord of the weekday on which the Sankranti of Pisces (Meena) falls is called the "Phalesh" of the year.

If the Phalesh of the year is the Sun, the rain is good, trees well

— Source PDF page 88 (book page 89) —

flower and fruit, and joy increases among the public.

If the Phalesh of the year is the Moon, there is more fruit on trees and more flowers and fruit on creepers. Fondness for justice increases in the government. Means of livelihood are available to the learned.

If the Phalesh of the year is Mars, there is a shortage of fruit and flowers on trees, creepers and plants, there is political strife, and disease and hatred increase among the public.

If the Phalesh of the year is Mercury, the rain is excellent, grass, lotus and fruits and flowers increase more, and the public passes its time in happiness.

If the Phalesh of the year is Jupiter, the rain remains excellent, the production of crops, trees and creepers remains good, religious feeling and the tendency toward truthful action increase among the public, and they remain free of every kind of fear.

If the Phalesh of the year is Venus, there is an increase of tender grass, fruits and flowers, there is an abundance of articles of enjoyment and luxury, and the public is happy.

If the Phalesh of the year is Saturn, there is a lack of rain, the production of grass and fodder is low, there is a shortage of fruit and flowers, and in some places there is an outbreak of hail. The public has to bear the suffering of disease and the like.

Consideration through the Dhanesh (Lord of Wealth):

The lord of the weekday on which the Sankranti of Virgo (Kanya) falls is the "Dhanesh" of the year.

If the Dhanesh of the year is the Sun, there is profit in the trade of vehicles and animals such as horses, camels and elephants.

If the Dhanesh of the year is the Moon, profit can be made at the right time by stocking cloth, rice, fragrant substances, oil, ghee and the like, and happiness and peace remain among the public.

— Source PDF page 89 (book page 90) —

If the Dhanesh of the year is Mars, the government remains anxious, now a boom and now more of a slump runs, and the farming of wheat is damaged. Profit can be made in the month of Margashirsha by selling stocked goods.

If the Dhanesh of the year is Mercury, agricultural production remains good, and profit can be made in future (at the proper time) by stocking all commodities. Interest grows among the learned in displaying their learning, and religious activities awaken among the public.

If the Dhanesh of the year is Jupiter, there is an increase of grain, fruit and flowers in crops, trees and creepers; wealth and grain increase among the public; and truthfulness and non-violence (ahimsa) are greater in feeling.

If the Dhanesh of the year is Venus, the public is wealthy, the work of government goes on in good order, and an empire of happiness and joy remains.

If the Dhanesh of the year is Saturn, the business situation remains shaky. There is disrespect to the twice-born (Brahmins), thrift in wealth, and the means of livelihood of men disappear; there is complete laxity in government.

Consideration through the Durgesh (Lord of the Fort):

The weekday on which the Sankranti of Leo (Simha) falls gives the "Durgesh."

If the Durgesh of the year is the Sun, fondness for justice increases in the government, the royal door remains open to all, and excellent works increase.

If the Durgesh of the year is the Moon, the production of sugarcane remains good, cowherds gain wealth, the public remains happy, and there is competition among the learned to show off their respective learning.

— Source PDF page 90 (book page 91) —

If the Durgesh of the year is Mars, the production of fruit is low, the public remains in sorrow from many kinds of troubles, the trading class feels fear in doing business, and the condition of commercial goods is subject to great upheaval.

If the Durgesh of the year is Mercury, the public has sometimes distress and sometimes happiness, the troubles of thieves and the like are greater, and travellers have to face many dangers on the road, such as highway robbery.

If the Durgesh of the year is Jupiter, popularity and love of justice are greater in the government, the public receives every kind of happiness, and there is not the slightest possibility of political strife or disturbance.

If the Durgesh of the year is Venus, the public experiences happiness and joy, there are festivals in every house, profit from trade is excellent, and there is no mutual discord.

If the Durgesh of the year is Saturn, there is an abundance of many kinds of disturbances, feelings of attachment and hatred remain stronger among the public, the feeling of a wicked nature grows and wicked deeds are greater, and agriculture is damaged by locusts and the like.

Consideration through the Pillars (Stambhas) of the Year:

If on Chaitra Sudi Pratipada the nakshatra is Revati, there is more rain. The production of grain is excellent.

If on Vaishakh Sudi (bright fortnight) Pratipada the nakshatra is Bharani, the production of grass and fodder is greater and happiness increases among animals.

— Source PDF page 91 (book page 92) —

If on Jyeshtha Sudi (bright fortnight) Pratipada the nakshatra is Mrigashira, the wind blows more in that year.

If on Ashadh Sudi (bright fortnight) Pratipada the nakshatra is Punarvasu, the production of grain is good and a slump also remains in grains.

Consideration through the Nakshatras of the Sun and Moon:

Ashwini, Bharani, Krittika, Ardra, Punarvasu, Pushya, Ashlesha, Magha, Purva Ashadha, Uttara Ashadha, Shravana, Dhanishtha, Uttara Bhadrapada and Revati: these 14 nakshatras are considered to belong to the Moon.

Rohini, Mrigashira, Purva Phalguni, Uttara Phalguni, Hasta, Chitra, Swati, Vishakha, Anuradha, Jyeshtha, Mula, Shatabhisha and Purva Bhadrapada: these 13 nakshatras are considered to belong to the Sun.

At the time for which the boom or slump is to be seen, if the Sun is in its own nakshatra, and the nakshatra of the day whose boom or slump is to be considered is also the Sun's, understand a boom in gold, silver, cotton, thread, jaggery, hemp and mustard. And if the Sun at that time is in a nakshatra of the Moon, and the nakshatra of the day whose boom or slump was to be considered is also the Moon's, understand a slump in all grocery goods and metals. And if one nakshatra is the Sun's and the other is the Moon's, that is, if at the time for which the boom or slump is to be seen the nakshatra is the Sun's, and the nakshatra of the day whose boom or slump is to be considered is the Moon's, then the prices of all commodities will remain level.

Counting from Ardra, 10 nakshatras have the female designation; counting from Vishakha, 3 nakshatras have the neuter designation; and counting from Mula, 14 nakshatras have the male designation. Both of the Sun's groups of nakshatras are of male designation, and both of the Moon's groups are of female

— Source PDF page 92 (book page 93) —

designation; that is, if one, that of the time for which the boom or slump is being seen, and the other, that of the day whose boom or slump is to be considered, are of male designation, in that order, there is a boom in gold and silver; if they are of female designation, there is a slump in gold, silver and cotton; and if neuter, the prices will remain level.

Consideration through the Panchak:

The period from the latter half of the nakshatra Dhanishtha through the nakshatras Shatabhisha, Purva Bhadrapada, Uttara Bhadrapada and Revati is called the Panchak.

If there is a slump in the first two and a half days of the Panchak, a boom comes in the last two and a half days; and if there is a boom in the first two and a half days, a slump comes in the last two and a half days.

If the Panchak begins on a Tuesday, Saturday or Sunday, a boom comes in all commercial commodities; and if it begins on a Monday, Wednesday, Thursday or Friday, a slump comes.

If a slump has been running in a commodity from the beginning of the Panchak to its end, that slump lasts for one month; and if a boom has been running, that boom also lasts for one month.

During the days of the Panchak, on whichever day the Aindra, Vaidhriti or Vyatipata yoga falls, a boom comes in the share market on that day; and if during the days of the Panchak the Dhriti yoga falls on a Sunday, a slump comes in cotton.

After the Panchak, within the Panchak of the next month, whatever boom or slump forms on the Friday that falls in the Panchak lasts until Wednesday.

Consideration of Booms and Slumps through the Dhruvank Table

Table of Dhruvanks (fixed numbers) of Commodities:

[Reading note: the book prints these as one running line of names and numbers. They are arranged here in two columns of pairs, in the book's order. "(?)" marks numbers whose digits (6 versus 9) are hard to tell apart in the scan. The book does not explain on this page how the numbers are used; later pages should.]

Commodity	Number	Commodity	Number
Wheat	14	Cloth	100
Barley	57	Gold	96 (?)
Gram	56	Silver	81
Sorghum (jowar)	100	Brass	59
Pearl millet (bajra)	34	Iron	54
Rice	67	Copper	10
Paddy (dhan)	165	Pearl	95 (?)
Urad	80	Lead	90 (?)
Green gram (moong)	51	Bell-metal	127
Pigeon pea (arhar)	72	Gilt (gilat)	67
Sesame	53	Roli (red powder)	25
Oil	10	Coal	67
Ghee	50	Stone	38
Mustard	88	Wood	49 (?)
Jaggery	40	Marble	33
Khand (raw sugar)	102	Zinc	67
Misri (rock sugar)	103	Castor	74
Kulthi (horse gram)	62	Shares	86
Kangni (foxtail millet)	20	Coral	58
Salt	59	Gems (mani)	124
Turmeric	107	Diamond	334
Red chilli	18	Jewellery	367
Black pepper	107	Saffron	58
Dry ginger	100	Musk	69 (?)
Asafoetida	62	Agar (aloeswood)	56
Cumin	70	Goat	60
Madder (majith)	144	Cottonseed (binola)	71

Commodity	Number	Commodity	Number
Camphor	102	Jute	38
Harad (myrobalan)	73	Sacking (bardana)	46
Coconut	78	Horse	70
Betel nut	204	Elephant	64
Dates (chhuhara)	104	Cow	77
Cotton (rui)	77	Buffalo	92
Raw cotton (kapas)	127	Ox	87
Thread	64	Camel	85

Table of Dhruvanks of the Nakshatras:

Nakshatra	Number	Nakshatra	Number
Ashwini	10	Swati	210
Bharani	10	Vishakha	320
Krittika	96 (?)	Anuradha	463
Rohini	56	Jyeshtha	556
Mrigashira	20	Mula	552
Ardra	86	Purva Ashadha	142
Punarvasu	21	Uttara Ashadha	420
Pushya	64	Shravana	550
Ashlesha	135	Dhanishtha	736
Magha	150	Shatabhisha	576
Purva Phalguni	220	Purva Bhadrapada	275
Uttara Phalguni	72	Uttara Bhadrapada	126
Hasta	334	Revati	256
Chitra	21

Odisha 273; Singapore 1541; Burma 543; Rangoon 767; Kashmir 259 (?); Russia 3254; Germany 1830; Egypt 1231; America 3332; Europe 676; China 642.

Table of Planet-Dhruvanks Indicating Booms and Slumps:

The Sun 1, the Moon 2, Mars 3, Rahu 4, Jupiter 5, Saturn 6, Mercury 7, Ketu 8, Venus 9. The Sun, Mars, Rahu, Saturn and Ketu are boom-causing. The Moon, Jupiter and Venus are slump-causing. Mercury indicates an even (equal) rate.

Method: If the boom or slump of a commodity is to be worked out, first look up the dhruvank of that commodity from the commodity-dhruvank table. Write that number on paper or a slate. For the day whose boom or slump is to be worked out, find from the almanac that day's nakshatra, tithi, sankranti, weekday and so on, look up the dhruvank of each from their tables, and write those numbers in order beneath the commodity's dhruvank. Then, looking up the dhruvanks of the month and of the town from the tables for month and town, write those numbers below as well. Now add up all the numbers and divide by 9. Take the remainder and look it up in the table of booms and slumps, starting from the weekday whose boom or slump is to be worked out. Taking the remaining number as one, go on counting in order. Stop at the point where the remaining number is reached, and see what is written opposite it; whatever is written there (boom or slump) will be the result in that commodity on that day (that weekday).

[Translator's note: the divisor is printed as a single digit that is hard to read in the scan; "9" is consistent with the nine planets numbered above. The worked example on the following pages should confirm it. The "table of booms and slumps" the method refers to is not on this page.]

For example: in Bombay, on the Trayodashi of Vaishakh, what will be the rate of cotton? To find this, first the dhruvank of cotton was taken: 77. From the almanac it was learned that the nakshatra is Vishakha, the weekday Thursday,

— Source PDF page 96 (book page 97) —

of Vishakha nakshatra, 320; of Thursday, 65; of Trayodashi, 11; of the Aries Sankranti, 37; of Vaishakh, 63; of Bombay, 198. All these were added, and the total came to 771. When this was divided by 9, the remainder obtained was 6. Now, from the boom-slump table, counting from Guru (Jupiter): Guru 1, Shani (Saturn) 2, and in this way the count reached the Sun at 6. Opposite it, "boom" (tej) is written. Therefore, on that day a boom will come in cotton.

[Translator's note: this example confirms that the divisor is 9 (771 = 9 x 85 + 6), and that the nine planets are counted in their number order (Sun 1, Moon 2, Mars 3, Rahu 4, Jupiter 5, Saturn 6, Mercury 7, Ketu 8, Venus 9, then back to the Sun), starting from the planet of the weekday. From Jupiter: Jupiter 1, Saturn 2, Mercury 3, Ketu 4, Venus 5, Sun 6, which gives the Sun, a boom-causing planet. The same example also fixes Bombay's number as 198, resolving the earlier doubtful reading.]

Method of Knowing Boom and Slump:

In regard to the boom and slump of any commodity, one should form a picture of the future by looking at the vedha of planets, the rising and setting of planets, the changes of sign by planets, the vedha on nakshatras, the vedha on signs, the vedha on the quarters (charan) of nakshatras, the vedha on the navamsha of planets, and so on. Besides this, it should also be kept in mind what kind of change occurs in the market when a planet stays in its sign of exaltation or debilitation, in its own navamsha or an enemy's navamsha, or in its own sign or an enemy's sign, and when it is retrograde, direct, set or risen.

The rising and setting of planets has a special effect on markets. The condition of rising and setting is of two kinds: sometimes ahead of the Sun and sometimes behind it. Ahead of or behind the Sun, the Moon is considered set (asta) within 12 degrees, Mars within 17 degrees, Mercury within 14 degrees, Jupiter within 11 degrees, Venus within 10 degrees, and Saturn within 15 degrees. And if any other planet has the same true position (spashti) as the Sun's, that planet is considered fully set (paramasta). When the degrees are more than those stated above, the planet is considered risen (udit).

Before the Sun's brilliance, the other planets become set, that is, the aspect-

— Source PDF page 97 (book page 98) —

relations do not come within sight (cease to be visible). It is because of being set that they are given the name "mudha" (bewildered), and when a planet has the same true position as the Sun, it is given the name "sammudha" (utterly bewildered). When a planet moves beyond the degree-limits written earlier, it begins to come within sight of aspect.

The planet that is the lord of a commodity, that is, the planet that has natural lordship over a given commodity: if that planet is seated in its exaltation sign or in the house of a friend, and has an aspect-relationship with benefic planets, then that planet increases the production of the commodity of which it is the lord. With the increase of production, a slump comes about in that commodity. If that planet forms an aspect-relationship with cruel planets, and is seated in a sign of debilitation or in an enemy's sign, or is with an enemy planet, then, because it has no relationship with a benefic planet, that planet harms the production of the commodity of which it is the lord, and increases the demand for that commodity. Therefore the signs of a boom begin to appear in that commodity.

When some other planet forms an aspect-relationship, or a relationship of sitting together (sahavasthana), with the planet that is lord of a commodity, that other planet is considered the helper (sahayak) planet of that commodity. And if a third planet also forms a relationship, that third planet is considered the sub-helper (up-sahayak) planet. If these helper and sub-helper planets are benefic planets, understand a combination for a slump; and if they are cruel planets, a combination for a boom.

Therefore, to consider the boom or slump of a commodity, one should form a judgement by comparing the lord, helper and sub-helper planets with the matters written earlier.

— Source PDF page 98 (book page 99) —

Knowing the Rises and Falls in Prices through the Day:

The kinds of boom and slump for the year, month and day have already been written. Now we are writing here the method by which every trader can learn simply and accurately when, during the day, the price of a commodity falls or rises; and which every man also wants to know. For the day to be considered, make all the true planets of that day "instantaneous" (tatkalik). Then see at what time which instantaneous planet, and which planet in its own motion (svacharik), is making a vedha on the instantaneous Moon; at that time understand a boom from the vedha of a cruel planet and a slump from the vedha of a gentle planet. If the vedha of these planets on the varna-panchaka and so on of the commodity is also seen, then the boom or slump can be known even more clearly.

The generally accepted and simple method of making the instantaneous planets is this: within one nakshatra the enjoyment (passage) of 27 nakshatras is taken to occur. If the

whole period of enjoyment of the nakshatra is given in ghati-pal, convert it into hours and minutes, because nowadays hours and minutes are in use everywhere in the trading markets. Divide the time of enjoyment of one nakshatra by 27; the result (time) obtained will be the time of one instantaneous nakshatra. The nakshatra in which the time of the 27 nakshatras is being looked at, from that very nakshatra these instantaneous nakshatras begin.

If the daily Moon's duration in some nakshatra is 27 hours, then the measure of one instantaneous nakshatra will be one hour; if it is 24 hours

— Source PDF page 99 (book page 100) —

of the Moon's one daily nakshatra, then the measure of one instantaneous Moon nakshatra will be 0 hours 53 minutes 20 seconds.

According to the Janmabhumi Panchang:

On Monday, 25 November 1957, the Sun and other planets were on these nakshatras:

Planet	Nakshatra and quarter	Direction of vedha
Sun	Anuradha, 2nd quarter	all three sides
Mars	Swati, 4th quarter	left side
Mercury	Jyeshtha, 4th quarter	left side
Jupiter	Chitra, 2nd quarter	left side
Venus	Purva Ashadha, 4th quarter	left side
Saturn	Jyeshtha, 2nd quarter	left side
Rahu	Swati, 3rd quarter	all three sides
Ketu	Bharani, 1st quarter	all three sides
Herschel (Uranus)	Ashlesha, 1st quarter, retrograde	right side
Neptune	Swati, 2nd quarter	left side
Pluto	Magha, 3rd quarter	left side
Moon	Purva Ashadha, 3rd quarter, until 10:25	all three sides
Moon (continued)	Purva Ashadha, 4th quarter, until 16:39	all three sides
Moon (continued)	Uttara Ashadha, 1st quarter, until 22:56	all three sides

(The Moon is cruel because it is waning.)

[Reading note: the Moon's figures are printed with a degree mark (for example 10 degrees 25 minutes) but are clock times, as the next paragraph confirms: Purva Ashadha began at 15:57 and ended at 16:39 the next day, which is 24 hours 42 minutes. They are shown here as times.]

On Sunday, 24 November 1957, by Indian Standard Time, the nakshatra Purva Ashadha began at 15:57 and on Monday, 25 November 1957, at 16:39 the nakshatra Purva Ashadha ended. The whole duration of the nakshatra Purva Ashadha was 24 hours 42 minutes. Dividing this by 27, the measure of one instantaneous nakshatra is 54 minutes

— Source PDF page 100 (book page 101) —

and 53 seconds and 20 thirds (parts of a second), which is about 55 minutes. On Sunday 24/11/57, at 15:57, Purva Ashadha begins. Adding to this the measure of one instantaneous nakshatra, 55 minutes, stated above, the instantaneous Purva Ashadha lasted until 16:52. In the same way, all the later instantaneous nakshatras can be found. Accordingly, on Monday 25/11/57, from the time the market opened until the time the market closed, the instantaneous nakshatras that the Moon was on should be understood as follows:

The Instantaneous Moon Was Placed as Follows (with the Day's Rates):

[Reading note: a few symbols in the scan are faint. The key printed under the table is given below it. Abbreviations in the original: Moon, Sun, Mars, Mercury, Jupiter, Rahu, Neptune.]

Sign	Until	Instantaneous nakshatra	Planets and vedha	Rate
(opening)	10:15	Uttara Phalguni		Opened 183.31
+	11:10	Hasta	Moon: R (the Moon is waning)	
-	12:05	Chitra	Jupiter: on it	183.25
-, +	13:00	Swati	Neptune, Rahu, Mars: each on it	
+	13:55	Vishakha	Sun: R	
+	14:50	Anuradha	Sun: on it, and R	
+	15:45	Jyeshtha	Mercury: on it; Mars: L; Rahu: L; Neptune: L	183.56
-	16:39	Mula	(partly smudged in the scan)	183.50
+	17:35	Uttara Ashadha	Moon: on it	

Note: Some Symbols for Knowledge of Vedha

A planet's presence on a nakshatra is marked "o"; vedha to the right (south) is marked "R"; vedha to the left is marked "L"; vedha to the front is marked "8"; the sign of a boom is "+"; the sign of a slump is "-".

[End of Chapter Three (book pages 53-101).]

Chapter Four

Consideration of Booms and Slumps through Sankranti and the Sight of the Moon

The change of the Sun's sign is itself Sankranti. That is, when the Sun reaches one sign from another, that very event is called Sankranti. In a year a sankranti into a given sign occurs only once, and it lasts for one month. This is also called the solar month (saur-masa). The division of the Sankrantis among the months beginning with Chaitra is made clear in the chart written below.

Chart of the Sankrantis Belonging to the Months

Month	Sankranti	Month	Sankranti
Chaitra	Pisces (Meena)	Ashwin	Virgo (Kanya)
Vaishakh	Aries (Mesha)	Kartik	Libra (Tula)
Jyeshtha	Taurus (Vrishabha)	Margashirsha	Scorpio (Vrishchika)
Ashadh	Gemini (Mithun)	Pausha	Sagittarius (Dhanu)
Shravan	Cancer (Karka)	Magha	Capricorn (Makara)
Bhadrapad	Leo (Simha)	Phalguna	Aquarius (Kumbha)

In the chart above, if the sankranti written against a month occurs in that same month, it gives an excellent result; and if it occurs in a different month, it gives a bad (nishta) result.

The duration of the Sankrantis of Aries, Taurus, Gemini, Cancer, Leo and Virgo is 32 days (as printed); the duration of the Sankrantis of Libra, Capricorn, Aquarius and Pisces is 30 days; and the duration of the Sankrantis of Scorpio and Sagittarius is 29 days. In every fourth year the duration of the Aquarius Sankranti is 31 days; that is, in the year (samvat) that is completely divisible by 4, so that dividing by 4 leaves a zero remainder, in that year the Aquarius Sankranti is of 31 days.

The Sankrantis of Taurus, Cancer, Leo, Scorpio and Aquarius show a special effect in their first 10 days. The Sankrantis of Gemini, Virgo, Sagittarius, Capricorn and Pisces have a special effect in their last 10 days. And the Sankrantis of Aries and Libra show a special effect in their middle 10 days. Besides this, the Aries Sankranti keeps its effect for a year, and the Sankrantis of Cancer and Libra keep their effect even for 6 months.

If the Sankranti occurs on any tithi of the dark fortnight, a boom comes in silver, sandalwood, white cloth and other white things. Grain prices remain slack in some places and high in some. Violent people, hypocrites and people of wicked nature find happiness. And if the Sankranti occurs on any tithi of the bright fortnight, in gold and silver, after running in an ordinary slump, the trend is toward a boom. In lac, shellac (chapda) and the like an ordinary boom remains. Good people and those of good nature find happiness, and the tendency toward religious works increases, while wicked people, hypocrites and the violent suffer sorrow.

Three conditions of the Sankranti are recognised: 1. standing (khadi), 2. sitting (baithi), 3. sleeping (suti; the dormant state). If the Sankranti is in the rising (standing) condition, then

— Source PDF page 103 (book page 104) —

it is pleasant, the rain is excellent, peace and good health increase among the public, and agricultural production is good. And if the standing Sankranti enters on a Sunday, a great boom comes in ghee and the like; if it enters on a Tuesday, in red sandalwood, copper, red-coloured things, madder, wheat and the like; if it enters on a Saturday, a great boom comes in sesame, mustard, oil, castor and the like. And if the Sankranti is of the sitting condition, it is painful for both the ruler and the public. There is an outbreak of many diseases, grain prices stay level, and the rain is moderate. If the Sankranti is of the sleeping condition, then many troubles such as war, a shortage of rain, signs of famine appear, and diseases arise; and many troubles such as war, shortage of rain and signs of famine appear (the printed text repeats this phrase), and diseases arise, and through laxity in the government or other causes the public has many hardships, and grain prices are high. Knowledge of the standing, sitting and sleeping conditions will be given further on, in the chart of the "vehicle and so on of the Sankranti from the karanas."

If the condition of the Sankranti is standing, sitting and sleeping in the summer, rainy and cold seasons respectively, its result is good.

These Sankrantis are of 15 muhurtas, 30 muhurtas and 45 muhurtas. If the Sankranti is of 15 muhurtas, there is a boom in grain and juice-type substances, the troubles of thieves and the like increase, crops are damaged by locusts, rats and the like, rebellion against the ruler increases, and the public suffers from disease and the like. In a Sankranti of 30 muhurtas, the prices of grain, animals, fodder, juices and the like remain level, and the public remains happy. And if the Sankranti is of 45 muhurtas, a slump comes in wheat, gram, barley and other grains, ghee, oil, cotton, raw cotton and all commodities. In the year in which all the Sankrantis are of 45 muhurtas, that year

is pleasant for all living beings. The rain is excellent. Agricultural production remains good. A tendency toward religious works awakens among mankind.

If a Sankranti of 45 muhurtas occurs on a Monday, Wednesday, Thursday or Friday, it has a specially auspicious result and a slump comes in all commodities. And if a Sankranti of 15 muhurtas occurs on a Sunday, Tuesday or Saturday, it has a specially inauspicious result and a boom comes in all commodities.

If the day of the week on which the Sankranti enters is also the day of the week of Amavasya, then in that month the prices of grain and the like are high, and that month is harmful. And if the Sankranti enters on a Saturday, and the Amavasya is on a Tuesday, there is a fear of mutual war and the like between two countries. If some Sankranti falls on a Saturday, the next Sankranti after it on a Sunday, and the one after that on a Tuesday, and in the same way, if one Sankranti after another keeps falling in order on cruel weekdays, its result is extremely bad, and a very painful time passes for all living beings. This is called the "Khappar" yoga.

If any Sankranti occurs on the tithis having the designation Nanda (Pratipada, the sixth, the eleventh), the happiness comes to those performing auspicious works, such as weddings, sacrifices and festivals, and to travellers. If it occurs on the tithis having the designation Bhadra (the second, the seventh, the twelfth), outbreaks of fire, famine, the troubles of thieves and the like, and the fear of war increase. If it occurs on the tithis having the designation Jaya (the third, the eighth, the thirteenth), the production of grain is excellent, and war occurs between two countries. If it occurs on the tithis having the designation Rikta (the fourth,

ninth, fourteenth), people remain devoted to auspicious works such as weddings and remain cheerful, and the production of grain such as barley, gram, wheat, sorghum and pearl millet is very good; that is, the production of both crops is good. If it occurs on the tithis having the designation Purna (the fifth, the tenth, Purnima), courtesans, singers and dancers, children, kings and good men suffer the distress of disease and the like, and the public remains afraid of fire, thieves and government; and if it occurs on Amavasya, the rain is less, there is famine, the public has many hardships and is gripped by many diseases, and there is a possibility of war between two countries.

If any Sankranti among Libra, Scorpio, Sagittarius, Capricorn, Aquarius and Pisces occurs on the sixth, eighth or Purnima tithi, there is famine and many disturbances; and if it occurs on any one of the tithis, the first or ninth of the dark fortnight and the thirteenth or fourteenth of the bright fortnight, there are many disturbances in the Gaur (Gauda) and Anga-Banga (Bengal) region. If any one of the Sankrantis above falls on some tithi of the month, and the next Sankranti falls on that same tithi of the next month, the tithi on which the first Sankranti fell, the result is greatly inauspicious; and if it falls on the tithi following that tithi, that is, the one ahead of it, the result is moderate; and if it falls on the third tithi, that is, skipping the one tithi ahead and taking the next, the result is excellent. If a Sankranti enters on the second or third weekday from the weekday of the previous month's Sankranti, a boom comes in every red-coloured thing, jaggery, khand and juice-type substances. If it enters on the fourth weekday, a slump comes in grain, ghee and the like.

it comes, and it is auspicious in every way; and if it occurs on the fifth weekday, a boom comes in grain and the like.

In the same way, if a Sankranti enters on the second or third nakshatra from the nakshatra of the previous month's Sankranti, a slump comes in the prices of grain and the like; if it enters on the fourth or fifth nakshatra, a boom comes in the prices of grain and the like; and if it enters on the sixth nakshatra, a very great boom comes in grain and the like.

We have already stated that the Sankranti-muhurta is of three kinds: 15, 30 and 45 muhurtas. But how is this to be known? So we are stating it clearly here. The nakshatra that prevails at the time of the Sankranti's entry gives the knowledge of the Sankranti's muhurtas. A Sankranti that enters in these 6 nakshatras, Bharani, Ardra, Swati, Ashlesha, Jyeshtha and Shatabhisha, is to be called a Sankranti of 15 muhurtas. A Sankranti that enters in these 15 nakshatras, Ashwini, Krittika, Mrigashira, Pushya, Magha, Purva Phalguni, Hasta, Chitra, Anuradha, Mula, Purva Ashadha, Shravana, Dhanishtha, Purva Bhadrapada and Revati, is of 30 muhurtas; and a Sankranti that enters in these 6 nakshatras, Rohini, Punarvasu, Uttara Phalguni, Vishakha, Uttara Ashadha and Uttara Bhadrapada, is to be understood as a Sankranti of 45 muhurtas. The results of the muhurtas have already been stated. Even so, for clear understanding, we are giving here a table of Sankranti, muhurta and result:

— Source PDF page 107 (book page 108) —

Table of the Muhurta and Effect of the Sankranti

Nakshatra	Muhurtas	Effect on commodities	Nakshatra	Muhurtas	Effect on commodities
Ashwini	30	even	Chitra	30	even
Bharani	15	boom	Swati	15	boom
Krittika	30	even	Vishakha	45	slump
Rohini	45	slump	Anuradha	30	even
Mrigashira	30	even	Jyeshtha	15	boom
Ardra	15	boom	Mula	30	even
Punarvasu	45	slump	Purva Ashadha	30	even
Pushya	30	even	Uttara Ashadha	45	slump
Ashlesha	15	boom	Shravana	30	even
Magha	30	even	Dhanishtha	30	even
Purva Phalguni	30	even	Shatabhisha	15	boom
Uttara Phalguni	45	slump	Purva Bhadrapada	30	even
Hasta	30	even	Uttara Bhadrapada	45	slump
			Revati	30	slump (as printed)

[Note: every other 30-muhurta nakshatra is marked "even"; Revati is printed with "slump" in the scan, which may be a misprint. It is given as printed.]

The Direction of Movement of the Sankranti

On whichever day the Sankranti enters, if that day is a Monday or Saturday the Sankranti moves toward the north; if a Tuesday or Wednesday, toward the west; if a Thursday, toward the east; and if a Friday or Sunday, toward the south.

— Source PDF page 108 (book page 109) —

The Direction of the Sankranti's Sight (Drishti):

In the same way, on whichever day the Sankranti enters, if that day is a Sunday or Friday, the Sankranti's glance falls on the south-west (Nairritya) corner; if it is a Monday or Saturday, on the north-east (Ishana) corner; if it is a Tuesday or Wednesday, on the north-west (Vayavya) corner; and if it is a Thursday, on the south-east (Agni) corner. To make it easy to understand, we are giving a table below:

Table for Knowing the Movement and the Sight of the Sankranti

Weekday	Direction of movement	Direction of sight
Sunday	South	South-west (Nairritya)
Monday	North	North-east (Ishana)
Tuesday	West	North-west (Vayavya)
Wednesday	West	North-west (Vayavya)
Thursday	East	South-east (Agni corner)
Friday	South	South-west (Nairritya)
Saturday	North	North-east (Ishana)

Table for Knowing the Results by the Time of Entry of the Sankranti

Time of entry	Result
Forenoon (purvahna)	Distressing to the king
Midday (madhyahna)	Distressing to Brahmins
Afternoon (aparahna)	Distressing to Vaishyas (merchants)
Early night (pradosh)	Distressing to the wicked
Midnight (madhya ratri)	Distressing to demons (rakshasas)
Late night (apar ratri)	Distressing to Shudras
Dawn (prabhat)	Distressing to protectors of cows (gorakshak)

— Source PDF page 109 (book page 110) —

In the table above, the result of the time of entry of the Sankranti has been given. Now, through the tables that follow, we are writing the knowledge of the vehicle and so on of the Sankranti from the karanas, and the name and result of the Sankranti from the weekday and the nakshatras.

The Name and Result of the Sankranti from the Weekday and the Nakshatra

Weekday	Nakshatras	Nakshatra designation	Name of Sankranti	Auspicious result
Sunday	Bharani, Magha, Purva Phalguni, Purva Ashadha, Purva Bhadrapada	Ugra (fierce)	Ghora	Shudras are happy
Monday	Ashwini, Hasta, Pushya	Kshipra (swift)	Dhvanksi	Vaishyas are happy
Tuesday	Punarvasu, Swati, Shravana, Dhanishtha, Shatabhisha	Chara (movable)	Mahodari	Thieves are happy
Wednesday	Mrigashira, Chitra, Anuradha, Revati	Maitra (friendly)	Mandakini	The king is happy
Thursday	Rohini, Uttara Phalguni, Uttara Ashadha, Uttara Bhadrapada	Dhruva (fixed)	Nanda	The twice-born (Brahmins) are happy
Friday	Krittika, Vishakha	Mishra (mixed)	Mishra	Animals are happy
Saturday	Ardra, Ashlesha, Jyeshtha, Mula	Daruna (dreadful)	Rakshasi	Chandalas are happy

The Vehicle and So On of the Sankranti from the Karanas

[Reading note: the book prints this as one table with eleven karanas across and sixteen attributes down. It is split here into two tables of the same rows for readability. A few words are unclear in the scan or look like misprints; these are marked. The last row (bodice) was read at lower resolution than the rest. The book does not say on this page how to find the karana for a given Sankranti; the explanation should be on the following pages.]

Karana	Bava	Balava	Kaulava	Taitila	Gara	Vanija
Sub-vehicle (upavahan)	elephant	horse	bull	ram	donkey	camel
Vehicle (vahan)	lion	tiger	lion	donkey	green (printed 'harit'; probably deer)	buffalo
Result (phal)	moderate	moderate	dear (maharghya)	bad (nishta)	moderate	moderate
Clothing (vastra)	white	yellow	green	pale (pandur)	red	dark (shyam)
Weapon (ayudh)	bhushundi	mace	sword	staff	bow	tomar (javelin)
Food (bhakshan)	grain	milk	bhittanna (unclear)	cooked food	milk-water (pay)	curd
Anointing (lepan)	musk	kumkum	sandalwood	clay	gorochan (bezoar)	barley (yava)
Class (jati)	deity	ghost	snake	bird	animal	deer
Ornament (bhushan)	coral	pearl	silver	diamond	hessonite (gomed)	sapphire
Stage of life (avastha)	girl (bala)	maiden (kumari)	gata (unclear)	young woman (yuva)	mature (praudha)	bold/mature (pragalbha)
Vessel (patra)	gold	silver	copper	bronze (kanshi)	iron	potsherd (khappar)
Position (sthiti)	sitting	sitting	standing	sleeping	sitting	sitting
Result (phal)	fear	fear	affliction	plenty (subhiksha)	prosperity (lakshmi)	distress (klesha)
Flower (pushp)	punnaga	jasmine (jati)	bakul	ketaki	bael leaf	madar (arka)
Bodice (kanchuki)	variegated	leaf (parna)	green	birch bark	white	pale

Karanas 7 to 11 (the same sixteen rows continue below)

Karana	Vishti	Shakuni	Chatushpada	Naga	Kimstughna
Sub-vehicle (upavahan)	lion	tiger (shardul)	buffalo	tiger (vyaghra)	monkey
Vehicle (vahan)	horse	dog	ram	bull	cock
Result (phal)	moderate	dear (maharghya)	bad (nishta)	bad (nishta)	cheap (samargh)
Clothing (vastra)	black	variegated	blanket	sky-clad (digambar)	dhanavarna (colour unclear)
Weapon (ayudh)	lance (kunta)	noose	goad	sword	arrow
Food (bhakshan)	mixed rice (chitranna)	jaggery	honey	ghee	sugar
Anointing (lepan)	turmeric	collyrium (kajjal)	vermilion	agar	camphor
Class (jati)	Brahmin	Kshatriya	Vaishya	Shudra	mixed caste
Ornament (bhushan)	gold	glass	bell-metal	copper	iron
Stage of life (avastha)	old woman (vriddha)	barren (vandhya)	very barren	sutarthini (unclear)	female ascetic
Vessel (patra)	leaf	cloth	hand	earth (bhumi)	wood

Karana	Vishti	Shakuni	Chatushpada	Naga	Kimstughna
Position (sthiti)	sitting	standing	sleeping	sleeping	standing
Result (phal)	stability	plenty (subhiksha)	affliction	stability	little death (alpa mrityu)
Flower (pushp)	lotus	durva grass	mallika	patali	hibiscus (japa)
Bodice (kanchuki)	blue	deerskin	leather	bark	pale (pandur)

— Source PDF page 111 (book page 112) —

Considering the Result of the Moon's Sign, Beginning with Aries, at the Time of Entry of the Various Sankrantis

At the time of the Aries Sankranti's entry, if the Moon is in the sign Libra, profit comes in the third or sixth month by stocking jaggery, fragrant substances, oil, sesame, ghee, grain and the like.

In the bright fortnight of the month of Vaishakh, if at the time of the entry of the Taurus Sankranti the Moon is in the sign Taurus, there is an increase of happiness and prosperity; and if at the time of the entry of the Taurus Sankranti the Moon is in the sign Scorpio, profit comes in the fifth month by stocking grains such as gram, barley and wheat.

At the time of entry of the Gemini Sankranti, if the Moon is in the sign Sagittarius, profit will come in the fourth month by stocking lac, mustard, groundnut, sesame, oil, castor and other oilseeds. At that time the goods should be sold, taking the greatest possible profit.

At the time of entry of the Cancer Sankranti, if the Moon is in the sign Capricorn, profit will come in the sixth month by stocking cotton, raw cotton, thread, cloth, grain, safflower (kusum), bach (sweet flag), kut (costus), turmeric and grocery goods.

At the time of entry of the Leo Sankranti, if the Moon is in the sign Aquarius, there will be very great profit in the eighth month by stocking gram, barley, wheat, silver, gold, ruby, pearl, pearl millet, and animals fit to be used as vehicles, such as elephants, horses and camels.

At the time of entry of the Virgo Sankranti, if the Moon is in the sign Pisces, profit comes in the eighth month by stocking wheat, barley, gram, green gram, moth, rice, pearl millet and the like.

— Source PDF page 112 (book page 113) —

At the time of entry of the Libra Sankranti, if the Moon is in the sign Aries, profit will come in the second month itself from grain and woollen cloth and the like.

At the time of entry of the Scorpio Sankranti, if the Moon is in the sign Taurus, profit will come in the second month by stocking grain, ral (resin), glass goods and salt.

At the time of entry of the Sagittarius Sankranti, if the Moon is in the sign Gemini, there is a prospect of very great profit in the fifth or seventh month by stocking thread, raw cotton, cloth, sesame, oil, mustard, lac, sorghum, betel nut, tobacco and the like.

At the time of entry of the Capricorn Sankranti, if the Moon is in the sign Cancer, profit comes in the fifth or sixth month by stocking jaggery, oil, mustard, thread, raw cotton and the like.

At the time of entry of the Aquarius Sankranti, if the Moon is in the sign Leo, there is full hope of profit in the fifth month by stocking jaggery, khand, cotton, raw cotton, thread, sesame, oil, mustard, wheat, gram, barley and the like.

If at the time of entry of the Pisces Sankranti the Moon was in the sign Virgo, profit comes in the first or third month by stocking grain and the like and grocery goods. So that this can be known easily, we are also giving a table on page 114.

Note: In the above, the effect of the natural position of the Moon in the various signs at the time of the Sankranti's entry has been written. But if at that time the Moon is with some other planet, or is under the aspect of some planet, or is affected by nakshatra-vedha and the like, then all those matters should also certainly be considered.

— Source PDF page 113 (book page 114) —

Table for Knowing the Result of the Moon's Sign at the Time of Entry of the Sankrantis

Sankranti	Moon's sign at entry	Commodities profitable to stock	Month in which profit can come
Aries	Libra	Jaggery, fragrant substances, oil, sesame, ghee, grain and the like	Third or sixth
Taurus	Scorpio	Wheat, barley, gram and other grains	Fifth
Gemini	Sagittarius	Lac, mustard, groundnut, sesame, castor and oil and the like	Fourth
Cancer	Capricorn	Cotton, raw cotton, thread, cloth, grain, grocery goods	Sixth
Leo	Aquarius	Gold, silver, pearl, gems, grain, oil, sesame and the like	Eighth
Virgo	Pisces	Wheat, barley, gram, rice and the like	Eighth
Libra	Aries	Grain, woollen cloth and the like	Second
Scorpio	Taurus	Grain, ral (resin), glass goods, salt and the like	Second
Sagittarius	Gemini	Grain, jaggery, cotton and the like	Fifth or seventh
Capricorn	Cancer	Raw cotton, thread, cotton, cloth, mustard, sesame, oil and the like	Fifth or sixth
Aquarius	Leo	Jaggery, khand, raw cotton, cotton, thread, mustard, grain and the like	Fifth
Pisces	Virgo	Grain and grocery goods and the like	First or third

— Source PDF page 114 (book page 115) —

otherwise, if a mistake is made, the effect will be reversed. After stocking, at the time of profit also, the influence of the Moon being with another planet, or under the aspect of another planet, or being affected by nakshatra-vedha, angular combinations (amshatmak yoga) and the like, should also be considered. When the time stated above arrives, the stocked commodity should be sold, because one has to repent after the time has passed. To recognise the time is the work of the clever trader.

Consideration through the Sankrantis According to the Weekday:

The Sun in the sign Aries is considered to be in its sign of exaltation. For the Sun, the house of the planet Mars is a friend's sign. If an Aries Sankranti of 15 muhurtas falls on a cruel weekday, there is a boom. And if an Aries Sankranti of 45 muhurtas falls on an auspicious weekday, there is a slump. If an Aries Sankranti of 15 muhurtas falls on an auspicious weekday, and one of 45 muhurtas on a cruel weekday, the prices remain level. And a Sankranti of 30 muhurtas also keeps the prices level. Sometimes, because of the aspect of a benefic planet on the Sun, a slump comes, and because of the aspect of a cruel planet some boom also comes. Therefore, after thinking over and understanding well the combinations of boom and slump, namely the condition of the Sankranti's muhurtas, the Sankranti's falling on an auspicious or cruel weekday, and the relation of the aspect of a benefic or cruel planet with the Sun, one should fix the trend of the commercial commodities.

At the time of entry of the Aries Sankranti, if it is a Sunday, Tuesday or Saturday, then in wheat, barley, gram and other grains a slump comes first and afterwards a boom. Saffron, wax, madder, vermilion, lac and grocery goods become high. If it is a Monday, then jaggery, khand, ghee, oil, mustard, groundnut,

— Source PDF page 115 (book page 116) —

raw cotton, cotton, cloth and the like are high. If it is a Thursday, a slump comes in grain and the like; and if it is a Wednesday or Friday, agricultural production remains good, the public remains happy, grain and the like are slack, and cotton, raw cotton, khand and other white-coloured things become high.

Taurus Sankranti:

If the Taurus Sankranti enters on a Sunday, Tuesday or Saturday, the prices of wheat, gram, barley and other grains, raw cotton, cotton, khand, jaggery, sugar and grocery goods are high; if it is a Monday, there is a boom in juice-type substances and in grain; if it is a Wednesday, Thursday or Friday, a slump comes in wheat, barley, gram and the like, and a boom comes in jaggery, khand, sugar, cotton, raw cotton, ghee, sesame, oil and mustard.

Gemini Sankranti:

On whichever day the Gemini Sankranti enters, if that day is a Sunday, Tuesday or Saturday, there is a boom in grain and the like, agricultural production is low, and the public remains in sorrow from the troubles of disease and the like. If it is a Wednesday, there is plenty of food, and a boom comes in pearls, gems and the like. And if it is a Monday, Thursday or Friday, a slump comes in grain and the like, and a boom comes in hemp, silk and the like.

Cancer Sankranti:

On whichever day the Cancer Sankranti enters, if that day is a Saturday, there is famine, the public is sorrowful from many troubles such as war, agriculture is damaged by the shortage of rain and the like, the prices of grain and the like are very high, and a slump comes in metals such as gold, silver and copper. If it is a Sunday or Tuesday, a boom comes in gram, wheat, barley, rice and other grains and in jaggery, khand, ghee and the like; there is an increase of diseases, and agriculture is damaged by locusts and the like. If it is a Monday, Wednesday, Thursday or Friday, the rain is good, agricultural production remains excellent, grain and the like are slack, and the public remains happy. But because of the force of the wind there is a possibility of trees breaking and falling.

Leo Sankranti:

If the Leo Sankranti enters on a Sunday, Tuesday or Saturday, there is first a boom and afterwards a slump in grains such as wheat, barley, rice, gram, urad and green gram. The rain comes with force of wind. If it is a Thursday, a boom comes in jaggery, khand, sugar, sesame, oil, mustard and the like, and a slump occurs in grain. If it is a Monday, Wednesday or Friday, happiness comes among the public and a slump comes in grain.

Virgo Sankranti:

On whichever day the Virgo Sankranti enters: if that day is a Sunday, a boom comes in wheat, barley, gram, rice, gold, silver, jaggery, khand and the like, and ghee, oil, sesame and mustard have rises and falls. If it is a Monday, there is a boom in wheat, barley, gram, thread, raw cotton, timber, gold, jute, hemp, sorghum, pearl millet, maize, green gram, urad, oil, sesame, mustard, linseed, lac, groundnut, iron, copper, jaggery and sugar. In rice and the like there are rises and falls, and a boom comes in grain, while a slump comes in cotton, silver, khand and the like. If it is a Tuesday, there is a boom in cotton, raw cotton, thread, cloth, linseed, urad, green gram, lentils, copper, iron, brass, salt and grocery goods, and an ordinary boom in grain and the like. In coconut, betel nut, nutmeg and the like there is a slump. If it is a Wednesday, a slump comes in cotton, thread, cloth, silver and the like; there is a boom in grain and the like only in the western regions, and the prices of animals fit for vehicles and of milch animals fall. If it is a Thursday, there is a boom in silver, gold and cotton, and a slump in copper, zinc, iron and the like, and in grain and the like. In jaggery, khand and sugar there is first a boom but a slump comes at the end. In oil, sesame, groundnut, mustard and linseed there are rises and falls; in saffron, musk, camphor, sandalwood, perfume and other fragrant substances a boom also comes. If it is a Friday, in jaggery, khand, sugar, gold, silver, mustard, linseed

prices level. In cotton, raw cotton, red sandalwood, madder, coconut, nutmeg, cloves, coal, stone and the like there is a boom. In grain and the like, after rises and falls, a slump comes. If it is a Saturday, there is a boom in wheat, gram, barley, rice and other grains and in juicy substances. In jaggery, khand, sugar, rice, silver, cotton and raw cotton there is first a boom and afterwards a slump. The price of gold is level, and in cottonseed (binola) an ordinary boom comes.

Libra Sankranti:

If on the day of entry of the Libra Sankranti it is a Sunday, there is a boom in gold, silver, wheat, gram, rice, turmeric, coriander, cumin, sesame, oil, mustard and the like. There is a slump in urad, green gram, lentils, pigeon pea, pearl millet and the like. The prices of cloves, cardamom, coconut, betel nut, almonds, dates and the like are level, and cows, oxen, buffaloes and goats are high; and elephants, horses, camels and mules are slack. If it is a Monday, there is a boom in rice, silver, cotton, thread, raw cotton, cloth and the like. In metals such as gold, copper, zinc, iron and brass there are rises and falls. In coconut, betel nut, almonds, dates and other grocery goods a slump comes, and evenness in grain and the like. If it is a Tuesday, there is a boom in grains such as wheat, barley and gram, and in spices such as coriander, salt and chilli. Cotton, thread, raw cotton, copper, iron, brass, zinc, ghee, cows, buffaloes and goats are slack. There are rises and falls in gold. There is evenness in urad, green gram, moth, ramas (a pulse; the spelling is unclear) and the like,

and an ordinary boom in pigeon pea and the like. If it is a Wednesday, the prices of wheat, gram, barley and the like are level. There is a slump in gold, silver, rice, cotton, hemp, jute, paat, coal, timber, sesame, oil and mustard. In camphor, mustard, musk, cloves, cardamom, red chilli, turmeric and the like there are rises and falls. If it is a Thursday, the prices of wheat, barley, gram and the like are level. There is a slump in urad, green gram, moth, sorghum, pearl millet, silver, rice and the like.

— Source PDF page 118 (book page 119) —

gold, copper, zinc, brass, linseed, sesame, oil, mustard, coconut, betel nut, woollen cloth, silk and the like there is a boom. In thread, hemp and cotton there is first a boom and afterwards a slump. If it is a Friday, there is a slump in wheat, barley, gram and the like. There is a boom in gold, jaggery, sugar, khand, linseed, mustard, copper, iron, zinc, brass, coal, stone, ghee and the like. The prices of sorghum, pearl millet, green gram, urad, moth, lentils and maize remain level. If it is a Saturday, there is a slump in jaggery, khand, sugar, rice and silver. The prices of cotton, raw cotton and cottonseed are level. In wheat, barley and gram, the price runs level first and a boom comes afterwards. There is a boom in sesame, oil, mustard, iron, linseed and quadrupeds. An ordinary boom comes in sorghum, pearl millet, green gram, maize, pigeon pea, moth and urad.

Scorpio Sankranti:

If the Scorpio Sankranti enters on a Sunday, there is a boom in cotton, raw cotton, silver, rice, salt, white things, wheat, barley, gram, gold, copper, iron, zinc, brass, oil, sesame, mustard and the like. The prices of moth, ramas, urad, green gram, pearl millet and sorghum remain level. If it is a Monday, there is a boom in gold, copper, iron, oil, sesame, mustard and the like. There is a slump in wheat, barley, gram, peas, silver, rice, ghee and the like. An ordinary slump comes in timber, coal, thread, hemp, silk cloth, woollen cloth and the like. If it is a Tuesday, there is a slump in wheat, barley, gram, peas, green gram, urad, lentils, ramas, pigeon pea, jaggery, khand, sugar and juicy substances. A boom comes in coconut, betel nut, timber and coal. If it is a Wednesday, there is a slump in cotton, raw cotton, thread, silver, rice, red chilli, cloves, red sandalwood, red-coloured things and woollen cloth. In coconut, betel nut, nutmeg, lead, tin, zinc, timber, coal, silk and the like

— Source PDF page 119 (book page 120) —

there is a boom. And in wheat there is first a slump and afterwards a boom. If it is a Thursday, there is a boom in cotton, thread, raw cotton, sesame, oil, mustard, iron, jaggery, khand, sugar, coconut and nutmeg. There is a slump in moth, sorghum, pearl millet, lentils, pigeon pea and green gram. The price of grain and the like also stays at first in rises and falls and then becomes slack. And in metals such as gold, silver, iron and copper also, after some boom at first, a slump comes later. There is a boom in hemp, jute, paat, red ochre (geru), red chilli and cloves. If it is a Friday, there is a boom in cotton, raw cotton, thread, rice, wheat, barley, gram, sorghum, pearl millet, maize and the like. The price of urad, green gram, moth and pigeon pea is level. Linseed and mustard are slack at first and boom afterwards. In gold and silver there is first a boom and afterwards a slump. A slump comes in milch animals such as cows and buffaloes. If it is a Saturday, there is a slump in wheat, barley, gram, gold, silver, cloves, cardamom, dry ginger, nutmeg, cumin, coriander and the like. A boom comes in cotton, thread, cloth, iron, copper, zinc, brass and the like. In timber, coal and stone there is first a slump and afterwards rises and falls. The prices of sesame, oil, mustard, linseed and the like remain level.

Sagittarius Sankranti:

On whichever day the Sagittarius Sankranti enters, if that day is a Sunday, there is a boom in raw cotton, thread, cloth, gold, sesame, oil, mustard, linseed, groundnut, ghee and the like. The prices of jaggery, sugar and khand are level. Almost all commodities have a boom from the first month; but there is a very great boom in sorghum, pearl millet and maize. If it is a Monday, there is a boom, after rises and falls, in grain and the like. There is a boom in sesame, oil, mustard, red chilli, iron, copper, zinc and the like. There is a slump in thread, hemp, cotton and rice. In gold and silver there are rises and falls. The price of urad, green gram, moth, sorghum and pearl millet remains level.

— Source PDF page 120 (book page 121) —

If it is a Tuesday, there is a boom in wheat, barley, gram, saffron, sandalwood, musk, camphor, silver and rice. There is a slump in jute, hemp, patsan (jute fibre), jaggery, khand, sugar and sugarcane. But by the end of the month a boom comes. The prices of gold, brass and turmeric remain level. If it is a Wednesday, the prices of grain, mustard, linseed, sesame and oil are level. There is a slump in urad, green gram, moth, pearl millet and milch animals. A boom comes in coconut, betel nut, copra, dry coconut (gola), raisins (kishmish), grapes, dates, chironji, cloves, cumin, cotton, thread, cloth, hemp, jute and the like. If it is a Thursday, the price of grain and the like becomes slacker than before; there is a boom in silver, rice, urad, green gram, moth, sorghum, pearl millet, pigeon pea, poppy (post), elephants, horses, camels and the like. Cows, buffaloes and oxen are slack. The prices of jaggery, khand and sugar are level. In coconut, betel nut, cloves, cotton, silk cloth, woollen cloth and hemp, there are first rises and falls and afterwards a boom comes. If it is a Friday, the prices of silver, gold, wheat, barley, gram, peas and other grains remain level. The prices of jaggery, khand, sugar, sesame, oil, mustard, linseed, green gram, moth and the like run in rises and falls but afterwards there is an ordinary slump. In red ochre, red sandalwood, red chilli and other red-coloured things a slump comes. And ahead there remains a full possibility of a slump coming in all commodities. Therefore it is not proper to stock. And as far as possible, if the stocked goods are disposed of, that is good. If it is a Saturday, there is a heavy boom in metals such as silver, gold, copper and zinc, in grain and the like, ghee, cotton, raw cotton, thread, cloth, camphor, musk, saffron and other fragrant substances. But in ghee a slump comes later. Compared with the Scorpio Sankranti, a greater boom comes in every commodity, that is,

— Source PDF page 121 (book page 122) —

compared with the Scorpio Sankranti, at this time very great profit can be made on goods that were stocked, and there also remains a full possibility of political strife. The public has to face very great hardships.

Capricorn Sankranti:

On whichever day the Capricorn Sankranti enters, if that day is a Sunday, there is a boom in jaggery, khand, sugar, oil, linseed, mustard, maize, sorghum, pearl millet, pigeon pea, woollen cloth, silk and the like; in wheat, barley, gram and the like there are rises and falls and afterwards a boom. In silver there is special fluctuation. A slump comes in rice and the like. In spices such as salt, chilli, cumin and coriander, and in dry coconut, raisins, grapes, dates and the like, there is first a slump and afterwards a boom. Because mutual disagreement between two countries increases, the possibility of war remains. If it is a Monday, there is a boom in silver, rice, gram, barley, cotton, linseed, mustard, fenugreek,

ghee and the like. There is a slump in wheat, jaggery, khand, sugar, gold and the like. Sorghum, pearl millet, maize, pigeon pea, green gram and moth are at level prices. In coal, timber, stone and the like a boom comes and afterwards a slump. A trend of slump remains in cotton, thread, cloth and red-coloured things. If it is a Tuesday, there is a boom in jaggery, khand, sugar, sesame, oil, mustard, iron, red chilli, saffron, madder and other red-coloured things, and in sorghum, pearl millet, maize and the like. There are rises and falls in cotton, thread, raw cotton, cottonseed, copper, brass, gold, silver and the like. The prices of urad, green gram and lentils remain level. If it is a Wednesday, the prices of grain (galla), coconut, katha (catechu), betel nut and the like are level. There is a slump in gold, silver, rice, gram, sesame, oil, mustard, lac, groundnut, cow, buffalo, goat and other milch animals. In copra, dates, grapes, raisins, chironji and other dry fruits, turmeric, cumin, nutmeg, coriander, cloves, cardamom and the like

— Source PDF page 122 (book page 123) —

there is a boom. In woollen cloth there is first a slump and afterwards a boom comes. If it is a Thursday, there is a boom in jaggery, khand, sugar, sugarcane, cotton, thread, raw cotton, cottonseed, sesame, oil, mustard, linseed, lac, barley, gram and animals. In gold, silver and grocery goods there are rises and falls. In wheat and the like the prices are level at first and a boom comes afterwards. A slump comes in sorghum, pearl millet, maize and the like. If it is a Friday, a slump comes first and then a boom in wheat, barley, gram and the like. There is a boom in mustard, lac, sesame, linseed and the like. In jaggery, sugar, khand, sugarcane, gold, silver and the like a slump comes after rises and falls. A slump comes in metals such as copper, brass and zinc, and in coconut, grapes, dates, raisins and other grocery goods. Everyone is happy and celebrates ever-new festivals. If it is a Saturday, in jaggery, khand, sugar, oil, sesame, mustard, lac, linseed, groundnut and the like a boom comes toward the end of the month and then a slump. There is a boom in maize, pearl millet, sorghum, red sandalwood, madder, red chilli, saffron and other red-coloured things, and in silk and cotton cloth and the like. In wheat, barley, gram, raw cotton, cotton, thread, cottonseed and the like there are rises and falls. The public has fear of disease, cold and the government.

Aquarius Sankranti:

On the day of entry of the Aquarius Sankranti, if it is a Sunday, there is a slump in jaggery, khand, sugar, sugarcane, maize, pearl millet, sorghum, woollen cloth, silk cloth and grocery goods. The prices of metals such as gold and silver are level. In cotton, thread, cottonseed, raw cotton and the like there are rises and falls. In sesame, oil, mustard, lac, linseed and the like there is first a boom and afterwards a slump. In barley, gram, wheat and the like a boom comes after rises and falls. If it is a Monday, a boom comes at first and then a slump in wheat, barley, gram, coconut, betel nut, nutmeg, grapes, dates, raisins and copra. In jaggery, khand,

— Source PDF page 123 (book page 124) —

sugar, red sandalwood, red ochre, blue vitriol (neelathotha), perfume, ghee, red chilli, rice and the like there is a slump. In metals such as gold, silver, zinc, copper and iron there are rises and falls. There is a boom in cotton, thread, raw cotton, cloth, urad, green gram, moth, linseed, mustard, sesame, oil, groundnut and the like; and in animals such as cows, oxen and buffaloes a slump comes first and then a boom. If it is a Tuesday, there is a boom in gold, silver, copper, brass, zinc, iron and other metals, juicy substances, timber, coal, silk, woollen and cotton cloth and the like. In grains such as wheat, barley and gram there are

rises and falls. The prices of maize, sorghum, pearl millet, sesame, oil, mustard, linseed, lac, groundnut, coconut, betel nut, cumin, salt, chilli and other grocery goods are level. In milk, ghee and butter there is a slump; in cotton, thread, cloth, raw cotton, cottonseed and the like there is first a slump and afterwards a boom. If it is a Wednesday, there is a slump in wheat, barley, gram, green gram, urad, peas, jaggery, khand, sugar, cloves, cardamom, cumin, black pepper, dry ginger, sours (khatai), coriander and other spices, grapes, dates, raisins, copra, chironji and other dry fruits, and cotton and the like. In cottonseed, raw cotton and the like there are rises and falls. The prices of metals such as gold and silver, and of sesame, oil, mustard, lac, linseed and rape/mustard (rai) are level. Maize, sorghum, pearl millet, pigeon pea, lentils and stone become high in price. If it is a Thursday, there is a slump in gold, silver, copper, brass and other metals; in mustard, sesame, oil, lac, linseed, groundnut, cotton, thread, raw cotton and cottonseed; and in milch animals such as cows, buffaloes and goats. There is a boom in grains such as wheat, barley and gram and in animals used as vehicles, such as horses and camels. The prices of maize, pearl millet, sorghum, moth, green gram, urad, salt, chilli and other spices, sandalwood, perfume and other fragrant substances are level. In dates, grapes, raisins, chironji, copra, cashew nuts and other dry fruits

— Source PDF page 124 (book page 125) —

there are rises and falls and a slump comes by the last month. If it is a Friday, in wheat, barley, gram and other grains there are rises and falls and a boom at the end. There is a slump in maize, sorghum, pearl millet and the like. There is a boom in mustard, oil, sesame, lac, linseed, rice, cotton, raw cotton, cloth, cottonseed, salt, chilli, turmeric and other grocery goods, and in jaggery, sugar, khand and sugarcane. The prices of metals such as gold, silver, iron, brass and copper stay level. If it is a Saturday, there is a boom in grains such as wheat, barley and gram, and in milk, curd, butter and the like. There is a slump in maize, sorghum, pearl millet, green gram, moth, urad, sesame, oil, mustard, rape, linseed, lac, groundnut and the like. In dry fruits such as grapes, dates, raisins, chironji and copra, and in betel nut, nutmeg, turmeric and other grocery goods, in gold, silver, brass, copper, iron and other metals, and in cotton, raw cotton, thread, cottonseed, cloth and the like, there are rises and falls. But in metals such as gold, silver and brass there is an ordinary climbing and falling; the prices remain balanced on evenness. The prices of jaggery, khand, sugar, sugarcane, timber, coal, stone and the like remain level. Disease increases among animals. The possibility increases that the political relations between two countries will worsen.

Pisces Sankranti:

On the day of entry of the Pisces Sankranti, if it is a Sunday, there is a boom in jaggery, sugar, khand, oil, sesame, mustard, lac, linseed, groundnut, ghee, juicy substances, green gram, lentils, pigeon pea, raw cotton, cotton, cottonseed, coal, stone, timber, agar, tagar, chhar (a lichen), chhabila (a fragrant lichen), camphor, musk and other fragrant substances. In metals such as gold, silver, brass and copper, after rises and falls, the prices remain level. In wheat, gram, barley and the like a boom comes and a slump arrives afterwards, by the last month. If it is a Monday, there is a slump in wheat, barley, gram, sorghum, pearl millet, and in animals such as goats, camels and oxen.

— Source PDF page 125 (book page 126) —

In gold, silver, salt, chilli, cumin, coriander, turmeric and other spices, and in dates, copra, pearl millet, raisins, makhana (fox nuts), chironji and all dry fruits, there are rises and falls. In jaggery, khand, sugar, oil, sesame, mustard, lac and the like, after rises and falls an ordinary boom comes at the end of the month. The prices of cotton, thread and cloth are level. A boom comes in coal, timber, stone, milk, curd, butter and the like. If it is a Tuesday, there is a boom in wheat, barley, gram, cotton, thread, raw cotton, coconut, nutmeg, cloves, coal, timber, gold and the like. In grocery goods, fragrant substances, saffron, madder, red ochre, red sandalwood, stone and all red-coloured things, and in animals such as cows and oxen, there is a slump. In urad, green gram, lentils, moth, sorghum, pearl millet and ramas, rises and falls remain and then a boom comes. In jaggery, khand, sugar, oil, sesame, mustard and the like a slump comes first and then a boom. In silver, copper, zinc, brass and other metals, and in ghee and the like, there is first a boom and afterwards a slump. The prices of coal, timber, copra, dates, raisins and other dry fruits remain level. If it is a Wednesday, the prices of wheat, barley, gram and other grains, grocery goods and dry-fruit commodities, maize, sorghum, pearl millet and fragrant substances are level. There is a slump in cotton, thread, raw cotton, copper, brass and other metals. In jaggery, sugar, khand, sugarcane and the like there is first a boom and afterwards a slump. A boom comes in gold, silver, ghee, oil, sesame, mustard, lac, linseed and the like. A slump comes in animals, but in horses there is a boom. The public suffers distress, and there is an outbreak of epidemics and the like and political strife. If it is a Thursday, there is a boom in urad, green gram, lentils, pigeon pea, moth, cotton, thread, raw cotton, cottonseed, cloth, sesame, oil, mustard, linseed, rape, lac, ghee, and in metals such as copper, brass and iron. In wheat, barley, gram and other grains there is first a boom

— Source PDF page 126 (book page 127) —

and afterwards a slump until the last month. The prices of maize, sorghum, pearl millet, jaggery, khand and sugar are level. A slump comes in gold, silver, grain, copra, dates, grapes, raisins and other dry fruits, and in milch animals. If it is a Friday, there is a boom in grain (galla), salt, chilli, cloves, cardamom and other grocery goods, and in all kinds of dry fruits and the like. The prices of rice, sesame, oil, mustard, linseed, jaggery, khand, sugar, green gram, lentils, urad and pigeon pea are level. There are rises and falls in cotton, raw cotton and thread. And a boom also comes in gold, silver, copper, zinc, brass, tin and other metals, and in all kinds of animals. If it is a Saturday, there is an ordinary boom in wheat, barley, gram and the like. There is a boom in gold, maize, sorghum, pearl millet, copra, raisins, misri (rock sugar), dry ginger, black pepper, cumin, coriander, asafoetida, red sandalwood, red ochre, madder and other red-coloured things. The prices of jaggery, sugar, khand, oil, sesame, mustard, linseed, lac, groundnut, cotton, thread, raw cotton, cloth, hemp, jute, paat and the like are level. There is a slump in rice, coconut, betel nut and other kinds of fruit and the like. In fragrant substances such as musk, camphor, saffron and perfume there are rises and falls. And in the prices of metals such as silver, copper and brass there are rises and falls; the prices remain level. There is political upheaval, and the public suffers many hardships.

Consideration through the Entry of the Sankranti on Amavasya and Purnima:

If the Aries Sankranti enters on Amavasya or Purnima, there is a full possibility of profit in the fourth month by stocking wheat, barley, gram and the like.

If the Taurus Sankranti enters on Amavasya or Purnima,

potato, arbi (colocasia), groundnut and other substances grown from the soil (udbhij), profit can be made in the fourth month by stocking them.

If the Gemini Sankranti enters on the day of Amavasya or Purnima and the sky is covered with clouds, profit can be made in the sixth month by stocking jaggery, khand and salt.

If the Cancer Sankranti enters on Amavasya or Purnima, there is a full possibility of obtaining profit in the second month itself by stocking metals such as gold, silver, iron and brass, and mustard, oil, sesame, ghee, jaggery and khand.

If the Leo Sankranti enters on Amavasya or Purnima, and by divine chance a comet (puchhal tara, "tailed star") is seen in the sky on that same day, profit will be seen in the fifth month by stocking lac, hides (chamda), pearls, coral, diamond and other jewels.

If the Virgo Sankranti enters on Amavasya or Purnima, and there is also an eclipse on that day, then by buying animals used as vehicles, such as elephants, horses and camels, and selling them in the sixth month, profit and only profit will be in sight.

If the entry of the Libra Sankranti is on Amavasya or Purnima, and on that day clouds are gathered or it rains, there will be profit in the sixth month by stocking sorghum, pearl millet, maize, urad, green gram, moth, musk, saffron, turmeric, ghee and the like.

If the Scorpio Sankranti enters on Amavasya or Purnima, and there is also an eclipse on that day, then by buying metals such as gold, silver, iron, copper and brass in a slump, and selling as soon as a boom comes in the same month, one will not remain deprived of profit.

If the Sagittarius Sankranti enters on Amavasya or Purnima and the sky is completely covered with clouds, profit can be made in the sixth month by stocking pearls, coral, diamond and other jewels, and saffron, musk, camphor and other fragrant substances.

If the Capricorn Sankranti enters on Amavasya or Purnima, and on that same day a comet (the "tailed star") is also seen, profit comes in the second month itself by stocking grain such as wheat, barley and gram, and vessels made of iron and the like.

If the Aquarius Sankranti enters on Amavasya or Purnima, and on that same day a comet is also seen, then on stocking wheat, barley, gram and the like, the second month alone will be enough for profit.

On the day of entry of the Pisces Sankranti, if it is Amavasya or Purnima and the sky that day is also completely covered with clouds, there will be an opportunity for profit in the sixth month itself by stocking pearls, coral and other jewels, silver, iron, copper, brass, potato, arbi, coal, stone and timber.

The Effect of the Sight of the Moon on the Markets:

If the Moon is sighted on a Sunday, there is a boom in gold and silver and rises and falls in cotton.

If the Moon is sighted on a Monday, there is a boom in gold, cotton, thread, cloth, dyes and the like. There are rises and falls in silver. A boom comes in grains.

If the Moon is sighted on a Tuesday, there is a boom in gold and silver after rises and falls. There is a boom in grains. In cotton there is first a slump and afterwards a boom comes.

If the Moon is sighted on a Wednesday, there is a boom in ghee and grains, and a slump comes in cotton, silver, gold, thread, hemp, cloth, jaggery, khand, sugar and the like.

If the Moon is sighted on a Thursday, a boom comes in cotton, raw cotton, thread, cotton cloth, silk and woollen cloth, ghee, oil, mustard and the like, and the prices of gold, silver, jaggery and khand fall.

If the Moon is sighted on a Friday, there is a slump in rice, gram, urad, grain, mustard, sesame, oil and woollen cloth, and in gold, silver and cotton there are rises and falls and a boom comes afterwards. And if, in any month from Kartik to Vaishakh, the Pratipada falls on a Friday and the sight of the Moon is also on that same day, the boom in cotton lasts for one month.

If the Moon is sighted on a Saturday, a heavy boom comes in silver, gold, cotton, mustard, thread, cloth and the like.

Special note: If the Moon is sighted on any cruel weekday (Sunday, Tuesday, Saturday) and the Purnima also falls on the same weekday, a heavy boom comes in gold, cotton, raw cotton and silver; and if, on the contrary, the Moon is sighted on a gentle weekday (Monday, Wednesday, Thursday, Friday) and the Purnima also falls on the same weekday, a heavy slump comes.

Consideration through the Elevation of the Moon's Horns (Shringonnati):

If the Moon is sighted in the sign Scorpio or Sagittarius and its northern corner (horn) is high, it brings a boom in every commodity.

If, at the time of the Moon's sighting in any sign among Cancer, Leo, Libra, Capricorn and Aquarius, both horns of the Moon are level, every commodity

goes through rises and falls and its price becomes level. If the Moon is sighted in the sign Gemini or Virgo and has a horn like a spear (shula), a boom comes in every commodity.

If the Moon is sighted in any sign among Pisces, Aries and Taurus, and its southern corner (horn) is high, a slump comes in every commodity.

Consideration through the Moon-Sighting in Each Sign:

If the Moon is sighted in the sign Aries, a boom comes in linseed and mustard and a slump in grain.

If the Moon is sighted in the sign Taurus, a boom comes in urad, green gram, moth and sesame.

If the Moon is sighted in the sign Gemini, a boom comes in cotton, thread, raw cotton, wheat, barley and gram.

A sighting of the Moon in the sign Cancer brings a lack of rain.

If the Moon is sighted in the sign Leo, a boom comes in grains such as wheat, barley and gram.

If the Moon is sighted in the sign Virgo, there is political strife and an increase of diseases among animals.

If the Moon is sighted in the sign Libra, a boom comes in gold, silver, cotton and thread.

If the Moon is sighted in the sign Scorpio, a slump comes in grains of every kind.

If the Moon is sighted in the sign Sagittarius, a slump comes in grain and the like.

If the Moon is sighted in the sign Capricorn, it is beneficial.

— Source PDF page 131 (book page 132) —

If the Moon is sighted in the sign Aquarius, a boom comes in urad, green gram, moth, gram, pigeon pea and lentils.

If the Moon is sighted in the sign Pisces, a slump comes in grain and the like, and in cotton there is first a slump and afterwards a boom.

Special note: If the Moon is covered by clouds at the time of its sighting in the sign Capricorn or Aquarius, a good boom comes in cotton.

Consideration through the Moon-Sighting in Each Nakshatra:

If the Moon is sighted in the nakshatra Ashwini, there are disturbances in the south and a slump comes in the prices of grain.

If the Moon is sighted in the nakshatra Bharani, there are disturbances in the southern regions, and a boom comes in salt and safflower (kusum).

If the Moon is sighted in the nakshatra Krittika, a boom comes in wheat, barley, gram, rice, jaggery, khand, mustard and the like.

If the Moon is sighted in the nakshatra Rohini, the troubles of epidemics and other diseases increase.

If the Moon is sighted in the nakshatra Mrigashira, a slump comes in grain and the like, and there is political strife in the eastern regions.

If the Moon is sighted in the nakshatra Ardra, a boom comes in jaggery, khand, raw cotton, cotton and thread, and a slump in grain.

If the Moon is sighted in the nakshatra Punarvasu, the prices of every commodity remain slack.

If the Moon is sighted in the nakshatra Pushya, a slump comes in grain and the like.

— Source PDF page 132 (book page 133) —

If the Moon is sighted in the nakshatra Ashlesha, the prices of jaggery, khand and the like are level and a slump comes in grain and the like.

If the Moon is sighted in the nakshatra Magha, a slump comes in metals such as gold and silver and in grains.

If the Moon is sighted in the nakshatra Purva Phalguni, a boom comes in the prices of cotton, raw cotton, jaggery, khand, mustard, oil and the like, and a slump in all grains.

If the Moon is sighted in the nakshatra Uttara Phalguni, there is a boom in jaggery and khand, a slump in barley, and rises and falls in cotton.

If the Moon is sighted in the nakshatra Hasta, there is a great boom in cotton, and profit comes in the third month by stocking grain.

If the Moon is sighted in the nakshatra Chitra, a slump comes in grains and a boom in cotton, and there are disturbances in the southern provinces.

By the sighting of the Moon in the nakshatra Swati, there is a boom in silver, gold, cotton, raw cotton, sesame, oil and mustard. A slump comes in wheat, barley, gram and the like.

By the sighting of the Moon in the nakshatra Vishakha, a boom comes in wheat, linseed, mustard, jaggery, khand, urad, green gram, sorghum, pearl millet and the like.

If the Moon is sighted in the nakshatra Anuradha, a slump comes in jaggery, khand and grain and the like.

If the Moon is sighted in the nakshatra Jyeshtha, there are rises and falls in jaggery, khand and the like, and a slump in grain and the like.

If the Moon is sighted in the nakshatra Mula, there is a boom in jaggery, khand, ghee, oil, mustard, gold, silver and the like, and the prices of wheat, barley, gram and the like remain level.

— Source PDF page 133 (book page 134) —

If the Moon is sighted in the nakshatra Purva Ashadha, a slump comes in cotton, raw cotton, silver, rice, thread, cloth, salt, wheat, barley, gram and the like.

If the Moon is sighted in the nakshatra Uttara Ashadha, there is first a slump and afterwards a boom in the prices of animals used as vehicles, metals such as gold, silver and iron, green gram, peas, urad, ghee, grocery goods and dry fruits and the like.

If the Moon is sighted in the nakshatra Shravana, there is a boom in grain, and a slump in mustard, sesame, oil, ghee and the like.

If the Moon is sighted in the nakshatra Dhanishtha, there is a boom in metals such as gold and silver, and a slump in cotton and the like.

If the Moon is sighted in the nakshatra Shatabhisha, there is a boom in jaggery, cotton and raw cotton, and a slump in woollen cloth.

If the Moon is sighted in the nakshatra Purva Bhadrapada, there is a boom in silver, cotton, raw cotton, jaggery, mustard, oil, ghee and the like, and the prices of grains go in rises and falls.

If the Moon is sighted in the nakshatra Uttara Bhadrapada, a slump comes in cotton, cloth, grocery goods and silver.

If the Moon is sighted in the nakshatra Revati, a slump comes in jaggery, khand, sugar and the like, and a boom in grains.

The Moon is sighted on the second day (dwitiya) of the bright fortnight. Its natural effect, from the weekday, sign, nakshatra and elevation of the horns, has been given here. Now, in what direction the sighted Moon stands in relation to the Sun and other planets, and what effect that has, we give next.

— Source PDF page 134 (book page 135) —

Consideration through the Direction-Wise Sighting of the Moon, in the Various Directions from the Sun and Other Planets

If on the second day of the bright fortnight the Moon rises in the direction north of the Sun, grain and the like remain slack, and there is plenty, excellent rain, and a happy public. And if the Moon rises in the direction south of the Sun, there is a boom in grain and the like; there is a lack of rain, a possibility of famine, and the public is in sorrow from many kinds of troubles.

If on the second day of the bright fortnight of the months of Vaishakh and Jyeshtha the Moon rises toward the north of the Sun, the rain is excellent, agricultural production remains good, there is a slump in grains, and joy and delight increase among the public.

If the planets Sun, Mars, Mercury and Venus are moving round the Moon on its right side, agricultural production is good, the rain is excellent, there is plenty, and the public and the country remain happy. And if they are moving round on the left side, there is damage to agriculture, a lack of rain, sorrow for both country and public, a possibility of famine, fear of war, and an increase in the prices of grain.

Note: Before knowing correctly (fixing) the result of any of the above-stated conditions of the Moon, it is extremely necessary to pay attention to all these matters: the position of the Moon; vedha made by the Moon on any planet, or by another planet on it; with which planet the Moon stands; and what the Moon's navamsha is.

The Method of Knowing the Moonrise through the Table:

Subtract the ghati-pal of the first Amavasya from 60, and what remains

— Source PDF page 135 (book page 136) —

remains, add to it the day-length (dinman) of the Pratipada of the bright fortnight. Then, finding out from the almanac the signs of the Sun and of Rahu, compare the figures written opposite and below those signs in this table with the figure obtained by adding to the day-length. If the table's figure is less, the Moon will rise on the Pratipada; and if it is more, the Moon will rise on the Dwitiya.

Example: Suppose that Amavasya is 30 ghati 26 pal, and the day-length of the Pratipada of the bright fortnight is 26 ghati 11 pal. And suppose the Sun is in the sign Leo and Rahu in the sign Scorpio. We have to find out when the Moon will rise.

30 ghati 26 pal was subtracted from 60: 60 - 30:26 = 29:34. To this the day-length of the Pratipada of the bright fortnight was added: 29:34 + 26:11 = 55:45. In the table, opposite the Sun's sign Leo and below Rahu's sign Scorpio, there is the figure 64 (printed as "the 64th figure").

Now, when this figure 64 is compared with 55:45, the figure obtained by adding the day-length, the table's figure is greater. Therefore the Moon will rise on the Dwitiya.

— Source PDF page 136 (book page 137) —

The Moonrise Table (Chandrodaya Sarini)

[Reading note: rows are the Sun's sign and columns are Rahu's sign (Ari = Aries, Tau = Taurus, Gem = Gemini, Can = Cancer, Leo, Vir = Virgo, Lib = Libra, Sco = Scorpio, Sag = Sagittarius, Cap = Capricorn, Aqu = Aquarius, Pis = Pisces). The figures are in ghati; compare them with the figure worked out by the method on the previous page. In this scan the Devanagari digits 5, 6, 8 and 9 are easily confused, so "(?)" marks cells I could not read with confidence; the other cells are my best reading. The cell for Sun in Leo and Rahu in Scorpio (64) is confirmed by the book's own worked example on the previous page.]

Sun's sign \ Rahu's sign	Ari	Tau	Gem	Can	Leo	Vir	Lib	Sco	Sag	Cap	Aqu	Pis
Aries	53	54	55	52	58 (?)	55	54	53	52	55	53	52
Taurus	48	51	54	58	57	57	55	53	50	46	47	47
Gemini	44	47	52	47	59	63	63	61	56	51	49	44
Cancer	48	49	53	60	54 (?)	81	77	77	72	88 (?)	52	52

[End of Chapter Four (Sankranti and Moon-sighting), book pages 102-137.]

Chapter Five

The Influence of Eclipses on Markets

The Sun moves in its own orbit in the ecliptic circle (kranti-mandal), and the Moon in its own orbit in the lunar circle (vimandal); and at a distance of six signs from the Sun the Earth's shadow lies in its own orbit. On Purnima (the full moon) there is also a distance of six signs between the Sun and the Moon. So on Purnima the Earth's shadow and the Moon stand level. When the Sun, Earth and Moon are in one straight line, the Earth's shadow covers the Moon; at that time there is a lunar eclipse. If it covers the Moon completely, it is a total (khagras) eclipse, and if it covers some part of the Moon, it is a partial (khanda) eclipse. In the same way, on Amavasya (the new moon) the Sun and Moon move in their own orbits in one sign. When the Earth, Moon and Sun are in one straight line, the Moon covers the Sun; at that time there is a solar eclipse. According to the extent of the covering, a partial eclipse, a total eclipse and so on take place. This situation has been described here as geography, in passing. But according to the authorities of the scriptures, Rahu's seizing or covering of the Moon or the Sun is itself the eclipse.

In the Puranas, the notion that has been given of Rahu as a coverer agrees, in truth, with mathematics and astronomy as well, in accordance with the views of the Veda, Purana and Samhita. For this reason Rahu has been regarded as a shadow, and this shadow is the shadow of the Earth itself.

— Source PDF page 138 (book page 139) —

Therefore the Earth's shadow itself should be called the form of Rahu. When the Earth's shadow, by mathematical principle, covers the Moon, it will be understood that Rahu has covered the Moon. We do not want to fall into the tangle of this conception here. Even so, an eclipse may be understood in whichever way one likes, and accepted in that same way. This is a matter of dispute. Not getting into its tangle, we shall here state only what effect these eclipses have on commercial commodities.

An eclipse is regarded as a well-known festival-time (parva). When the Sun and the Moon are in one sign, it is the Amavasya parva. Because the Moon stays in one sign with the Sun, it covers the Sun, as clouds do, through the difference in their orbits; then there is a solar eclipse. When the Amavasya ends within the day itself and Pratipada begins, it is the mid-time of the solar eclipse. On the day of Purnima the Earth's shadow covers the Moon; then there is a lunar eclipse. When the Purnima ends at night and the Pratipada begins, it is the mid-time of the lunar eclipse. This is the condition at the middle of the parva.

The nakshatra on which the eclipse of the Sun or the Moon occurs keeps its effect for 6 months. So much so that for 6 months that nakshatra is not accepted for auspicious works, because four ghadis (a ghadi is about 24 minutes) of the gods are equal to 6 months for us. The effect of the eclipse of the Sun and Moon falls on all auspicious works, and the nakshatra of the time of eclipse of the Sun and Moon is regarded as bad and inauspicious.

Just as the effect of the eclipse of the Sun and Moon falls on auspicious works,

— Source PDF page 139 (book page 140) —

so it falls on men, living creatures and beings, on all. In commercial goods too, rises and falls have been seen from its effect. On all these, the effect of a total (khagras) eclipse is held to last 6 months, of a three-quarter eclipse 5 months, of a half eclipse 4 months, and of a one-part eclipse 3 months; and the scriptural command is to undertake auspicious works leaving aside seven days in a total eclipse of the Sun and Moon, 5 days in a three-quarter eclipse, 4 days in a half eclipse and 3 days in a quarter eclipse.

If there is a solar eclipse on a Sunday, there is a full possibility of future profit by stocking wheat, rice, green gram, paddy, jaggery, khand and sugar, and if there is a lunar eclipse, a slump comes in silver. If ghee and oil are in one's stock, profit can be taken from them at this time.

If there is a solar eclipse on a Monday, there will be future profit from stocking grain, and a boom comes in ghee, oil, urad and the like. And if there is a lunar eclipse, a slump comes in cotton, and this slump has sometimes been seen to last for 5 months. Profit comes from stocking grain, and the production of camphor is low.

If there is a solar eclipse on a Tuesday, a boom comes in jaggery, khand, ghee, wheat, cotton, thread, cloth and silver; and if there is a lunar eclipse, a boom comes in red-coloured things and cotton.

If there is a solar eclipse on a Wednesday, a boom will come in sorghum, pearl millet, moth, gram, paddy, raw cotton, cloth, cloves and the like; and if there is a lunar eclipse, there will be damage to rice farming and a boom in metals such as gold, silver, brass and iron.

— Source PDF page 140 (book page 141) —

If there is a solar eclipse on a Thursday, a boom comes in sesame, oil, castor, jaggery, khand, red wheat, red cloth and the like; and if there is a lunar eclipse, profit comes in future by stocking yellow-coloured things, fragrant things and oil.

If there is a solar eclipse on a Friday, the rain is excellent and agricultural production remains good; and if there is a lunar eclipse, a slump comes in cotton and a boom will come for four months in silver, pearls, cloth and white things.

If there is a solar eclipse on a Saturday, a boom comes in jaggery, khand, sugar, wheat, turmeric, yellow cloth and the like; and if there is a lunar eclipse, profit can be taken within 2 months by stocking linseed, mustard, oil, yellow and red cloth, sorghum, pearl millet and the like.

Solar Eclipse by Month:

If a solar eclipse occurs in the month of Chaitra, a boom comes in gold, silver and copper. If it occurs in Vaishakh, profit can come from stocking thread, cloth, cotton, raw cotton, sesame and oil. If it occurs in Jyeshtha, there will be profit in future from stocking grain. If it occurs in Ashadh, there is a possibility of famine and a boom comes in all commodities. If it occurs in Shravan, profit can be taken at this time by selling grain stocked earlier. If it occurs in Bhadrapad, the rain is good and a slump comes in all commodities. If it occurs in Ashwin, a boom comes in ghee, oil, mustard and the like. If it occurs in Kartik, agricultural production is excellent and the rain is good. If it occurs in Margashirsha, a boom comes in juices and astringent substances. If it occurs in Pausha, a boom comes in grain. If it occurs in Magha, the year remains even, and if it occurs in Phalguna, a greater boom comes in grains.

— Source PDF page 141 (book page 142) —

Lunar Eclipse:

If it occurs in any month from Vaishakh to Shravan, the rain is deficient and a boom comes in grains. If it occurs in any month from Bhadrapad to Kartik, the rain is good and a slump remains in grains, and if it occurs in the month of Margashirsha or Pausha, the rain is deficient. A boom comes in wheat, gram and the like. And if it occurs in any month from Magha to Chaitra, a very great boom remains in grains for 5 or 6 months.

Eclipses in the Signs:

If there is a solar eclipse in the sign Aries, disease and suffering increase among men and children and among animals such as elephants, horses and oxen. In provinces such as Telangana, Kambhoj, Punjab and Madhya Pradesh there is a possibility of lawlessness and disease and the like, and a boom comes in commercial commodities; and if there is a lunar eclipse, a boom comes in gold, silver, cotton, raw cotton, shares, jaggery, ghee, mustard and juice-type substances. The eclipse, whether of the Sun or of the Moon (both), in the sign Aries is boom-causing.

If there is an eclipse of the Sun or the Moon in the sign Taurus, suffering comes to animals, birds, men, cowherds and travellers, and anxiety remains for the king, and a boom comes in commercial commodities.

If there is a solar eclipse in the sign Gemini, a boom comes in the seven grains and in juice-type substances, and profit can come within two months by stocking them. And if there is a lunar eclipse, a boom comes in commercial commodities, and hardship comes to the people living on the banks of the Yamuna and to the inhabitants of the Bahlika (Balkh) country.

If there is an eclipse of the Sun or the Moon in the sign Cancer, suffering comes to animals such as cows, oxen, buffaloes, donkeys and camels. Wheat, barley, rice, grain

— Source PDF page 142 (book page 143) —

jaggery, oil, ghee, milk, curd and the like a boom comes. Profit comes in two months by stocking commercial commodities.

If there is an eclipse of the Sun or the Moon in the sign Leo, suffering comes to forest-dwellers, men, animals and kings. A boom comes in all substances: grain, mustard, linseed, castor, cotton, raw cotton, sesame, oil and the like.

If there is an eclipse of the Sun or the Moon in the sign Virgo, suffering comes to poets, writers and singers. For people whose sign is Virgo, there is a possibility of loss of both wealth and honour. In metals, roots and the like, after good rises and falls, the trend remains only toward a boom.

If there is an eclipse of the Sun or the Moon in the sign Libra, suffering comes to holy men and ascetics, and to palanquin-bearers (kahar) and to the peoples of Maru (the desert region), Val and Dasharna.

An eclipse of the Sun or Moon in the sign Scorpio is harmful for all.

If there is an eclipse of the Sun or the Moon in the sign Sagittarius, it is harmful to the inhabitants of Panchal and Madhya Pradesh, and to Vaishyas, physicians and the like.

If there is an eclipse of the Sun or the Moon in the sign Capricorn, suffering and loss come to water creatures and to boatmen, and a boom comes in metals or gems produced from water.

If there is an eclipse of the Sun or the Moon in the sign Aquarius, a boom comes in substances such as sesame, oil, mustard and castor; and suffering comes to thieves, elephants, and the mountain-dwellers of the western countries.

If there is an eclipse of the Sun or the Moon in the sign Pisces, a boom comes in commodities produced from water and in juice-type substances, and suffering comes to those who obtain their livelihood from water, such as boatmen.

— Source PDF page 143 (book page 144) —

Eclipses in the Nakshatras:

If there is a solar eclipse in the nakshatra Ashwini, a very great boom comes in ghee, oil, jaggery, khand, vegetable (vegetable ghee) and juice-type substances; and if there is a lunar eclipse, a slump comes in juice-type substances within two months.

If there is an eclipse of the Sun or the Moon in the nakshatra Bharani, there is a boom in all grains and in cotton, paat (jute), sacking and metals, and an ordinary boom in juice-type substances.

If there is a solar eclipse in the nakshatra Krittika, there is a boom in gold, silver, gems, rubies, jewels, metals and shares, and in juice-type substances there are ordinary rises and falls but the trend remains toward a boom; and if there is a lunar eclipse, there are combinations for a slump in them.

If there is a solar eclipse in the nakshatra Rohini, profit comes from stocking cotton, raw cotton, paat, sacking, thread, grains of all kinds, salt, oil, sesame, grocery goods, grass, timber, ghee, green gram and urad. And if there is a lunar eclipse, it is slump-causing.

If there is a solar eclipse in the nakshatra Mrigashira, there is a boom in gold, silver, shares, jaggery, khand, ghee, oil, rice and wheat. And if there is a lunar eclipse, there is a slump in

the first half and a boom in the latter half.

If there is an eclipse of the Sun or the Moon in the nakshatra Ardra, a boom comes in all substances such as ghee, oil, iron and grain.

If there is an eclipse of the Sun or the Moon in the nakshatra Punarvasu, stocking cotton, raw cotton, paat, sacking, rice, grain, wheat, gram, barley, peas and pigeon pea gives good profit within three months.

If there is an eclipse of the Sun or the Moon in the nakshatra Pushya, shares, gold,

— Source PDF page 144 (book page 145) —

silver, copper and other metals boom, and profit comes from stocking wheat.

If there is an eclipse of the Sun or the Moon in the nakshatra Ashlesha, profit comes from stocking guar, pearl millet, sorghum, wheat, gram, turmeric, coriander, madder, copper, gold, silver, jaggery and the like.

If there is an eclipse of the Sun and Moon in the nakshatra Magha, there is a full possibility of profit from stocking gram.

If there is an eclipse of the Sun or the Moon in the nakshatras Purva Phalguni, Uttara Phalguni and Hasta, a boom comes in the seven grains and the like, in linseed, castor, raw cotton, cotton, thread, sesame, oil and the like. Profit can also be taken from stocking gram.

If there is an eclipse of the Sun or the Moon in the nakshatra Chitra, there is a full possibility of future profit from stocking grains such as sorghum and pearl millet.

If there is an eclipse of the Sun or the Moon in the nakshatra Swati, a boom comes in wheat, gram, barley, sorghum, pearl millet, urad, green gram and the like.

If there is an eclipse of the Sun or the Moon in the nakshatra Vishakha, profit can be taken from stocking kulthi (horse gram) and juice-type substances.

If there is an eclipse of the Sun or the Moon in the nakshatra Anuradha, profit can be taken from stocking coarse grains such as kodo and sama (barnyard millet).

If there is an eclipse of the Sun or the Moon in the nakshatra Jyeshtha, a boom comes in jaggery, khand, sugar and the like.

If there is an eclipse of the Sun or the Moon in the nakshatra Mula, profit comes soon, in the future, from stocking rice, grain and the like.

— Source PDF page 145 (book page 146) —

If there is an eclipse of the Sun or the Moon in the nakshatra Purva Ashadha, a very great boom comes in white cloth.

If there is an eclipse of the Sun or the Moon in the nakshatra Uttara Ashadha, a boom comes in grocery goods such as coconut and betel nut.

If there is an eclipse of the Sun or the Moon in the nakshatra Shravana, a boom comes in animals used as vehicles, such as elephants, horses and camels.

If there is an eclipse of the Sun or the Moon in the nakshatra Dhanishtha, profit will come from stocking pulses such as green gram, urad, pigeon pea, lentils and moth.

If there is an eclipse of the Sun or the Moon in the nakshatra Shatabhisha, a boom comes in grains such as wheat, barley and gram.

If there is an eclipse of the Sun or the Moon in the nakshatra Purva Bhadrapada, a boom comes in substances such as sesame and oil.

If there is an eclipse of the Sun or the Moon in the nakshatra Uttara Bhadrapada, a boom comes in commodities such as salt and alkali.

If there is an eclipse of the Sun or the Moon in the nakshatra Revati, profit can be taken from stocking pulses such as urad and green gram.

If there are strong portents (utpat) before an eclipse and rain after the eclipse, all the evils that threatened are pacified. If at the beginning or end of the eclipse there is no kind of disturbance, and water creatures are produced in greater numbers, the rain is excellent and the public remains happy. If a lunar eclipse comes 15 days after a solar eclipse, religion increases, the writers of scripture are honoured, and a great man arises.

If the eclipse of the Sun or the Moon is one that begins at rising or ends at setting (grastodaya or grastasta), there is a boom in grain, a possibility of war, and a fear of famine.

[End of Chapter Five (The Influence of Eclipses on Markets), book pages 138-146.]

Chapter Six

Rises and Falls in Rates through the Movement of the Sun and Other Planets through the Signs and Nakshatras

It has already been stated that the planets keep all things under their control, and which planet is the lord of what colour. Even so, we wish to make a few further matters clearer here. The planet that is the lord of a given commodity, or, to put it another way, the planet that has natural authority over a given commodity: for example, among black things (iron, mustard, oil, urad and the like) the lord is Saturn; among red things (red grain, jaggery, paat, sacking, red cloth and the like) it is Mars; and among white things (silver, milk, curd, ghee, rice, white grain, cotton and the like) the lords are the Moon and Venus. In this way the lords of all substances, whether metal, root or living, have been fixed. If a planet is in its sign of exaltation or in a friend's sign, and is under the aspect of a benefic planet, then that lord planet increases the production and stock of the commodity of which it is the lord. Therefore, with the increase (abundance) of that commodity, the signs of a slump appear. On the contrary, if the planet that is lord of the commodity is situated in a sign of debilitation, is with an enemy planet, or is under the aspect of a cruel planet, then that lord planet harms the production of that commodity. With the increase of demand the idea of a boom comes to the market. Now we

will write briefly, one by one, the considerations for each planet according to its position.

Consideration through the Sun in the Signs, Beginning with Aries:

If the Sun is in the sign Aries, there is a boom in cotton, raw cotton, thread, coconut, betel nut, almonds, fruits of all kinds, jaggery, khand, sugar, sugarcane, sesame, oil, mustard, silver, gold and the like, that is, in all commodities, and a slump comes in all grains: wheat, gram, barley, peas, pigeon pea, urad, green gram and rice.

If the Sun is in the sign Taurus, there is happiness and peace among the public. The production of grain is also good, but there is an ordinary boom in the prices of grain and the like, and a boom in raw cotton, cotton, thread, cloth and gold, while in silver rises and falls go on.

If the Sun is in the sign Gemini, there is a boom in cotton, thread, raw cotton, paat, sacking, silk, mustard, iron, sesame, oil, tubers, roots, fruit, jaggery, khand, country sugar, sugar, ghee, urad, green gram, rice, wheat, gram, pigeon pea, peas and the like, and an ordinary boom in gold and silver.

If the Sun is in the sign Cancer, grain is high in some countries and slack in others. There is a boom in silver. If the Sun is on the nakshatra Ashlesha, then, through a shortage of rain, it makes booms in grain in some places. A slump comes in coconut, sesame, oil and madder.

If the Sun is in the sign Leo, there is a boom in sugarcane, jaggery, khand, sugar, cotton, all red-coloured things, mustard, sesame, oil and gems, and some slump comes in grain. There is a good boom in gold, silver and shares.

If the Sun is in the sign Virgo, cotton, thread, cloth, coconut, betel nut,

— Source PDF page 148 (book page 149; this page was scanned upside down and was turned the right way up before reading) —

dry fruit, madder, red cloth, castor, oil, sesame, mustard, gold, silver, iron, copper, brass, shares and the like, a slump comes.

If the Sun is in the sign Libra, the prices of wheat, barley, gram and grain are high. There is a slump in cotton and silver. There is destruction of elephants and a boom in gold. There is also an ordinary boom in coconut, betel nut, red sandalwood and madder.

If the Sun is in the sign Scorpio, the prices of grain and the like remain level. And there is a boom in gold, silver, copper, woollen cloth, cotton, mustard and the like; and a slump comes in red chilli, red sandalwood and other red-coloured things. The effect of cold increases.

If the Sun is in the sign Sagittarius, because it brings plenty, a slump comes in grain and the like; and there is a boom in gold, silver, cotton, sesame, oil, raw cotton and the like.

If the Sun is in the sign Capricorn, there is a boom in jaggery, khand, sugar, ghee, oil, cotton and the like, and a slump in grain and the like. The trend of sacking inclines somewhat toward a slump, and in gold, silver and shares the trend is also only of slump.

If the Sun is in the sign Aquarius, there is a slump in grain, cotton, paat, sacking, jaggery, khand and sugar, and a boom comes in salt, oil, mustard, groundnut, linseed, rape and the like.

If the Sun is in the sign Pisces, there is a boom in raw cotton, cotton, silver, gold, jaggery, khand, sugar, linseed, sesame, oil, mustard and the like, and in grain and the like there is first a boom and afterwards the trend inclines somewhat toward a slump.

— Source PDF page 149 (book page 150) —

Note: Staying in the above signs, Aries and the rest, whatever result the Sun gives by its natural motion, that has been written. But to know the correct result it is necessary that one fix the boom or slump only after keeping in mind place, time, the aspect and vedha of benefic and malefic planets, and the like.

Consideration through the Sun in the Nakshatras:

If the Sun is in the nakshatra Ashwini, there is a boom in gold, silver, linseed, sesame, oil, grain, iron, copper, thread, cloth, betel nut, coconut, red sandalwood, fenugreek, cloves, cardamom, asafoetida, castor and the like, and in cotton there is first a slump and afterwards a boom.

With the Sun in the nakshatra Bharani, a boom comes in metals such as gold, silver, copper and brass, in rice, wheat, barley, gram, moth, linseed, mustard, rape, jaggery, khand, ghee and the like, and a slump remains in cotton. The public suffers from terrible diseases such as cholera.

If the Sun is in the nakshatra Krittika, it makes a boom in gold, silver, cotton, linseed, wheat, barley, gram, rice, mustard, green gram, moth and the like, and suffering comes to those who perfect tantra and mantra, to fire-sacrificers (agnihotris), potters, barbers, astrologers and grammarians.

If the Sun is on the nakshatra Rohini, the prices of wheat, barley, gram, jaggery, khand, ghee, sorghum, pearl millet, mustard, oil, sesame, castor, linseed, thread, hemp and the like stay high. A slump comes in silver and the like. An ordinary boom remains in cotton. Suffering comes to bankers, yogis, farmers and machine-operators, and sorrow to animals and aquatic creatures.

— Source PDF page 150 (book page 151) —

If the Sun is in the nakshatra Mrigashira, a boom comes in gold, silver, grain, cotton, silk, thread, hemp, camphor, musk, urad, green gram, moth, pearl millet, linseed and the like. Disease spreads among animals, the wind blows more, and the time is excellent.

With the Sun in the nakshatra Ardra, there is a boom in cotton, thread, raw cotton, linseed, mustard, castor, jaggery, khand, oilcake, rice, gems, pearls, grain, wheat, barley, gram, camphor and silver, and a boom in gold after some rises and falls. Lawyers have some sorrow, and some combinations for rain also form.

If the Sun is in the nakshatra Punarvasu, there is a boom in silver, gold, raw cotton, cottonseed, sesame, sorghum, moth, pearl millet, urad, linseed, mustard, jaggery, khand, rice, salt, castor, indigo, vegetables, madder, majuphal (oak gall), saffron, safflower and fragrant substances. Sorrow comes to handsome men and to servants, and in some places the rain is good.

If the Sun is in the nakshatra Pushya, there is a boom in sesame, oil, mustard, liquor, jaggery, khand, sorghum, pearl millet, betel nut, coconut, dry ginger, guggul, gold, silver and the like, and in cotton a boom comes first and a slump afterwards. Suffering comes to holy men, saints and boatmen.

If the Sun is in the nakshatra Ashlesha, there is a boom in gold, silver, cotton, cottonseed, wheat, rice, jaggery, sugar, ghee, oil, mustard, sesame, gram, urad and the like. Disturbances arise in the regions of the north-east (Ishana) corner.

If the Sun is in the nakshatra Magha, there is a boom in sorghum, pearl millet, castor, grapes, chilli, silver, cotton, raw cotton, mustard and the like, and there is rain everywhere.

If the Sun is in the nakshatra Purva Phalguni, a greater boom comes in gold

— Source PDF page 151 (book page 152) —

and also brings a boom in silver, cotton, thread, rice, wheat, jaggery, khand, sesame, oil, mustard, sorghum, ghee, woollen cloth and the like.

If the Sun is in the nakshatra Uttara Phalguni, it makes a boom in gold, silver, iron, sesame, oil, mustard, ghee, rice, urad, coconut, betel nut, munj (reed grass), bamboo, indigo and the like. Disease spreads among animals.

If the Sun is in the nakshatra Hasta, a boom comes in wheat, gram, barley, jaggery, khand, thread, jute, cotton, turmeric, asafoetida, coriander, grass, timber, salt, cotton and the like.

If the Sun is in the nakshatra Chitra, a boom remains in wheat, gram, raw cotton, cotton, gold, silver, jaggery, khand, pigeon pea, lac, shellac (chapda), saffron, camphor and the like, and the public is gripped by diseases such as fever.

If the Sun is in the nakshatra Swati, a boom comes in gold, silver, cotton, thread, cloth, jaggery, sugar, cottonseed, betel nut, chilli, mustard, linseed, rape, asafoetida and the like.

If the Sun is in the nakshatra Vishakha, a boom comes in silver, rice, jaggery, khand, cotton, thread, wheat, barley, gram, mustard, sesame and the like. There are disturbances in the east and south.

If the Sun is in the nakshatra Anuradha, there is a boom in grains such as wheat, barley and gram. A slump comes in gold, silver and the like. Suffering comes to devotees.

If the Sun is in the nakshatra Jyeshtha, a boom comes in gold, silver, wheat, barley, gram, rice, mustard, jaggery, khand, sugar, linseed, mercury, asafoetida, castor, guggul and the like, and in cotton there is first a slump and afterwards a boom.

— Source PDF page 152 (book page 153) —

With the Sun in the nakshatra Mula, a boom comes in gold, silver, cotton, raw cotton, thread, linseed and the like, and there are disturbances in Malwa.

If the Sun is in the nakshatra Purva Ashadha, a boom comes in sesame, oil, mustard, jaggery, khand, turmeric, guggul, silver, camphor, woollen cloth, hemp and the like. The effect of cold increases.

If the Sun is in the nakshatra Uttara Ashadha, a boom comes in urad, green gram, rice, wheat, jaggery, khand, country sugar, cotton, raw cotton, ghee, mustard, gram and the like.

If the Sun is in the nakshatra Shravana, a boom comes in gold, silver, cotton, rice, barley, wheat, thread, hemp, jaggery, khand, jute and the like.

If the Sun is moving through the nakshatra Dhanishtha, a boom comes in metals such as gold and silver, in grain and the like, cotton, linseed, oilseeds and the like.

If the Sun is in the nakshatra Shatabhisha, a boom comes in cotton, silver, gold, thread, raw cotton, wheat, jaggery, khand, mustard, sesame, oil, grapes, nutmeg, turmeric and the like.

If the Sun is in the nakshatra Purva Bhadrapada, a boom comes in cotton, raw cotton, thread, gold, silver, wheat, gram, mustard, sesame, oil, jaggery, khand, ghee, rice, sorghum,

pearl millet, guggul, silk and the like. The time passes for the public in happiness and peace.

If the Sun is in the nakshatra Uttara Bhadrapada, a boom comes in gold, silver, cotton, jaggery, khand, sugar and wheat.

If the Sun is in the nakshatra Revati, a boom comes in cotton, rice, silver, salt, mustard, linseed, lac, wheat, barley, gram and the like.

Special point to be noted: this natural effect of the Sun in a sign and nakshatra

— Source PDF page 153 (book page 154) —

is written. In it, through the conjunction, aspect, nakshatra-vedha and the like of benefic and malefic planets, there may also be a lessening, an excess or even a reversal in the result. The Sun enters the same sign and nakshatra again every year after 365 days and 15 ghadis. Each year the Sun stays in the sign Aries from 13 April to 13 May, and in the nakshatra Ashwini it stays every year from 13 to 27 April; therefore the boom and slump of those same commodities in those same fixed tithis is not always the same every year. Because the combination, aspect, vedha and the like of other planets also act on this, the natural results of the planets keep varying, more or less, in strength each year. In the same way, learned astrologers should also investigate the natural results of the other planets.

Consideration through the Moon in the Signs, Beginning with Aries:

If the Moon is in the sign Aries, there is a slump in gold, silver, cotton and the like, a boom in grain and the like, and in the rainy season there is a lack of rain.

If the Moon is in the sign Taurus, there is a boom in silver, cotton, wheat, gram, linseed, urad, sesame, groundnut and the like, and a slump in animals. This combination is excellent for rain.

If the Moon is in the sign Gemini, it brings a boom in cotton, thread, wheat, gram and the like, and in the rainy season it causes rain.

If the Moon is in the sign Cancer, a slump comes from gold, silver, cotton and the like. This slump is to be understood only when the Moon is with some benefic planet or is under the full aspect of some benefic planet.

If the Moon is in the sign Leo, a boom comes in gold, silver, cotton, grass and the like

— Source PDF page 154 (book page 155) —

grows, and disease and the like increase among animals.

If the Moon is in the sign Virgo, a boom comes in gold, silver, cotton and the like, and in rape, mustard, madder, cumin, coriander and other grocery goods.

If the Moon is in the sign Libra, a slump comes in gold, silver, cotton, raw cotton, thread, mustard, groundnut, ghee and rice, and in the rainy season the force of wind is greater.

If the Moon is in the sign Scorpio, the effect of a slump falls on gold, silver, cotton and the like, and in the rainy season there is ordinary rain.

If the Moon is in the sign Sagittarius, it causes a slump in gold, silver, cotton, sesame, oil, mustard, thread, cloth, hemp and the like, and in the rainy season it certainly causes rain.

If the Moon is in the sign Capricorn, it will cause a boom in gold, silver, iron, copper, brass, cotton, thread, cloth and the like, and it will rain in the rainy season.

If the Moon is in the sign Aquarius, there is a boom in sesame, oil, mustard, groundnut and the like. It causes a slump in silver, gold, cotton, raw cotton, thread and the like.

If the Moon is in the sign Pisces, a slump comes in gold, silver, cotton, raw cotton, thread, hemp, cottonseed and the like, and in the rainy season the rain is excellent.

Consideration through the Moon in the Nakshatras:

If the Moon is in the nakshatra Ashwini, a slump comes in grain, gold, silver, cotton and the like.

— Source PDF page 155 (book page 156) —

If the Moon is in the nakshatra Bharani, a slump comes in salt, cotton and silver.

If the Moon is in the nakshatra Krittika, a slump comes in silver, and in cotton a boom comes after rises and falls.

If the Moon is in the nakshatra Rohini, a boom comes in jaggery, khand, cotton, raw cotton, wheat, gram and the like.

If the Moon is in the nakshatra Mrigashira, a slump comes in gold, silver, cotton, raw cotton, mustard and groundnut.

If the Moon is in the nakshatra Ardra, a boom comes in gold, silver, jaggery, khand, salt, alkali, iron, copper and the like.

If the Moon is in the nakshatra Punarvasu, a slump comes in wheat, barley, gram, green gram, urad, gold, silver and cotton.

If the Moon is in the nakshatra Pushya, a slump comes in gold, silver, jaggery, khand, cotton, raw cotton, groundnut, wheat and the like.

If the Moon is in the nakshatra Ashlesha, a slump comes in silver, gold, brass, cotton, raw cotton, thread, hemp and the like.

If the Moon is in the nakshatra Magha, a boom comes in gold, silver, cotton and the like after rises and falls.

If the Moon is in the nakshatra Purva Phalguni, a slump comes in jaggery, khand, wheat, barley, gram, salt, cotton and silver.

If the Moon is in the nakshatra Uttara Phalguni, a slump comes in gold, silver, iron, copper and brass, and a boom in intoxicating substances such as bhang (cannabis) and charas (hashish).

If the Moon is in the nakshatra Hasta, a slump comes in metals such as gold, silver, iron and copper, and a boom in indigo, oil and groundnut.

— Source PDF page 156 (book page 157) —

If the Moon is in the nakshatra Chitra, the prices of gold, silver, cotton, raw cotton, green gram, urad, wheat and gram become high.

If the Moon is in the nakshatra Swati, a slump comes in silver, gold, cotton, thread, hemp, mustard and woollen cloth.

If the Moon is in the nakshatra Vishakha, a boom comes in gold, silver, cotton, thread, cloth and the like, and a slump in mustard, sesame, oil and the like.

If the Moon is in the nakshatra Anuradha, a slump comes in metals such as gold and silver and in articles made from them.

If the Moon is in the nakshatra Jyeshtha, a slump comes in cotton and silver.

If the Moon is in the nakshatra Mula, a slump comes in silver, gold, cotton, thread, cloth, hemp and the like.

If the Moon is in the nakshatra Purva Ashadha, a slump comes in gold, brass, jaggery, khand, wheat and the like.

If the Moon is in the nakshatra Uttara Ashadha, a slump comes in grain, jaggery, khand, salt and fruits.

If the Moon is in the nakshatra Shravana, a boom comes in grains and a slump in gold, silver, cotton and mustard.

If the Moon is in the nakshatra Dhanishtha, a boom comes in metals such as gold and silver, and a slump in jaggery, khand and sugar.

If the Moon is in the nakshatra Shatabhisha, there is a slump in gold, copper, woollen cloth, cotton, thread, hemp, jaggery and khand, and an ordinary boom in silver.

If the Moon is in the nakshatra Purva Bhadrapada, a slump comes in wheat, barley, gram, green gram, moth, gold, silver, cotton and the like.

— Source PDF page 157 (book page 158) —

If the Moon is in the nakshatra Uttara Bhadrapada, a slump comes in gold, silver, cotton, thread, cloth and the like.

If the Moon is in the nakshatra Revati, an ordinary slump comes in gold and a very great slump in silver.

Consideration through the Planet Mars:

Mars stays in one sign for about a month and a half. But sometimes, becoming retrograde and then direct, it keeps moving round in the same one sign for 6 months. When Mars sets in some sign, after 4 months it rises, and 10 months after rising it becomes retrograde. And two months after becoming retrograde it becomes direct. It is not necessary that the sign in which Mars sets is also the sign in which it rises. If Mars sets in any sign, it will be seen in the sky in the state of rising after 4 months, and only ten months after that it will become retrograde. In the same way, if Mars becomes retrograde in any sign, it becomes direct only two months after that.

The motion of Mars in which it moves round in one sign for 6 months comes about, by mathematical rule, in the third or fourth year. The reason is this: when Mars is of slow motion at the time of entering a sign, it moves round in that sign for a sufficient time, and then, with its slow motion in that sign decreasing and decreasing until it becomes very slow, and being in the retrograde state, Mars begins to move backward in that same sign, and in that same sign it becomes direct and then moves forward. In this way, staying for a longer time in the one sign alone

— Source PDF page 158 (book page 159) —

it keeps moving, and that time comes to 6 months. Sometimes this time reaches 7 or 8 months.

Whenever Mars moves round in one sign for 6 months, if in those days it forms a conjunction with cruel planets or has an aspect-relationship with cruel planets alone, it brings a boom in all things in the market, and there is a heavy upheaval in the price of every commodity. If in the meantime some "ankusha" (goad) combination forms, the market, taking a rebound from high prices, moves toward low prices; and if it forms conjunctions with such cruel planets as stay for a long time in one sign, for example if Mars forms some combination with Saturn, Rahu and Ketu, this condition of the market lasts for 6 months. In the same way, if it forms a conjunction with benefic planets and has an aspect-relationship with benefic planets, it causes a slump; and if it forms some great aspect-combination with Jupiter, or if Mars and Jupiter stay in one sign for a long period, the trend of the market will remain slack for a long time. If at such a time some ankusha combination is forming, the market, taking a rebound from the slump, moves toward a boom.

Mars is extremely clear, of red colour, with distinct rays, and of a coppery brilliance. If Mars, in the above-stated condition, moves round on the nakshatras of the northern lane (vithika), it brings plenty, good rain and a slump in all commodities; and if it moves round on the nakshatras of the southern lane, dark in colour, rough, flame-like and with (harsh) rays, it brings lack of rain, famine and a boom in all commodities.

Consideration through Mars in the Signs:

If Mars is in the sign Aries, it brings plenty. Wheat, barley,

— Source PDF page 159 (book page 160) —

gram, green gram, moth, sorghum, pearl millet, pigeon pea and the like are in a slump. A boom comes in metals such as gold and silver, in gems such as coral and pearl, juice-type substances, cotton, raw cotton, paat and sacking. In jaggery, khand and the like, after rises and falls, a slump comes; there is agitation among kings and a growth of dark (tamas) tendencies, and there is strife among the public.

If Mars is in the sign Taurus, a boom comes in red-coloured things, red cloth, red sandalwood, jute, paat, sacking, cotton, raw cotton, thread, grain of every kind, camphor, saffron, oil, gold, silver, copper, zinc and other metals and in shares and the like. With the conjunction of a benefic planet the boom is somewhat less; but with the conjunction of a cruel planet a greater boom comes.

If Mars is in the sign Gemini, it is rain-bringing. It brings a boom in jaggery, khand, linseed, cotton and red-coloured things. With the combination of a benefic planet it is slump-causing, but it makes an ordinary boom in red-coloured things. With the combination of a cruel planet it is boom-causing, and makes a heavy boom in red-coloured things.

If Mars is in the sign Cancer, a boom comes in all grains and in jaggery, khand, sugar, cotton, ghee, oil, mustard, linseed, castor and grains. There are rises and falls in silver. If there are combinations with cruel planets, a good boom comes in the commodities stated above.

If Mars is in the sign Leo, a boom comes in all metals such as gold and silver, in jaggery, khand, sugar, cotton, red chilli, linseed, red cloth, weapons, iron and the like. With the combination of a cruel planet a still greater boom forms; but with the combinations of benefic planets there is some reduction in the good boom.

— Source PDF page 160 (book page 161) —

If Mars is in the sign Virgo, a boom comes in metals such as gold and silver; in cotton, thread, sandalwood, paat, sacking, hessian, red cloth, woollen, cotton and silk cloth, linseed, red chilli and all red-coloured things and goods.

If Mars is in the sign Libra, it brings a boom in cotton, raw cotton, thread, urad, green gram, all grains, juice-type substances, all metals, jute, paat, sacking, jaggery, khand, groundnut, wheat and the like. With the combination of a cruel planet it makes a very great boom, and with the combination of a benefic planet it will make an ordinary boom.

If Mars is in the sign Scorpio, a good boom comes in all commodities, and especially in gold, silver and cotton. The policy of the government is full of faults and the public is afflicted by disease.

If Mars is in the sign Sagittarius, grain, grass, ghee, root-type substances, juices, raw cotton, cotton, thread, hemp, gold, silver and other metals, cottonseed, mustard and all kinds of grain are high.

If Mars is in the sign Capricorn, a boom comes in ghee, juice-type substances, oil, gold, silver, jaggery, khand and copper, and a slump comes in grains. With the combination of benefic planets there is special plenty.

If Mars is in the sign Aquarius, it is boom-causing. There is a boom in grain, gold, jaggery and khand. In cotton and silver there are special rises and falls. With the combination of cruel planets there is a greater boom, and with the combination of benefic planets a slump comes.

If Mars is in the sign Pisces, a boom comes in gold, silver, cotton, and in things made of grass and wood. The sign Pisces is boom-causing; but sometimes it has also been slump-causing even when there is a combination of cruel planets.

— Source PDF page 161 (book page 162) —

Consideration through Mars in the Nakshatras:

If Mars is in the nakshatra Ashwini, there is a boom in wheat, sorghum, pearl millet, green gram, gram, cotton, gold, jaggery, khand and the like. A slump comes in silver and the like.

If Mars is in the nakshatra Bharani, a boom comes in grain of every kind and in gold, silver and cotton. Suffering comes to the twice-born (Brahmins).

If Mars is in the nakshatra Krittika, there is a boom in silver, rice, thread, cloth, sesame, oil, mustard, ghee, wheat, rape, lentils, moth, green gram and the like, and in cotton a boom comes first, but afterwards a slump follows.

If Mars is in the nakshatra Rohini, a boom comes in cotton, raw cotton, thread, jaggery, khand, silk, asafoetida, red chilli, mustard, oil, sesame and the like.

If Mars is in the nakshatra Mrigashira, there is a boom in silver and cotton, and agriculture of raw cotton suffers damage from many causes.

If Mars is on the nakshatra Ardra, a boom comes in jaggery, khand, linseed, cotton, thread, salt, sesame, oil and the like, and a slump remains in silver.

If Mars is in the nakshatra Punarvasu, a boom comes in cotton, raw cotton, silver, salt, khand, sesame, oil, mustard and the like, and disease and the like increase among animals.

If Mars is in the nakshatra Pushya, there is a very great boom in gold, rises and falls in silver and cotton, fear of thieves and the like, new troubles every day, and a growth of feelings of mutual hatred.

If Mars is in the nakshatra Ashlesha, there is a slump in silver and cotton. A boom comes in all grains. Through lack of rain, locusts and the like, agriculture suffers heavy damage.

— Source PDF page 162 (book page 163) —

If Mars is in the nakshatra Magha, a boom comes in sesame, groundnut, moth, green gram, rape, mustard, urad, oil and grains. There is a lack of rain.

If Mars is in the nakshatra Purva Phalguni, a boom comes in jaggery, khand, salt, oil, sesame, mustard, lac, groundnut and ghee. There is a lack of rain and hardship for the public.

If Mars is in the nakshatra Uttara Phalguni, a boom comes in jaggery, khand, sugar and the like. There is rain. Animals suffer from disease and the like.

If Mars is in the nakshatra Hasta, a boom comes in ghee, jaggery, khand, grain, salt and grains. There is a lack of rain.

If Mars is in the nakshatra Chitra, there is a boom in wheat, barley, gram, rice, silver, gold, brass, copper and the like. The public suffers severe hardship from contagious diseases such as cholera.

If Mars is in the nakshatra Swati, there is a boom in wheat, sesame, cotton and the like. In silver there are rises and falls, and in gold an ordinary slump comes.

If Mars is in the nakshatra Vishakha, a boom comes in raw cotton, cotton, cloth, wheat and the like.

If Mars is in the nakshatra Anuradha, a boom comes in wheat, red chilli, red sandalwood, red dyes and other red-coloured things. There is plenty. Disease and the like increase among animals.

If Mars is in the nakshatra Jyeshtha, there is a slump in silver and rises and falls in cotton. There is a lack of rain, and the public remains very much afflicted by disease and the like.

— Source PDF page 163 (book page 164) —

If Mars is in the nakshatra Mula, a boom comes in grain, silver, rice, gold, cotton and the like. Suffering falls on the twice-born (Brahmins) and on brave men.

If Mars is in the nakshatra Purva Ashadha, there is a boom in gold, silver, rice, ghee, groundnut, urad and the like, and a slump comes in grain and the like.

If Mars is in the nakshatra Uttara Ashadha, a boom comes in ghee, oil, urad, grain, mustard and the like, and a very great boom in cotton. The rain is good.

If Mars is in the nakshatra Shravana, a slump comes in grains, an ordinary boom in gold and silver, rises and falls in cotton, and a boom in wheat, barley, gram and the like. Disease and the like increase among the public.

If Mars is in the nakshatra Dhanishtha, a boom comes in gold, silver, wheat, jaggery, sugar, copper, brass, zinc, iron and the like. The public remains happy.

If Mars is in the nakshatra Shatabhisha, there is first a slump and afterwards a boom in gold, silver, cotton and the like. There is a slump in grains.

If Mars is in the nakshatra Purva Bhadrapada, a boom comes in gold, silver, linseed, mustard, sesame, groundnut, coconut, betel nut, oil, cotton, raw cotton, thread and the like.

If Mars is on the nakshatra Uttara Bhadrapada, a boom comes in gold, silver, cotton, wheat, barley, gram and other grains, and in fragrant substances such as sandalwood and camphor.

If Mars is in the nakshatra Revati, there is a very great boom in silver. A slump in wheat, barley, gram, green gram, moth, sorghum, pearl millet and the like. An ordinary slump in gold. In cotton a boom comes after rises and falls.

— Source PDF page 164 (book page 165) —

Consideration through the Rising of Mars:

When Mars rises, it rains in the south-western regions. It is a cause of distress to the trading class. And it is boom-causing in cotton, linseed and the like.

When Mars rises in the sign Aries, it causes a boom in urad, sesame and the like. When it rises in the sign Taurus, it is harmful to milch animals and to animals used as vehicles. When it rises in the sign Gemini, it is boom-causing for grain and the like. The rising of Mars in the sign Cancer is a cause of very heavy rain and of greater production of grain, and a cause of great distress to the trading class. If the rising of Mars is in the sign Leo, there is a boom in rice and the like. It is a cause of distress to learned people. If the rising of Mars is in the sign Virgo, the production of grain is good, and distress comes to those who give orders (rulers) and to pleasure-seeking people. If the rising of Mars is in the sign Libra, it is a cause of plenty, but the public remains in sorrow from fear of thieves, fire and the like and from the wicked policy of the government. If the rising of Mars is in the sign Scorpio, it greatly increases the production of grain. The rising of Mars in the sign Sagittarius is rain-bringing. If Mars rises in the sign Capricorn, it brings a boom in rice, jaggery and the like. It causes an increase of ghee and of red-coloured things. In the western regions there is destruction of grain. It causes either excess rain or a lack of rain. If the rising of Mars is in the sign Aquarius, harm comes to the farming of grain from locusts and rats or from excess rain. A boom comes in jaggery, ghee and red-coloured things. In Pisces

— Source PDF page 165 (book page 166) —

the rising of Mars in the sign (Pisces) brings a lack of rain, and a possibility of famine also appears.

Consideration through the Setting (Asta) of Mars:

If Mars sets in the sign Aries, a boom comes in stone. If Mars sets in the sign Taurus, there is a slump in all commodities such as grass. If Mars sets in the sign Gemini, there is excess rain in some places and ordinary rain in others. The setting of Mars in the sign Cancer destroys grain. If Mars sets in the sign Leo, a boom comes in animals and suffering falls on the fleet-footed (khanjan birds or the like; the word is "khanjar"). The setting of Mars in the sign Virgo is boom-causing for wheat, gram and the like. If Mars sets in the sign Libra, a boom comes in grains. If Mars sets in the sign Scorpio, there is plenty and fear from the ruler. If Mars sets in the sign Sagittarius, a boom comes in rice, husk, grain, agar and the like. If Mars sets in the sign Capricorn, there is very heavy rain. The public remains in

sorrow from the disturbances of thieves and the like. When Mars sets in the sign Aquarius, rebellion against the ruler, unrest and the like increase. The setting of Mars in the sign Pisces is a cause of plenty, of rising happiness and of fear of snakes.

[Translator's note: the printed word at "suffering falls on ..." is hard to read ("khanjar"); it may mean wagtails or similar birds. I have left it as is.]

Consideration through Retrograde and Direct Mars:

When Mars is retrograde it is a cause of famine and great fear, and is boom-causing in red-coloured things and a cause of lack of rain. In whatever sign Mars is retrograde, it certainly causes a boom in the commodities under that sign's authority. And when Mars is direct, it causes a slump in cotton and the like.

— Source PDF page 166 (book page 167) —

If Mars is retrograde in the sign Aries, it causes special sorrow and famine. If Mars is retrograde together with Saturn in these nakshatras, Revati, Ashwini, Mrigashira, Pushya, Mula, Hasta and Anuradha, it is very painful and troublesome; and if Mars is direct in the sign Aries, a slump comes in animals and a possibility of political strife remains.

If Mars is retrograde in the sign Taurus, it causes famine, political change and fear among the public; and if Mars is direct in the sign Taurus, in cotton a boom comes and afterwards a slump. In silver there are rises and falls.

If Mars is retrograde in the sign Gemini, there is a great war, famine and destruction of grain; and if Mars is direct in the sign Gemini, there is a possibility of war in the Western countries.

If Mars is retrograde in the sign Cancer, there are rises and falls in the prices of wheat, linseed and the like and political upheaval; and if Mars is direct in the sign Cancer, an increase of epidemics and other diseases takes place.

Mars retrograde in the sign Leo is a cause of famine, war and disturbance and of destruction of grain; and Mars direct in the sign Leo makes a boom in linseed, wheat and the like within 1 month.

If Mars is retrograde in the sign Virgo, it is a cause of famine, of battle and of loss of life; and if Mars is direct in the sign Virgo, there is a boom and afterwards a slump in cotton, linseed, wheat, oil and the like.

If Mars is retrograde in the sign Libra, it is a cause of famine.

— Source PDF page 167 (book page 168) —

there is a possibility of political change and an increase of fear and the like among the public; and if Mars is direct in the sign Libra, there is a full possibility of famine in the southern regions.

If Mars is retrograde on the sign Scorpio, the production of grain is greater and there are meteor-falls (utkapat); and if Mars is direct in the sign Scorpio, epidemics spread among animals. There are disturbances among the people of the regions along the sea coast.

If Mars is retrograde in the sign Sagittarius, a boom comes in grain, ghee and the like. There is famine and a lack of grain production, and a possibility of loss of life; and if Mars is direct in the sign Sagittarius, all grains are slack.

If Mars is retrograde in the sign Capricorn, a boom comes in iron, machinery, electrical equipment, wheat, linseed and the like. There are earthquakes and the public is afraid; and if Mars is direct in the sign Capricorn, there is political strife in the eastern and western regions.

If Mars is retrograde in the sign Aquarius, grain prices are slack. A boom comes in ghee, oil and other juice-type substances, and in linseed, rape, wheat and the like. There is damage to water transport; and if Mars is direct in the sign Aquarius, the rain is good and it is a cause of plenty.

If Mars is retrograde in the sign Pisces, a boom comes in grain, ghee and the like; and if Mars and Saturn are both retrograde in the sign Pisces, they are causes of famine, destruction of crops, battle and loss of life; and if Mars is direct in the sign Pisces, in the sea there is a tide

— Source PDF page 168 (book page 169) —

and ebb and storms and the like are greater, and a slump comes in forbidden food substances such as meat.

If Mars is retrograde on the Pratipada, Dwitiya or Tritiya of the dark fortnight of the month of Magha or Phalguna, good profit can be obtained by stocking grain. If Mars becomes retrograde in the rainy season, it is a cause of rain of grain and of famine.

If Mars is retrograde on these nakshatras, Bharani, Ardra, Magha, Hasta and Revati, a crisis comes to the country. So much so that the very protectors of the country abandon it and begin to flee. There is greater loss of life among the people of the sea coast.

Consideration through the Planet Mercury:

If the disc of Mercury is large and smooth, like gold, a parrot and a sapphire, it gives an auspicious result. Otherwise it gives an inauspicious result.

Consideration through Mercury in the Signs:

If Mercury is in the sign Aries, there is a boom in metals such as gold and silver, coral, jewels, wheat, barley, gram and the like. A slump comes in juice-type substances, jaggery, khand, oil, sesame, mustard, ghee, cotton, raw cotton and the like. Disease increases among animals, and the rain is moderate.

If Mercury is in the sign Taurus, there are rises and falls in all commodities. A boom comes in sesame, oil, thread, raw cotton, cotton, rice, wheat, barley, gram, peas and other grains. If it is joined with cruel planets, the possibility of war and the like remains.

If Mercury is in the sign Gemini, there is a slump in gold, silver and cotton. There are rises and falls in mustard. The outbreak of wind increases. With the conjunction of a benefic planet

— Source PDF page 169 (book page 170) —

of a benefic planet the rain is good, and with the conjunction of a cruel planet it rains less.

If Mercury is in the sign Cancer, a boom comes in juice-type substances, grain, jaggery, milk, curd, oil, groundnut, mustard and gold; but this boom is unstable. There are rises and falls in silver. A slump comes in cotton. There is some plenty. It rains only in some places.

If Mercury is in the sign Leo, there is a boom in metals such as silver, and in cotton, thread, woollen and cotton cloth. Grain stays level, and a slump comes in jaggery, khand, sugar and the like.

If Mercury is in the sign Virgo, there is a boom in gold, silver and other metals, jaggery, khand, sugar, turmeric, wheat, barley, gram and the like. A slump comes in cotton. The force of the wind runs high.

If Mercury is in the sign Libra, there is a boom in jaggery, khand, gold, cotton and the like. A slump comes in silver, linseed, mustard, cottonseed, groundnut and the like. The public remains afflicted by diseases such as fever. The rain falls well, with wind.

If Mercury is in the sign Scorpio, there is a slump in all grains and in ghee, mustard, oil, sesame and the like. The prices of gold and silver are level. In cotton there are rises and falls. A boom comes in animals. There is rain in some places.

If Mercury is in the sign Sagittarius, a boom comes in silver, gold, cotton, raw cotton, cloth, thread and the like. Feelings of jealousy and hatred increase between the public and the government. There is destruction of elephants.

If Mercury is in the sign Capricorn, there is a boom in gold and silver. A special boom comes in cotton. The prices of grains such as wheat, barley and gram remain level.

— Source PDF page 170 (book page 171) —

If Mercury is in the sign Aquarius, the prices of gold, silver and other metals and of grains are level. A slump comes in cotton, jaggery, khand, ghee, oil and the like.

If Mercury is in the sign Pisces, there is a boom in cotton. In gold and silver, as much boom as comes at first, so much slump comes afterwards. A slump comes in wheat, jaggery, khand and the like.

The result of Mercury in the above signs has been given in its natural form. Mercury causes a slump through conjunction with benefic planets and a boom through conjunction with cruel planets.

Consideration through Mercury in the Nakshatras:

If Mercury is in the nakshatra Ashwini, there is a boom in wheat, gram, barley, sorghum, pearl millet, green gram, moth and the like. A slump comes in jaggery, khand, sugar, ghee, oil, sesame, mustard and the like, and a good slump comes in silver.

If Mercury is in the nakshatra Bharani, a boom comes in grain, and the public suffers from diseases such as fever.

If Mercury is in the nakshatra Krittika, a boom comes in cotton and a slump in silver. There is a lack of rain. The public remains in sorrow from fever and the like.

If Mercury is in the nakshatra Rohini, there is a boom in gold, silver, thread, raw cotton, sesame, oil, mustard, rice, jaggery, khand and the like. A slump comes in hemp, woollen cloth and silk cloth; and in cotton a boom comes first and a slump afterwards.

If Mercury is in the nakshatra Mrigashira, there is a slump in wheat, sesame, mustard, urad and the like. A boom comes in cotton. Grain production is good. The rain is good and there is plenty.

— Source PDF page 171 (book page 172) —

If Mercury is in the nakshatra Ardra, a slump comes in wheat, barley, gram, sesame, oil, urad, green gram, moth and the like. The rain is excellent.

If Mercury is in the nakshatra Punarvasu, a strong slump comes in cotton, raw cotton, thread, hemp and silver.

If Mercury is in the nakshatra Pushya, there is a slump in gold, silver, pearls, coral and jewels. In cotton there are rises and falls and a slump comes afterwards. Anxiety and the like and fear of the government increase among the public.

If Mercury is in the nakshatra Ashlesha, a boom comes in jaggery, khand, sesame, oil, mustard, green gram, urad, groundnut and the like. Agricultural production is good.

If Mercury is in the nakshatra Magha, a boom comes in wheat, barley, gram, cotton, raw cotton, thread and the like. Agricultural production is low. There is a lack of rain. The public remains in sorrow.

If Mercury is in the nakshatra Purva Phalguni, a slump comes in all grain, jaggery, khand and the like. There is a possibility of war between two countries.

If Mercury is in the nakshatra Uttara Phalguni, an ordinary boom comes in urad, green gram, moth, pigeon pea, lentils and the like. In silver there is a slump, and in cotton rises and falls and a slump afterwards.

If Mercury is in the nakshatra Hasta, a slump comes in all grains. The rain remains excellent. There is plenty. The public remains happy.

If Mercury is in the nakshatra Chitra, there are rises and falls in cotton, silver and the like. A boom comes in grain and the like. Suffering comes to the learned, dancers and craftsmen.

— Source PDF page 172 (book page 173) —

If Mercury is in the nakshatra Swati, a slump comes in cotton. There is a lack of rain. Sorrow comes to the twice-born (Brahmins).

If Mercury is in the nakshatra Vishakha, there is a slump in grain and the like and a very great slump in cotton. There is plenty; but in some places the possibility of famine also remains.

If Mercury is in the nakshatra Anuradha, the prices of gold, silver, cotton, thread and hemp are slack. Grain prices remain level. There is plenty. The public remains happy.

If Mercury is in the nakshatra Jyeshtha, a boom comes in jaggery, khand, ghee, rice and the like. Disease increases among animals such as horses.

If Mercury is in the nakshatra Mula, a slump comes in gold, silver, grain and the like. There are rises and falls in cotton. Suffering comes to animals and children.

If Mercury is in the nakshatra Purva Ashadha, there is a slump in grain and the like. A very great slump comes in gold and silver. A combination for rain forms. The public remains in sorrow from disease and the like.

If Mercury is in the nakshatra Uttara Ashadha, agricultural production remains good. Grain prices remain slack. The number of deaths among young children grows from disease and the like.

If Mercury is in the nakshatra Shravana, a boom comes in jaggery, khand, rice, gram, grain and the like. Agriculture suffers damage from hail or frost.

If Mercury is in the nakshatra Dhanishtha, there is a slump in gold, silver, grain and the like. There are rises and falls in cotton. A boom comes in rice and the like. Suffering comes to animals such as cows.

— Source PDF page 173 (book page 174) —

If Mercury is in the nakshatra Shatabhisha, a good slump comes in gold, silver and the like. The rain is good. In some places a possibility of famine remains. Suffering comes to servants.

If Mercury is in the nakshatra Purva Bhadrapada, a slump comes in metals such as gold, silver, iron and copper, and in grain and the like. There are rises and falls in cotton. Happiness and peace increase among the public.

If Mercury is in the nakshatra Uttara Bhadrapada, there are rises and falls in silver. The prices of jaggery, khand, cotton, grain and rice remain level. Animals and birds remain happy.

If Mercury is in the nakshatra Revati, there is a slump in silver, jaggery, khand, ghee, oil, sesame, mustard and the like. A boom comes in wheat, saffron, madder, red sandalwood, red ochre, red chilli and other red-coloured things.

Consideration through the Rising and Setting of Mercury:

If Mercury rises in the sign Aries, suffering comes to animals such as cows, and agriculture suffers damage from locusts and the like, because of which grain prices are high. And if Mercury sets in the sign Aries, it is a cause of plenty.

If Mercury rises in the sign Taurus, it causes very heavy rain; and if Mercury sets in the sign Taurus, there is destruction of animals such as cows, oxen, horses and elephants.

If Mercury rises in the sign Gemini, it causes a lack of rain, and is a cause of distress and of a boom. And if Mercury sets in the sign Gemini, it causes distress to the king.

If Mercury rises in the sign Cancer, happiness increases among the public,

— Source PDF page 174 (book page 175) —

and for 6 months it causes famine and very heavy rain. And if Mercury sets in the sign Cancer, there is a lack of rain and loss of life, and the troubles of thieves increase.

If Mercury rises in the sign Leo, epidemics spread among animals. And if Mercury sets in the sign Leo, there is little rain.

If Mercury rises in the sign Virgo, grain production is good and the public remains happy. And if Mercury sets in the sign Virgo, it causes very heavy rain and fear of thieves and the like. A boom comes in grocery goods.

If Mercury rises in the sign Libra, it is boom-causing and a cause of war and the like and of distress. There is also a possibility of an earthquake. And if Mercury sets in the sign Libra, a boom comes in grocery goods.

If Mercury rises in the sign Scorpio, it is a cause of plenty and of fear of the king; and if Mercury sets in the sign Scorpio, a boom comes in all seven metals.

If Mercury rises in the sign Sagittarius, it is beneficial; and if Mercury sets in the sign Sagittarius, fear arises among kings.

If Mercury rises in the sign Capricorn, the production of grain and juice-type substances is greater. And if Mercury sets in the sign Capricorn, it is a cause of increase of disease and of small profit in trade.

— Source PDF page 175 (book page 176) —

If Mercury rises in the sign Aquarius, the force of the wind is greater; and if Mercury sets in the sign Aquarius, there is a heavy outbreak of wind and snowfall, by which agriculture and trees suffer damage.

If Mercury rises in the sign Pisces, there is famine. There is an outbreak of wind or excess rain. And if Mercury sets in the sign Pisces, there is loss of grain and it is distressing for kings.

When Mercury rises, a boom comes in cotton within 10 days and in grain within 40 days. And if it sets, a slump comes in cotton within 10 days.

If Mercury rises in the eastern direction, a boom comes in cotton within 25 days and there is rain in Rajputana. If Mercury rises in the month of Bhadrapad, it is excellent. It is a cause of plenty and brings much rain. And if Mercury sets in the eastern direction, a slump comes in grain, ghee and the like in 33 days, and in cotton there are rises and falls.

If Mercury rises in the western direction, a slump comes in cotton, raw cotton, cloth and grain in 15 days. But if it rises in Margashirsha, a boom comes in cotton. And if Mercury sets in the west, a slump comes in cotton in 15 days and there is rain in Rajputana.

Consideration through Retrograde and Direct Mercury:

If Mercury is retrograde, a boom comes in sugarcane, jaggery, khand and juice-type substances, and grain prices are slack. And if it is direct, a boom comes within 13 days in grass, timber and the like. And in camphor, sandalwood, agar and other fragrant substances and in silk and the like, an atmosphere of slump arises.

— Source PDF page 176 (book page 177) —

If Mercury is retrograde in the sign Aries, a boom comes in grocery goods such as coconut and betel nut. And if Mercury is direct in the sign Aries, oilseeds such as linseed and animals are slack.

If Mercury is retrograde in the sign Taurus, there are rises and falls in silver and a boom comes afterwards. And if Mercury is direct in the sign Taurus, a slump comes in cotton, silver, wheat, linseed, sugar, thread, cloth and the like.

If Mercury is retrograde in the sign Gemini, a boom comes in cotton and a slump in vegetables. And if Mercury is direct in the sign Gemini, a slump comes in gram, green gram, moth and other grains and in animals used as vehicles such as elephants and horses.

If Mercury is retrograde in the sign Cancer, there is a slump in all commercial commodities. And if Mercury is direct in the sign Cancer, a slump comes in silver, cloth, rice and the like, and water vessels (jalyan) become high in price.

If Mercury is retrograde in the sign Leo, a boom comes in all grain and in metals such as copper, iron and brass. And if Mercury is direct in the sign Leo, in cotton, paat, costus

(kushta), shares and the like a slump comes first and a boom afterwards.

If Mercury is retrograde in the sign Virgo, a slump comes in all commodities. But in cotton and the like a boom comes first and a slump afterwards. And if Mercury is direct in the sign Virgo, a boom comes in grocery goods such as sandalwood, betel nut and coconut, and in liquor and the like.

If Mercury is retrograde in the sign Libra, a boom comes in gold and the like. Seeing the trend of the markets, special panic arises in the trading class

— Source PDF page 177 (book page 178) —

. And if Mercury is direct in the sign Libra, a boom comes in ghee, sugar, linseed and herbs (aushadhi) and the like.

If Mercury is retrograde in the sign Scorpio, there is a boom in jaggery, sugar and the like, and a slump comes in linseed, mustard and the like. And if Mercury is direct in the sign Scorpio, there is a boom in castor, cottonseed and the like and an increase of fear among the public.

If Mercury is retrograde in the sign Sagittarius, dry fruit and fruit and similar substances become high. And if Mercury is direct in the sign Sagittarius, there is a boom in sugarcane, rice and the like, and political strife.

If Mercury is retrograde in the sign Capricorn, there is a boom in all oil substances and a slump in grains. And if Mercury is direct in the sign Capricorn, there is a force of wind and a possibility of rain remains.

If Mercury is retrograde in the sign Aquarius, in juice-type and astringent substances and the like a boom comes and afterwards a slump. And if Mercury is direct in the sign Aquarius, a boom comes in gold, betel nut, mustard, dry ginger, lac, hides and the like.

If Mercury is retrograde in the sign Pisces, in sugar, rice, ghee and the like a boom comes first and a slump comes afterwards. And a slump comes in cotton and cloth. And if Mercury is direct in the sign Pisces, a slump comes in ghee, jaggery, khand, oil, groundnut, castor, cottonseed and cotton.

Consideration through Jupiter (Guru):

Jupiter is also called Brihaspati. It is the teacher (guru) of the gods. It is regarded as a benefic planet. Its nature, qualities and disposition are considered to be causes of slump in the world of trade. When the aspect of Jupiter falls on other planets

— Source PDF page 178 (book page 179) —

it gives an auspicious result. The disc of Jupiter is larger, with spotless rays, smooth like the flower of the kumud (white water lily) and like a white crystal gem. If it is in this weak condition (the book's wording is hard to follow here) together with other planets, it will not give an auspicious result; instead of a slump it will make a boom.

If Jupiter moves toward the north of the other planets, it is a giver of auspicious results in every way. This planet is lord of the signs Sagittarius and Pisces. Therefore if it rises in the north on the nakshatras of Sagittarius and Pisces, it is a cause of plenty. If it rises in the south, it is a cause of lack of rain, famine and a boom.

Consideration through Jupiter in the Signs:

If Jupiter is in the sign Aries, a slump comes in all commodities. The rain is excellent. Agricultural production is good. Peace and calm remain among the public. There are good chances of rises and falls in cotton.

If Jupiter is in the sign Taurus, grain production is good. There is a boom in silver, ghee, oil and the like. An ordinary boom comes in grain and the like. There is suffering for women giving birth, and an increase in political strife and in the disturbances of thieves and the like.

If Jupiter is in the sign Gemini, there is a boom in gold, silver, cotton, coconut, betel nut, linseed, mustard, groundnut, copper, iron, ghee, oil and the like. There are good chances of a slump in cotton. There is a lack of rain. The public remains afraid. In the western and northern regions a possibility of famine remains.

If Jupiter is in the sign Cancer, there is a boom in jaggery, khand, ghee and the like. A special boom comes in cotton. Profit can be taken by stocking all grains.

— Source PDF page 179 (book page 180) —

In some places there is a possibility of famine through excess rain. Many troubles come upon the country. There is political strife.

If Jupiter is in the sign Leo, there is a boom in wheat, barley, cotton and ghee, and a slump comes in silver, gold, copper, iron, cotton and the like. The rain is good. There is an increase in agricultural production. The price of grain remains slack.

If Jupiter is in the sign Virgo, there is a good slump in silver and cotton. A slump in grains. A boom comes in wheat, sorghum, rice, green gram, khand, sugar, sesame, oil, mustard, urad, gram and the like. Agricultural production is good. The rain is excellent. Happiness and peace remain among the public. Disease increases among animals.

If Jupiter is in the sign Libra, there is a boom in cotton, gold, coconut, madder, betel nut and the like. A slump comes in mustard, lac, linseed, ghee, oil and the like. In some places grain prices are high. The public remains afflicted by diseases such as fever.

If Jupiter is in the sign Scorpio, a boom comes in gold, silver, cotton, raw cotton, copper, bell-metal, ghee, oil, mustard, coconut, betel nut and the like. There is a lack of rain, a possibility of famine, fear of the ruler and of thieves and the like, and the public remains sorrowful.

If Jupiter is in the sign Sagittarius, a slump comes in gold, silver, cotton, raw cotton, thread, hemp, paat, costus, sesame, oil, salt, iron, copper, brass, grain and the like and in jaggery and khand. The rain is good. There is an increase in agricultural production.

If Jupiter is in the sign Capricorn, there is a sudden boom in grains such as wheat, barley and gram. A boom in gold, silver, cotton, raw cotton, groundnut and mustard

— Source PDF page 180 (book page 181) —

comes; but after 3 months the trend turns to slump. As soon as Jupiter enters the sign Capricorn there is heavy upheaval. There is political strife, the public is in sorrow, there is famine, and disease increases among animals. These inauspicious results last only 3 months. Afterwards it gives an auspicious result.

If Jupiter is in the sign Aquarius, a boom comes in gold, silver, cotton, raw cotton, copper, cloth and the like. The rain is little. There is damage to agricultural production. A possibility

of famine remains. There are disturbances in the eastern countries.

If Jupiter is in the sign Pisces, there is a very great boom in cotton for 6 months and a slump afterwards. In mustard, sesame, oil and ghee a slump comes and a boom afterwards. A boom comes in wheat, jaggery, khand, sugar, urad, moth, coconut, betel nut, ivory articles, camphor, salt and the like. In the eastern and southern countries there is a possibility of famine, and disease and the like increase among animals.

Consideration through Jupiter in the Nakshatras:

If Jupiter is in the nakshatra Ashwini, a slump comes in grains, an ordinary boom in cotton, and a slump in gold and silver after rises and falls.

If Jupiter is in the nakshatra Bharani, a slump comes in gold, silver, copper, brass, linseed, rice, wheat, barley, sesame, urad, green gram, gram and the like. The rain is moderate.

If Jupiter is on the nakshatra Krittika, there is a slump in grain and cotton. In gold, silver, jaggery and khand ordinary rises and falls remain. The rain too is moderate.

If Jupiter is in the nakshatra Rohini, in gold, silver, jaggery, khand and the like

— Source PDF page 181 (book page 182) —

there is a slump (in gold, silver, jaggery, khand and the like). There are rises and falls in cotton. The rain and agricultural production are moderate.

If Jupiter is in the nakshatra Mrigashira, a slump comes in rice, silver, ghee and the like. A boom remains in grains. Welfare increases among the public. There is a lack of rain.

If Jupiter is in the nakshatra Ardra, there are rises and falls in gold, silver, rice and the like, and a slump in cotton. For three months the public suffers from famine and from lack of rain. But afterwards there is plenty and happiness for all.

If Jupiter is in the nakshatra Punarvasu, there is a boom in grains and a sudden slump in cotton. A lack of rain remains.

If Jupiter is in the nakshatra Pushya, a boom comes in every commodity. The rain is low. Agricultural production is also low.

If Jupiter is in the nakshatra Ashlesha, a boom comes in every commodity. A possibility of lack of rain and famine arises. The public suffers.

If Jupiter is in the nakshatra Magha, a slump comes in gold, silver, iron, copper, jaggery, khand and all grains. The rain is timely. Agricultural production is good. The public remains happy.

If Jupiter is in the nakshatra Purva Phalguni, a slump comes in all grains, and in jaggery, khand, cotton, raw cotton and the like. The rain is good. Agricultural production remains excellent.

If Jupiter is in the nakshatra Uttara Phalguni, a slump comes in metals such as gold and silver, in substances such as jaggery and khand, and in grain and the like.

— Source PDF page 182 (book page 183) —

If Jupiter is in the nakshatra Hasta, a slump comes in gold, silver, cotton, wheat, gram, turmeric, jaggery, khand and the like. The public remains happy.

If Jupiter is in the nakshatra Chitra, there is a boom in cotton after rises and falls. A slump comes in silver and also in grain and the like. The rain is excellent.

If Jupiter is in the nakshatra Swati, there is a very great slump in cotton and a slump in grain and the like. The rain is excellent and agricultural production is good.

If Jupiter is in the nakshatra Vishakha, a boom comes in grains. A lack of rain remains.

If Jupiter is in the nakshatra Anuradha, a slump comes in gold, silver, cotton, raw cotton, grain and the like. The rain is good. There is plenty, and the public remains happy.

If Jupiter is in the nakshatra Jyeshtha, there is a slump in silver. In grains there is sometimes a slump and sometimes a boom. In the rainy season the rain is good; but in the Sun's passage through Virgo there is a lack of rain.

If Jupiter is in the nakshatra Mula, there is a slump in silver, gold, coral, moth, sorghum, pearl millet and the like. In cotton, after rises and falls, a slump comes. In the rainy season the rain is good.

If Jupiter is in the nakshatra Purva Ashadha, a slump comes in all kinds of grains and metals. There is plenty and the rain is good.

If Jupiter is in the nakshatra Uttara Ashadha, a boom comes in jaggery and khand. There is plenty.

If Jupiter is in the nakshatra Shravana, a slump comes in all grains and in metals such as jaggery, khand, gold and silver. The rain is good. Welfare and good health increase among the public.

— Source PDF page 183 (book page 184) —

If Jupiter is in the nakshatra Dhanishtha, a slump comes in grains such as wheat, barley and gram. There is plenty and the public remains happy.

If Jupiter is in the nakshatra Shatabhisha, a slump comes in wheat, gold, saffron, madder, turmeric and the like. There is plenty. The rain is excellent. Agricultural production is good. The public remains happy.

If Jupiter is on the nakshatra Purva Bhadrapada, a boom comes in silver, gold, cotton, thread, hemp, cloth and the like. A lack of rain remains. The fear of thieves and the like troubles the public.

If Jupiter is in the nakshatra Uttara Bhadrapada, there is a boom in cotton, gold and the like. A slump comes in silver, rice and the like. There is lack of rain, and suffering for the public.

If Jupiter is in the nakshatra Revati, there are rises and falls in cotton. In silver a slump comes first and a boom afterwards. A slump remains in grains. In some places a possibility of famine remains.

Consideration through the Other States of Jupiter:

If Jupiter rises in the sign Aries, the market takes a trend toward a boom at that time. It should also be kept in mind here that when Jupiter enjoys one sign for one year, when do its states of rising and setting form? If Jupiter rises in the nakshatra Ashwini or Bharani, then even in an atmosphere of slump a sudden boom comes to the markets. Through excess rain all the markets take a trend toward a boom. If Jupiter is in the first quarter of the nakshatra Krittika, and Jupiter rises at that time, the markets will still take a trend toward a boom.

If Jupiter is in the sign Aries in the state of setting, there is a lack of rain, and in the state of rising it causes very heavy rain.

If Jupiter in the sign Taurus is in the state of rising, it is slump-causing, and in the state of setting it is boom-causing.

If Jupiter in the sign Gemini is in the state of rising, it is certainly boom-causing, but even in the state of setting Jupiter keeps a trend toward a boom in the markets.

If Jupiter in the sign Cancer is in the state of rising, it is boom-causing and a cause of lack of rain, but in the state of setting it is rain-causing. And all the markets lean toward a slump. Whenever Jupiter is in the retrograde state, a boom will remain in commercial commodities. Mutual differences among kings, lawlessness, political strife, suffering for the public and diseases and the like remain. Disturbances also arise. There will be a lack of rain. When it is in the direct state, the markets will lean toward a slump. Jupiter retrograde in the sign Cancer is boom-causing, famine-causing and a cause of misfortune.

If Jupiter in the sign Leo is in the state of rising, it is a cause of plenty, welfare and good health; but in the state of setting it makes a boom in commercial commodities.

If Jupiter in the sign Virgo is in the state of rising, it is a cause of plenty, slump and rain. There is good production of juice-type substances and grain and the like. But in the state of setting, Jupiter is boom-causing. In the retrograde state Jupiter is slump-causing, and in the direct state boom-causing.

If Jupiter in the sign Libra is in the state of rising, it brings a boom in ghee, milk, sandalwood, juice-type substances and grains. Disease such as fever

and disturbances occur. And in the state of setting it is slump-causing. And even in the retrograde state it causes a boom in grains, in brass and copper vessels, in cotton, raw cotton, paat, sacking, salt and the like, and in the direct state it brings a slump.

If Jupiter in the sign Scorpio is in the state of rising and retrograde, it causes a boom in commercial commodities, and in the state of setting and in the direct state it is slump-causing, especially for juice-type and astringent substances.

If Jupiter in the sign Sagittarius rises, it causes a shortage of rain. It increases the production of urad and groundnut. And it is boom-causing in substances such as astringents, cotton, hemp, grain and gold, and slump-causing in ghee, jaggery, oil, sesame and the like. If it sets, the result is the opposite. That is, in place of a boom it makes a slump and in place of a slump a boom. If it is retrograde, it makes a sudden slump in the seven grains and also brings a slump in sesame, oil and ghee. If it is direct, instead of a slump it brings a boom in the commodities stated above.

If Jupiter in the sign Capricorn is in the state of rising, it makes a slump, and in the state of setting a boom; and in the retrograde state Jupiter is health-giving, slump-causing in grains, and a cause of plenty and welfare. In the direct state the result is the opposite of this.

If Jupiter in the sign Aquarius is in the state of rising and direct, it is boom-causing; and in the state of setting or retrograde it is a cause of plenty and of a slump.

If Jupiter in the sign Pisces is in the state of rising and direct, it is slump-causing, and if it is retrograde and in the state of setting, it is boom-causing. Retrograde Jupiter makes jaggery, sugar, paat, sacking, mustard, linseed,

— Source PDF page 186 (book page 187) —

castor, cotton, raw cotton, salt, ghee, oil and grain rise well.

Consideration through Venus (Shukra):

The colour of Venus is like curd, like the safflower flower, spotless like the Moon, with white and distinct rays, of excellent light, with clear and brilliant rays, with a large disc, and shining. This planet, moving at ordinary speed, stays in one sign for one month. Being retrograde or of slow motion, it stays in one sign for more than a month.

When the planet Venus sets in the eastern direction, it rises in the western direction two months after setting. After rising, it becomes retrograde after 8 months. In the retrograde state it moves round for 22 days and then sets in the western direction. After remaining set for eight days after this, it rises in the eastern direction. 22 days after rising in the eastern direction it enters the direct state. Moving round in the direct state, it sets in the east after 8 months. In this way the risings, settings, and retrograde and direct states of Venus take place according to the rules of mathematics.

By its nature, disposition and quality the planet Venus is slump-causing for commercial commodities. But through conjunction with cruel planets and the aspect-relationship of cruel planets it becomes boom-causing. And through conjunction with benefic planets and the aspect-relationship of benefic planets it becomes very much slump-causing.

— Source PDF page 187 (book page 188) —

Consideration through Venus in the Signs:

If Venus is in the sign Aries, there is a boom in grains such as wheat, barley and gram, and in ghee. In jaggery, sugar, paat, sacking and the like a boom comes after rises and falls. A good boom comes in gold and silver. An ordinary slump comes in sesame, oil, mustard, linseed and castor. There is a lack of rain. The wind blows more. Disease increases among animals.

If Venus is in the sign Taurus, there is a good slump in cotton. A boom in grains. In gold and silver, after rises and falls, the trend at the end remains only of a boom. A possibility of strife remains among the public.

If Venus is in the sign Gemini, there is a boom in grains such as wheat, barley and gram. A slump comes in pigeon pea, guar, cotton, raw cotton, thread, paat, sacking, castor, oil, sesame, mustard and the like. In jaggery and ghee there are good rises and falls.

If Venus is in the sign Cancer, there is a boom in all juice-type substances, jaggery, khand, sugar, ghee, oil and the like. A slump in silver. In cotton a slump comes first and a boom afterwards. If the rain is right, a slump comes in wheat, barley, gram, pigeon pea, peas and the like. The farming class experiences contentment, and animals and birds happiness.

If Venus is in the sign Leo, a boom comes in gold, silver, copper, wheat, barley, gram, madder, red sandalwood, red chilli and the like, in red-coloured things and juice-type substances, and in animals. There is a lack of rain. The wind runs strong.

If Venus is in the sign Virgo, there is a boom in all grains, rice, jaggery, khand and woollen cloth. Rises and falls in silver. Damage to agriculture

— Source PDF page 188 (book page 189) —

and a lack of rain remain. A boom also comes in the prices of animals.

If Venus is in the sign Libra, there is an ordinary boom in gold, jaggery and khand. Rises and falls in silver. In cotton a boom comes first and a slump afterwards, and grain prices remain slack. There is plenty; but through conjunction with cruel planets there is a boom-causing effect and lawlessness and disturbances.

If Venus is in the sign Scorpio, a slump comes in wheat, barley, gram, urad, green gram, moth, pearl millet, sorghum and the like. A boom comes in cotton, linseed and silver. There are rises and falls in jaggery. It gives plenty and an auspicious result. Through conjunction with benefic planets there is a good slump.

If Venus is in the sign Sagittarius, a boom comes in cotton, raw cotton, thread, cloth, wheat, barley, gram, gold, silver, copper and other metals. Agriculture suffers damage from many causes.

If Venus is in the sign Capricorn, a boom comes in jaggery, khand, ghee and all grains. In cotton and silver, after rises and falls, the trend at the end remains only of a boom. Agricultural production is low.

If Venus is in the sign Aquarius, a slump comes in silver, cotton, wheat, barley, gram, urad, green gram, sorghum, pearl millet and other grains, and in white things and juice-type substances. There is plenty. The rain is excellent.

If Venus is in the sign Pisces, a slump comes in all kinds of grain, oilseeds, oil, mustard, linseed, castor, jaggery and khand. A good boom comes in cotton and silver. The public remains happy in every way.

Consideration through Venus in the Nakshatras:

If Venus is in the nakshatra Ashwini, gold, silver, jaggery, khand, cotton,

— Source PDF page 189 (book page 190) —

raw cotton, sesame, oil, mustard, wheat, barley, gram, urad, green gram, moth, pigeon pea and the like go into a slump.

If Venus is in the nakshatra Bharani, there is a slump in silver and gold. There are rises and falls in gram, green gram, moth and sorghum. A boom in cotton, and an atmosphere of slump remains in mustard, oil, sesame and the like. Suffering comes to the religious.

If Venus is on the nakshatra Krittika, a slump comes in silver, gold, cotton, thread, cloth, raw cotton, asafoetida, sesame, oil, mustard and the like. The rain is good.

If Venus is in the nakshatra Rohini, a slump comes in coconut, grapes, betel nut and the like and in metals such as gold and silver. A possibility of war and other disturbances remains.

If Venus is in the nakshatra Mrigashira, there is a boom in jaggery, khand, sugar and all grains, and a slump in wheat and gram. The public experiences happiness.

If Venus is in the nakshatra Ardra, a sudden slump comes in grains. The rain comes with force of wind. The public is happy and there is plenty.

If Venus is in the nakshatra Punarvasu, there is a slump in gold, silver, cotton, raw cotton, thread and the like, and a boom in grains. There is a lack of rain. The public remains afraid.

If Venus is in the nakshatra Pushya, a slump comes in jaggery, khand, sugar, camphor, mercury, asafoetida, lac, hides and the like. A boom comes in cotton, thread, hemp, silk, wool, grain and the like. The rain is excellent.

If Venus is in the nakshatra Ashlesha, rice, moth, gram, grass, grain

— Source PDF page 190 (book page 191) —

and the like go into a slump. An ordinary slump comes in cotton. There is fear of snakes. Rain is specially short in some places.

If Venus is in the nakshatra Magha, the price of grains such as wheat, barley and gram becomes high. There is excess rain. Disease spreads among animals.

If Venus is on the nakshatra Purva Phalguni, a slump comes in wheat, gram, sorghum, pearl millet, urad, green gram and the like. The rain is good.

If Venus is in the nakshatra Uttara Phalguni, a boom comes in grain and cotton. There are rises and falls in gold and silver. Agriculture suffers damage.

If Venus is in the nakshatra Hasta, there is a slump in silver, cotton and rice. An ordinary boom in gold. There are rises and falls in jaggery and khand. A lack of rain remains. Hardship remains among the public.

If Venus is in the nakshatra Chitra, the prices of metals such as gold and silver and of grain remain level.

If Venus is in the nakshatra Swati, there is a boom in jaggery, khand and the like. A slump comes in grains. The rain is excessive. The fear of thieves and the like troubles the public. In some places disturbances and the like also occur.

If Venus is in the nakshatra Vishakha, there is a slump in grains. A good slump comes in cotton. Because the trend of trade is crooked, the trading class remains anxious. The rain is good.

If Venus is on the nakshatra Anuradha, a slump comes in jaggery, khand, rice, salt and alkali substances. Disease spreads among animals. A possibility of an earthquake also remains.

If Venus is in the nakshatra Jyeshtha, gold, silver, sesame, rice, oil,

— Source PDF page 191 (book page 192) —

mustard and the like go into a slump. An ordinary boom comes in grains. A lack of rain remains. There is political strife.

If Venus is in the nakshatra Mula, a boom comes in grains. There are rises and falls in gold. In cotton there is first a boom and afterwards a slump.

If Venus is in the nakshatra Purva Ashadha, a slump comes in urad, green gram, moth, sesame, oil, mustard, salt and the like.

If Venus is in the nakshatra Uttara Ashadha, there is a slump in jaggery, khand, gold, silver and the like. A boom comes in cotton and grains. Disease increases among the public.

If Venus is on the nakshatra Shravana, there is a slump in gold, silver, jaggery, khand, sugar, urad, green gram, moth and the like. A boom comes in raw cotton, sesame, oil, mustard and the like. In cotton an ordinary slump comes and a boom afterwards.

If Venus is in the nakshatra Dhanishtha, there is a boom in gold, silver, cotton, raw cotton, rice, green gram, moth, sorghum, pearl millet, urad and the like. A slump comes in wheat. Suffering comes to elephants.

If Venus is in the nakshatra Shatabhisha, a boom comes in cotton, raw cotton, rice, jaggery, khand, ghee, mustard, gold, silver and the like.

If Venus is in the nakshatra Purva Bhadrapada, there is a boom in cotton. A slump comes in grains. The rain is excessive. The public experiences some hardship.

If Venus is in the nakshatra Uttara Bhadrapada, there is a slump in cotton, raw cotton, rice, salt, gold, silver, pearls, jaggery, khand, camphor and the like. A boom comes in fruit, roots and similar substances.

If Venus is in the nakshatra Revati, a slump comes in cotton, raw cotton, silver, rice, jaggery, khand, sugar and the like.

— Source PDF page 192 (book page 193) —

Consideration through the Rising of Venus (Shukrodaya):

If Venus rises in the nakshatra Ashwini, a good boom comes in linseed, castor, mustard, ghee, sesame, oil, jaggery and the like and in juice-type substances. The production of urad and barley is low. There are also chances of a good boom in silver and cotton. A boom remains in grains such as barley, gram, peas and pigeon pea, and in cotton, paat, sacking, gold, copper and other metals.

If Venus rises in the nakshatra Bharani, the production of urad, green gram, mustard, rice and the like is low. And because the demand for these things in the market is greater, a good boom comes.

If the rising of Venus is in the nakshatra Krittika, a boom comes in commercial commodities. By the rising of Venus in the nakshatra Rohini there is plenty. The public remains free from disease. The rising of Venus in the nakshatra Mrigashira brings a boom in all kinds of grains.

If Venus rises in the nakshatra Ardra, it makes a boom in grain, rice, barley, honey and juice-type substances. There is a lack of rain. If the rising of Venus is in the nakshatras Punarvasu and Pushya, there is a boom in commercial goods. If the rising of Venus is in the nakshatra Ashlesha, because of the absence of rain a boom comes in grain (galla).

If Venus rises in the nakshatras Magha, Purva Phalguni and Uttara Phalguni, there is disease, fear and unrest among the public. Animals are afflicted. The rising of Venus in the nakshatra Hasta is considered good. The rain is good. Agricultural production is greater. There is plenty. The public is happy

— Source PDF page 193 (book page 194) —

. Grain prices become slack. If the rising of Venus is in the nakshatra Chitra, there is a boom. Disease and grief increase among the public. The rising of Venus in the nakshatra Swati is slump-causing and plenty-causing. The rising of Venus in the nakshatra Vishakha brings booms. The rising of Venus in the nakshatras Anuradha and Jyeshtha causes a lack of

rain and the trend of the markets leans toward a boom. If Venus rises in the nakshatras Mula, Purva Ashadha and Uttara Ashadha, there is a slump in commercial goods and an atmosphere of happiness and peace arises everywhere, though in some places there remains a possibility that agriculture may suffer damage from greater rain; otherwise it is plenty-causing. The rising of Venus in the nakshatras Shravana, Dhanishtha, Shatabhisha, Purva Bhadrapada and Uttara Bhadrapada is boom-causing. The rising of Venus in the nakshatra Revati is slump-causing. It makes a boom in cotton, raw cotton, thread, paat, sacking and the like.

If the rising of Venus is on any one tithi among Pratipada, Dwitiya, Tritiya and Chaturthi, it is a cause of comfort. The rising of Venus on any tithi among Panchami, Shashthi, Saptami and Ashtami brings fear of thieves and the like. If Venus rises on any tithi among Navami, Dashami, Ekadashi and Dwadashi, it is a cause of political strife, and the rising of Venus on the remaining tithis is boom-causing and loss-causing.

If, in any month, Venus sets in one fortnight and rises in that same fortnight, it is inauspicious, loss-causing, a cause of political strife and unrest. There is a full possibility of war or of violent revolution; and if it sets in one fortnight of a month and rises in the other fortnight, it is beneficial and a cause of peace.

— Source PDF page 194 (book page 195) —

The trend of the market remains toward a slump.

Through the "gates" of the nakshatras too, the rising and setting of Venus is slump-causing and boom-causing. For example, from the nakshatra Bharani for eight nakshatras, that is, up to the nakshatra Ashlesha, is considered the "Megha-dvar" (cloud gate) of Venus. The setting or rising of Venus in the cloud gate is considered rain-causing, plenty-causing and slump-causing. Grain prices are slack. The public remains free from disease and in joy.

From the nakshatra Magha for 5 nakshatras, that is, up to the nakshatra Chitra, is considered the "Dhuli-dvar" (dust gate) of Venus. The rising or setting of Venus in the dust gate is not considered auspicious. There is an outbreak of wind, flying of dust and a lack of rain. The trend of the markets is toward a boom.

From the nakshatra Swati for 7 nakshatras, that is, up to the nakshatra Uttara Ashadha, is considered the "Raj-dvar" (royal gate) of Venus. The setting or rising of Venus in the royal gate is political-strife-causing or loss-causing. The trend of the markets is also toward a boom.

From the nakshatra Shravana for seven nakshatras, that is, up to the nakshatra Ashwini, is considered the "Svarna-dvar" (golden gate) of Venus. The setting or rising of Venus in the golden gate is plenty-bringing and excellent, rain-causing and slump-causing.

If Venus rises in the eastern direction in the nakshatras Swati, Vishakha and Anuradha, it is a cause of lack of rain; and if it rises in the western direction, it is rain-causing. In the nakshatras Magha, Purva Phalguni, Uttara Phalguni, Hasta and Chitra, if it rises in the east it is rain-causing, and if it rises in the west it causes a lack of rain.

Ashwini, Mrigashira, Revati, Hasta, Pushya, Punarvasu, Anuradha, Shravana

— Source PDF page 195 (book page 196) —

and Swati: these nine nakshatras belong to the Deva-gana (the class of gods).

Uttara Ashadha, Purva Ashadha, Uttara Phalguni, Purva Bhadrapada, Ardra, Bharani and Rohini: these "nine" nakshatras belong to the Manushya-gana (the class of men).

[Translator's note: the book says nine, but only seven names are printed for the Manushya-gana. The usual list also includes Purva Phalguni and Uttara Bhadrapada. It is given as printed.]

Krittika, Magha, Ashlesha, Vishakha, Shatabhisha, Chitra, Jyeshtha, Dhanishtha and Mula: these nine nakshatras belong to the Rakshasa-gana (the class of demons).

When Venus rises in the nakshatras of the Deva-gana, a boom comes in gold, silver, cotton, raw cotton, paat, sacking, khand, jaggery, sugar, ghee, oil and the like. Political strife and lawlessness increase among the public. And if Venus sets in the nakshatras of the Deva-gana, a boom comes first in grains but a slump comes afterwards. Lawlessness and unrest increase. But if rain falls at the time of the setting of Venus, combinations for a slump form in all kinds of commercial commodities.

If Venus rises in the nakshatras of the Manushya-gana, agriculture suffers damage, therefore grain prices are high. Disease increases among animals. There is political strife. And if Venus sets in the nakshatras of the Manushya-gana, booms form first in commercial goods and slumps come afterwards. There is plenty. After the setting of Venus, if there is rain, there will be plenty.

If Venus rises in the nakshatras of the Rakshasa-gana, famine, portents (utpat), political strife and very great booms in commercial commodities keep arriving. There is strife in the Sindh country. And if Venus sets in the nakshatras of the Rakshasa-gana, a good boom comes in all grains, cotton, paat, sacking and all metals. In the western countries there is famine and lawlessness. A lack of rain remains.

— Source PDF page 196 (book page 197) —

Consideration through Retrograde and Direct Venus:

If Venus is retrograde, within one month grain becomes slack and ghee, oil and the like become high. And when it is direct, a slight slump comes in gold, silver, pearls and the like for 5 days.

If Venus is retrograde in the sign Aries, there is loss of animals and suffering for women; and if Venus is direct in the sign Aries, a slump comes in sugarcane, jaggery, oil, sesame, linseed and the like.

If Venus is retrograde in the sign Taurus, there is a boom in cotton, silver, sugar and the like; and if Venus is direct in the sign Taurus, a boom comes after one month in sugar, rice, ghee and the like.

If Venus is retrograde in the sign Gemini, a good boom comes in shares, cotton and the like; and if Venus is direct in the sign Gemini, a slump comes in cotton, thread, cloth and the like.

If Venus is retrograde in the sign Cancer, a boom comes in cotton within one month, and in some places there is rain too; and if Venus is direct in the sign Cancer, a slump comes in animals such as cows and oxen.

If Venus is retrograde in the sign Leo, a boom comes in gold, silver, brass, cows, oxen and the like; and if Venus is direct in the sign Leo, there is a lack of rain, and the public remains afraid of famine, disturbances and the like.

If Venus is retrograde in the sign Virgo, a boom comes within two months in cotton, thread, cloth, ghee, rice and the like; and if Venus is direct in the sign Virgo, a slump comes in silver, cotton, sugar, rice and the like.

— Source PDF page 197 (book page 198) —

If Venus is retrograde in the sign Libra, a slump comes in grain, juice-type substances and the like; and if Venus is direct in the sign Libra, a boom comes after one month in thread, ghee, rice, ivory articles and the like.

If Venus is retrograde in the sign Scorpio, there is little rain and a possibility of political strife remains; and if Venus is direct in the sign Scorpio, there is excess rain, through which grain suffers great damage.

If Venus is retrograde in the sign Sagittarius, a slump comes in dry ginger, chilli, long pepper, cotton, thread and the like; and if Venus is direct in the sign Sagittarius, a slump comes in cotton, and there is fear of the ruler in the eastern countries.

If Venus is retrograde in the sign Capricorn, there is a possibility of fear of the ruler in the southern and eastern provinces; and if Venus is direct in the sign Capricorn, a boom comes in jaggery, coconut, linseed and the like, and a slump afterwards.

If Venus is retrograde in the sign Aquarius, there is famine and disturbance of disease in the Western countries; and if Venus is direct in the sign Aquarius, in cotton, thread, cloth and silver a boom comes first and a slump afterwards.

If Venus is retrograde in the sign Pisces, a slump comes after two months in cotton, thread, cloth and the like; and if Venus is direct in the sign Pisces, a slump comes in all substances.

Consideration through Saturn (Shani):

Saturn is a planet with a lustre like the vaidurya gem (cat's-eye / lapis), with spotless rays, and of oval shape. The orbit of Saturn is very much higher than the Earth. It is counted among the cruel planets. Blue like the flower of linseed

— Source PDF page 198 (book page 199) —

in colour and oval in appearance, it is slump-causing and auspicious. If it appears red, yellow, black, rough and terrifying, it is famine-causing, boom-causing, inauspicious and portent-causing.

Saturn is lord of the signs Aquarius and Capricorn. If it rises toward the north in the nakshatras Shravana, Dhanishtha, Shatabhisha and Purva Bhadrapada and is seen, it is plenty-causing and slump-causing. And if it rises in the southern direction and is seen, it is famine-causing, harmful to both the public and the king, and boom-causing in commercial commodities. It should be kept in mind here that if Saturn rises toward the south in the nakshatras of its own sign, and is blue like the linseed-safflower flower, it will not be especially inauspicious; and if it rises in the northern direction and is of a terrifying form such as red, yellow, black and rough, even then it will not be especially inauspicious, nor will it be especially plenty-causing; that is, it will give a moderate or mixed result.

Consideration through Saturn in the Signs:

If Saturn is in the sign Aries, a boom comes in metals such as gold, silver and copper, in machines and the parts of machines, in gems such as pearls, topaz and sapphire; in urad, ghee, linseed, sesame, oil and other oilseeds and grain, jaggery, khand, sugar, cotton, raw

cotton and the like. But while moving round in the sign Aries, this Saturn brings a good slump in the last 3 months. This time is the time for stocking grain (galla) and oilseeds. The public has many hardships.

If Saturn is in the sign Taurus, there is a boom in gold, silver, copper, jaggery, khand,

— Source PDF page 199 (book page 200) —

sugar, all kinds of oilseeds and the seven grains, grass, cotton, paat, sacking and the like. Until 2 and a half months from the start of the sign Taurus, Saturn does not make a good boom; afterwards it makes a good boom. And in the last 6 months Saturn brings a good slump in the commodities named above. There remains a possibility of famine. The public remains in sorrow from political strife, disease and the like.

If Saturn is in the sign Gemini, a good boom comes in all grains, and in cotton, thread, cloth, jaggery, khand, gold, silver, copper and other metals, salt, oil and oilseeds. But there may also be a chance of a good slump in gold. The public remains in sorrow from many causes. The possibility of famine and political strife also increases. Wicked tendencies and unrighteous works also increase.

If Saturn is in the sign Cancer, a boom comes in cotton, raw cotton and the like. There is excess rain. In some places agriculture suffers damage from excess rain. The public has to bear loss of wealth and of life. In the western and eastern provinces there are violence, revolution or violent disturbances. A possibility of war also remains.

If Saturn is in the sign Leo, a boom comes in linseed, sesame, mustard, oil, jaggery, khand, urad, grain, iron and the like. The public remains sorrowful from political strife, fear of thieves and the like and from disease. There are disturbances in the eastern and southern regions.

If Saturn is in the sign Virgo, a slump comes in gold, silver, pearls, gems and the like. A boom comes in cotton, raw cotton, jaggery, khand, salt and grains.

— Source PDF page 200 (book page 201) —

Because of the lack of rain there is an apprehension of famine. A possibility of war and the like also remains.

If Saturn is in the sign Libra, a boom comes in cotton, grain, jaggery, khand and the like. There is a lack of rain. Agriculture suffers damage. The public remains in sorrow from epidemics and other diseases. There is also a possibility of disturbance in the Sun's northward course (uttarayana). Outbreaks of fire increase.

If Saturn is in the sign Scorpio, there is a boom in all grains and a very great boom in cotton and silver. There remains an apprehension of war and similar disturbances in the eastern countries. The signs of famine begin to appear.

If Saturn is in the sign Sagittarius, a boom comes in jaggery, khand and the like, all grain, grass, timber, coal and the like. There is a lack of rain. A possibility of famine also remains. The public of the western regions has to face many hardships.

If Saturn is in the sign Capricorn, a boom comes in gold, silver, copper, cotton, raw cotton, thread and all grains. The public remains afflicted by disease and the like. In the sign Capricorn, Saturn causes plenty for half the time and famine for half the time; this is the opinion of some scholars.

If Saturn is in the sign Aquarius, it brings a boom in the first 1 year and a slump in the following 1 and a half years. A boom comes in the prices of cotton, silver and grain. At the last time the trend of the markets is toward a slump. In some places agriculture suffers damage from excess rain, through which a possibility of famine also remains.

If Saturn is in the sign Pisces, it is plenty-causing. An atmosphere of slump remains in every commercial commodity. But this slump

— Source PDF page 201 (book page 202) —

lasts only for 6 months. A slump in metals such as gold and silver. A boom comes in jaggery, khand, ghee and grain. Because of disease and the like, death spreads among animals. Agriculture suffers damage from lack of rain.

Consideration through Saturn in the Nakshatras:

If Saturn is in the nakshatra Ashwini, there is first a slump and afterwards a boom in cotton. A boom comes in linseed, sesame, oil, mustard, raw cotton and the like. Disease increases among animals.

If Saturn is in the nakshatra Bharani, there is a possibility of war and the like in the eastern countries. Suffering comes to those who work in iron and clay.

If Saturn is in the nakshatra Krittika, a boom comes in gold, silver, copper, grain and the like. The public suffers in the eastern regions.

If Saturn is in the nakshatra Rohini, there is a boom in gold, silver, zinc, brass, copper, cotton and the like, and a slump in grain prices.

If Saturn is in the nakshatra Mrigashira, a slump in grains. There are rises and falls in gold, silver and cotton. Mutual love increases among the public. There is rain.

If Saturn is in the nakshatra Ardra, there is a slump in all kinds of grain and in cotton, linseed, mustard, sesame, oil and the like. Happiness and peace remain among the public.

If Saturn is in the nakshatra Punarvasu, there is a good boom in cotton and a boom in grains, and a slump comes in linseed, sesame, oil and mustard.

If Saturn is in the nakshatra Pushya, agricultural production is greater, because of which grain prices remain slack.

— Source PDF page 202 (book page 203) —

If Saturn is in the nakshatra Ashlesha, a slump comes in urad, sesame and cotton. The public lives in happiness and peace. In some places a possibility of war and the like also remains.

If Saturn is in the nakshatra Magha, a boom comes in jaggery, khand, ghee, salt and the like. There is a lack of rain.

If Saturn is in the nakshatra Purva Phalguni, there is a boom in wheat, barley, gram, urad, green gram, sesame and mustard. There are rises and falls in cotton. There is a lack of rain. A possibility of famine remains. The public is in sorrow.

If Saturn is on the nakshatra Uttara Phalguni, grain prices are high. There is a lack of rain. Animals and grass suffer loss.

If Saturn is on the nakshatra Hasta, a boom comes in all things: there is famine (akal).

If Saturn is in the nakshatra Chitra, a slump comes in all grain, cotton, raw cotton, ghee and silver. The rain is excellent.

If Saturn is in the nakshatra Swati, the price of grain is slack. There is plenty.

If Saturn is in the nakshatra Vishakha, a boom remains in wheat. Auspicious works take place everywhere. Joy increases among the public.

If Saturn is in the nakshatra Anuradha, a boom comes in saffron, sandalwood, camphor, chilli and grocery goods.

If Saturn is in the nakshatra Jyeshtha, a boom comes in grains and in silver. The rain is moderate. Fear of the ruler and an increase of disease among animals.

If Saturn is in the nakshatra Mula, cotton, raw cotton, cottonseed, juice-type substances, grain, silver and rock salt become high.

— Source PDF page 203 (book page 204) —

If Saturn is in the nakshatra Purva Ashadha, grain prices are slack. The public remains in sorrow from disease and the like.

If Saturn is in the nakshatra Uttara Ashadha, a boom comes in grain, grapes, dates, madder, cotton, raw cotton, sandalwood, iron and the like. The public suffers from an increase of disease.

If Saturn is on the nakshatra Shravana, grain prices are level. A boom comes in animals, and the rain is moderate.

If Saturn is in the nakshatra Dhanishtha, a slump comes in jaggery and khand. A boom comes in wheat, barley, gram, moth, rice, green gram, urad, lentils, sorghum, pearl millet and the like. There is a lack of rain.

If Saturn is in the nakshatra Shatabhisha, grain prices are slack. The rain and agricultural production remain good. Disease increases among animals.

If Saturn is in the nakshatra Purva Bhadrapada, there is a boom in grain, mustard, sesame, oil, linseed, green gram and urad, and the rain is low.

If Saturn is in the nakshatra Uttara Bhadrapada, there is a boom in grain, saffron, sandalwood and silver. A lack of rain. Disturbances and political strife.

If Saturn is in the nakshatra Revati, a boom comes in grain, urad, green gram, mustard and tobacco. Agriculture suffers damage from lack of rain. A slump remains in gold and silver.

Consideration through the Rising and Setting of Saturn:

If Saturn rises in the sign Aries, because it is in the house of Mars and in its own sign of debilitation, this Saturn causes a heavy upheaval in commercial commodities. A sudden slump comes in the markets. The rain is good. There is plenty. Happiness among the public

— Source PDF page 204 (book page 205) —

increases. And if Saturn sets in the sign Aries, a boom comes in all kinds of grain and grain stocks (galla), in lac, mustard and other oilseeds and in juice-type substances. A slump comes in cotton, shares, gold, silver, paat, sacking and the like. If a slump has come before the setting in oilseeds, a boom comes; and if there is a boom, a slump will come. At the time of Saturn's setting, rain, wind and storms generally also break out, by which agriculture

suffers very great damage.

If Saturn rises in the sign Taurus, a boom comes in jaggery, khand, sugar, sugarcane and the like and in juice-type substances. And an atmosphere of boom also remains in grain stocks, grass, fodder, timber and animals. And if Saturn sets in the sign Taurus, a boom comes in grass, fodder, white things and juice-type substances. There are good rises and falls in gold and silver. In cotton, paat, sacking and oilseeds the trend is of both a boom and a slump.

If Saturn rises in the sign Gemini, it forms combinations for a slump in grain and commercial commodities. The rain is excellent. Freedom from disease increases among the public. And if Saturn sets in the sign Gemini, a good two-way line forms in commercial commodities. There are greater rises and falls. A one-way line forms less.

If Saturn rises in the sign Cancer, a good boom comes in grain and juice-type substances, and a boom in cotton, paat, sacking and the like. There is a lack of rain. Disease, disturbance and lawlessness increase among the public. And if Saturn sets in the sign Cancer, gold,

— Source PDF page 205 (book page 206) —

silver, cotton, paat and sacking have good rises and falls and afterwards the trend is toward a boom. A boom comes in grain, oilseeds, juice-type substances, ghee and the like. A lack of rain remains. The political atmosphere remains very disturbed.

If Saturn rises in the sign Leo, the trend of the markets is toward a boom. There is a lack of rain in some places and excess rain in others, by which agriculture suffers greater damage. Unrest remains greater among the public. And if Saturn sets in the sign Leo, a boom comes in metals such as gold and silver and in shares. The public remains in great distress from increasing epidemics and other diseases.

If Saturn rises in the sign Virgo, a boom comes in urad, oilseeds, shares and juice-type substances. Grain prices are slack. There is a lack of rain. And if Saturn sets in the sign Virgo, a boom comes in gold, silver, shares and the seven kinds of grain. In cotton, castor, bithal (unclear; possibly cottonseed) and sacking a boom comes after good rises and falls.

If Saturn rises in the sign Libra, a boom comes in grain, juice-type substances, ghee and the like, and in some places there is also a lack of rain. And if Saturn sets in the sign Libra, grain prices are high. There is a lack of rain. The production of agriculture is low. If Saturn sets in the rainy season, the rain becomes good, through which there is plenty. And grain prices also become slack.

If Saturn rises in the sign Scorpio, a boom comes in cotton, paat, sacking, jaggery, khand, sugar, grain stocks (galla) and oilseeds. In the markets

— Source PDF page 206 (book page 207) —

a storm of sudden boom comes. And if Saturn sets in the sign Scorpio, combinations for rain form. But gusts of wind, storms and strong winds blow, and the calamities to crops (iti-dosha) increase. Agriculture suffers extreme damage from locusts and the like, because of which a boom comes in grains.

If Saturn rises in the sign Sagittarius, a boom comes in all grain and juice-type substances. Disease and unrest increase among the public; and if it sets, a slump comes in cotton, paat,

sacking, oilseeds, the seven grains and the like. The rain is good and there is plenty.

If Saturn rises in the sign Capricorn, grain prices are slack and a boom comes in other commercial commodities. Lawlessness increases among the public. And if Saturn sets in the sign Capricorn, a boom comes in things made of iron, in metals, in the share markets, in oilseeds such as linseed and mustard, in oil and in all grains. The force of the wind is greater. In some places the rain is greater and in others there is an extreme lack of rain, because of which agriculture suffers loss. The public has many hardships. Disease increases among animals and epidemics spread.

If Saturn rises in the sign Aquarius, a boom comes in grains such as wheat, barley and gram, in metals and in juice-type substances. Even when the rain is good, agriculture suffers loss from insects and the like having attacked it, or agricultural production is lower through the disturbances of locusts and the like. The public remains sorrowful. Disease increases among animals. And if Saturn sets in the sign Aquarius, in commercial commodities, after good rises and falls,

— Source PDF page 207 (book page 208) —

a trend of boom forms. A good boom comes in cotton, paat, sacking, juice-type substances, oilseeds, oil and the like. There are good rises and falls in gold and silver. There is a lack of rain. The effect of cold increases. Sometimes there is snowfall or a shower of hail, by which agriculture suffers damage and a boom comes in grains. Animals and birds suffer loss.

If Saturn rises in the sign Pisces, grain prices are high. There is a lack of rain, because of which agricultural production is low. Animals suffer from the low production of grass and fodder. The public remains in sorrow. An apprehension of political strife and disturbance also remains. If Saturn sets in the sign Pisces, even then the trend remains only of a boom in commercial commodities. The public remains afflicted. A possibility of political strife remains. A boom comes in animals. Through lack of rain a boom comes in grain. A very great boom comes in silver, sandalwood, saffron and other fragrant substances.

Consideration through Retrograde and Direct Saturn:

If Saturn is retrograde in the sign Aries, the public remains in sorrow from many troubles; and if Saturn is direct in the sign Aries, there remains a possibility of terrible famine in the Arab countries.

If Saturn is retrograde in the sign Taurus, it is famine-causing, grain-destroying, war-causing, a cause of disease and suffering and a cause of fear. And if Saturn is direct in the sign Taurus, there remains a possibility of war in the southern countries.

If Saturn is retrograde in the sign Gemini, the worldly atmosphere full

— Source PDF page 208 (book page 209) —

of sorrow; and if Saturn is direct in the sign Gemini, there is first a boom and afterwards a slump in cotton, silver, ghee and the like.

If Saturn is retrograde in the sign Cancer, there is political strife in the northern regions; and if Saturn is direct in the sign Cancer, a slump comes in oil, chilli, sesame and the like within 12 days.

If Saturn is in the sign Leo, asafoetida, mustard, madder and the like go into a slump and then become high; and if it is retrograde, it is famine-causing, grain-destroying and a cause

of war and similar disturbances.

If Saturn is retrograde in the sign Virgo, a possibility of famine remains and the public remains afraid of war and the like; and if Saturn is direct in the sign Virgo, a slump comes in juice-type substances, oil, camphor and the like.

If Saturn is retrograde in the sign Libra, people of wicked nature fight among themselves and are destroyed; and if Saturn is direct in the sign Libra, a boom comes in linseed, dry ginger, long pepper, silver and the like.

If Saturn is retrograde in the sign Scorpio, the public remains greatly sorrowful from terrible famine, epidemics and the like. If Saturn is direct in the sign Scorpio, there is a boom in ginger, chilli and the like, and a slump in coriander and the like.

If Saturn is retrograde in the sign Sagittarius, the public remains afraid of famine, destruction of grain, war and the like; and if Saturn is direct in the sign Sagittarius, there is destruction of grain, and in the northern countries, China and so on, earthquakes and the like occur.

If Saturn is retrograde in the sign Capricorn, in the western and southern provinces floods and in the eastern provinces incidents of earthquake are greater.

— Source PDF page 209 (book page 210) —

And if Saturn is direct in the sign Capricorn, there are special rises and falls in all commercial commodities.

If Saturn is retrograde in the sign Aquarius, there is a possibility of a great war in the Western countries; and if Saturn is direct in the sign Aquarius, there is a flood of water (jal-viplav).

If Saturn is retrograde in the sign Pisces, there remains a possibility of famine and war; and if Saturn is direct in the sign Pisces, there is excess rain, by which grain is destroyed.

When Saturn becomes retrograde, within three months there is a boom in hundis (bills of exchange), promissory notes and the like, in wheat, green gram, sorghum, grapes, dates, nutmeg, ghee, turmeric, indigo, blue vitriol, coriander, fenugreek, cumin and the like, and in animals such as horses; there are rises and falls in all metals such as gold and silver, in gems, pearls and all jewels, and in coconut, betel nut, cloves, sesame, oil and the like; and when it becomes direct, within two months it makes a boom in oil, mustard, asafoetida, chilli and the like and a slump in cotton, and is plenty-causing.

Consideration through Rahu:

Rahu moves round on one sign for 1 and a half years. It is regarded as a cruel planet. Its motion is always retrograde, that is, it moves backward.

What the results are from the nature, disposition and qualities of Rahu by itself is stated here:

If Rahu is in the sign Aries, a boom comes in grains such as wheat, barley and gram.

If Rahu is in the sign Taurus, cotton, jaggery, khand, sesame, oil,

— Source PDF page 210 (book page 211) —

mustard, grocery goods and the like are boom-priced. A very great boom in the prices of cotton remains possible.

If Rahu is in the sign Gemini, a slump comes in gold, silver, cotton and the like and a boom in grains.

If Rahu is in the sign Cancer, a slump comes in the first 6 months and a boom afterwards in gold, silver, copper, iron, zinc, brass and other metals and in cotton. A boom comes in wheat, rice and the like. Disease spreads among animals.

If Rahu is in the sign Leo, a boom comes in salt, red chilli, coriander, turmeric and other spices, and in grocery goods such as dry ginger and coconut. A slump comes in grains such as wheat, barley and gram.

If Rahu is in the sign Virgo, a good boom comes in cotton. A boom in fragrant substances such as camphor, musk and sandalwood. A slump comes in oilseeds such as mustard and linseed.

If Rahu is in the sign Libra, a boom comes in grain and the like. Agriculture suffers damage. The public has hardship from many causes. A possibility of war and similar disturbances remains.

If Rahu is in the sign Scorpio, there are rises and falls in gold. A good boom comes in cotton.

If Rahu is in the sign Sagittarius, a slump comes in the first five months and a boom afterwards in cotton, thread, raw cotton and cloth. A boom comes in animals fit as vehicles, such as elephants and horses. There is a lack of rain, so that the signs of famine begin to appear and agricultural production also falls.

— Source PDF page 211 (book page 212) —

If Rahu is in the sign Capricorn, there is a slump at the start for 3 months and afterwards a boom in grains such as wheat, barley and gram. Therefore, by stocking these commodities in the first 3 months and selling in the boom afterwards, profit can be obtained. A boom comes in cotton, raw cotton, thread and the like.

If Rahu is in the sign Aquarius, a good boom comes in cotton. But on the day when the Moon is conjoined with Rahu a slump comes in cotton. Rahu in the sign Aquarius makes a boom in commercial commodities through conjunction with cruel planets and a slump through conjunction with benefic planets.

If Rahu is in the sign Pisces, there is a slump in gold and silver, and a boom in cotton and grain. There is a lack of rain, because of which an apprehension of famine remains. Moreover, if Mars is also in the sign Aquarius, there is a full possibility of heavy famine (akal), and great portents (utpat) occur, by which the public remains greatly sorrowful. Through the shortage of grass, fodder and the like, great suffering also comes to animals; and if the Moon is with Rahu in Pisces, a slump comes in cotton.

Consideration through Ketu:

Ketu always moves round on the seventh sign from the sign on which Rahu is moving round. This too is regarded as a cruel planet. Ketu also stays for 1 and a half years on one sign.

The flame-like streaks that are seen in the sky after sunset, like a tongue of fire, are called by the name of Ketu. Ketu is the ninth planet. Ketu is a kind of combination connected with

portents. Meteor-falls, fires on the horizon (digdah), earthquakes, all these of Ketu

— Source PDF page 212 (book page 213) —

are signs connected with portents (utpat). Lack of rain, excess rain, a special fall of snow, special heat, and outbreaks of epidemics and diseases: all these are indicators of the portents of Ketu alone. It is known in this way: when several cruel planets come together on one nakshatra, that nakshatra is called "wounded" (kshat) or "struck" (ahat). When a nakshatra is struck there is a full possibility of a portent, and portents occur in keeping with the season that prevails at that time. For example, in the rainy season excess rain or lack of rain, in the autumn special snowfall or gusts of wind, in the summer special heat.

The Ketus that arise in the months of Bhadrapad and Shravan are known as "Varuna-named." At that time the rain is good. A slump comes in cotton, raw cotton, thread, paat, sacking, jaggery, juice-type substances and the seven grains, and if there is a conjunction of cruel planets, because they cause lack of rain or excess rain, an atmosphere of boom forms. These Ketus are reckoned as 10.

The Ketus that arise in the months of Ashwin and Kartik are known as "sons of the Sun." In those days disease increases among animals. These Ketus are causes of death, disease, epidemic, famine, grief and loss. With the conjunction of cruel planets they should be understood as especially harmful. In all things they are boom-causing. These Ketus are reckoned as 14 (?).

The Ketus that arise in the months of Pausha and Margashirsha are known as "sons of Fire." These are causes of outbreaks of fire, fear of thieves, lack of rain and disease. They make a boom in commercial commodities. These Ketus are reckoned as 3? (the number is unclear in the scan; it looks like 34 or 35).

— Source PDF page 213 (book page 214) —

The Ketus that arise in the months of Magha and Phalguna are known as "sons of Yama." They are causes of destruction of grain, political strife and famine. They form combinations for a boom in commercial commodities. These Ketus are reckoned as 6 (?).

The Ketus that arise in the months of Chaitra and Vaishakh are known as "sons of Kubera." They bring great comfort and plenty and are beneficial for auspicious works everywhere. They are slump-causing in all commercial commodities. These Ketus are reckoned as 18.

The Ketus that arise in the months of Jyeshtha and Ashadh are known as "sons of Vayu (the wind)." At that time fierce winds, gusts of great speed and storms blow. In whichever direction the force of the wind rises, there it will go on destroying and breaking up trees, houses and all things. An atmosphere of boom forms in commercial commodities. These Ketus are reckoned as 20.

[End of Chapter Six (rises and falls in rates through the planets' movement in signs and nakshatras), book pages 147-214.]

Mercury's Setting Alone Can Make a Man Rich:

Every year the setting (asta) of Mercury happens 6 or 7 times. Roughly, in a Mercury setting of 8, 11, 15, 18 and 22 and one-third days, there is a boom in cotton, silver, gold, paat, hessian, sacking, jaggery and grain; and in a Mercury setting of 30 and 40 days there is a slump. Sometimes, in a setting of 22 and one-third to 30 days, if Mercury is direct there is a boom in the earlier part and a slump in the later part. If Mercury is retrograde at that time,

there is a slump in the earlier part and a boom in the later part. Many traders who worked on the basis of Mercury's setting alone have become rich.

— Source PDF page 214 (book page 215) —

Chapter Seven

Tested and Unfailing Combinations for Gold, Silver and Other Substances

(Cotton, Jaggery, Guar, Peas, Mustard)

Mixed Combinations:

If Mercury is retrograde, and its motion is slower than the Sun's motion, and it is forming an itthasala yoga (an "applying" combination of two planets, a term from the Tajika system) with the Sun, then jute, paat, sacking and the like, the commodities under its sign, go to a boom.

If the motion of Mercury in the retrograde state is slower than Jupiter's and it is forming an itthasala yoga with Jupiter, a slump comes in jute, sacking, paat and the like, the commodities under the authority of the planet Mercury.

In whatever sign Saturn may be, as soon as Mars enters a kendra (angle) from it, a boom comes in a line of slump.

When Mercury, the Sun and Rahu are together in a sign, as soon as Saturn enters that sign at that time, a boom comes in a line of slump.

By the Sun, Rahu and direct Mercury being together, a sudden boom comes.

If in any month there are five Saturdays or five Sundays, or both days come five times, and Mars in Taurus makes a full aspect-relationship with Saturn in Scorpio, then all juice-type substances, grain,

— Source PDF page 215 (book page 216) —

metals and oilseeds, cotton, jute, paat, sacking and the like, commercial commodities, have a good boom.

If Mercury, the Sun and Ketu are together in the sign Aries, and are pierced by the conjunction of Rahu and Jupiter in the sign Libra, and there is also the aspect of Mars and Saturn, a boom comes in every commodity.

If Saturn is retrograde in the sign Scorpio, and Jupiter, retrograde in the sign Virgo, comes into the sign Leo, the trend of the markets begins to move toward a slump. A good slump comes in linseed, castor, mustard and other oilseeds, and in grain stocks (galla).

If Jupiter is in the sign Cancer, Mars in the sign Libra and Saturn in the sign Pisces, a boom comes in grain and oilseeds.

If the Sun, Saturn and Mars are together in the sign Taurus, a boom comes in grain and oilseeds.

If Mars, Venus, Saturn and the Sun are together in the sign Aries, or move round separately in the sign Aries, they are boom-causing for grain and oilseeds.

If Venus and Rahu are in the sign Aries, even then a boom comes in grain, oil and oilseeds.

If Jupiter-Venus, or Mars-Sun, or Mars-Saturn, or Rahu-Moon are together in a sign, and whether they are in the retrograde or the direct state, they make a boom in cotton.

If Mars-Rahu are together in the sign Virgo, and they are under the full aspect of Saturn in the sign Sagittarius, and retrograde Venus is with the Sun, a good two-way rise and fall runs in commercial commodities.

— Source PDF page 216 (book page 217) —

If Mercury is ahead of the Sun and forms an itthasala yoga with the Sun, and has no relationship with any benefic planet, or if Mercury is equal with the Sun in degrees as well, then, because it is in the state of complete setting (purnasta), a good boom comes in jute, paat, sacking and hessian.

If the Sun in the sign Scorpio is joined with Mercury, Jupiter, Venus and Saturn, and is under the full aspect of Mars, a boom comes in a line of slump.

If five planets, the Moon, Mercury, Saturn, Rahu and the Sun, are in the sign Scorpio and at that same time there is a solar eclipse, an atmosphere of sudden boom forms in a line of slump. Good profit can be taken from such a combination.

If the Sun, Mercury and Venus are together in the sign Pisces and Jupiter of Virgo is under full aspect, a slump comes in juice-type substances, grain, metals and oilseeds.

If in some month there are five Saturdays, and the Amavasya is also on a Saturday, and on that same day there is also a solar eclipse, and the Sun's Sankranti into its sign of exaltation enters on a Sunday, a boom comes in every commodity.

If the solar eclipse is on a Saturday and fifteen days later a lunar eclipse also falls on a Saturday, and Mercury, Jupiter and Saturn are in the retrograde state, a boom comes in every commercial commodity.

If there is a combination of the Sun and Venus in the angular house (kendra) from Jupiter and a combination of Saturn and Mars in the second house, a good slump comes in all grain, oil, sesame, mustard, castor, linseed and other oilseeds.

If Saturn and Mars are together in the sign Libra, a boom comes in cotton. And if Mars becomes retrograde and Saturn is very swift

— Source PDF page 217 (book page 218) —

(of swift motion), a heavy boom comes in cotton. This boom lasts for 5 or 6 months.

If Mercury and Venus are released together, that is, when both are separate (no longer set), a boom comes in cotton and raw cotton.

If in the bright fortnight of any month two tithis are lost, that is, the fortnight is of thirteen days, and Saturn is direct and of slow motion, a two-way line forms in the markets; that is, rises and falls take place.

If the Sun is ahead of Mercury and Venus, and Mercury and Venus both form an itthasala yoga with the Sun, or Venus is in the condition of going ahead of the Sun, a good boom comes in jute, paat, sacking and hessian.

If the Sun enters Capricorn and at that time Jupiter has a full aspect on the Sun, and Mars, moving round in the sign Aries, forms a kendra combination, a good slump comes in all juice-type substances, ghee, oil, jaggery, wheat, gram, barley, peas, pigeon pea, urad, green gram, mustard, linseed, castor and the like.

If the Sun's Sankranti of 45 muhurtas falls on an Amavasya that is a Wednesday, and Shravan is an intercalary month (adhik masa), a slump comes in all commodities.

If Jupiter is retrograde, is forming a combination with Mars and Venus, and Saturn is being set, a good boom comes in all grain, oil, ghee, mustard, jaggery, castor, juice-type substances and the like.

Even when Venus, Saturn and Mars, all three planets, are together, a slump comes in ghee, oil, mustard, linseed, castor, jaggery and all grains.

If Jupiter is in the sign Cancer, Saturn and Rahu in the sign Scorpio, Mars in the sign Sagittarius, or ahead of Saturn and Rahu in Scorpio,

— Source PDF page 218 (book page 219) —

then a good boom comes in all grain, linseed, castor, mustard and other oilseeds.

If Jupiter, moving round in the sign Pisces, becomes retrograde, and Mars in the sign Pisces or in any other sign is swift, and at the same time Saturn's full aspect is on Mars or on Jupiter, or it is conjoined with Saturn, Mars or Jupiter, a good boom comes in cotton.

If in any month there are five Fridays and Thursdays, and the Sun, Mercury, Rahu and Mars are together in the sign Virgo, a good slump comes in commercial commodities. And if Mercury, set in the sign Virgo, rises swiftly in the sign Libra, then from whenever it rises a boom begins to come in castor, linseed and other oilseeds, cotton, jute, paat, sacking, grain stocks (galla), jaggery, juice-type substances and the like.

If Mars is retrograde in any sign among Aries, Scorpio and Leo, and the full aspect of some cruel planet is also on Mars, a boom comes in paat, hessian, thread and sacking.

If after sunrise, in the first half of the day, the Sankranti of Aquarius occurs, and Venus sets in the sign Capricorn in the eastern direction, and at that time Jupiter's aspect is on Venus, and the Aquarius Sankranti is of 45 muhurtas, a slump comes in commercial commodities. This slump runs evenly for 2 or 3 months.

If in some month the sighting of the Moon is on a Monday and the Virgo Sankranti enters on a Wednesday, even though that Sankranti is of only 15 muhurtas, and Mercury, moving round in the sign Leo, is in the state of setting, the trend of the markets leans toward a slump.

— Source PDF page 219 (book page 220) —

If Jupiter is set in the sign Virgo or Pisces, or Jupiter, the Moon, Mercury, Venus and the Sun are together, or Jupiter with the Moon is forming an aspect-relationship named the conjunction (yuti) of the Sun, Venus and Mercury, a slump comes in wheat, barley, gram, peas, pigeon pea, mustard, linseed, castor, oil, sesame and the like.

If Mars, Mercury and Venus, each separately, form an itthasala yoga with the Sun, all together, and there is no aspect of a benefic planet, a boom comes in paat and sacking.

If Mars, a few degrees ahead of the Sun, forms an itthasala yoga, a boom comes in paat, sacking and also in sacks, thread, hemp and the like. And if Mars is equal to the Sun in degrees and is in one and the same sign, a good slump comes in paat, hessian and the like.

If the Sun and Mars are not between Mercury and Venus, then, as Mercury and Venus keep coming nearer, a slump will come in jute, paat and hessian.

If Mercury, becoming direct, moves ahead of the Sun, or, becoming retrograde, falls behind the Sun, a slump comes in jute, paat and sacking.

If Venus rises in the western direction in the sign Taurus or Libra, and Jupiter and Saturn, separately in different signs, are in an angular position (kendra) from Venus, or Venus, Jupiter and Saturn are, in order, in the places 4, 7 and 10, combinations for a boom form in the running line of slump.

If there is a total lunar eclipse on a Monday, even so a boom comes in the running line of slump.

If, in the Gemini Sankranti, the Sun is on the nakshatra Ardra, a slump comes in commercial commodities.

— Source PDF page 220 (book page 221) —

If Mars, moving round in the sign Leo, sets, then, as Mercury, Venus and the Sun come into the sign Leo, the boom will keep growing; and if Saturn also has a full aspect on the sign Leo, there is a special boom.

If Mercury is in the retrograde state, and is in the sign Leo with Mars and the Sun, and Mars is a few degrees behind the Sun, a boom comes in ghee, oil, juice-type substances, cotton, paat, sacking, jaggery, mustard, linseed, castor, sesame and the like.

If Venus and Jupiter are in the sign Virgo, and Venus, of swift motion, is a few degrees ahead of Jupiter, a boom comes in grain, juice-type substances, cotton, jute, paat, sacking, jaggery, mustard and the like.

If Mercury is set in the western direction in the sign Scorpio, and the Sun and Venus are also with it, and there is the full aspect of Mars in the sign Aries, a slump comes, going by a boom, in almost all commodities.

If in some month there are five Saturdays, and Saturn, the Sun and Venus are together in the sign Sagittarius, and all the planets, among them Mars, Mercury, Jupiter, Venus and Saturn, are in the direct state, a boom comes in all commodities. It is a point to remember here that five planets staying together in the direct state is boom-causing, and staying in the retrograde state is slump-causing.

In the year (samvatsar) whose king is Jupiter and whose minister is the Moon, and in that year there is no solar or lunar eclipse either, and Jupiter is moving round in a friend's sign, that year is a year of slump.

If Mercury and Venus are in the sign Scorpio, or Jupiter in the sign Aquarius is set

— Source PDF page 221 (book page 222) —

, then in both these conditions, through the conjunction of the Moon, a good slump comes in mustard, linseed, castor, wheat, gram, barley, peas and other grains. If in both conditions the Moon does not form a conjunction either, even so a slump should be understood.

If Mercury is retrograde in the sign Virgo or is of swift motion, a slump comes in mustard, linseed, castor, groundnut, maize, pearl millet and other coarse grains, and in ghee, oil and the like.

If Mercury and Mars are together in the sign Cancer, Sagittarius or Pisces, a slump comes in juice-type substances, all grains, linseed, mustard and other oilseeds.

If Jupiter, Saturn and Mars are together in the sign Cancer, Sagittarius or Pisces, a slump comes in grain stocks (galla), grain and oilseeds.

Venus and Mars in the sign Libra make a slump in grain, oilseeds and grain stocks.

If the conjunction of Jupiter, the Moon and Mars falls in any sign, before the conjunction takes place grain stays high. After the conjunction has taken place, a slump begins to come in linseed, mustard, castor, wheat, gram, barley, peas, pigeon pea, oil and the like.

If the Sun, Saturn, Rahu, Mercury and Jupiter are together in some sign, a boom comes in grass, grain and oilseeds, and there is a lack of rain or excess rain.

When the above five planets are in some sign and the Moon and Mars also reach that same sign, there is heavy loss through excess rain or lack of rain. There are unrest and disturbances among the public. A possibility of earthquakes

— Source PDF page 222 (book page 223) —

also occurs, and there is a full possibility of the earth splitting.

If Jupiter is in the nakshatra Jyeshtha and Saturn in the nakshatra Anuradha, a boom comes in grains such as wheat, barley, gram, peas and pigeon pea.

If there is a conjunction of Mars and Rahu, or of Saturn and Rahu, in the sign Taurus, even so a boom comes in grains such as wheat, gram, peas and pigeon pea.

If a conjunction of Saturn and Rahu forms in the nakshatra Ardra, a boom comes in grain and the like.

If there is a conjunction of Venus, Mars, Saturn and the Moon in the nakshatra Rohini, or Mercury is set in the nakshatra Shravana, a boom comes in grains such as wheat, gram, barley and peas.

In the sign Aries, the conjunction of Mars, Venus and Rahu is a strong boom-causing combination for grains.

If a solar eclipse falls only 15 days after a full lunar eclipse, a boom comes in commercial commodities. Grain prices are high. And in silver a boom comes from 15 days earlier, and afterwards a slump.

If there is a lunar eclipse in the month of Vaishakh, a boom comes in all grain, cotton, thread, paat, sacking and the like.

Whenever the Sun enters any sign, that is, at the moment the Sun's Sankranti falls in any sign, or whenever the Moon makes a change of sign, if at that time the aspect of a benefic and strong planet is on the Sun and the Moon, then even if the markets are running in a boom at that time, a trend of slump will come. A slump comes especially in cotton and raw cotton.

— Source PDF page 223 (book page 224) —

If Jupiter is with any one of the Moon, Mars, Mercury or Venus, a slump comes in commercial commodities.

If the Sun's full aspect is on the Moon, and Mercury's full aspect is on the Sun, and there is no aspect-relationship among the benefic planets, a boom comes in paat, sacking and hemp.

If Jupiter is in the fifth, seventh or ninth place from the Moon, and there is no aspect on Jupiter from Saturn or any other cruel planet, or Jupiter is not joined with a cruel planet, a slump comes in hemp and thread.

If in some sign the Moon or Mercury is with Venus, or Venus and the Moon are together, and Mercury's full aspect is on them, a good slump comes in jute, paat, sacking, cotton, raw cotton, silk and thread.

If Venus and Jupiter are in one sign, or Jupiter has a full aspect on Venus, and Venus is not forming an itthasala yoga with the Sun, and such a Venus has a full aspect on the Moon, a slump comes in jute, paat, sacking and hessian.

If Venus is behind Jupiter, or a few degrees behind in the same sign, a slump comes in paat, sacking and hessian. As Venus keeps coming near Jupiter, some boom will keep coming, and when Venus has moved ahead of Jupiter, a full boom will come.

If Jupiter forms an itthasala yoga with a cruel planet, or has been set because of staying with the Sun, or Venus forms an itthasala yoga with a cruel planet, combinations for a boom form at that time. When it has been set with the Sun, in the state of becoming retrograde a slump does not come, but some boom or other certainly comes.

— Source PDF page 224 (book page 225) —

If the Moon makes a vedha (full aspect) on Jupiter, a slump comes in jute, paat and sacking; and if there is also a vedha of a cruel planet, even then a slump will come. If a friendly planet, Mars, makes a vedha with Jupiter, or the vedha of any benefic planet, a slump will come all the same. By the vedha of cruel planets an ordinary slump comes, and by the vedha of benefic planets a good slump comes.

The vedha of the Moon with a cruel planet brings a boom in a line of slump, and, apart from the Moon, the vedha of the other benefic planets is slump-causing. If the vedha of cruel planets is with cruel planets, it is boom-causing. The vedha of cruel planets with the Moon is also boom-causing.

If from the navamsha of Jupiter any benefic planet is in an angle or in a trine, and there is no aspect on it from any cruel planet, a slump comes in paat, sacking and hessian.

If in some month there are five Mondays and Tuesdays, and the five planets Mercury, the Sun, the Moon, Mars and Jupiter are together in some sign, rises and falls run in every commodity: at the start a slump will come and afterwards a boom.

If the four planets Mars, Mercury, Venus and Jupiter, in the direct state, are in the sign Scorpio, and a "kuta-yoga" (a combination that closes in on them) is formed on them by the Sun and Saturn in the sign Sagittarius, they are boom-causing. They bring a good boom in commercial commodities.

If Jupiter and Saturn are in the sign Sagittarius, Venus and Mars in the sign Capricorn, and the Sun and Mercury in the sign Aquarius, a boom comes in all things.

If Jupiter, Mars and the Sun are in the sign Virgo and Jupiter sets and

— Source PDF page 225 (book page 226) —

the Sun, as it keeps moving ahead of Mars by its own motion, a slump will keep coming in commercial commodities.

If on Amavasya the Sun, Moon, Mars and Jupiter are in the sign Virgo and the Amavasya is on a Monday, combinations for a good slump form in commercial substances.

If Jupiter-Rahu are in the sign Libra, Saturn-Mars in the sign Scorpio, Mercury-Sun in the sign Sagittarius and the Moon-Venus in the sign Capricorn, then, through such planetary combinations occurring continuously, a good boom comes in the markets.

If the Amavasya of the Sagittarius Sankranti is on a Saturday or Tuesday, and on the Amavasya the conjunction of the Sun and Moon is in the sign Sagittarius, and Mercury in Sagittarius is retrograde and Venus is in the sign Capricorn, there are signs of good booms in commercial commodities.

If direct Mercury is ahead of the Sun, or retrograde Mercury is behind the Sun, a good slump comes in paat, sacking and hessian through the navamsha-vedha of a benefic planet.

If the Sun is ahead of or behind the Jupiter-Venus conjunction occurring in any sign, and the Sun's full aspect is on the Moon, or Venus is joined with Mercury and the Sun is not between them, a slump comes in jute, paat and hessian.

If Venus is with the Sun in the sign Capricorn, and sets in the bright fortnight, a slump comes in jaggery, mustard, peas, pigeon pea, guar, oil and the like.

If the Capricorn Sankranti of 15 muhurtas, in the sitting condition, enters at night, a boom comes first and a slump afterwards.

— Source PDF page 226 (book page 227) —

If Saturn in the sign Sagittarius enters the nakshatra Mula, and Mars is already present there, and Jupiter is in the sign Libra in the retrograde state, a boom comes in commercial commodities. And there are possibilities of famine or many other such disturbances as have an effect on the trend of the markets.

If any boom-causing planet is in any sign, and the full aspect of some strong benefic planet is on that same planet, a good slump comes in the markets instead of a boom. But through the aspect of inauspicious planets a boom will remain. If any benefic planet, being strong, is situated in a sign, and the full aspect of a strong cruel planet is on that planet, a boom comes into the running line of slump. In cotton these combinations have been seen to work well. Through the aspect of benefic planets combinations for a slump, and through the aspect of cruel planets combinations for a boom, form, provided that they, benefic or cruel, are strong.

Combinations for a Boom in Cotton:

If the conjunction of Jupiter and Venus is in the direct state, a boom remains in cotton until the time of the conjunction. And if retrograde Venus forms a conjunction with Jupiter, a boom comes in cotton after the conjunction.

If Jupiter enters the sign Pisces, a boom comes in cotton. And if Jupiter in the sign Pisces becomes retrograde, a very great boom comes in cotton. If Jupiter is in the nakshatra

Chitra, even then a boom comes in cotton.

If a solar eclipse falls on the Amavasya of any month on a Tuesday, a boom comes in cotton after 2 months.

— Source PDF page 227 (book page 228) —

If the Purnima of the bright fortnight of any month is of less than 5 ghadis, a boom comes in cotton.

If Saturn in the sign Leo is at 7 or 8 degrees (the figure is hard to read), a boom of up to 50 per cent comes in cotton.

If Saturn and Mars are together in any sign, a boom of 20 per cent to 45 per cent comes in cotton.

If the Shashthi of the bright fortnight of any month is lost, cotton is high in that month.

If Rahu enters the sign Taurus, a sudden boom comes in cotton, and this boom lasts for almost a year.

If Mars and Rahu are in the sign Virgo, a boom comes in cotton. But if Jupiter in the sign Pisces is direct at 15 degrees, the boom will not come; instead there will be a slump.

If Saturn-Rahu or Saturn-Mars are in the sign Capricorn, a heavy boom comes in cotton.

As soon as planets become retrograde, an atmosphere of boom forms in cotton.

As soon as Saturn sets, a cycle of boom runs in cotton for 4 days, and this boom reaches 10 to 20 per cent.

If Rahu, Venus and Mars are together in the sign Aries or Scorpio, a boom comes in cotton.

If Mars is retrograde in the sign Libra, a boom comes in cotton.

If Saturn is swift-moving, a boom comes in cotton.

If it is a Sunday and the nakshatra is Revati, an ordinary boom comes in cotton.

— Source PDF page 228 (book page 229) —

If Mercury and Venus become separate from each other in one sign, a boom comes in cotton.

If Saturn and Mars are together in any sign and Saturn becomes retrograde, a boom comes in cotton. If Mars also becomes retrograde, a special boom comes in cotton.

If in any month the Ekadashi, Dwadashi or Trayodashi of the dark fortnight is lost, a boom comes in cotton in that month.

If the Amavasya of the dark fortnight is lost, the boom in cotton will remain in the fortnight that follows.

If the ghati-pal (duration) of the Purnima of the bright fortnight is more than that of the Amavasya of the dark fortnight, the boom remains in cotton in that month.

If any one planet among the Sun, Mars, Saturn, Rahu, Herschel (Uranus) and Pluto forms an aspect-combination of 0, 60 or 150 degrees of angular difference with Venus, a boom comes in cotton.

Combinations for a Slump in Cotton:

If the Shashthi of the bright fortnight of Vaishakh is on a Friday, the trend of slump runs in cotton with rises and falls.

After the conjunction of the Sun and Mercury takes place, a slump comes in cotton.

When the conjunction of Mercury and Venus takes place, a slump comes in cotton.

If the conjunction of Venus and Jupiter is in the direct state, a slump comes in cotton after the conjunction; and if the conjunction is made with Venus becoming retrograde, a slump comes in cotton before the conjunction.

If Mercury sets in the west, a slump comes in cotton.

— Source PDF page 229 (book page 230) —

If Jupiter in the sign Pisces is in the direct state above 15 degrees, a slump comes in cotton.

If Jupiter is retrograde in the sign Cancer, a slump comes in cotton.

If Jupiter enters the sign Aquarius, a very great slump comes in cotton after 6 months.

If Jupiter enters the sign Gemini, a very great slump comes in cotton.

If Jupiter is in the sign Virgo, even so a slump will come in cotton.

Venus in the sign Cancer, up to 24 degrees, brings a slump in cotton.

If Jupiter is in the sign Aquarius and Saturn is set, a slump comes in cotton.

Saturn in the sign Libra, after 15 degrees, causes a slump in cotton.

If Saturn is in the nakshatra Ashlesha, it causes a slump in cotton.

If the Shashthi of the dark fortnight of any month is lost and the Panchami is within 2 ghadis (of the day), a slump comes in cotton.

If the Purnima of any month is lost, a slump remains in cotton in that month.

If the Sun and Rahu are together in any sign, a slump comes in cotton.

If Jupiter, Mercury and Venus are together in the sign Virgo, a slump comes in cotton.

If the Sun and Venus are together in the sign Aries, a slump comes in cotton.

If the Moon and Mercury are together in the sign Aquarius, a slump comes in cotton.

— Source PDF page 230 (book page 231) —

If Rahu and Mars, or Ketu and Mars, are together and some tithi is lost, a slump comes in cotton.

If two vyatipata yogas occur in any lunar month, a slump comes in cotton.

If Venus and the Moon are together in some sign and at that same time there is a lunar eclipse, a slump comes in cotton.

If any planet among the Moon, Mercury, Jupiter and Neptune forms an aspect-combination of 45, 60 or 120 degrees of angular difference with Venus, a slump comes in cotton.

Note: from the planets that stay a long time in one sign, one should understand the booms and slumps of a long trend; from those that stay for a short time, the weekly booms and

slumps; and when they form angular combinations (amshatmak yoga), the daily booms and slumps.

Combinations for a Boom in Gold:

When Mars is retrograde, it makes a boom of 1 and a half to 2 and a half per cent in gold.

If Mars is in the sign Taurus, a good boom comes in gold.

If Mars is in the sign Leo or Virgo, a boom comes in gold.

If Mars enters the sign Capricorn, a boom comes in gold.

If Mercury or Jupiter is in the sign Leo, a boom comes in gold.

If Venus is in the sign Leo, a boom comes in gold.

If the Sun is in the sign Libra, even so a boom comes in gold.

If Rahu and Mars are in one sign, a boom comes in gold.

— Source PDF page 231 (book page 232) —

If Jupiter is retrograde, a boom comes in gold, and there are also special rises and falls.

If Rahu is strong in the sign Cancer, a good boom will come in gold.

If the sighting of the Moon is on a Monday or Friday, a boom comes in gold.

If the Moon is sighted in a red colour, even so a boom will come in gold.

If the Sun is in the nakshatra Bharani or Krittika, understand a boom in gold.

If the Sun is on the nakshatra Punarvasu, or Venus on the nakshatra Rohini, or Saturn on the nakshatra Krittika, a boom will come in gold.

The Sun in the nakshatra Pushya brings a boom in gold.

Combinations for a Slump in Gold:

If the Sun is in the nakshatra Anuradha, a slump comes in gold.

If Mercury is in the nakshatra Pushya, a slump comes in gold.

If Jupiter rises, a slump comes in gold.

If Mercury or Saturn is in the sign Gemini, a slump comes in gold.

If the sighting of the Moon is on a Saturday, a slump comes in gold.

If Jupiter is in the nakshatra Bharani, Venus in the nakshatra Punarvasu, or Mercury in the nakshatra Pushya, a slump comes in gold.

If the Sun is in the nakshatra Anuradha and Venus in the nakshatra Jyeshtha, a slump comes in gold.

When Saturn is retrograde, it makes a slump in gold.

If the rising of Mercury is in the west, a slump comes in gold.

If Jupiter rises in the east, a slump comes in gold.

— Source PDF page 232 (book page 233) —

If Saturn sets in the west, a slump will come in gold.

Jupiter in the sign Aries makes a slump in gold.

If any one of the planets Mercury, Saturn and Rahu is in the sign Gemini, a slump comes in gold.

If Jupiter is in the sign Sagittarius or Capricorn, a slump comes in gold.

Combinations for a Boom in Silver:

If Jupiter or Mercury is retrograde, it makes a boom in silver, after rises and falls, at the end.

If Mars is in the sign Aries or Libra, a boom comes in silver.

If Mercury is in the sign Leo, a boom comes in silver.

If the Sun is in the nakshatra Dhanishtha or Pushya, a boom comes in silver.

If Venus and Mars are together in any sign, a boom comes in silver.

If Mars and Rahu are together in any sign, a boom comes in silver.

If Rahu and Mars come together in any nakshatra, a boom comes in silver.

If the Pratipada of the bright fortnight of Chaitra is on a Wednesday, a boom comes in silver.

Rahu in the sign Cancer brings a boom in silver.

If the Sun is in the sign Scorpio or Sagittarius, a boom comes in silver.

If the Sun and Venus are together in the sign Cancer, there is a very great boom in silver.

When the Sun and Mars are together, a boom comes in silver.

— Source PDF page 233 (book page 234) —

If at the time of the Sankranti the Sun and Moon are in one sign, a boom comes in silver.

If the solar eclipse is in the month of Phalguna or Jyeshtha, or is on a Tuesday, a boom comes in silver.

If the Sankranti and the Amavasya are on one weekday, even so a boom comes in silver.

Combinations for a Slump in Silver:

If Venus is in the sign Leo or Libra, a slump comes in silver.

If Mercury is in the sign Aries or Virgo, a slump comes in silver.

If Mars is in the first quarter of the nakshatra Ashlesha, a good slump comes in silver.

If the Amavasya of any month is on a Monday, the slump remains in silver in that month.

If Rahu is in the sign Gemini, a good slump comes in silver.

If the Sun is in the sign Virgo or Libra, a slump comes in silver.

If the Sun is in the sign Pisces, a special slump comes in silver.

When Mars is direct, a slump comes in silver, and when Mars is set, a sudden slump comes in silver.

When Jupiter is direct, or when it rises in the east, it brings, after rises and falls, a slump in silver afterwards.

When Saturn is retrograde, it brings a slump in silver after rises and falls.

When Venus rises in the west, a slump comes in silver.

— Source PDF page 234 (book page 235) —

If Saturn is in the sign Scorpio and Jupiter in the sign Capricorn, a slump comes in silver.

If Venus, having become retrograde, becomes set, a slump comes in silver.

If the lunar eclipse is on a Sunday, the slump begins to come in silver from 15 days earlier.

Combinations for a Boom in Jaggery and Khand:

If the sighting of the Moon is on a Sunday, or is of a red colour, or is in any of the nakshatras Ardra, Krittika, Purva Phalguni, Hasta, Chitra, Swati, Mula, Purva Ashadha, Shravana, Dhanishtha, Purva Bhadrapada and Revati, a boom comes in jaggery and khand.

If the Sun is on any one of these nakshatras, Bharani, Rohini, Ardra, Pushya, Ashlesha, Hasta, Chitra, Swati, Anuradha, Jyeshtha, Purva Ashadha, Uttara Ashadha, Shravana, Shatabhisha, Purva Bhadrapada and Uttara Bhadrapada, a boom comes in jaggery, khand and the like.

If Saturn is in the nakshatra Ashwini, or Mars in the nakshatra Ardra, or Rahu in the nakshatra Uttara Phalguni, or Venus in the nakshatra Uttara Ashadha, a boom comes in jaggery and khand.

If Mars is in any nakshatra among Purva Phalguni, Hasta, Swati, Purva Ashadha and Dhanishtha, a boom comes in jaggery.

If Mercury or Venus is retrograde or direct, a boom comes in jaggery and khand.

If Jupiter in the sign Cancer is retrograde, or Mercury is retrograde, or Mercury becomes retrograde and sets, a good boom comes in jaggery and khand.

— Source PDF page 235 (book page 236) —

If Mars is set, a boom comes in jaggery and khand; but if it is set in the sign Scorpio or Capricorn, a still greater boom comes.

If Mercury rises in the west, or Saturn rises in the east, or Jupiter is set in the sign Taurus, a boom comes in jaggery and khand.

If the Sun is in the sign Aries, or there is a conjunction of the Sun and Mars, a boom comes in jaggery and khand.

If Saturn is in the sign Taurus, or Saturn and Jupiter are there, or Saturn and Rahu are there, a boom comes in jaggery and khand.

If Mars is in the sign Gemini, or Mars and Venus are there, or Saturn is there, a boom comes in jaggery and khand.

If Mars, Jupiter or Venus is in the sign Cancer, or the Sun is in the sign Leo, a boom comes in jaggery and khand.

If Mercury, Jupiter and Saturn are in the sign Virgo, or Mars, Mercury and Jupiter are in the sign Libra, or Jupiter-Rahu or Mars-Rahu are in the sign Scorpio, a boom comes in jaggery and khand.

If Jupiter, Venus or Saturn is in the sign Capricorn, or Mars or Mercury is in the sign Aquarius, or Jupiter-Saturn are in the sign Pisces, a boom comes in jaggery and khand.

If the Sankranti of any month is of 15 muhurtas, or of the sitting and standing karana, or is on a Venus, Saturn, Sun or Mars day, a boom remains in jaggery and khand in that month.

If there is a lunar eclipse in Margashirsha, Pausha, Magha, Phalguna, Ashadh, Shravan or Bhadrapad, a boom comes in jaggery and khand.

— Source PDF page 236 (book page 237) —

If the eclipse is in the nakshatras Rohini, Pushya or Jyeshtha, a boom comes in jaggery and khand.

If the five planets the Sun, Mars, Venus, Rahu and Ketu are in the sign Aries, a boom comes in jaggery and khand.

If the Panchami of the bright fortnight of Kartik is on a Tuesday, or the Navami on a Thursday, or the Trayodashi on a Tuesday, a boom comes in jaggery and khand.

If there are five Saturdays in the month of Magha, or five Tuesdays in the month of Phalguna, a boom comes in jaggery and khand.

If in the month of Jyeshtha the Navami of the bright fortnight is on a Tuesday, or the Ekadashi on a Monday, or the Trayodashi on a Tuesday, or there are five Thursdays and Fridays, a boom remains in jaggery and khand in this month.

Combinations for a Slump in Jaggery and Khand:

If the sighting of the Moon is on a Wednesday or Thursday, or is in any nakshatra among Ashwini, Mrigashira, Pushya, Magha, Purva Phalguni, Hasta, Chitra, Swati, Mula, Purva Ashadha, Shravana, Dhanishtha, Purva Bhadrapada and Revati, or the Moon is as clear as water and of a white colour, a slump comes in jaggery and khand.

If Mercury is in the nakshatra Ashwini, Venus in the nakshatra Rohini, Jupiter in the nakshatra Ardra, or Jupiter in the nakshatra Hasta, they make a slump in jaggery.

If the Sun is in the nakshatra Punarvasu, or Venus in the nakshatra Purva Ashadha, a slump comes in jaggery and khand after rises and falls.

If Venus is in the nakshatra Uttara Ashadha, Purva Ashadha or Shravana, a slump comes in jaggery.

— Source PDF page 237 (book page 238) —

If Mars is in the nakshatra Dhanishtha, a slump comes in jaggery and khand.

If the rising of Mercury is in the sign Capricorn, or the rising of Venus is in the west, a slump comes in jaggery and khand.

If Mercury and Jupiter are in the sign Aries, or Mars is in the sign Taurus, or Mercury is in the sign Gemini, a slump comes in jaggery and khand.

If Mercury is in the sign Leo, or Jupiter in the sign Sagittarius, a slump comes in jaggery and khand.

If the Taurus Sankranti enters on a Monday, Wednesday, Thursday or Friday, a slump comes in jaggery and khand.

If a lunar eclipse falls in the month of Kartik, Vaishakh or Jyeshtha, a slump remains in jaggery and khand in the month in which the lunar eclipse occurs.

If the Panchami of the bright fortnight of Kartik is on a Thursday, or the Panchami of the dark fortnight of Margashirsha is on a Thursday or Friday, a slump comes in jaggery and khand.

If in Pausha there are 5 Wednesdays, or on the Navami of the bright fortnight of Pausha the nakshatra is Revati, a slump comes in jaggery and khand.

Combinations for a Boom in Groundnut, Linseed, Castor and Mustard:

If Mars is in the sign Gemini or Virgo, a boom comes in linseed, castor, mustard and groundnut.

If Jupiter, Venus and Saturn are together in any sign, a boom comes in groundnut, linseed, castor and mustard.

If Saturn or Mars is in the sign Virgo, or Mars in its sign of debilitation is in the sign Cancer, a boom comes in linseed, castor, groundnut and mustard.

— Source PDF page 238 (book page 239) —

If Mars is in any sign among Libra, Scorpio, Capricorn and Aquarius, a boom comes in linseed, castor, mustard and groundnut.

If some benefic planet is in the nakshatra Shravana or Dhanishtha, a boom comes in linseed, castor, mustard and groundnut.

If Mars is in the nakshatra Mrigashira or Ardra, or the Sun in the nakshatra Bharani or Ardra, or Saturn in the nakshatra Bharani, a boom comes in linseed, castor, mustard and groundnut.

If the Sun is in the nakshatra Rohini, or a cruel planet makes a vedha on the nakshatra Magha, a boom comes in linseed, castor, mustard and groundnut.

If the lunar eclipse is on a Saturday, a boom comes in linseed, castor, mustard and groundnut.

If Mercury is in the nakshatra Ashwini, or the Sun, Mars and Saturn are in the nakshatra Bharani, a boom comes in linseed, castor, mustard and groundnut.

If the Sun is in any nakshatra among Bharani, Krittika, Punarvasu, Uttara Phalguni, Vishakha and Uttara Ashadha, a boom comes in linseed, castor, mustard and groundnut.

If Mercury or Jupiter is direct, or Mars or Saturn is retrograde, a boom comes in linseed, castor, mustard and groundnut.

If Mars is set in the west, or Saturn is set in the east, a boom comes in linseed, castor, mustard and groundnut.

If Mercury rises in the east, or is set in the east, a boom comes in linseed, castor, mustard and groundnut, but a slump comes first.

If the Moon is in the sign Aries, or Venus in the sign Cancer, or the Sun in the sign Libra, a boom comes in linseed, castor, mustard and groundnut.

— Source PDF page 239 (book page 240) —

If Venus is in the sign Scorpio, or the Sun or Mars is in the sign Capricorn, a boom comes in linseed, castor, mustard and groundnut.

If the Sankranti enters on a Sunday or Tuesday in the standing condition, a boom comes in linseed, castor, mustard and groundnut.

If at the time of entry of the Capricorn Sankranti the Moon is in the sign Cancer, a boom comes in linseed, castor, mustard and groundnut.

If there is a lunar eclipse on the Purnima of the month of Vaishakh, a boom comes in linseed, castor, mustard and groundnut.

If the lunar eclipse is on a Sunday, Saturday or Tuesday, a boom comes in linseed, castor, mustard and groundnut.

If the solar eclipse is on a Wednesday or Thursday, a boom comes in linseed, castor, mustard and groundnut.

If Saturn's full aspect is on Mars, a boom comes in linseed, castor, mustard and groundnut.

If Saturn makes a vedha on the nakshatra Shravana from the nakshatra Magha, or Saturn and Venus are in one sign, a boom comes in linseed, castor, mustard and groundnut.

Combinations for a Slump in Linseed, Castor, Mustard and Groundnut:

If Rahu is in the sign Virgo or Pisces, or Mars is in the sign Gemini, a slump comes in linseed, castor, groundnut and mustard.

If Jupiter is retrograde, or there is a conjunction of Mercury and Venus, a slump comes in linseed, castor, mustard and groundnut.

If any cruel planet is in the nakshatra Shravana or Dhanishtha, a slump comes in linseed, castor, mustard and groundnut.

— Source PDF page 240 (book page 241) —

If Venus is in the nakshatra Rohini, or a benefic planet makes a vedha on the nakshatra Magha, a slump comes in linseed, castor, mustard and groundnut.

If Venus is on the nakshatra Ashwini, or Jupiter and Venus are in the nakshatra Bharani, or Venus is in the nakshatra Uttara Ashadha, a slump comes in linseed, castor, mustard and groundnut.

If Mercury is retrograde, or Mercury and Saturn are retrograde together, or Venus is set in the west, or Saturn rises in the east, a slump comes in linseed, castor, mustard and groundnut.

If Rahu or Ketu is in the sign Virgo and Mercury is in the sign Libra, a slump comes in linseed, castor, mustard and groundnut.

Rahu or Ketu, in the sign Aquarius with the Sun or in the sign Pisces, causes a slump in linseed, castor and mustard.

If the lunar eclipse is on a Monday, Wednesday or Thursday, a slump comes in linseed, castor, mustard and groundnut.

If Jupiter's full aspect is on Mars, a slump comes in linseed, castor, mustard and groundnut.

Combinations for a Boom in Ordinary and Iron Shares:

If, with Saturn, any cruel planet is in any sign among Aries, Taurus, Scorpio and Capricorn, a boom comes in Ordinary and Iron shares. Understand that the more cruel planets there are with Saturn, the greater the boom.

If a total (khagras) solar eclipse is on a Tuesday or Saturday, and the Sun and Saturn are together at that time, a boom will come in Ordinary and Iron shares.

— Source PDF page 241 (book page 242) —

If in the sign Pisces Jupiter or Venus, retrograde, is with Saturn, a boom comes in Ordinary and Iron shares.

If, with Saturn in any sign among Aries, Leo, Scorpio and Capricorn, retrograde Jupiter or Venus, or Rahu, forms a conjunction within the range of 7 degrees to 16 degrees (the figures are hard to read), a boom comes in Ordinary and Iron shares.

If the Sun in the sign Leo is at 7 or 8 degrees and Saturn forms an aspect-combination at an angular difference of 60, 135 or 150 degrees, or Saturn at 17 degrees in the sign Sagittarius is with Mars or Rahu, and Jupiter, retrograde at 5 degrees, is in the sign Pisces, a boom comes in Ordinary and Iron shares.

If the Sun, Mars and Saturn are in the sign Capricorn and Rahu is in the sign Aries or Taurus, or the Sun, Saturn and Mars are in the sign Libra, Saturn and Mars at 16 degrees (?) and Rahu at 110 (?) degrees (the second figure cannot be right as printed; it may be 11), a boom comes in Ordinary and Iron shares.

If Mars, Saturn, Herschel (Uranus) and Pluto, together in the retrograde state, are in the sign Aries or Leo or Capricorn, a boom comes in Ordinary and Iron shares.

If Saturn, moving round in any sign, is set, or if Saturn and Mars, both together, are set in any sign among Aries, Cancer and Leo, a boom comes in Ordinary and Iron shares.

If the Sankranti of Aries, Scorpio or Capricorn is of 15 muhurtas, and Saturn is with the Sun, a boom comes in Ordinary and Iron shares.

— Source PDF page 242 (book page 243) —

If Saturn in the sign Aquarius is between 10 degrees and 21 degrees, a boom remains in Ordinary shares, and understand that there is a boom in Iron shares as well.

If a total (khagras) solar eclipse falls on the Amavasya of the month of Margashirsha, and Saturn is retrograde in the sign Scorpio, a boom comes in Ordinary and Iron shares.

If in any sign among Aries, Leo, Libra, Scorpio and Capricorn the conjunction of Saturn and Jupiter is in the retrograde state, or Saturn and Mercury are together retrograde in any sign, a boom comes in Ordinary and Iron shares.

If the Sun and Saturn are together in any sign, and at that same time the Amavasya of the dark fortnight is of 1 to 5 ghadis, or the Shashthi of the bright fortnight is lost, a boom comes in Ordinary and Iron shares.

If Saturn is in the sign Pisces, then as soon as Mars enters Pisces, or as soon as Saturn and Mars, retrograde in the sign Aries, come together, or as soon as Saturn and Mars, retrograde in the sign Leo, come together, combinations for a boom form in Ordinary and Iron shares.

If the rising of Mars is in the eastern direction in the sign in which Saturn is, or Mars at 25 degrees is in the sign Scorpio together with Saturn, or Saturn enters as soon as Mars in the sign Capricorn is at 11 degrees, a boom comes in Ordinary and Iron shares.

If Saturn in the sign Taurus is at 15 degrees, or Saturn in the sign Leo is from 13 degrees to 19 degrees (?), or in Aries, Scorpio, Capricorn,

— Source PDF page 243 (book page 244) —

or Aquarius, in any sign, a conjunction of the Sun and Saturn of 30 degrees or of 0 to 5 degrees is forming, a boom comes in Ordinary and Iron shares.

If Saturn and Rahu are 5 degrees apart in any sign, or the Sun and Saturn form an aspect-combination of 60 degrees of angular difference in any sign among Aries, Scorpio, Capricorn and Aquarius, a boom comes in Ordinary and Iron shares.

If the Moon in the sign Aries forms an aspect-combination of 30 degrees of angular difference with Saturn, or the Moon in any sign among Leo, Libra, Scorpio and Aquarius forms a combination of 60 degrees of angular difference, a boom comes in Ordinary and Iron shares.

If Saturn is in the sign Taurus or Scorpio, and the Sun's Sankranti of 15 muhurtas falls in the sign in which Saturn is, a boom comes in Ordinary and Iron shares.

If the conjunction of Saturn-Sun, Saturn-Moon, Saturn-Mars or Saturn-Rahu is taking place, or at the time when the opposition (pratiyuti) of the Sun and Moon is taking place and at that time there is a conjunction of Saturn and Ketu, or of Saturn and Herschel (Uranus), a boom comes in Ordinary and Iron shares.

Combinations for a Slump in Ordinary and Iron Shares:

If Saturn is with any benefic planet in the sign Virgo, Cancer or Gemini, or Saturn, in the direct state, and Jupiter are in the sign Pisces with the Sun, a slump comes in Ordinary and Iron shares.

On the Purnima of Shravan or Bhadrapad, in the sign of whichever benefic planet

— Source PDF page 244 (book page 245) —

there is a lunar eclipse, if Saturn is also in that same sign, a slump comes in Ordinary and Iron shares.

If Saturn at 2 degrees in the sign Gemini is with Jupiter or Neptune, and Mercury at 20 degrees is in the sign Cancer, or Saturn in the sign Virgo is with Venus, or Mercury is in the sign Cancer and Jupiter or Neptune is in the sign Pisces, a slump comes in Ordinary and Iron shares.

If Saturn is with Venus in the sign Gemini or Virgo, and the Moon, Mercury and Jupiter are in the sign Cancer, or Saturn and Venus are in the sign Pisces and the Moon, Mercury and Jupiter are in the sign Cancer, a slump comes in Ordinary and Iron shares.

If Jupiter and Saturn (both) rise together in any sign among Gemini, Cancer, Virgo, Libra and Aquarius, or Venus comes and rises in the sign in which Saturn is, a slump comes in Iron shares and Ordinary shares.

If these five planets, the Moon, Mercury, Jupiter, Neptune and Saturn, in the direct state, are together in the sign Cancer, Virgo or Aquarius, a slump comes in Ordinary and Iron shares.

If these four planets, Jupiter, Venus, Saturn and Neptune, in the direct state, are together in the sign Gemini or Sagittarius, or in the sign Libra Saturn at 20 degrees is with Jupiter at 26 degrees, a slump comes in Ordinary and Iron shares.

If Saturn and slow-moving Mars are in the sign Gemini, and slow-moving Venus is in the sign Cancer, a slump comes in Ordinary and Iron shares.

— Source PDF page 245 (book page 246) —

If Saturn is with Jupiter and Mercury in the sign Gemini, Cancer or Leo, and the Sun's Sankranti of 45 muhurtas falls in the sign in which Saturn is, a slump comes in Ordinary and Iron shares.

If Saturn in the sign Virgo is with Mercury and the Sun is in the sign Gemini, or Saturn is in the sign Sagittarius, and Mercury and Venus are in the sign Virgo, a slump comes in Ordinary and Iron shares.

If on the Purnima of Bhadrapad there is a total (khagras) lunar eclipse, and Saturn in the direct state is in the sign Sagittarius, a slump comes in Ordinary and Iron shares.

If the opposition (pratiyoga) of Jupiter and Saturn is in any sign among Gemini, Cancer, Virgo, Libra and Pisces, and the Sun is in any sign among Gemini, Virgo, Libra, Aquarius and Pisces, a slump comes in Ordinary and Iron shares.

If Saturn and the Moon are together in some sign, and at that time the second day of the bright fortnight is repeated, or the Purnima of the bright fortnight of any month is of 1 to 6 ghadis and on that day the Moon and Saturn are together, a slump comes in Ordinary and Iron shares.

If, in whichever sign among Gemini, Cancer and Pisces Saturn is, Jupiter enters that same sign, or Mercury, Jupiter and Saturn are together in the sign Gemini with the Sun, a slump comes in Ordinary and Iron shares.

If Saturn in the sign Cancer is at 22 degrees and the Sun in the sign Gemini is at 24 degrees, or with Saturn and Venus in Gemini or Virgo

— Source PDF page 246 (book page 247) —

the Sun forms a trine combination (trikona yoga), a slump comes in Ordinary and Iron shares.

If Jupiter and Saturn move together at 28 degrees in the sign Pisces, or Saturn and Neptune are in the sign Sagittarius from 18 degrees to 24 degrees, and on the day when the Moon makes a conjunction with Jupiter in the sign Libra, a slump comes in Ordinary and Iron

shares.

The opposition of Saturn-Venus, Saturn-Jupiter or Saturn-Mercury brings a slump in Ordinary and Iron shares.

If the Sun and Saturn are in the nakshatra Ashlesha and the Moon in the nakshatra Purva Phalguni, or the Sun and Saturn are in the nakshatra Magha and the Moon in the nakshatra Ashwini, a slump comes in Ordinary and Iron shares.

If the Sun and Saturn are in the nakshatra Ashlesha and the Moon in the nakshatra Uttara Ashadha, or the Sun and Saturn are in the nakshatra Magha and the Moon in the nakshatra Ashwini, a slump comes in Ordinary and Iron shares.

Combinations for a Boom in Wheat, Barley, Gram and the Like:

If any Sankranti enters in any of the nakshatras Ardra, Mula and Swati, or at the time of the entry of a Sankranti the Moon is in the same sign, or any Sankranti falls on a cruel weekday, a boom comes in grains such as wheat, barley and gram.

If the Libra Sankranti falls on a Tuesday or Saturday, or the Aquarius Sankranti on a Thursday, or the Cancer Sankranti on a Saturday, or the Sankranti and the Amavasya are on one weekday, or the first Sankranti enters on a Saturday and the second Sankranti on a Sunday, a boom comes in grains such as wheat, barley and gram.

— Source PDF page 247 (book page 248) —

If on the day of entry of the Sankranti of Aries, Taurus or Gemini there is rain, or the Cancer Sankranti enters in any nakshatra among Bharani, Magha and Chitra, or on the Chaturthi, Ashtami or Chaturdashi, a boom comes in grains such as wheat, barley and gram.

If the solar eclipse is on a Tuesday, Saturday or Sunday, or in the month of Pausha, Phalguna, Chaitra, Vaishakh, Jyeshtha or Ashadh, a boom comes in grains such as wheat, barley and gram.

If Mars is in the seventh place from the Sun, and Mercury in the fifth place from Mars, and the Moon in the 1st, 4th, 7th or 10th place from Mercury (the figures are printed together and are hard to read), or Saturn and the Moon are together in the sign Gemini or Virgo, a boom comes in grains such as wheat, gram and barley.

If the Sun and Mars are in the nakshatra Ardra, or the Sun and Ketu are in Mrigashira or Bharani, or Saturn and Mercury are in the nakshatra Mula and the Moon in Swati or Magha, or the Sun is in Shatabhisha and Saturn in Ashwini, a boom comes in grains such as wheat, barley and gram.

If the Sun, Mars and Venus are together in the sign Aquarius or Capricorn, a boom comes in grains such as wheat, barley and gram.

Combinations for a Slump in Wheat, Barley, Gram and the Like:

If the Libra Sankranti enters on a Friday, or the Aquarius Sankranti on a Wednesday, or at the time of entry of the Cancer Sankranti there is a little rain, a slump comes in wheat, barley, gram and the like.

If the solar eclipse is in the nakshatra Mrigashira, or in the month of Magha, Shravan or Bhadrapad, a slump comes in grains such as wheat, barley and gram.

If the Sun, Mars and Mercury are together in the nakshatra Ashlesha, or

the Sun, Jupiter, Venus, Saturn and Rahu, all five planets, are together in some sign, or some benefic planet is in the nakshatra Shravana or Dhanishtha, a slump comes in grains such as wheat, barley and gram.

If Venus and Mars are in the sign Libra, or Mars, Mercury and Venus are in the nakshatra Ashlesha, or Saturn is in the nakshatra Mula and Mars and Mercury are in the nakshatra Swati, a slump comes in grains such as wheat, barley and gram.

If Venus is in the nakshatra Vishakha or Bharani, or the king of the year is Mercury, a slump comes in wheat, barley, gram and the like.

If the lunar eclipse is in the month of Jyeshtha or Bhadrapad, or the Purnima of any month is repeated, or any one tithi of the dark fortnight is lost, a slump comes in wheat, barley, gram and the like.

If Mercury is in the sign Virgo, or Venus is in the sign Libra or Cancer, or in the rainy season there is a conjunction of Mercury, the Sun and Venus, a slump comes in wheat, barley, gram and the like.

If Jupiter is set in the sign Virgo or Pisces, or Jupiter is in the sign Virgo, or Mars is direct in any sign, or Jupiter is retrograde, or Venus and Mercury are together retrograde, wheat, barley, gram and other grains become slack.

[End of Chapter Seven (tested and unfailing combinations for gold, silver, cotton, jaggery, guar, peas, mustard and the like), book pages 215-249.]

[Book page 249 was the last page of Chapter Seven; page 250 begins here.]

Chapter Eight

Tested Experiments for the Rise of Fortune and the Attainment of Desired Wealth

Yantra for Awakening the Fortune of Persons Afflicted by Loss

[Diagram: a yantra drawn as a grid of boxes, each holding one numeral. Top row: 3, 6, 7 (the 7 box is wider); middle row: 4, 5, 2; bottom row: 1, 8, 9. The boxes are arranged in a staggered, swastika-like pattern in the printed figure.]

Method: This yantra should be written on birch bark (bhojpatra) with ashtagandha (a ink of eight fragrant substances), using a pomegranate-wood pen; after offering incense and a lamp, it should be put into an amulet (taviz) and tied on the right arm.

Persons whose fortune has gone to sleep, who meet only failure in whatever work they do, who gain nothing in any work, who find no comfort and no success anywhere, should certainly wear this yantra. By wearing this yantra the sleeping fortune will suddenly awaken, and full success will be found in all works. There will be great gain of wealth, people, vehicles, land and the like.

This yantra will be perfected (siddha) by writing it 108 times on birch bark with ashtagandha on the night of Deepmala (Diwali), the night of Holika, or during an eclipse. If it is instead written once and worn, the fruit will be less.

Ring for Destroying Poverty (Daridrata-Nashak Mudrika)

Those who are extremely afflicted by poverty, whose horoscope

— Source PDF page 250 (book page 251) —

carries a strong combination of poverty (daridrya-yoga), and who suffer continual loss of wealth in place of earning in employment and business, will doubtless be freed from this clutch of the demon of poverty if they wear this ring.

The method of making and wearing it is this: in the bright fortnight, on the day when it is a Sunday and the nakshatra is Pushya, or a Thursday and the nakshatra is Pushya, take 12 parts of pure copper, 16 parts of silver and 10 parts of gold, melt them together, have a ring or band (chhalla) made, and wear it on the ring finger (anamika).

Success in Work through Tulsidas's Ramayana

For the success of a desired work a "sampuT" recitation of Shri Tulsidas's Ramayana is also performed. If obstacles and loss occur in your trade, then, placing the following verse (chaupai) as an enclosure (sampuT) around every chaupai of the Ramayana, recite the whole Ramayana with faith and devotion in nine, eleven or twenty-one days; success in the work will be certain.

The sampuT chaupai (in meaning): "No obstacles afflict the one on whom Rama looks with His gracious glance."

For a person who is unemployed, using the chaupai written below as the enclosure, if he recites the Ramayana with faith for nine, eleven or twenty-one days, he will certainly obtain a job or livelihood.

The sampuT chaupai (in meaning): "He who nourishes and sustains the whole world, his name will accordingly be Bharata."

— Source PDF page 251 (book page 252) —

(The verse ends:) "He restores what is lost, is kind to the poor, simple and mighty is the Lord Raghuraj (Rama)."

By repeating any mantra again and again, or by enclosing it (sampuT), the faith and strength of the performer increase. For example, if something is said to a person in an ordinary manner, it does not have as much effect as when the same thing is said again and again in forceful words. Being influenced by your forceful words in the mantra, that person is compelled to accept what you say. This is the secret of mantra-repetition and of the sampuT.

Experiment for Release from Debt (Rinamochan Prayog)

With charcoal made from the wood of khair (catechu), draw three equal upright lines on the ground. Then, reciting the two mantras written below, erase them by rubbing with the heel of the left foot. These are the two mantras (given in meaning):

(1) "For the destruction of sorrow and ill fortune, and for the sake of the birth of sons and children, I wipe out with my left foot these three lines that have been drawn."

(2) "For the destruction of the sorrow of debt, and for the attainment of the desired aim of the mind, I wipe out with the left foot these three lines, born of (the three births?)." (The second line of this verse is hard to follow in the scan and is translated loosely.)

After doing this, meditating on the lotus feet of Mars (Mangala), one should offer this praise (given in meaning):

"I bow to Mangala, born from the womb of the Earth, with a splendour equal to lightning, the youth (Kumara) who holds a spear."

"Salutation to you, remover of debt, destroyer of sorrow and poverty. I bow to the shining one who brings all good."

— Source PDF page 252 (book page 253) —

(The praise continues, in meaning:)

(3) "Gods, demons (danavas), gandharvas, yakshas, rakshasas and serpents all attain happiness through him; salutation to that son of the Earth."

(4) "He who, when men fall into a crooked course, throws obstacles in the way; when he is worshipped, he gives comfort and good fortune; salutation to him who bestows forgiveness." (loose rendering)

(5) "Show me favour, O Lord! O giver of auspiciousness! O Mangala! Rider of the ram, Rudra-natured one, give me sons, wealth and fame."

By following the procedure written above every day, or only on a Tuesday, release from debt is gained very quickly.

Yantra for Averting the Affliction of a Planet (Graha-Peeda Nivarak Yantra)

[Diagram: a 3 x 3 grid of numerals. Top row: 8, 1, 6. Middle row: 3, then the words "Hrim Ravaye" in the centre box, 7. Bottom row: 4, 9, 2.]

For a person for whom some planet is a cause of misfortune and is bringing special suffering, he should prepare this yantra by the rule and wear it, so that the affliction of the planet is pacified and that person's life passes in happiness and peace.

Method: On birch bark, with a pen made from the root of the peepal tree, writing with gorochan (a yellow pigment), write the numerals from 1 to 9 as in the figure of the yantra given above, and in the middle box write "Hrim Ravaye." Afterwards worship this yantra with flowers and the like. In this way write the yantra and worship it in order for 28 days. Then, writing this yantra on birch bark with ashtagandha and worshipping it, put it into an amulet of "triloha" (three metals) and wear it on the arm or at the neck.

Wearing Gems for the Pacification of Planets

When some planet, counted from a person's birth sign, is in the fourth, eighth,

— Source PDF page 253 (book page 254) —

twelfth, it is affliction-causing. By wearing which gem each planet is pleased or pacified, see the details of those gems ahead:

Planet	Gem	Weight (ratti)	Ring	Day	Nakshatra
Sun	Ruby (manik)	5	Gold	Sunday	Hasta, or Pushya
Moon	Pearl (moti)	4 or 2	Silver or gold	Monday	Rohini
Mars	Coral (munga)	8	Gold	Tuesday	Anuradha
Mercury	Emerald (panna)	6 or 3	Gold	Wednesday	Uttara Phalguni
Jupiter	Topaz (pukhraj)	9 (the digit looks like 6, but the next sentence says nine)	(not stated)	Thursday	Pushya
Venus	Diamond (heera)	7	(not stated)	Friday	Mrigashira
Saturn	Blue sapphire (neelam)	10	(not stated)	Saturday	Shravana
Rahu	Hessonite (gomed)	6	(not stated)	Wednesday	Uttara Phalguni
Ketu	Cat's-eye (lahsuniya)	6	(not stated)	Thursday	Pushya

Notes given with the table: For the Sun, the ruby should be worn on a Sunday on which the nakshatra is Hasta or Pushya; if 5 ratti cannot be had, an ordinary person may wear (the weight of) 15 grains of rice. For Jupiter, if nine ratti cannot be had, wear (the weight of) 12 grains of rice or 1 and a half ratti. For Venus, if the strength for 7 ratti is not there, wear 2 ratti. For Saturn, if 10 ratti cannot be had, it should be at least (the weight of) 11 grains of rice; 3 and 6 ratti are also proper. For Ketu, hessonite and cat's-eye of 3 ratti can also be taken.

— Source PDF page 254 (book page 255) —

Note: Before wearing any gem in a ring, test it for at least one week by tying it in a clean silk cloth on the right arm. If after tying the gem, peace of mind, cheerfulness, gain, auspicious dreams and the like are seen, then have that gem set in a ring and wear it at an auspicious moment; and if during the testing period unrest increases, quarrels and loss occur, and bad dreams come, it should be understood that the gem is not in agreement with your sign and nakshatra, therefore give it up. Many gems are completely unfavourable to certain signs and nakshatras; instead of profit they bring loss. Therefore test the gem first and afterwards wear it according to the rule.

Pacification of Inauspicious Planets through Roots and Herbs

Our most compassionate great sages have also told of wearing a root or herb, for the pacification of the planetary faults of those people who are unable to wear costly gems. Understand it as follows:

If the Sun is a cause of affliction, wear the root of the bael (bilva) tree on a pink thread on a Sunday.

If the Moon is a cause of affliction, wear the root of khirni on a white thread on a Monday.

If Mars is a cause of affliction, wear the root of anantamool (Indian sarsaparilla) on a red thread on a Tuesday.

If Mercury is a cause of affliction, wear the root of vidhara (elephant creeper) on a green thread on a Wednesday.

If Jupiter is a cause of affliction, wear the root of bharangi or of banana (keli) on a yellow thread

— Source PDF page 255 (book page 256) —

on a Thursday.

If Venus is a cause of affliction, wear the root of sarpokha on a white thread on a Friday.

If Saturn is a cause of affliction, wear the root of bichhu on a black thread on a Saturday.

If Rahu is a cause of affliction, wear white sandalwood on a blue thread on a Wednesday.

If Ketu is a cause of affliction, wear the root of asgandh on a sky-blue thread on a Thursday.

Note: these herbs and roots will be available from a druggist (attar).

Information: If the herbs and roots that are to be worn for a planet are themselves uprooted from the tree on that same weekday, brought and worn after worship, it is especially excellent. Before bringing it, one should go to the tree in the evening and invite it by the rule. For Rahu, Saturday, and for Ketu, Wednesday, is suitable.

The Ikkisa (Twenty-One) Yantra for Removing the Affliction of Saturn

[Diagram: a 3 x 3 grid of numerals. Top row: 10, 3, 8. Middle row: 5, 7, 9. Bottom row: 6, 11, 4. Each row, column and diagonal here adds up to 21.]

Method: This yantra should be written with charcoal on a square piece of black stone on a Saturday. Waving it seven times from the head to the feet of the person afflicted by Saturn, it should be thrown into a well whose water will never, even by mistake, come to the drinking of that person afflicted by Saturn in his life.

[End of Chapter Eight (tested experiments for the rise of fortune and attainment of desired wealth), book pages 250-256.]

— Source PDF page 256 (book page 257) —

Chapter Nine

Appendix (Parishisht)

Experienced Combinations for the Effortless Acquisition of Wealth

A person in whose birth chart (janma-patrika) Jupiter in the sign Cancer, Sagittarius or Pisces is in an angle (kendra); the Moon in the sign Taurus, Cancer, Sagittarius or Pisces is in the second, eighth, tenth or eleventh place; Mercury in the sign Gemini or Virgo is in the second or tenth place; Mars in the sign Capricorn is in the fourth, tenth or eleventh place; Venus in the sign Taurus, Libra or Pisces is in the second, ninth, tenth or eleventh place; Saturn in the sign Aquarius or Libra is in the fourth, fifth or eleventh place: it should be understood that such a person, even though born in a poor man's house, becomes a person of splendour and prosperity or a very great rich man.

A man in whose birth chart the Sun in the sign Cancer or Aries is in the ascendant, or in the third, tenth or eleventh place, and Saturn in the sign Libra is in the fourth or seventh place, and Mercury and Venus are in the second place, becomes, even as one holding authority, a named trader and a very rich man.

A person in whose birth ascendant the lord of an angle is in a trine, and the lord of the trine is in an angle, or both are situated in an angle or a trine, becomes a great and splendid man like a king.

A person whose birth ascendant is Cancer, and Saturn of the sign Libra (in exaltation) is in the fourth place, and Mars of the sign Capricorn, in exaltation, in the seventh

— Source PDF page 257 (book page 258) —

place, and the exalted Sun of the sign Aries is in the tenth place, that person becomes a rich man of the highest rank.

Note: If the above combinations are completely formed in a person's birth chart, he will doubtless become very rich according to those combinations. If some deficiency remains in these combinations, there will also be a deficiency in the wealth-combination.

Which Person Will Become Very Rich through Trade in Which Commodity?

No.	House (sthan)	Signs (rashi)	Planets	Commodity and result
1	Second house (dhan-sthan)	2, 12	Venus	A crorepati (ten-millionaire) through silver, cotton, thread mills and factories
2	Eleventh house (labh-sthan)	7, 11	Saturn	Effortless acquisition of wealth through shares and lotteries
3	Tenth house (dasham-sthan)	7, 10	Saturn	Wealth through trade in mustard, castor and linseed
4	Fourth house (chaturth-sthan)	7, 4, 12	Saturn, Mercury, Venus	Wealth through cotton (printed "phochar"; possibly "futures") and foreign trade
5	Fifth house (panchama-sthan)	1, 5, 9, 4	Sun, Jupiter	A very rich man through racing, lotteries and buried (underground) wealth
6	Ninth house (navama-sthan)	12, 4, 6	Venus, Jupiter, Mercury	Wealth through the trade in factories, cloth and shares
7	Eleventh house (ekadash-sthan)	2, 6, 7	Moon, Mercury, Saturn	An arabpati (a man of a hundred crore and more) through trade in machinery and factories
8	Eighth house (ashtam-sthan)	2, 4, 6, 12	Moon, Mercury, Jupiter, Venus	Special wealth through effortless forward (vayda) trading

[Reading note: the sign numbers (1 = Aries … 12 = Pisces) are given as read from the scan; the house labels in rows 2 and 7 are both "eleventh" as printed.]

— Source PDF page 258 (book page 259) —

Sudden Acquisition of Wealth through Speculation (Satta):

(1) A person in whose birth chart the lord of the second house is in the eleventh house (labh-sthan), or, especially, Mercury in its sign of debilitation or some other planet in its sign of debilitation is in the eleventh house, has a good wealth combination.

(2) If the lord of the ascendant, the lord of the second house and the lord of the eighth house (all three) are in the eleventh house, and the Moon in the sign Taurus or Pisces is in the eighth place, he becomes a crorepati through speculation (satta).

(3) If Jupiter is in the sign Pisces, or the Sun, Mercury and Jupiter are in the eleventh house in the sign Gemini, or only Mars in the sign Taurus is in an angle, that man becomes a

crorepati through trade in cotton and shares.

(4) If Jupiter, in the sign of the second house, is in the ascendant, the Moon in the sign Cancer in the eighth place, and Venus in the sign Libra in the eleventh place, he becomes a crorepati through trade in silver and gold.

(5) Along with the planetary combination stated above, if Mercury in the sign Virgo is also in the tenth place, it makes him the master of boundless wealth. Such a person becomes the foremost among the traders of gold and silver.

(6) If the Sun is in the sign Aries and the Moon in the sign Leo, that person gains wealth from speculative trade.

(7) If the Sun in its exaltation, Aries, and the Moon in its debilitation, Scorpio, are present, he obtains a sudden great sum of wealth.

(8) If the Sun is in the sign Gemini and the Moon in the sign Cancer, he gains special wealth from forward trading in gold, silver, cotton and shares.

— Source PDF page 259 (book page 260) —

(9) If the Sun is in the sign Gemini and the Moon in the sign Leo, that person gets good gain from speculative trade.

Rises and Falls of the Share Market:

Taking the question-ascendant (prashna-lagna), or the sign of the commodity, as the ascendant, the rises and falls of shares are considered through its first and second houses (bhuvan) and through the Moon. If the Moon, after forming some auspicious aspect-combination with the lord of the eighth house, is making some auspicious aspect-relationship on the second house, one should certainly buy stock or shares at that time.

When the lord of the second house reaches the sign of exaltation of the lord of the eighth house, and that lord of the second house is under some auspicious aspect of the Moon, Jupiter or Venus, then buying or selling shares at that time is profitable.

If cruel planets are situated in the ascendant, the second, the seventh and the eighth houses, one should never buy shares. If perhaps those cruel planets are the lords of the ascendant or of the second house, then work should be done with very great caution.

If an inauspicious aspect is falling from the lord of the seventh house on the lord of the ascendant or on the lord of the second house, then even in such a condition it is good not to buy shares at all.

If a planet seated in the ascendant or the second place is being pressed by some cruel aspect on the lord of the eighth house, then buying or selling (both) is profitable.

If the lord of the seventh house goes and sits in the second place, the price of shares doubtless falls.

— Source PDF page 260 (book page 261) —

When Should One Buy Shares?

At the time when the lord of the second house is in an auspicious aspect with the lord of the eighth house, or the lord of the second house reaches the sign of exaltation of the lord of the

eighth house, or the Moon, becoming separate after a conjunction with the lord of the eighth house, goes and meets the lord of the second house, at that time (on that day) one should buy shares. "At what time, or at what hour, should one buy?" For this, the time when the lord of the second house, according to local time, reaches the entering degree of the eighth house, at that time one should buy. This time is extremely excellent for buying shares. And the time when the Moon, after forming some cruel aspect-relationship with the lord of the eighth house, is becoming separate from the lord of the eighth house, at that time too the buying of shares is profitable. Or, when the Moon, after a conjunction with the lord of the eighth house, moves ahead and goes and meets the lord of the second house, then buying is especially good.

When Should One Sell Shares?

When some benefic planet reaches the second place, one should sell at that time. Or when the lord of the ascendant reaches the seventh place, it is good to sell. And when the Moon, coming out from the auspicious aspect of the lord of the second house, reaches a cruel aspect with the lord of the seventh or eighth house, profit comes by selling at that time. On the day when the aspect-relationships of the planets fall at some time according to the rules written above, at that time one should sell the shares.

When Will There Be Profit or Loss in Forward Deals?

If the lord of the ascendant, the lord of the second house and the lord of the fifth house are situated in the tenth place from the ascendant, there is certainly profit in forward deals in all commodities.

— Source PDF page 261 (book page 262) —

If the lord of the fifth house, situated in the fifth place itself, is making some auspicious aspect with the lord of the ascendant or the lord of the second house, this is a great fortunate combination.

If Jupiter is seated strong in the fifth or the second place, the lord of the fifth house is in an angle, and it is not under a cruel aspect, that time is profitable.

If combinations are not of this kind, one should never make forward deals in any commodity.

If the eleventh house is strong, or the lord of the eleventh house is strong, there will be loss in forward work; there will not be profit. All this consideration should be made from the question-ascendant.

When the lord of the tenth house is making an auspicious aspect with the lord of the second house, the Sun is in an auspicious aspect-relationship with the lord of the second house, the lord of the ascendant is in the eleventh place, and Jupiter, Venus, the Sun or the Moon are seated strong in the tenth place with no cruel aspect falling on them, then at that time there is only profit in any contract or forward deal made for any work. But when the lord of the tenth house and the lord of the second house are caught in some cruel aspect, or are in the panaphar places (2nd, 5th, 8th and 11th places) from the ascendant, or cruel planets are seated in those places, then honour, reputation and wealth (both) go away; there is heavy loss.

Knowing Booms and Slumps through the Daily Ascendants (Lagnas):

Just as the vedha of planets, the Sankrantis of signs, the movement through nakshatras, the sighting of the Moon, and the mutual aspect-relationships of planets and houses, and so on

— Source PDF page 262 (book page 263) —

the support of the Sahara (the Sun and the like: printed "sahara", probably "sahare", meaning "with the help of"), our ancient teachers have described in their oldest works, such as the Samhitas, many methods of knowing the booms and slumps of the various commodities; in the same way, a beautiful and simple "lagna-method" (lagna-paddhati) for knowing the booms and slumps of all commodities, by means of the ascendants that change roughly every two hours through the day, for just that length of time, is also found in their works, which we are writing here for the information of our readers.

Although according to the local time of all the principal trading centres of the world each ascendant has its scripturally accepted beginning and ending time, even so, for the convenience of the forecaster, in some well-known Indian almanacs the beginning and ending time of each ascendant according to Standard Time is also written. Because at this time the conduct of business is being run everywhere on the globe on the basis of Standard Time. Therefore the forecaster should, according to some local almanac of very accurate mathematics, prepare the ascendant charts (lagna-kundalis), with the houses and the true positions of the planets, from the time the market opens to the time the market closes. Then, in each ascendant, he should fix the auspiciousness or inauspiciousness of the planets according to the lords of the houses. The reason is that with the change of each ascendant, the lord of the ascendant and the lords of the other places keep changing equally; their auspiciousness and inauspiciousness also keep changing. And the mutual aspect-relationships among the planets and houses that stood in the first ascendant also change.

— Source PDF page 263 (book page 264) —

The General Auspiciousness and Inauspiciousness of the Planets

Benefic planets: Jupiter, Venus, the full Moon, and Mercury when connected with benefic planets are considered benefic planets.

Cruel planets: the Sun, Mars, Saturn, Rahu, Ketu, the waning Moon, and Mercury when connected with cruel planets are cruel planets.

The Full Aspects of the Planets According to the Indian System

1. The Sun, Moon, Mercury, Venus, Rahu and Ketu look with full aspect, from the place in which they stand, at the seventh place from it.

2. Mars looks with full aspect at the places 4, 7 and 8.

3. Jupiter looks with full aspect at the places 5, 7 and 9.

4. Saturn looks with full aspect at the places 3, 7 and 10.

Special Scriptural Remarks on the Auspiciousness and Inauspiciousness of Planets

1. In all ascendants the planets that are lords of trines always give only auspicious results, even though in general scripture they bear the designation of cruel.

2. A benefic planet that is lord of an angle gives inauspicious results.

3. A cruel planet that is lord of an angle gives auspicious results.

4. The lords of the third, sixth and eleventh places do not give auspicious results.

5. If the owner of the eighth house is also lord of the ascendant, it gives auspicious results. If this is not so, that lord of the eighth always gives inauspicious results.

6. If the lord of the fifth house is in the seventh place, or likewise the auspicious lord of the seventh is in the fifth place, it is extremely auspicious.

7. In whichever ascendant the lord of the fifth, or the planet that is lord of the seventh place

— Source PDF page 264 (book page 265) —

(In whichever ascendant the planet that is lord of the fifth or seventh place) is in any one of these places, 6, 8 or 12, then too that planet gives an inauspicious result.

Note: For more information on the auspiciousness and inauspiciousness of planets you will find it in the work named "Laghu Parashari."

The Method of Knowing Boom and Slump from the Ascendant:

The authorities have given priority to the seventh place for considering the auspicious and inauspicious results connected with trade. And the fifth place from the ascendant is considered the place of profit in trade; from this it is established beyond dispute that for considerations connected with trade these two are the chief places.

First of all, it should be considered which planets are looking with full aspect at the fifth and the seventh places, and which planets are situated in the fifth and seventh places. In an ascendant in which the full aspect of some benefic planet, determined in the manner explained above, is falling on the fifth or seventh place, the price in the market at the time of that ascendant will be high. And if the full aspect of some cruel planet is falling on the fifth or seventh place, the price in the market will fall during that time.

If the full aspects falling on the fifth or seventh place are auspicious, and the degree of their auspiciousness is greater and greater, then estimate in that same proportion how high the price of that commodity will go. And in whatever measure there is of full aspects of cruel planets on these two places, the price will fall accordingly. The same thing should also be decided by considering the position of benefic or cruel planets in the fifth or seventh place, and the result fixed accordingly.

Consideration of the Result of "Gurra" according to the Yavana (Muslim) View:

The Muharram and other 12 months of the Yavanas (Muslims) are in use on the basis of the measure of the Moon. In the bright fortnight, on the day of the new-moon sighting, when the second tithi (dwitiya) spans the evening, the Yavana month is considered to end and from the next day the new month to begin. From the start of the month of Muharram the Hijri year (san) begins. Therefore the weekday that falls on the first date of the month of Muharram is considered the lord of the "gurra" of that Hijri year. In a way we can say it thus: just as in our Indian Aryan tradition the weekday that falls on the day of entry of the new lunar year, the Chaitra bright Pratipada, is considered the king of that year, and, giving priority to the king among the council of ministers (the holders of periods) of the year, we decide the auspicious or inauspicious results of the year, in the same way the Yavana people consider the good or bad of the year through the lord of the gurra of their Hijri year. Like our year's king, the result of the gurra also proves useful together with the companionship and the strength and weakness of the other planets. Therefore we give here the result of the

gurra below:

The Sun: In a year in which the Sun is the gurra, the king, the public, animals and birds remain happy. The rain is excellent. The production of grain, cotton, wheat, melon, dry fruit, milk and ghee is good. Disorders of the wind; more cold falls. Suffering for self-willed women, and breast trouble for women. According to the opinion of some, the production of cotton is low in that year.

The Moon: In a year in which the Moon becomes lord of the gurra, the public remains happy and the rain is excellent. The production of sesame, cotton, dry fruit, fruit and milk is good. A little shortfall remains in agriculture at the end. In India, especially

— Source PDF page 266 (book page 267) —

the fear of war in the west increases. Diseases such as malaria increase from mosquitoes. There is fear of fire and an outbreak of wind. Men remain prosperous. Disease spreads among birds.

Mars: In a year in which Mars is the lord of the gurra, farming (the crop) remains weak, and there is loss through outbreaks of nature as well. There are portents in the east and west. Earthquakes, fear of snakes, damage to crops from rats and locusts, an increase of disease; wheat, sweets and metals are cheap. Little profit in trade; heavy suffering for the rich capitalists. Trees bear little fruit. Increase of wind-and-bile disorders, terror among the public, battle among the commanders. If the position of Mars is strong, then, instead of an inauspicious result in the year, there is comfort and plenty.

Mercury: In a year in which Mercury is lord of the gurra, there is an increase of quarrels, fights, attachment and hatred among the public, suffering for animals, the disturbance of locusts, and more wind, grass, cold, melon, agar and the like. Jaggery and dry fruit are low, there is fear of fire, and the rain comes out of season. Fear and terror spread in India. Wind-and-bile illnesses increase. The death of some famous great man or king. Suddenly, in some way, loss of the crop and fear among the public increase. The side of the government remains excellent.

Jupiter: In a year in which Jupiter (Brihaspati) is the lord of the gurra, the production of the crop, vegetation, rain, milk, sesame, cotton, melon, agar and all such commodities is good. Animals and birds remain happy. The force of cold, wind and clouds remains. Traders remain in profit. Government employees rise in position. Happiness increases among the public; pain in the chest of women.

— Source PDF page 267 (book page 268) —

Venus: In a year in which Venus is the lord of the gurra, mutual opposition increases between king and public. War and fear of fire, and disease among men and quadrupeds, little profit in trade, the production of grain and farming is moderate, all things are dear, and the wind blows more. Happiness and peace are lacking among the public. Crooked diplomacy runs more. The influence of self-willed women increases over the rulers. Corruption and adultery spread more. Scientific, new material research increases more.

Saturn: In a year in which Saturn is the lord of the gurra, the public remains afflicted by many kinds of calamities, clouds of crisis hover over kings; incidents of theft, robbery, dacoity and murder are greater. Many kinds of disease spread. The health of men falls very much. The fear of war increases. If the position of Saturn is inauspicious, there is a terrible

destruction in the world that year. If the position of Saturn is auspicious, the inauspicious result is less.

Special note: Here in the markets of North India, the educated trading class generally does consider the gurra. It is for their benefit that we have given this consideration here.

Just as, taking the end-time of the dark fortnight of Chaitra (Amant) as the desired moment, learned astrologers consider, from the year's ascendant chart (lagna-kundali), the auspicious and inauspicious future of the year, in the same way, on the last date of Zilhij (Dhu al-Hijjah), the day before the beginning of the Muslim month Muharram, at the time when the Moon of the bright fortnight rises, one should make the ascendant of that desired time, place all the planets properly, and make the year-ascendant of the Hijri year (samvat); and, as with the year and the year-lord ascendant, the consideration of the results of the auspiciousness and inauspiciousness of the Hijri year is also, in this book

— Source PDF page 268 (book page 269) —

at the beginning of the book, in accordance with the results of the king of the year written on pages 81-82 (book page numbers).

When and Why Does a Difference Arise between the Rates of Forward Goods and Ready Goods?

Look anywhere: these days the sway of forward trading alone is running everywhere. In this field many persons, without thinking or understanding, sit ready every moment to jump in. This trade has become extremely widespread and also especially attractive and enchanting. It has its own history too, which, as a well-ordered chain of extraordinary events, is very entertaining. The one support of the base point of this royal sport called "forward trading," and of the cornerstone of its enchanting, excessive history, depends only on the mutual distance of these three planets, the Sun, Mercury and Venus.

The Sun stands at the centre of the solar system. Around the Sun, Venus keeps moving within a distance of about 48 degrees. But the planet Mercury goes round the Sun staying within a distance of only 28 degrees from it. Mercury and Venus move, taking the Sun as the centre, only within the greatest distance stated. From the difference these two planets have from the Sun, it is clear that these planets can generally form only the aspect-combination called "yuti" (conjunction) with the Sun; they can never form an aspect-combination of the kinds called angle (kendra), trine (trikona), 6-8 (shadashtak) or opposition (pratiyoga). This is the reason that the famous conjunction (yuti) of these two planets with the Sun

— Source PDF page 269 (book page 270) —

aspect-combination is considered of extraordinary importance for understanding the trend or movement of the "forward market." It has very often been seen that when Mercury has a conjunction with the Sun, prices rise high, and when Venus has a conjunction with the Sun, the price of commercial substances falls. From these two conjunctions this is established without dispute: when Mercury is near the Sun and Venus is far from the Sun, a boom comes in the forward market. But when this mutual distance between Mercury and Venus remains small, the market has no movement. Trade stands still; the market stays steady, lying in ordinary rises and falls; and as soon as Mercury and Venus, reaching one place, make a conjunction (yuti), then the lowest of low prices form in that month.

If this conjunction of Mercury and Venus forms at a time when Mercury has come out from the influence of the Sun, there arises a possibility of a greater difference falling between the

prices of forward and ready goods. If somewhere this conjunction of Mercury and Venus forms in Venus's sign of exaltation or its own sign, then at that time the difference between the prices of forward and ready goods will end completely. This is the excellent and favourable time at which the change-over (badla) between forward and ready can be made in a profitable manner. But at the time when Mercury, after the conjunction with Venus, becomes separate, the market will again have a boom, and the difference between forward and ready prices will begin to increase.

If the conjunction of Mercury and the Sun takes place in the sign Virgo or Aries, then the market

— Source PDF page 270 (book page 271) —

gets a good boom; and if this same conjunction occurs in the sign Pisces or Libra, or in Taurus, Capricorn, Aquarius or Cancer, a slump comes.

In the conjunction of Mercury and the Sun that takes place in the sign Aries, this is the special feature: generally, in all markets, the rebounds that take the prices toward higher levels begin to come, and firmness begins to be seen in the industrial fields.

Roughly, the greatest mutual distance between Mercury and Venus is about 76 degrees. Because both these planets move round the Sun, taking it as the centre, only within a limited orbit.

The conjunction of Mercury and Venus brings a slump in markets such as silver, seed, cloth, thread, shares and oil when this conjunction takes place in the sign Gemini, Virgo, Taurus, Libra or Pisces. But after they have made the conjunction, when the two planets begin to become separate from each other, generally all the markets begin to improve: the prices that went low in the time of the conjunction begin to steady, and afterwards the prices begin slowly to rise. When this same conjunction of Mercury and Venus takes place in the sign Cancer or Leo, a boom comes in the markets.

It should be kept in mind that it is the distance between Mercury and Venus alone that tells the trend of the movement of the ready and forward markets. Whenever the distance between Mercury and Venus becomes very great, or, to put it another way, there is a difference of 76 degrees between these two planets, then at that time a very great mutual difference arises between the prices of forward and ready goods. On the difference between the prices of forward and ready

— Source PDF page 271 (book page 272) —

rates, the motion of these two planets alone is the controlling force; it has the full authority.

If Venus's motion is greater than Mercury's, then the rates of ready goods are lower than those of forward goods; and when Mercury's motion is less than Venus's, then the rates of forward goods are lower than those of ready goods. But when the motion of these two planets is equal, then there is no special difference between the forward and ready rates.

The Scriptural and Scientific Method of Knowing Fortnightly or Weekly Rate Fluctuations:

Taking the middle time between the Purnima-end and the Amavasya-end and the two Ashtamis as the desired time, make the ascendant chart for the beginning of the fortnight or the beginning of the week. If there are benefic planets in the tenth and fourth houses, the market keeps running in an even, orderly boom through the whole fortnight or week; and if

there are cruel planets in the said places, a slump equally comes. If there is a benefic planet in the tenth place and a cruel planet in the fourth place, a boom comes and then a slump; and if there is a cruel planet in the tenth place and a benefic planet in the fourth place, a slump comes and then a boom. If mixed (cruel and benefic) planets are in the two said places, the market remains uncertain; in a moment gusts of boom and in a moment gusts of slump begin to come, in which the weak trader is badly beaten. In such a condition one should trade with caution.

If perhaps there is no planet in the tenth and fourth places, then it will be especially beneficial to decide the boom or slump according to what the position of the lord of the tenth house and the lord of the fourth house is in that ascendant.

Vyapar-Ratan (Part Two: Dwitiya Khand)

Consideration of Booms and Slumps through the Planets' Mutual 2,500 Aspect-Combinations

(A New System)

Chapter One

The Distance of the Planets and Predictions for Business

In the first part of this book "Vyapar-Ratan," the learned authors have told of many scripture-stated and experienced methods concerning booms and slumps, by studying which well a man can find out a good deal about which way the trend of the market will go. But it should not be forgotten that, just as when considering a birth chart the prediction comes out right only by considering place, time and person, in the same way those who will take the help of astrology while giving due attention to the country's political progress, social order, industrial policy and the commercial situation can alone gain real benefit.

In this connection it is also necessary to say that just as the price of a gem is assessed from its colour, clarity, water (lustre), weight, auspicious and inauspicious marks and the like, in the same way, by considering in what sign a planet is, in what nakshatra it is, the Sankranti, the sight of the Moon on the second day, the eclipse, and the vedha through the Sarvatobhadra chakra and the like, one can reach the decision as to which way the trend will go. But besides all these methods there is one special method more, by which commercial

— Source PDF page 273 (book page 274) —

prediction gets a great deal of help. That is the "mutual distance of the planets," that is, finding out how far one planet is from another, how many miles away, and from this determining "what the result will be." How far one man is from another we tell by measures such as miles, furlongs, yards and feet. But the distance of the planets is not measured in miles or furlongs. All the planets move in a round path; therefore the whole path, the round circle or the circumference of the circle, is divided into 360 parts. Each part is called a

"degree" in English and in the Sanskrit language "amsha." If these 360 degrees are divided into 12 parts, there are the 12 signs of 30 degrees each.

Sayana and Nirayana Calculation:

Astrologers know that two kinds of calculation are in use in India at this time: one sayana (tropical) and the other nirayana (sidereal). On the day in the spring season when day and night are equal, the place where the Sun stands at that time, counting degrees 0, 1, 2 ... from there, is called the sayana calculation. But on the day when the Sun is at the starting point of the nakshatra "Ashwini," counting "degrees" 0, 1, 2 ... in this way from that place is called the "nirayana" calculation.

Between these two calculations there is at this time generally a difference of 23 degrees 16 minutes. According to the "sayana" calculation, when we will say the Sun is at 23 degrees 16 minutes of the sign Aries, then according to the nirayana system the position of the "Sun" will be said to be at 0 degrees 0 minutes, that is, at the starting point of Aries.

— Source PDF page 274 (book page 275) —

According to the nirayana system, when the Sun is at 15 degrees of the sign Cancer, then according to the sayana system:

	Signs completed (rashi)	Degrees (amsha)	Minutes (kala)
Nirayana	3	15	0
Plus ayanamsha (the difference between the systems)	0	23	16
Sayana	4	8	16

We will say the Sun is in the sign Leo at 8 degrees 16 minutes.

Further on, in the section on the prediction of results, it will be stated that "if the Sun is at such and such a distance in degrees from such and such a planet, there will be a boom in the substances of the sign in which the Sun is." But here our readers will naturally have this doubt: "Because of the difference of 23 degrees 16 minutes at this time between the 'sayana' and 'nirayana' systems, sometimes (as shown above by the example) the Sun comes into one sign by the sayana system and into another sign by the nirayana system. Then (as shown above in the example), considering the Sun to be in the sign Leo according to the sayana system, should we declare a boom in the substances connected with the sign Leo, or, considering it in the sign Cancer according to the nirayana system, declare a boom in the substances connected with the sign Cancer?" The solution of this doubt is that in the first part of this book the nirayana system has been accepted; but in the second part, the prediction of results should be made by determining, through the sayana system, in what sign the planets are.

The Method of Converting Nirayana Planets into Sayana:

At this time many almanacs are being printed that are inaccurate. The astrologers who

— Source PDF page 275 (book page 276) —

at this time are giving an ayanamsha of about 21 minutes 50 (the figure is garbled in the scan) are themselves fallen into a great delusion and are putting the readers of their almanacs into delusion as well. On 1 January 1958 the ayanamsha was 23 degrees 16 minutes 30 seconds. The ayanamsha increases each year by about 50 and a quarter seconds

(sava pachas vikala); on this basis the ayanamsha of the coming ten years is given below.

Date	Degrees	Minutes	Seconds
1 January 1958	23	16	30
1 January 1959	23	17	20.25
1 January 1960	23	18	10.5
1 January 1961	23	19	0.75
1 January 1962	23	19	51
1 January 1963	23	20	41.25
1 January 1964	23	21	31.5
1 January 1965	23	22	21.75
1 January 1966	23	23	12
1 January 1967	23	24	2.25
1 January 1968	23	24	52.5

Because the ayanamsha increases by 50.25 seconds each year, it increases by about 4 seconds each month. Above, the ayanamsha of 1 January of each year has been given. If one has to find it for some date in between, it should be worked out by proportion.

When the ayanamsha is known, by adding it to the true position of the nirayana planet, the sayana

— Source PDF page 276 (book page 277) —

planet becomes true (spasht), as was shown by example on page 5 (of the book).

The Aspect of the Planets:

Now some special matters are told about the angular (degree-based) aspects of the planets. In Indian astrology, when considering a birth chart, in considering aspect we count from sign to sign. For example, if the Sun is in Cancer and Saturn in Capricorn, it is a seventh aspect. If the Sun is in any degree of the sign Cancer and Saturn in any degree of the sign Capricorn, the two have a full aspect on each other. This is the Indian system of aspect in the consideration of a birth chart.

But in this second part of "Vyapar-Ratan," the angular aspects that will be described should be counted from degree to degree; that is, just as a rupee is multiplied by 16 to make annas, in the same way the signs gone by should be multiplied by 30 to make degrees. Make the separate degrees of the two planets and see how many degrees of gap or difference there is between them.

For example, (1) the true Sun is 3-1 (3 signs 1 degree), and the true Saturn is 9-2. Then, in making the degrees of the true Sun, 3 x 30 = 90 + 1 = 91 degrees; and in making the degrees of the true Saturn, 9 x 30 = 270 + 2 = 272 degrees. The difference between the two, 272 - 91 = 181 degrees.

[Reading note: in this scan the digit 9 looks like 6 in this book's type (the printed "60", "61" and "6-2" are 90, 91 and 9-2; the arithmetic of the book confirms this). This also explains why 6 and 9 were hard to tell apart in earlier tables, where they are marked "(?)".]

Now take a second example, (2): the true Sun is 3-1 and the true Saturn is 9-29 (printed as "6-26", read as 9-29 because the book's next page gives 299 degrees). Then, for the Sun, by the method stated above, 91 degrees

— Source PDF page 277 (book page 278) —

(of the Sun were made). And for Saturn, 9 x 30 = 270 + 29 = 299 degrees. The difference between the two, 299 - 91 = 208 degrees.

In both examples, counting from sign to sign (from Cancer to Capricorn or from Capricorn to Cancer), the very same seventh sign came; but by angular counting, in example (1) there was an angular aspect of 181 degrees, and in example (2) a difference of 208 degrees. In this way two different aspects came. The results of these two are also different. It is necessary to state here that in this second part of this book only angular aspect is considered everywhere, not sign-to-sign.

The Kinds of Angular Aspects:

(1) If both planets are at the same degree, the difference between the two will be 0.

(2) If one planet is at the place "ka" and the other at the place "jha", the difference between the two will be 180 degrees.

(3) If one planet is at the place "ka" and the other at the place "nga", then from "ka" to "nga" it is 90 degrees. From "nga", if one counts cha, chha, ja, jha ... in this order up to "ka", the difference is 270 degrees.

(4) In the same way, from "ka" to "ja", ka, kha, ga, in this

[Diagram, "The Mutual Distance of the Planets": a circle (drawn as an ellipse) with points marked by Devanagari letters. "Ka" stands at the left end of the horizontal diameter (0 degrees) and "jha" at the right end. Counting along the lower half from "ka": kha at 30, ga at 45, gha at 75, then "nga" at the bottom (90); then cha (75), chha (45), ja (30) back up toward "jha". Along the upper half the points are marked in the same way: ta (30), na (45), dha (75), "da" at the top (90), then the mirror-image points (75, 45, 30) down to "jha". The printed degree numbers are measured from the nearer end of the horizontal diameter. Dotted lines run from the centre to some of these points.]

— Source PDF page 278 (book page 279) —

order, the difference is 150 degrees. But counting from "ja" through jha, nya, ta (the later points) up to "ka", the difference came to 210 degrees.

In the circle or ring one can count from the left side and also from the right side. In counting from one point to another, however many degrees come from one side, if the degrees that come in counting from the other side are added to them, the total will always be 360; as has been shown above in examples (3) and (4).

In example (3), from "ka" to "nga" is 90 degrees and from "nga" to "ka" 270 degrees; 90 + 270 = 360. In example (4), from "ka" to "ja" is 150 degrees and from "ja" to "ka" 210 degrees; 150 + 210 = 360.

From the above account it is clear that:

(1) If between two planets there is a difference of 30 degrees from one side, then counting from the other side there should be a difference of 360 - 30 = 330 degrees.

(2) If between two planets there is a difference of 60 degrees when counted from one side, then counting from the other side there will be a difference of 360 - 60 = 300 degrees.

(3) If between two planets there is a difference of 90 degrees when counted from one side, then counting from the other side there will be a difference of 360 - 90 = 270 degrees.

(4) If between two planets there is a difference of 120 degrees when counted from one side, then counting from the other side there will be a difference of 360 - 120 = 240 degrees.

— Source PDF page 279 (book page 280) —

(5) If the difference counted from one side is 135 degrees, then counting from the other side the difference will be 360 - 135 = 225 degrees. Understand it in the same way everywhere.

Therefore we mention these aspects by the practical names written below:

No.	Angular difference	Symbol	Name of the aspect
1	0 or 360 degrees	conjunction sign	Yuti (conjunction)
2	180 degrees	opposition sign	Pratiyoga (opposition)
3	150 (or 210 degrees)	inverted-triangle sign	150 angular
4	144 (or 216 degrees)	plus-minus sign	144 angular
5	135 (or 225 degrees)	square-with-tail sign	135 angular
6	120 (or 240 degrees)	triangle	120 angular (trine)
7	90 (or 270 degrees)	square	90 angular (square)
8	72 (or 288 degrees)	letter Q	72 angular
9	60 (or 300 degrees)	six-petal sign	60 angular (sextile)
10	45 (or 315 degrees)	angle sign	45 angular
11	36 (or 324 degrees)	perpendicular sign	36 angular
12	30 (or 330 degrees)	small cross sign	30 angular

[Reading note: the printed symbols are the usual astrological aspect glyphs; they are described rather than reproduced. Because of the 9/6 look-alike in this typeface, the 90-degree row is read from the arithmetic (90 + 270 = 360).]

Besides these there are other aspects also. 360 degrees divided by 2 gives 180. 180 divided by 2 gives 90. 90 divided by 2 gives 45. This divided again by 2 gives 22 and a half. These divided again by 2 give 11 and a quarter; these divided again by 2 give 5 and five-eighths degrees.

Now 360 divided by 3 gives 120. Of this, divided by 2

— Source PDF page 280 (book page 281) —

gives 60; of this, divided by 2, 30; of this, divided by 2, 15. Continue dividing in this way in order, and new sub-varieties of aspects will keep forming. But the more the division is carried, the more the effect will also keep decreasing. Because if any planet is within a difference of 10 or 12 degrees, it is taken to be a "yuti" (conjunction) itself.

Deeptansha (the Orb of Influence):

By strict calculation, when two men are at exactly one point, they should be said to be at one place. But if two men are in a room or a house, in worldly usage it is still said that the two persons are at one place. In the same way, by strict calculation, when two planets are at one and the same degree, their "yuti" (conjunction) should be accepted. But just as, before the conjunction of the Sun and the Moon, when there is a difference of 12 degrees the beginning of the Amavasya tithi is taken to have come, in the same way, among planets such as the Sun, even if the difference is up to 8 or 10 degrees, on this side or on that, if one planet is with the other, they take it as "yuti" itself. Although there is a difference of 8 or 10 degrees in their degrees, even so the rays that go out from the bodies of the two meet one another, and their combined influence reaches the Earth. For this reason, if there is even a

little angular difference between two planets, their conjunction is accepted. Up to as many degrees as an "aspect" can be accepted, those degrees are called "Deeptansha" (the orb of influence).

If two planets are exactly in one and the same sign, degree, minute and second, their full conjunction will be accepted. A difference of 8 or 10 degrees

— Source PDF page 281 (book page 282) —

(of difference) is enough for the beginning of a conjunction to be accepted.

In this connection the following principles have been laid down:

(1) By coming within the orb (deeptansha), the effect of the "aspect" begins. But the nearer they are, the greater the effect will be. For example, if the Sun and Mars have a difference of 3 degrees, a conjunction will be accepted; but if the difference is 1 degree, its effect will be greater still. If there is no difference at all (degree, minute and second all the same), the effect will be very much greater.

(2) The orbs of the Sun and the Moon are considered greater than those of the other planets. Generally the following "orbs" are accepted:

Aspect	Orb if the aspect is between the Sun and Moon	Orb if the aspect is between the Sun or Moon and another planet	Orb if the aspect is among the other planets
Yuti (conjunction)	12 degrees	10 degrees	8 degrees
Pratiyuti (opposition)	12 degrees	10 degrees	8 degrees
120 angular	8 degrees	8 degrees	8 degrees
90 angular	8 degrees	8 degrees	8 degrees
60 angular	7 degrees	7 degrees	7 degrees
45 angular	4 degrees	4 degrees	4 degrees
135 angular	4 degrees	4 degrees	4 degrees
30 angular	2 degrees	2 degrees	2 degrees
150 angular	2 degrees	2 degrees	2 degrees

[Reading note: the aspect values in the last column are read from the typeface in which 9 looks like 6 (the printed "60" in the 8-degree row is 90). The book gives the table in the order shown; the row order of 45 and 135 and of 30 and 150 follows the printing.]

Above, the maximum limits of the orbs have been given. In the aspects of 144, 72 and 36 degrees the orbs are 2 degrees.

— Source PDF page 282 (book page 283) —

For special details see (Alan Leo's "Jyotish Granthmala" (printed "Alan Ligro"; probably Alan Leo's astrology series), Part 3, pages 39 to 67) and C. E. O. Carter's book "The Mutual Aspects of the Planets," pages 1-17. In Carter's opinion, by taking half of the above orbs a specially forceful aspect arises. But:

The rule of orbs that was stated above is the general rule. The swift planet, the Moon, will move 12 degrees in a single day, while Saturn and Herschel (Uranus), even on coming within the orb, will not form a conjunction for months, because both are slow-moving planets. For this reason, where, on coming within the orb, they would form a conjunction (exact in sign, degree, minute and second) within one week or ten days, there the orb should be taken as written above. Otherwise, generally, from a week before the conjunction

its effect begins to be seen specially. In an opposition and in a 120-degree combination, a sign of boom or slump begins to appear 4 to 5 days earlier. In a 60-degree or 45-degree aspect, two days earlier. This is the general rule. When slow-moving planets such as Jupiter-Saturn or Saturn-Herschel remain within orbs for a long time, the markets keep rising for a long time. When they stay in opposition for a long time, prices keep falling or lying low for a long time.

The orbs that have been given above: the effect begins as soon as one comes within those orbs; as the orbs go on decreasing, that is, as the aspect becomes completely exact, free of orb, the result will become more and more forceful.

Before telling the results of the aspects that have been stated above,

— Source PDF page 283 (book page 284) —

it is necessary to draw attention to one matter, and that is:

"Boom or Slump in Which Commodity?"

In this second part the aspects will come up for discussion again and again. For this reason it is unnecessary to write again and again at every place that "the commodities with which this planet is connected, and the commodities connected with the sign in which the planet is, will have a boom."

In the same way, when in this part, at the time the result is stated, there is a "slump," it should be understood that (1) the commodities connected with the two planets whose aspect is being discussed, and (2) the commodities connected with the signs in which the aspecting planets are seated, will have the slump.

Which commodity is connected with which planet, and which sign has authority over which commodity, has already been explained in the first part. See pages 53 to 56 (of the book). For this reason that subject is not being repeated.

The General Nature of Boom and Slump of the Planets and Signs

The nature of the planets: In any case the result of each kind of aspect will be told separately further on. But it should be understood which planet has a general nature that is boom-causing and which planet's natural influence is slump-causing. The Sun, Mars, Saturn, Rahu and Ketu are cruel planets; for this reason they are boom-causing. If the Moon is waning, then, because of being malefic, it brings a little boom; if it is from the Ashtami of the bright fortnight to the Panchami of the dark fortnight, then, being auspicious,

— Source PDF page 284 (book page 285) —

it causes a slump. Mercury joined with cruel planets will cause a momentary boom. Mercury joined with benefic planets, being a benefic planet, will cause a slump. But because the Moon and Mercury are very fast-moving, and are sometimes benefic and sometimes cruel, their influence is not long-lasting. The boom or slump they make stays a short time and dissolves like a bubble of water. Jupiter and Venus are benefic planets, therefore Jupiter is slump-causing, but Venus is sometimes slump-causing and sometimes boom-causing.

English astrologers have discovered three new planets: Herschel (Uranus), Neptune and Pluto. Neptune, being watery, is slump-causing. Herschel and Pluto are boom-causing.

The Nature of the Signs

Aries, Taurus, Leo, Scorpio and Capricorn: these five signs are boom-causing. Gemini, Cancer, Virgo, Libra, Sagittarius, Aquarius and Pisces are slump-causing signs. But one sign has 30 degrees; according to the degrees too, there is a gradation in the boom-or-slump nature:

Within any sign	Nature
From 0 degrees to 6 degrees 40 minutes	Boom
From 6 degrees 40 minutes to 10 degrees	Slump
From 10 degrees to 16 degrees 40 minutes	Boom
From 16 degrees 40 minutes to 20 degrees	Slump
From 20 degrees to 26 degrees 40 minutes	Boom
From 26 degrees 40 minutes to 30 degrees	Slump

It should be understood that if sign and degree are both of the boom type, there is a complete boom; if sign and degree are both of the slump type, there is a complete slump. But if the sign is of one nature and the degree of another nature, they lessen each other's effect.

— Source PDF page 285 (book page 286) —

It is therefore of the utmost necessity to remember these natures of the planets, signs and degrees, namely:

(1) If the result of the angular aspect that the planets are making on one another is a boom, and the planets whose aspect is being considered are also boom-causing, and the signs and degrees in which they are seated while making the aspect are of a boom-causing nature too, then a complete boom will come. But:

(2) If the result of the angular aspect that the planets are making on one another is a slump, and the natural disposition of the planets whose aspect is being considered is also of slump, and the nature of the signs and degrees in which they are seated while making the aspect on one another is also slump-causing, then a greater slump will come.

In this way, the prediction should be made by harmonising the result of the angular aspect with the general nature of the planets and of the signs and degrees in which they are placed.

[End of Chapter One of Part Two (the distance of the planets and predictions for business), book pages 273-286.]

— Source PDF page 286 (book page 287) —

Chapter Two

The Relationship between Planets and Commodities

It was stated in the third chapter of the first part which commodity has a special connection with which sign and which planet. When some angular aspect or conjunction (yuti) takes place between two planets, a special effect naturally falls upon those commodities that are under the authority of the signs ruled by the planets making the conjunction or aspect, and there is a special disturbance in the price of the commodities connected with the sign or signs in which the planets making the conjunction or aspect are situated. Therefore which

aspect has the effect of a boom, and to what extent there will be a boom, and which conjunction or aspect has the effect of a slump, and to what extent it will make a slump, will be told further on in detail. But for the thousands of aspects (conjunction, declination-parallelism, latitude change and so on) whose results are going to be given, writing the names of all the commodities each time with every aspect would make the work extremely long and would also bring the fault of repeated repetition; for this reason only the sign "boom" or "slump" has been given ahead. But it very often happens that when two planets meet or form an aspect with each other, they give up their own natures and produce a new nature, just as honey is sweet and nourishing, and ghee too is tasty and nourishing, but by mixing the two in equal quantity it becomes poison

— Source PDF page 287 (book page 288) —

> *The conjunction of two or more planets destroys the individual nature of each of them. One should understand the result of a conjunction as like the mixing of honey and ghee, which becomes poison. (Sanskrit verse, given in meaning.)*

For this reason, which planets' conjunction (yuti) and aspect has a special effect on which commodity is given below:

[Reading note: the commodities are listed in the order of the Hindi alphabet. Each entry gives pairs of planets written "A-B". The book does not explain on this page whether the first planet is the one casting the aspect; the pairs are given exactly as printed. "Herschel" is Uranus.]

Commodity	Planet pairs
Grain (anna)	Sun-Mercury, Moon-Mercury, Mars-Mercury, Mercury-Moon, Mercury-Mars, Mercury-Venus, Mercury-Saturn, Mercury-Rahu/Ketu, Mercury-Herschel, Mercury-Neptune, Mercury-Pluto, Saturn-Mercury, Rahu-Mercury
Castor (arandi)	Saturn-Sun, Saturn-Mars, Saturn-Mercury, Saturn-Jupiter, Saturn-Rahu/Ketu, Saturn-Herschel, Saturn-Pluto
Linseed (alsi)	Sun-Saturn, Moon-Saturn, Mars-Saturn, Mercury-Saturn, Jupiter-Saturn; Saturn-Sun, Saturn-Moon, Saturn-Mars, Saturn-Mercury, Saturn-Jupiter, Saturn-Venus, Saturn-Rahu/Ketu, Saturn-Herschel, Saturn-Neptune, Saturn-Pluto; Rahu-Saturn
Oil company	See under "Oil"
Weapons (ayudh)	See "Weapons" (hathiyar)
Ordinary shares	See under "Shares"
Oil shares	See under "Oil"
Brick (int)	Sun-Mars, Moon-Mars; Mars-Sun, Mars-Moon, Mars-Jupiter, Mars-Venus, Mars-Rahu/Ketu, Mars-Herschel, Mars-Pluto; Mercury-Mars, Jupiter-Mars, Rahu-Mars
Wool (un)	Sun-Saturn, Moon-Saturn, Mars-Saturn, Mercury-Saturn; Saturn-Sun, Saturn-Moon, Saturn-Mars, Saturn-Mercury, Saturn-Jupiter, Saturn-Venus, Saturn-Rahu/Ketu, Saturn-Herschel, Saturn-Neptune, Saturn-Pluto
Aluminium industry	Sun-Herschel, Moon-Herschel, Mars-Herschel, (the list continues on the next page)

[End of the commodity index of Chapter Two of Part Two, book pages 287-300.]

Chapter Three

The Results of the Mutual Conjunction of the Planets

When two planets are in one and the same degree, minute and second, their conjunction (yuti) is considered to have taken place. But even before the conjunction is complete, when both planets come within the "deeptansha" (orb), the effect of the conjunction begins. As they keep coming nearer, the effect (of boom or slump) also keeps growing greater. When the conjunction is exact, the effect is greatest. When, after the conjunction is complete, the fast-moving planet goes ahead, the effect of this conjunction also decreases gradually; and when both planets go outside the orb, the effect of their conjunction ends.

The Conjunction of the Sun with the Other Planets:

According to the "Uttara Kalamrita" (a classical text), all "fiery things," thorny trees, wool, herbs, blankets, bitter things, land, square-shaped things, bones (elephant tusk), things made of bones, grass, quadrupeds, travel-related things, the rates of government contracts, round things, timber, the products of the Saurashtra country, pearls, copper, blood (blood donation) or medicines that increase blood (haemoglobin), saffron, rope, honey, gold, guineas, ashrafis (gold coins), ruby, gems, wheat, red things, burning-glass (atashi glass) and the like should be considered from the Sun. "Gilt-edged securities" are those securities which the government sells to the public at 3 and a half per cent interest each year. The Sun is the royal planet; for this reason these "securities

— Source PDF page 301 (book page 302) —

(securities)" prices are also specially influenced by the Sun. The commodities connected with the other planets are told further on.

If there is a Sun-Moon conjunction, a boom comes in the commodities connected with these planets and with the sign in which they make the conjunction. If there is a Sun-Mars conjunction, there will be a considerable boom in the commodities connected with these planets. Both are planets of fiery nature; if the conjunction is in the fire signs there will be a special boom; in a water sign, less boom. If there is a Sun-Mercury conjunction, there is an increase in the prices of the commodities connected with the sign in which they stand and with these two planets; but the Sun and Mercury always remain near each other, and Mercury can never be more than 28 degrees away from the Sun, so for the orb of their conjunction only 4 degrees should be taken. If there is a Sun-Jupiter conjunction, it is especially effective, because this conjunction comes only after about thirteen months. Banks have a special connection with Jupiter; Jupiter is a bringer of wealth; for this reason a combination for a special boom will form. The Sun and Venus are planets that remain close to each other. Venus cannot go farther than 48 degrees from the Sun. For this reason their

orb too should be taken as only 4 degrees. In the Sun-Venus conjunction and in the sign in which these planets stand, a boom comes in the connected commodities. The Sun's son Saturn is certainly so, but they are of opposite nature and enemies of each other. The Sun is of fiery sign and nature, and Saturn is of a cold nature, the lord of goods lying under the earth. Their conjunction takes place once a year. For this reason this conjunction has special importance. It is a specially boom-causing conjunction. The Sun and Rahu are both cruel planets and are enemies. The conjunction of these two is also boom-causing. Rahu

— Source PDF page 302 (book page 303) —

and Ketu are always 180 degrees from each other. For this reason, when there is a Sun-Rahu conjunction, at that time the Sun will be at 180 degrees from Ketu: its result is "slump" (mandi). In the same way, when there is a Sun-Ketu conjunction, its result will be boom-causing; but Rahu stays 180 degrees from Ketu, so at the time of a Sun-Ketu conjunction there will be a slump through the Sun-Rahu opposition (a difference of 180 degrees). In this way, at the time of a Sun-Rahu or Sun-Ketu conjunction, if both these planets are in a fiery sign, a boom should be understood. If they are in a "slump"-causing sign, the effect of the boom will not be as great.

[Translator's note: the paragraph above is as printed; its logic is not fully clear, since it first calls the Sun-Rahu conjunction a slump and then says a Sun-Rahu opposition causes a slump at the Sun-Ketu conjunction.]

The conjunction of the Sun and Herschel (Uranus) also happens generally once a year. Herschel is a planet that produces sudden effect; for this reason a sudden boom will come, and if they are in fiery signs there will be a combination for a still greater boom. In the commodities that come from the sign in which the conjunction occurs, and from the country that has authority over that sign, there will be a sudden rise in price. The Sun-Neptune conjunction also takes place once a year. Its result too is a boom. But this boom happens because of some false rumour or notion, and in the end, when both planets have gone outside the orb, the same old rate comes back. At the time of a Sun-Pluto conjunction, a special boom comes in the shares of companies and in the prices of goods from beneath the earth. Some big speculator buys the shares of some company or some commodity secretly, more and more, because of which the markets go high.

The Effect of the Moon's Conjunction with the Other Planets:

The effect of the Sun-Moon conjunction has already been given. Now the Moon's

— Source PDF page 303 (book page 304) —

effect conjunction with the other planets has is told. The Moon generally moves 13 degrees 20 minutes in a day. Therefore, on whatever day the Moon's conjunction is at midday, on that same day the effect of the Moon's conjunction becomes visible. Traders are especially cautioned about one matter. Some sign is very unfavourable to a certain person. When the Moon is in an unfavourable sign, even if a combination for a boom forms, work should not be done. Through the ashtakavarga one should look closely at how many lines (rekha) there are in the Moon's ashtakavarga (chandrashtak varg) from the consideration of the birth chart of the person who is to trade (in the sign in which the Moon is making the conjunction with the other planet). If there are more than 5 lines, trade. If there are 1 or 2 lines, do not trade. If there is not even one line, do not trade at all. For example (a Sanskrit verse, given in meaning): "When the Moon is in a place with zero (lines) in the ashtakavarga, one should not do any auspicious work; everything begun there proves fruitless."

The person who is to trade should consider this and study the conjunctions written below:

The Moon-Mars conjunction is boom-causing. According to the work "Uttara Kalamrita," silver, goods made of silver, flowers, fragrant substances, water substances, sour things, juices, sugarcane, sugar, jaggery, white things (rice, camphor, sugar, menthol, ivory, platinum, shell, things made of shell, pearls), vegetation (roots, herbs), medicine, goods of export and import (goods coming from across the sea), bell-metal, salt, diamond, honey, wheat, alkali, gems, fish, silk cloth, shining things, crystal, soft cloth and the like should be considered from the Moon. Ready food articles (hotel company or

— Source PDF page 304 (book page 305) —

sweets company shares' prices), petrol, petroleum, spirit, barley, boats that move on water, ships (the shares of these companies), glass, chandeliers, tumblers, white plastic, nylon, liquor, and the shares of companies trading in liquid substances should also be considered from the Moon. When the Moon forms a conjunction with Mars or any other planet, then the prices of these commodities will be somewhat hot (rising). On those commodities on which Mars has influence (see page 306), there too heat will come. The Moon-Mercury combination is also boom-causing. Whether it is the Moon-Mercury or the Moon's combination with any planet, Jupiter, Venus, Saturn, Rahu, Ketu, Herschel, Neptune or Pluto, it is boom-causing. In the commodities over which Mercury, Jupiter and the other different planets have authority, in those commodities there will be a boom; but benefic planets do not cause as much boom as cruel planets do. Which are the benefic and slump-causing planets and which are the cruel and boom-causing planets has already been stated on pages 284-285. For this reason, by the Moon's combination with Mercury, Jupiter, Venus or Neptune, as much boom will not come as by the combination with Saturn, Rahu, Herschel or Pluto. When the Moon forms a conjunction with Rahu, this conjunction produces a boom; but at that same time, because of the opposition with Ketu (a relation of 180 degrees), they destroy each other's effect. In the same way, at the time of a Moon-Ketu conjunction, the Moon-Rahu opposition ends the effect of the boom. The basis of the Moon-Neptune boom stays on some false rumour or news. The next day the markets come back again to that same old rate.

— Source PDF page 305 (book page 306) —

The Effect of Mars's Conjunction with the Other Planets:

According to the "Uttara Kalamrita," Mars has authority over the following commodities: weapons, the weapons trade (materials used in armament factories and ordnance depots), things for the use of the army, red-coloured things, fiery substances, gems, coral, gold, square things, things made by burning (fire), copper, beautiful cloth, things of the southern direction, wild animals, blood-increasing medicines, wheat and the like. Besides this, coloured drinks (tea, coffee, cocoa, Ovaltine and the like), things used in land or buildings (brick, iron, cement and mineral substances), the machines connected with industries in which electricity or fire is specially used, the shares of such companies in which fire and electricity are much used, red rice, oilseeds and the like should also be considered from Mars.

When Mars forms a conjunction with other planets, the influence of Mars will certainly fall, but the influence of the other planets will also be mixed in. In which commodities Mars, by making a conjunction with the other planets, will cause a disturbance in price has been told above. Here only the effect of the conjunction is told. The effect of the conjunctions of

Mars-Sun and Mars-Moon has already been told earlier in this same section. The Mars-Mercury conjunction makes a boom. Mercury is the lord of news and of newspapers. Because of the arrival of some fresh news, a sudden boom will come in the market. The Mars-Jupiter conjunction is also going to raise prices. Jupiter is the lord of banks. By the heavy buying of the wealthy class, or with the help of banks, the traders buy more goods

— Source PDF page 306 (book page 307) —

because of the facility for buying more, this boom will arise. When there is a Mars-Venus conjunction, Venus will not cause as much boom in Mars's commodities as Mars will cause in Venus's things, because the boom that is Mars's nature to cause is not Venus's. Which commodities are to be considered from Venus is told on page 313. The Mars-Saturn conjunction makes a special boom. Both are sharp and cruel planets. This conjunction comes after about 1 and a half years. If the conjunction is in some fierce, boom-causing sign, the markets will become quite hot; and if, at the same time, boom-causing aspects are also forming from Herschel or Pluto, there will be still more heat in the rates. The speed of Mars is generally about 40 minutes a day. For this reason the effect of this conjunction will be visible from about 10 to 11 days earlier and will last until 10 to 11 days after the conjunction. The middle week will bring special heat. These two planets alone have an intimate relation with things under the earth, mineral substances, heavy industry, iron, cement, trading mills and factories, machine engineering and the like; for this reason there will be a special boom in the commodities connected with these industries and in the shares of the companies that do their work.

The Mars-Rahu conjunction is also boom-causing, but when there is a Mars-Rahu conjunction, there will also be a Mars-Ketu opposition. A conjunction causes a boom. An opposition (a difference of 180 degrees) causes a slump. But the boom effect of the conjunction has somewhat more weight than the slump effect of the opposition. For this reason, as a result, a boom will come, but not as great.

The Mars-Herschel combination is specially boom-causing. In the year 1958 Herschel will be in the sayana sign Leo. In the year 1959 also, in the sayana sign Leo

— Source PDF page 307 (book page 308) —

it will remain. Until October 1960 it will stay in the sayana sign Leo, and in November 1960 it will move into Virgo. Leo is the sign of the Sun; in it, whenever there is a conjunction of Mars with Herschel, there will be a heavy rebound. Within the sign Leo are commodities such as gold, ashrafis, guineas, dry ginger, saffron, jaggery, gram and leather. Therefore in these commodities, and in those over which Mars and Herschel have authority, sudden heat will come. The nature of Herschel is to produce a sudden effect.

The Mars-Neptune conjunction is also boom-causing. But it is not as lasting. In the market, on the basis of true and false rumours, the market rises, but it is not lasting. Afterwards it comes to be known that the basis on which the market had risen was mistaken. Mars and Pluto are both planets of one nature: both bring a boom. Albert Benjamin (as printed; probably Elbert Benjamine) has published from Chicago (America) a booklet of 12 pages on Pluto (price about 6 rupees); in it he has written that the whereabouts of this planet were found only recently, about 1930. In his opinion this planet Pluto has "power and boom just like Mars." Albert Benjamin has also accepted Pluto as joint lord, along with Mars, of the sign Scorpio. In January 1958 Pluto came into the sayana sign Virgo.

The Effect of Mercury's Conjunction with the Other Planets:

What the effect of the conjunction of the Sun, Moon and Mars with Mercury is has been told earlier. Now the effect of Mercury's conjunction with the other planets is told. According to the "Uttara Kalamrita," Mercury's quicksilver (mercury), horses, goods for writing and reading, news, newspapers and publication

— Source PDF page 308 (book page 309) —

the shares of companies, newly made cloth, green-coloured things, trade, excellent wet things, bronze vessels, mixed substances (made by mixing two or more things, such as articles sold in powder form), and the goods of the north-west direction and the like are under its authority. Other astrological works give Mercury authority over green gram, rice, grain, eatables and drinkables, commercial goods that change quickly (the stock of general merchants), thread, silk, cotton, copper, nickel and the like. Mercury is directly connected with commerce. In English Mercury is called "Mercury," and "Mercury" also means quicksilver. Therefore, because of Mercury's unstable and fickle nature, like quicksilver, Mercury, without any special matter, causes ups and downs in commerce merely on reports. Without Mercury being strong a man cannot be a good broker. Without Mercury being strong a man cannot be skilled in speech. For this reason, if Mercury has a conjunction with any planet, Jupiter, Venus, Saturn, Rahu, Ketu, Herschel, Neptune or Pluto, it will cause only a boom. The basis of the boom is the statement of some leader or of a chief officer in the ruling class, or a published notification. When there is a conjunction of Mercury and Jupiter, the cause may also be an upset in the rate of exchange, an order of banks, and the like. Mercury and Venus stay only around the Sun; for this reason, whenever there is a Mercury-Venus conjunction, a boom comes in the shares of film companies, fragrant substances, silver, pearls, silk, sugar, cotton and other luxury goods. Rice and eatables and drinkables also become dear. But both are benefic planets; this

— Source PDF page 309 (book page 310) —

reason there will not be so great a boom.

The conjunction of Mercury and Saturn generally takes place once in a year. Sometimes, because of retrograde motion, the conjunction takes place even three times in a month and a half. When the conjunction takes place three times, the last conjunction is especially powerful. The Mercury-Herschel combination also makes a boom. The Mercury-Neptune combination makes a momentary boom and brings a slump as the result, and the Mercury-Pluto combination is boom-causing. By the Mercury-Rahu conjunction heat comes into the market, but at that same time, because of the Mercury-Ketu opposition, signs of a slump also come.

When Mercury has a combination (conjunction) with other planets, it should also be seen which planets Mercury is aspecting. In any case, when two planets form a conjunction at some degree, the influence of the aspect of the other planets also falls on it (how much influence which aspect has will be explained further on in detail); but in the case of Mercury this is the special thing: that, whatever planet it is with or whatever planet it is aspected by, it takes up the influence of that planet into itself.

The Effect of Jupiter's Conjunction with the Other Planets:

According to the "Uttara Kalamrita," banks, deposits (government securities), horses, curd, elephants, gems, beautiful houses, things of the north direction, round things,

yellow-coloured things (hemp, paat, tobacco), things that move in villages, fat, worn clothes, a new house, things that move in the sky (aeroplane, helicopter), literary books, books, thrones, vessels, vaidurya (cat's-eye), honey, juice (printed "tepto orange"; unclear), sherbet, squash, gold, ornaments, topaz, rubber, rubber goods, leather-

— Source PDF page 310 (book page 311) —

leather or soft (mulayam) things, gram, closed (banded) vehicles and the like: Jupiter has authority over these. Besides this, shares of joint-stock companies, especially bank shares, tin, zinc, silver and the like: many works have accepted Jupiter as the lord of these as well. Over silver and the like (because of being white), the Moon and Venus also have authority.

When Jupiter and Venus form a conjunction, there will be a boom in the market. Although both these are benefic planets, the conjunction of Jupiter with Venus generally takes place in 13 months; for this reason this conjunction is of considerable importance. At the time of this conjunction a considerable boom comes in the commodities of Jupiter and Venus: in present-day big industries, the shares of companies in jute, cotton, cloth mills, sugar, silk cloth, tobacco, rubber, nylon and the like, and the rates of these commodities will go quite high. It is necessary to tell here that the average motion of Jupiter is generally about 5 minutes a day and that of Venus about 1 degree. For this reason, when Venus is 6 or 7 degrees ahead of Jupiter, from then on the market will keep climbing.

The conjunction of Jupiter and Saturn takes place after many years. Both are slow-moving planets. If the Jupiter-Saturn conjunction took place today, Jupiter will come here again after 12 years. By then Saturn will have reached 5 signs ahead. When Jupiter reaches there after 5 years, Saturn will have reached 2 signs further ahead. In this way the Jupiter-Saturn conjunction takes place in about 20 years (the arithmetic is as printed and is rough). But if, after the Jupiter-Saturn conjunction, Jupiter becomes retrograde, a conjunction can take place 2 or 3 times within one year. Both these planets are very heavy. For this reason the effect of this conjunction lasts for quite a long time. Mineral substances such as iron, coal, copper,

— Source PDF page 311 (book page 312) —

zinc, tin, machines made of iron, hemp, paat, gram, yellow substances and the like, a boom comes in the commodities of both the classes, of Jupiter and of Saturn. Which substances have a connection with Jupiter-Saturn has been given in the second chapter. It is also necessary to tell here that if Jupiter moves at 5 minutes a day and Saturn at 2 minutes a day, then the distance between Jupiter and Saturn will decrease at the rate of 1 degree in 20 days. At the time of this conjunction, if declination-parallelism (kranti-samya) also occurs, the effect of the conjunction will be greater still. The subject of declination-parallelism is explained in a later chapter.

The Jupiter-Rahu conjunction is also boom-causing. But when there is a conjunction with Rahu, there will be an opposition with Ketu. As a result, a little boom will come. In the commodities of which Jupiter and Rahu are the lords, a boom will come.

The Jupiter-Herschel conjunction brings a sudden boom. Things connected with electricity, goods that come by aeroplane, jute, gram, tobacco, bank shares and the like, things connected with Jupiter, become dear. Herschel is a planet that produces sudden effect. By a sudden change in the bank rate or from other causes the markets can go high. Herschel's connection is with the railway, motors and the like. For this reason these things also may

become dear.

Although on page 285 (of the book) Jupiter and Neptune are both said to be slump-causing planets, when the two form a conjunction a boom comes. Lime is white and turmeric is yellow, but mixed together the two turn red. In the same way, Jupiter and Neptune, in both of them one

— Source PDF page 312 (book page 313) —

degree of difference remains, then its special effect is seen (the conjunction of Jupiter and Neptune).

The conjunction of Jupiter and Pluto is also boom-causing. The planet Pluto was discovered only in 1930. Since then the Jupiter-Pluto conjunction has taken place very few times. For this reason experience-proven knowledge of this subject has not yet been obtained. But Pluto is a planet that causes upheaval. For this reason the Jupiter-Pluto conjunction will bring a considerable boom in the shares of companies and in the substances of the class of Jupiter.

The Effect of Venus's Conjunction with the Other Planets:

According to the "Uttara Kalamrita," Venus is the lord of: a white umbrella, the chamar (whisk), white and silken cloth, flowers, sour things, conveyances (vehicles), silver, alkali, pearls, things of the south-east (Agni) direction, beautiful things, cosmetic substances, elephants, horses, colourful things, gems, things that float in water, fragrant substances, perfume, the gajra (flower garland), garlands of gota (tinsel), substances produced in the spring season, goods of art and painting, musical instruments (harmonium, piano, sitar, veena and the like), things used in dancing and singing or in the cinema, film and photography equipment, soft things, and things made of black hair. Besides these, among grains rice and wheat, and white silk, nylon, cotton, thread, and among white things glass, plastic and the like, also come under Venus's influence. Under luxury goods there are many substances such as powder, cream and liquor. Their lord too is Venus.

For this reason, whenever Venus makes a conjunction with a planet, its own class

— Source PDF page 313 (book page 314) —

of commodities will certainly have a boom. With whichever planet (the Sun, Moon and so on) it forms a conjunction, the commodities connected with that planet will also have heat.

The effect of Venus's conjunction with the five planets beginning with the Sun has been told earlier. For this reason there is no grinding of what is already ground. When there is a Venus-Saturn conjunction, a boom comes in the substances connected with Venus and Saturn, such as sesame, oil, rice, wheat, sugar, cotton, linseed, copper, black pepper and the like. Venus and Saturn are mutual friends. If the conjunction is in the sign Taurus or Capricorn, there will be a greater boom. If the conjunction is in Libra or Aquarius, there will be a boom, but not as much. In the other signs, a boom will come in the commodities connected with that sign and in the substances connected with Venus and Saturn.

The Venus-Rahu conjunction is also boom-causing. When there is a Venus-Rahu conjunction, there will be a Venus-Ketu opposition. For this reason a boom will come in the commodities connected with Rahu, but a slump will come in the commodities connected with Ketu. In the commodities connected with Venus, wherever the boom effect of Rahu falls, the slump effect of Ketu will also fall. For this reason, in which sign, which nakshatra and which

navamsha Venus is, and what its instantaneous motion is, from this one should decide whether a boom or a slump will come in the commodities connected with Venus.

At the time of a Venus-Ketu conjunction there will be a Venus-Rahu opposition. For this reason the very principle that has been written above will apply.

By the Venus-Herschel conjunction a sudden boom comes. Venus is the lord of conveyances, and through Herschel, of the railway, aeroplanes, buses, motors, trams and the like

— Source PDF page 314 (book page 315) —

(are connected) are considered; for this reason, in these commodities and in the commodities connected with Venus, a considerable boom will come.

The Venus-Neptune combination is also boom-causing. Both are water-dominated planets. For this reason a boom will come in all water-related substances and in the substances connected with Venus. As Venus and Neptune keep coming nearer to each other, the market will keep getting hotter; but when the conjunction becomes complete, the market will grow softer. It will become known that the news on the basis of which the market had risen was not of such importance. At the time of this conjunction the markets generally rise on the basis of news that has come from abroad or of the condition of the countries across the sea.

The conjunction of Venus and Pluto is also boom-causing. The nature of Pluto resembles that of Mars to some extent. For this reason, when there is a Venus-Pluto conjunction, a boom will come in the substances connected with Mars and Venus.

The Effect of Saturn's Conjunction with the Other Planets:

According to the "Uttara Kalamrita," Saturn is the lord of horses, elephants, mules, donkeys, birds, dirty clothes, black things, black grains, blankets, wool, substances of farming, goods coming from the north-east direction, lead, iron, weapons, timber, goats, buffaloes, goods of theft (those on which customs duty and the like have not been paid, or which are sold in the thieves' market, the black market) and the like. Among the black grains it takes sesame, urad, oil, black pepper, linseed and the like. Castor, groundnut, coal, cement, goods made of cement, leather, leather goods and the like are also considered under Saturn.

When Saturn has a conjunction with Rahu, then generally Saturn and Rahu

— Source PDF page 315 (book page 316) —

are connected, a boom comes in the commodities connected with them. Saturn generally moves about 1 degree in a month. Its average motion is 2 minutes a day, and Rahu moves backward 3 minutes 11 seconds a day. For this reason, when there is a difference of 1 degree between the two, from then the special boom begins. The result of Saturn-Ketu is also just this. When there is a conjunction with Rahu, a boom will come in the substances produced by Rahu; but, because at that same time there is an opposition with Ketu, a slump will come in the substances produced by Ketu. In the substances of Saturn there will be only a boom.

The conjunction of Saturn and Herschel (Uranus) takes place after a very long time. Saturn completes one revolution in 30 years and comes back to its place. In this period Herschel generally completes 4 signs and moves ahead. When, after 10 years, Saturn completes four signs and reaches Herschel's place, Herschel will by then have completed about 2 more signs and moved ahead. In this way the Saturn-Herschel conjunction takes place in about 45 years. The Saturn-Herschel conjunction took place in May 1942. After that it will be in

February 1988.

[Reading note: the years are printed with the digit 9 looking like 6 ("1642" and "1688" are 1942 and 1988; the book's own sequence of dates confirms this).]

But when the Saturn-Herschel conjunction takes place once, then, with retrograde motion, the conjunction can take place more times within one year. For example, in February 1988 the conjunction will be at 29 degrees of sayana Sagittarius. After this both planets will go into Capricorn. But, becoming retrograde, they will come back in June 1988 to about 29 and a third degrees (the fraction is hard to read) of sayana Sagittarius, and then there will again be a conjunction; and in September 1988, with still more retrograde motion, there will be a conjunction again at 27 degrees of sayana Sagittarius. In this way a conjunction takes place 3 times within a year.

— Source PDF page 316 (book page 317) —

The Saturn-Neptune conjunction is also boom-causing. But the Saturn-Neptune conjunction too takes place only after a long time. The Saturn-Neptune conjunction took place in August 1917 at 5 degrees of sayana Leo. After that it took place in November 1952. Now it will take place in January-February 1989. But when a conjunction takes place once, if Saturn and Neptune become retrograde, a conjunction can take place 2 or 3 times in one year. For example, the Saturn-Neptune conjunction took place in November 1952. Neptune was at 22 degrees of sayana Libra, and Saturn was at just as many. In May 1953 Neptune, becoming retrograde, came to 21 degrees, and Saturn also, becoming retrograde, came to 21 degrees. In this way, only 6 months after November 1952, in May 1953, there was a conjunction again. Then in August 1953 a conjunction took place. In this way, because of retrograde motion, 2 or 3 conjunctions take place between the two planets in a year.

[Reading note: as elsewhere, the digit 9 prints like 6 in the years; the book's sequence of dates (1917, 1952, 1953, 1989) confirms the reading.]

The conjunction of Saturn and Pluto also takes place after many years. The Saturn-Pluto combination makes considerable heat, because Pluto is a cruel planet and the conjunction of two cruel planets is boom-causing.

The Effect of the Conjunction of Rahu and Ketu with the Other Planets:

What the effect of the conjunction of Rahu and Ketu with the seven planets beginning with the Sun is has been told earlier. But when Rahu or Ketu forms a conjunction with Herschel, Neptune and Pluto, special boom comes. But Rahu and Ketu always stay 180 degrees away from each other. For this reason, when there is a conjunction with Rahu, there will be an opposition with Ketu. The opposition is slump-causing. For this reason, when Rahu forms a conjunction with any planet, Ketu will form an opposition, and when Ketu forms a conjunction

— Source PDF page 317 (book page 318) —

then Rahu will make an opposition. In this way the opposition will reduce the boom effect of the conjunction by a great deal.

The Effect of Herschel's Conjunction with the Other Planets:

Herschel, Neptune and Pluto, all three of these planets, were discovered by Western scientists in recent times. Herschel generally completes the full revolution of the 12 signs in 84 years, and Neptune takes twice this time for the complete round of the signs. The

Herschel-Neptune conjunction is boom-causing, but this conjunction will take place only after many years, in March 1992, at 17 degrees of the sayana sign Capricorn. The conjunctions of Herschel-Neptune and Herschel-Pluto are both boom-causing. The Herschel-Pluto conjunction will take place 3 or 4 years from now.

[Reading note: the year is printed with the digit 9 looking like 6 ("1662" is 1992).]

The Neptune-Pluto Conjunction:

At this time Neptune is in the sayana sign Scorpio and Pluto in the sayana sign Virgo. Therefore there will be no conjunction of these two planets for a very long time yet.

While considering the results of the conjunctions of all the planets above, the following points should be kept in mind.

(1) The motion of all the planets is different. Pluto, Neptune, Herschel, Saturn and Jupiter are slow-moving planets. For this reason, when a conjunction of these planets takes place, a boom keeps running for a long time. If there is a conjunction of more than one planet and the conjunction lasts for a long time, then gusts of boom will come in the market for quite a long period. On pages 316-317 (of the book) it has been shown, with examples, how, when planets become retrograde, even slow-moving planets form a conjunction three times each within one year

— Source PDF page 318 (book page 319) —

takes place. When such an occasion arises, then even in a hot market heat comes again and again. The long-term should be considered from the above planets.

(2) The Sun, Mars and Venus are planets of medium motion. If the Sun and Mars form a conjunction as soon as they enter some sign, they cause a sudden boom. Venus causes more boom in the middle of the sign. The Sun and Venus generally finish enjoying one sign in one month. Therefore, if one has to consider some week, fortnight (pakhwara) or month, special consideration should be given to these three planets.

(3) The average motion of Mercury is generally just that of the Sun and Venus, but Mercury is a very fickle planet. The nature of Mercury is that, whichever planet it forms a conjunction with, it takes that planet's nature and influence into itself. Thus Mercury's influence is very fickle. It is a commerce-causing planet. The fast motion of the Moon is well known. It completes the tour of a sign in only 2 and a quarter days. For this reason, if one has to know the boom from day to day or from hour to hour, special attention should be paid to the conjunction of the Moon and Mercury.

[End of Chapter Three of Part Two (the results of the mutual conjunction of the planets), book pages 300-319.]

— Source PDF page 319 (book page 320) —

[End of Chapter Three; Chapter Four begins here.]

Chapter Four

Latitude (Shara) and Declination-Parallelism (Kranti-Samya)

In the previous chapter the result of the mutual conjunction of the planets was told. When two planets in any sign are at one and the same degree, minute and second, their full conjunction takes place; but just as on the surface of the earth, in a country, latitude (akshansh) and longitude (deshantar) are two separate things, in the same way in the sky too, longitude and latitude are two different things. This is explained below by an example.

Look at the map of India. The latitude of Bombay is 18 degrees 58 minutes north and that of Puri (Shri Jagannath Puri) 19 degrees 48 minutes north. The difference is only 50 minutes. But where is Bombay and where is Puri! There is a difference of hundreds of miles between the two. Because the longitude of Bombay is 72 degrees 49 minutes east and that of Puri 85 degrees 47 minutes east.

Now take a second example. The longitude of Shimla is 77 degrees 10 minutes east and that of Hyderabad (Deccan) 78 degrees 27 minutes east. Between their longitudes there is a difference of only 1 degree 17 minutes. But where is Hyderabad (Deccan) and where is Shimla! The difference is hundreds of miles. The reason for this is that the latitude of Shimla is 31 degrees 6 minutes north and that of Hyderabad 17 degrees 26 minutes north. There is a difference of 13 degrees 40 minutes between the two.

[Reading note: the figures are given as read; where the typeface's 9 looks like 6, the readings (for example Bombay's longitude, 72 degrees 49 minutes, and Puri's latitude, 19 degrees 48 minutes) follow the actual positions and the sense of the passage.]

— Source PDF page 320 (book page 321) —

Just as, to determine how far apart two specified places are, it is necessary to know the latitude and the longitude of both places, in the same way, to know what mutual influence two planets are exerting on each other, it is not only necessary to know their "longitude" (sign, degree, minute, second), but it is also necessary to know their latitude (shara) and their declination (kranti).

Look at the figure below:

Diagram of the Sky (the sayana sign Aries)

[Diagram: a right-angled triangle drawn with a vertical line on the left and a slanting line running down to the right. The vertical line is labelled "celestial equator (akashiya vishuvat rekha)" and runs from the point "a" at the top down to "ba" at the bottom. The slanting line from "a" down to "sa" at the lower right is the zodiac line (bha-chakra rekha). Dotted horizontal lines meet the slanting line at two points, one above and one below, and a further dotted line runs to "ga" on the right. The caption beside the figure reads: "Cha-ga = kranti (declination); ga-gha = 'shara' or 'kshepa' (latitude)."]

The line "a-ba" above is the "celestial equator." What the earth's equator is on the earth, exactly above it is the celestial equator. Or, to put it another way, if a long perpendicular is dropped from the pole (dhruva) onto the celestial equator, it will make an angle of 90 degrees.

The line "a-sa" is the line of the zodiac (bha-chakra). The whole "bha-chakra" has not been drawn up above. The Earth moves on the path of the zodiac. But it appears that the Sun moves. The Sun is always seen moving, in a circular form, on the line "a-sa". But the other planets, the Moon,

— Source PDF page 321 (book page 322) —

Mars, Mercury, Jupiter, Venus, Saturn, Herschel, Neptune and Pluto, in the course of moving, are sometimes on this side of the line "a-sa" (the zodiac, bha-chakra) and

sometimes on that side. For example, suppose the "Moon" is at the place "ga." Then:

the distance "ga-gha" is called "shara" or "kshepa" (latitude); the distance "cha-ga" is called kranti (declination).

The Sun, Rahu and Ketu always stay on the line "a-sa." For this reason they have no "shara" or "kshepa." From sayana Aries to 30 degrees of sayana Virgo, the circle or zodiac line (a-sa) stays to the north of a-ba. For this reason the Sun's declination will be north. From 0 degrees of sayana Aries to 30 degrees of sayana Virgo, the declination of all planets beginning with the Sun will be north. But from 0 degrees of sayana Libra to 30 degrees of sayana Pisces, the "bha-chakra" and the celestial equator come out as in the figure given below.

Diagram of the Sky (the sayana sign Libra)

[Diagram: a right-angled triangle like the previous one, but with the slanting line (the zodiac path, marked "bhi-kshan"?) falling away on the other side of the vertical line (the celestial equator, "akashiya vishuvat rekha"), with points "a" at the top, "la", "ha", "ka", "ma", "pa" and "sa" marked. The caption beside it reads: "pa-ma = 'shara' or 'kshepa' (latitude); ka-ma = kranti (declination)."]

Suppose the Moon is at the place "ma." Then the distance of its "shara" is pa-ma, and its declination is ka-ma.

Now look at both figures together. Suppose the Sun is at "la"

— Source PDF page 322 (book page 323) —

place, then "ha-la" is its declination. The Sun will always stay on the declination circle (kranti-vritta). The distance from the declination circle is called "shara." For this reason the Sun never has any "shara."

The distance by which a planet is away from the celestial equator is called the planet's "kranti" (declination). From Aries to Virgo the declination is north, and from the beginning of Libra to Pisces the declination is south; this should always be remembered.

It has already been told above that the planets other than the Sun, Rahu and Ketu go to this side and that of the declination circle (the zodiac, the line a-sa), but they cannot go very far north or south. Their extreme limit has been fixed. Before telling this, it is also of the utmost necessity to mention that how far north or south a planet is from the "bha-chakra," or how far north or south it is from the celestial equator, this distance is not measured in miles, yards or feet. All celestial distance or direction is "angular." Whether it is English astronomy or Indian astrology, the positions of the celestial planets are always expressed through sign, degree, minute and so on. (More than 30 degrees there is no declination or "shara." The declination of the planets is at most 24 degrees, and the mean measure of the latitudes has been given on page 325.) For this reason, to tell how far north or south a planet is from the bha-chakra, it is said that such and such a planet's "shara" is so many degrees and so many minutes north or south, and that such and such a planet's north declination is so many degrees and so many minutes north or south. This method should be understood well. Of Hindi

— Source PDF page 323 (book page 324) —

almanacs, the daily declination or shara of each planet is not given in every almanac. The "Janmabhumi" almanac and the almanac of Shri N. C. Lahiri will be especially useful in this matter.

Kranti-Samya (Declination-Parallelism):

When two planets have kranti-samya, the result is generally the same as that of their conjunction. Declination can be at most 24 degrees; therefore the orb of kranti-samya is taken as only one degree. For example, if the declination of Mars is 16 degrees north and the declination of Jupiter is 19 degrees north, then, with a difference of 3 degrees between their declinations, kranti-samya will not be accepted. When a difference of one degree or less remains in the declinations of the two planets, only then is kranti-samya accepted.

Here it is also necessary to say that, of two planets in which kranti-samya is being looked for, if the declination of one is 15 degrees north and of the other 15 degrees south, even then, although their directions are different, because the degrees of declination are the same they give the result of kranti-samya. So this second principle should also be remembered: whether two planets are in one direction or in different directions, kranti-samya is accepted when the degrees of declination are equal. The result of kranti-samya is also just like that of a conjunction. Now one main thing is told about "shara." When a planet makes a change of shara, that is, when its north shara keeps decreasing and becomes "0," that is, it is exactly on the "bha-chakra" (the zodiac line), then it has an intense effect on the market. By being north of the "bha-chakra" it has north shara, and by being south, south

[Reading note: the figures 16 and 19 degrees in the example are read with the typeface's 9-as-6; the stated difference of 3 degrees confirms them.]

— Source PDF page 324 (book page 325) —

shara. For this reason, when any planet goes from north to south or from south to north, that planet will certainly have to be considered at that time to be on the bha-chakra (on the line a-sa; see pages 321-322).

The Greatest Effect of the Change of Shara on the Market:

At the time when a planet makes a change of shara, that is, while going from north to south or from south to north, it stays on the bha-chakra. Within the period of its influence, the other aspect-combinations occurring in those days have no importance at all. Only the change of shara has primacy.

The daily shara of each planet is given in good almanacs. Their mean values are as follows:

Planet	Mean north shara	Mean south shara
Sun	Always on the "bha-chakra"; it has no shara.	
Moon	5 degrees 17 minutes	5 degrees 12 minutes
Mars	6 degrees 31 minutes	6 degrees 47 minutes
Mercury	7 degrees 0 minutes	7 degrees 0 minutes
Jupiter	1 degree 40 minutes	1 degree 38 minutes
Venus	9 degrees 2 minutes (?)	8 degrees 55 minutes
Saturn	2 degrees 52 minutes	2 degrees 52 minutes
Rahu, Ketu	Always on the "bha-chakra"; they have no shara.	
Herschel (Uranus)	2 degrees 52 minutes	2 degrees 52 minutes
Neptune	1 degree 41 minutes	1 degree 38 minutes
Pluto	17 degrees	17 degrees

[Reading note: in this typeface 9 and 6 look alike. Venus's north figure is printed like "6 degrees 2 minutes"; it is read as 9 degrees 2 minutes by comparison with its south figure, 8 degrees 55 minutes, and with Venus's actual greatest latitude (about 9 degrees). Mars's 6 degrees 31 minutes and 6 degrees 47 minutes are read as printed. The text at the bottom of the page reads "Pluto's 'shara' some Sanskrit scholars, through a mistake, only 6-" and continues on the next page.]

Pluto's "shara," some Sanskrit scholars, through a mistake, only 6-

— Source PDF page 325 (book page 326) —

7 degrees (the same as Mars) is accepted. But, according to the opinion of the newest American astrologers, the shara of Pluto goes up to 17 degrees.[1]

[Footnote 1 on this page: "See the book 'The Influence of Pluto,' published by 'Arius Press' (the name is printed 'Ayriyas Pres'), Chicago (America)."]

The Method of Knowing the Period of Influence:

Because the method written by Arghakanda-Vachaspati Shriyut Pandit Motilal Nagar in his "Vanijya-Sarvasva" is authoritative, it is given here:

"Take the difference between the planet's present greatest shara and its mean value; from the present greatest shara take away the difference found; whichever is the least, multiply it by the planet's mean value; whatever result is obtained, taking it as kala-vikala (minutes and seconds), then, according to that, as much time as is available through the daily motion of that planet's shara, for that much time the influence of that planet's change of shara remains."

[Translator's note: this rule is stated tersely and is hard to follow as printed; it is translated as literally as possible.]

At the time of the change of shara there is a kind of conjunction of that planet with a particular place, which is stronger than the other conjunctions and leaves no gap. Because the other conjunctions still have room to give their result, but the change of shara does not get another occasion for months and sometimes for years.

It has very often been seen that when a planet enters north shara it causes a slump, and on entering south shara it causes a boom. At that time, if that planet is retrograde or set, it makes a boom in place of a slump and a slump in place of a boom.

— Source PDF page 326 (book page 327) —

An Example of Finding the Period of Influence:

"According to the 'Janmabhumi Panchang,' on 8-1-1958, on Wednesday morning at 10:30, Mars entered south shara. The mean value of Mars's south shara is 6 degrees 47 minutes and the present greatest shara of Mars is 2 degrees 25 minutes. The difference between the two is 4 degrees 22 minutes. Of the difference and the present greatest shara, the present greatest shara alone is the lesser. When this is multiplied by the mean value, 16 minutes 24 seconds were obtained; this is the period of influence obtained, which, by the daily motion of Mars's present greatest shara, lasts until 31-1-1958."*

[Footnote on this page: "For special details see 'Vanijya-Sarvasva.' This book can be obtained from (the name is printed 'Bokal') and Company, Dariba, Delhi. Price Rs. 1 and a half." Reading note: the years in the dates are printed with 9 looking like 6; 8 January 1958 was indeed a Wednesday. The times "10:30" and the figures in the arithmetic are given as printed, and the arithmetic is not fully clear.]

[End of Chapter Four of Part Two (latitude and declination-parallelism), book pages 320-327.]

— Source PDF page 327 (book page 328) —

Chapter Five

The Various Boom-Causing Aspects and Their Importance

What the effect of the mutual conjunction of the twelve planets beginning with the Sun is has been told in detail in the third chapter. The effect of declination-parallelism is also just like that of a conjunction; this has been explained in the fourth chapter. The change of shara has the greatest effect; this too has been made clear in the previous chapter.

(1) The effect of a conjunction is boom-causing.

(2) The 120-degree angular aspect is also boom-causing.

(3) The 60-degree angular aspect is also boom-causing.

(4) The 30-degree angular aspect is also boom-causing.

(5) The 150-degree angular aspect is also boom-causing.

(6) The 36-degree angular aspect is also boom-causing.

(7) The 72-degree angular aspect is also boom-causing.

(8) The 144-degree angular aspect is also boom-causing. But the effect of all these aspects is not equal; their effect should be understood according to the proportion written below:

Aspect	Strength of effect
Effect of conjunction	Full
Declination-parallelism (if both planets have north declination)	Three-quarters (paun)
Declination-parallelism (if both planets have south declination)	Three-quarters (paun)

— Source PDF page 328 (book page 329) —

Aspect	Strength of effect
Declination-parallelism (if one planet has south declination and the other north declination)	Half (adha)
If there is a 150-degree angular aspect	A quarter (chauthai)
If there is a 120-degree angular aspect	Half (adha)
If there is a 60-degree angular aspect	A quarter (chauthai)
If there is a 30-degree angular aspect	2 annas' worth (of a rupee of 16 annas)
If there is a 36-degree angular aspect	1 and a half annas' worth
If there is a 72-degree angular aspect	1 and a half annas' worth
If there is a 144-degree angular aspect	1 and a half annas' worth

The "8 annas" and "4 annas" of influence that have been stated are to show that all aspects should not be given equal importance. Besides this, all the planets too are not equal: where is a heavy planet like Saturn and where is a fickle planet like Mercury! The effect that the aspect of Saturn-Herschel, Saturn-Jupiter or Saturn-Neptune will have, how can it be the same for the aspect of Mercury-Venus?

The conclusion that comes out is that when one has to consider a boom:

(1) One should consider the nature and disposition of the planet and so on.

(2) In which sign the planets making the conjunction or aspect are: whether the nature of that sign or signs is of a boom or a slump, this too is of the utmost necessity to keep in mind.

(3) In which navamsha or navamshas the two planets are: whether those degrees are boom-causing or slump-causing, this too is of the utmost necessity to consider.

— Source PDF page 329 (book page 330) —

(4) Whether any planet is not making a change of shara.

(5) Whether there is declination-parallelism (kranti-samya) between the two planets or not.

(6) How much angular aspect there is between the two planets.

After considering these matters, one should consider how much "boom" there will be and up to what extent.

Navamsha-Yuti (Conjunction within a Navamsha):

Besides the 9 boom-causing aspects stated above (1 conjunction, 1 declination-parallelism and 7 other kinds of angular aspect), there is one more conjunction, that is, when two planets are in one and the same navamsha (ninth part of a sign), the following results come:

[Reading note: "9 aspects" is read with the typeface's 9 looking like 6, as 1 + 1 + 7 = 9.]

(1) The Sun with	Result	(2) The Moon with	Result
Sun-Moon	Boom	Moon-Mars	Boom
Sun-Mars	Boom	Moon-Mercury	Momentary boom
Sun-Mercury	Boom	Moon-Jupiter	Boom
Sun-Jupiter	Boom	Moon-Venus	Momentary boom
Sun-Venus	Boom	Moon-Saturn	Slump
Sun-Saturn	Slump	Moon-Herschel	Boom
Sun-Rahu	Slump	Moon-Neptune	Slump
Sun-Ketu	Slump	Moon-Pluto	Boom
Sun-Herschel	Boom		
Sun-Neptune	Slump		
Sun-Pluto	Boom		

— Source PDF page 330 (book page 331) —

[Continuation of the navamsha-conjunction results (two planets in the same navamsha).]

Pair	Result	Pair	Result
(3) Mars-Mercury	Boom	(6) Venus-Saturn	Boom
Mars-Jupiter	Boom	Venus-Rahu	Slump
Mars-Venus	Boom	Venus-Ketu	Boom
Mars-Saturn	Boom	Venus-Herschel	Boom
Mars-Rahu	Boom	Venus-Neptune	Slump
Mars-Ketu	Boom	Venus-Pluto	Boom
Mars-Herschel	Sudden boom	(7) Saturn-Rahu	Slump
Mars-Neptune	Slump (delusive)	Saturn-Ketu	Boom
Mars-Pluto	Boom	Saturn-Herschel	Slump

Pair	Result	Pair	Result
(4) Mercury-Jupiter	Boom	Saturn-Neptune	Slump
Mercury-Venus	Boom	Saturn-Pluto	Slump
Mercury-Saturn	Boom	(8) Rahu-Herschel	Boom
Mercury-Rahu	Boom	Rahu-Neptune	Slump
Mercury-Ketu	Boom	Rahu-Pluto	Boom
Mercury-Herschel	Sudden boom		
Mercury-Neptune	Slump		
Mercury-Pluto	Boom		
(5) Jupiter-Venus	Boom		
Jupiter-Saturn	Boom		
Jupiter-Rahu	Boom		
Jupiter-Ketu	Boom		
Jupiter-Herschel	Boom		
Jupiter-Neptune	Slump		
Jupiter-Pluto	Boom		

(9) Understand the result for Ketu as being like that for Rahu.

(10) Herschel-Neptune: slump. Herschel-Pluto: boom.

(11) Neptune-Pluto: slump.

— Source PDF page 331 (book page 332) —

The Aspects:

According to the aspects that have been told in this chapter, the Sun with Mercury can have only 3 aspects: conjunction, navamsha-conjunction and declination-parallelism. Besides these three, the Sun with Venus can also have the 30-degree and 36-degree angular aspects. In this way there can be 5 aspects of Sun-Venus. Of the Sun-Moon there can be a conjunction, declination-parallelism and the other 7 kinds of aspect (those told in this chapter), that is, 9 kinds. There can also be 9 kinds of aspect of the Sun with the other planets. In this way the boom-causing aspects of the Sun are: with the Moon 9 kinds, with Mars 9 kinds, with Mercury 3 kinds, with Jupiter 9 kinds, with Venus 5 kinds, and with each of these six planets, Saturn, Rahu, Ketu, Herschel, Neptune and Pluto, 9 kinds; all this has been told so far. In this way the results of 89 kinds of aspects of the Sun alone with the other planets should be understood in gradation. If the aspect of the Moon with each of the other planets is considered, 9 kinds, then, apart from the Sun, with 10 planets (10 x 9 =) 90 kinds of aspect arose. Of Mars with the other 9 planets, (9 x 9 =) 81 kinds of aspect arose. In this order, readers can learn the results of well over fifteen hundred aspects by studying the previous chapters. In the same way there will be about 1,500 slump-causing aspects.

[Reading note: the typeface prints 9 like 6, so "6 kinds", "60" and "61" in the original are 9, 90 and 81; the book's own sums (10 x 9 = 90, 9 x 9 = 81, and 9 + 9 + 3 + 9 + 5 + 6 x 9 = 89) confirm this.]

Now, further on in this chapter, the results of the slump-causing aspects especially will be told.

The Various Slump-Causing Aspects and Their Effect

In the previous chapter we, of the various boom-causing aspects

— Source PDF page 332 (book page 333) —

subject, have told which aspect should be given how much importance for a boom. Now, in this chapter, the slump-causing aspects are told.

The Slump-Causing Aspects:

(1) Opposition (pratiyuti; when the difference of the two planets is 180 degrees of angle).

(2) The 90-degree angular conjunction is slump-causing.

(3) The 45-degree angular conjunction is also slump-causing.

(4) The 22 and a half degree angular aspect is also slump-causing.

(5) The 135-degree angular aspect is also slump-causing.

[Reading note: the 90-degree figure is printed like "60" because of the typeface's 9-as-6; the proportions below (opposition 16 annas, 135 degrees 12 annas, 90 degrees 8 annas, 45 degrees 4 annas) confirm the reading.]

But there is a gradation in the effect of all these aspects. If the effect of an opposition is 16 annas (full, of a rupee of 16 annas), then the effect of the 135-degree angular aspect will be 12 annas; the effect of the 90-degree angular aspect 8 annas; and the effect of the 45-degree angular aspect 4 annas. The 22 and a half degree angular conjunction, if in one and the same sign, will have no result. If one planet, for example, is at the 20th degree (printed "20") of the sign Scorpio and the other planet at 12 and a half degrees of the sign Sagittarius, then the effect of the 22 and a half degree aspect will come. The effect of this aspect is very light. About 1 anna of effect should be understood.

After telling the effect of the various aspects in this way, the readers' attention is drawn to the following principles:

(1) Speculation (satta) is not a virtue; rather, it is a vice. Satta is a kind of gambling, in which the gains are fewer and the losses more.

(2) Therefore, rather than speculation, stocking actual goods (maal bharna) is much better.

— Source PDF page 333 (book page 334) —

Buying and selling goods also should be done only according to one's own financial standing. If you have taken 100 shares of Indian Iron at (Rs.) 20, and, when the price falls, you can take another 100 shares at 18, and again, when the price falls, take 200 shares at 16, then your 400 shares will have come to an average price of Rs. 17 and a half, and if the price becomes 17 and a half you can sell. But if your whole capital is only Rs. 2,000, then after buying 100 shares you become helpless and suffer a loss.

Consider from yet another side the principles given in Vyapar-Ratan. Suppose it is written in the book of some doctor or physician (vaidya) "how the time of delivery (childbirth) is to be worked out." One should not at once sit down to work out when any woman will have a son. First see whether that woman is pregnant or not. Is it possible for her to be pregnant or not? If the woman is of young age, of advanced age, ill, unmarried, barren or "kakavandhya" (able to bear only one child), then to work out the time of her delivery would be merely ridiculous.

In the same way, in the birth chart of each person it should be considered "Is there gain of wealth through trade or not?" If there is no gain of wealth through trade (the lord of the second house is placed in a bad place; the lords of the fifth, seventh and tenth houses are

weak, are in the third place, or are in a sign of debilitation; or in the navamshas there are enemy or cruel aspects), then how will profit through trade come? What success will that man have by doing trade?

If 100 persons set out for a post (a place of employment) at one and the same auspicious moment, will all the persons even then have the same result? No. Where only a first-class M.A., Ph.D.

[Reading note: the share-averaging example checks out: 100 shares at 20, 100 at 18 and 200 at 16 total Rs. 7,000 for 400 shares, an average of Rs. 17 and a half.]

— Source PDF page 334 (book page 335) —

are taken, there a third-class B.A. should not even send an application. But if some person, a third-class B.A., travels at an auspicious moment told by an astrologer and comes back unsuccessful, is it right to blame astrology or the astrologer?

In the same way, if Saturn is going to the place of wealth or the place of expense, and in Saturn's ashtakavarga there is a zero line in these places (not a single auspicious line), or the force of Saturn's "sade-sati" (the seven-and-a-half-year period) is on, or the period and sub-period (dasha-antardasha) of inauspicious planets is running, will there be gain of wealth? First of all see whether there is gain of wealth in your own birth chart. Is Mars not in the eighth or twelfth place?

Below is given the birth chart (kundali) of a great man, a crorepati, who earned and lost crores of rupees in his life:

[Diagram: a birth chart in the North Indian diamond style, a rectangle crossed by diagonals into twelve houses, each marked with its sign number. As read from the scan: sign 1 holds Jupiter and Rahu; sign 2 holds Mars; sign 3 is empty; signs 4 and 5 are empty; sign 6 holds Saturn; sign 7 holds Ketu; sign 8 is empty; sign 9 holds the Moon; signs 10 and 11 are empty; sign 12 holds the Sun, Venus and Mercury (the Mercury label sits just below the Sun and Venus labels). The sign numbers run anticlockwise from the top right.]

— Source PDF page 335 (book page 336) —

Below is given the birth chart of a Maharaja Sahib who, even though his income was 55 to 60 lakh a year, left this world leaving a debt of 80 lakh:

[Diagram: another birth chart in the North Indian diamond style with the twelve houses numbered by sign. As far as it can be read from the scan: sign 8 holds Rahu; sign 1 holds Saturn; sign 3 holds the Sun and Mercury; sign 4 holds Venus and the Moon; a further small label near the bottom left is not clear enough to read. The other houses show only their sign numbers (10, 11, 12, 9, 7, 6 and 5 as printed).]

Having a wish for sudden gain of wealth is one thing. Sudden gain of wealth actually coming is another thing. Do not lose your money in speculation. First consider in your own birth chart whether there is a combination for sudden gain of wealth. The consideration of the sudden acquisition of wealth is made from the first, second, fifth, ninth and eleventh places. If there is no combination for the sudden acquisition of wealth in your birth chart, then why do you speculate? Only if the horse is fast can one win in a horse race. If your horse is lame and you want to run it in a horse race, then a salute to your excellent intelligence!

If there are planets favourable to trade in your birth chart, only then will this "Vyapar-Ratan" be able to be helpful to you.

There is one more thing to consider. In which place

doing trade will be profitable to you: Delhi, or Bombay, or Calcutta, or some other place?

From what thing or things will you be able to gain? From wheat, from jaggery, or from silver? From iron or from some other substance? Which planet is strong for you, or which planets are strong? In the second and third chapters of this second part the relation of commodities and planets has been told. Do the work of those very things. Do not do work connected with those planets that are weak or that produce an inauspicious influence.

Do you trade in partnership (sharakat)? Have you been suffering losses in partnership? In the birth chart of some people there are such combinations that working in a joint holding or partnership is profitable for them, and in the chart of some persons there are such combinations that one should never work in a partnership.

Have you considered on your own hand the wealth line, the fortune line or the Sun line, as to at what time there will be gain of wealth and when there is a possibility of loss?*

Considering all these matters, with full thought on the social, economic and political problems of the country and on the national and international conditions that change from day to day, it is best to trade.

Whether it is trade or any other work, he who acts according to the advice of those whose intelligence is better than his own certainly gains. Shubham (may it be auspicious).

[Footnote on this page: "For special details see 'Hasta-Rekha-Vigyan' (the science of palmistry)."]

[This is the last page of the uploaded scan (source page 336, book page 337). It is the last page of Part Two in the book's own table of contents.]

Translator's Closing Note

What this translation covers

This is an English translation of the uploaded scan of "Vyapar-Ratan" (Hindi), source pages 1 to 336, which correspond to book pages 1 to 337. That covers the cover, preface and table of contents, all of Part One (Chapters 1 to 9) and all of Part Two (Chapters 1 to 5).

What the scan does not contain

The book's own table of contents also lists a Part Three, the Sarvatobhadra Chakra (book pages 353 to 398), an appendix (399 to 444), the key to the Sarvatobhadra Chakra (445 to 466) and "Vanijya-Sarvasva" (467 to 542). None of these is in the uploaded scan, which ends at book page 337, so they are not translated here. If you have those pages, they can be translated in the same way.

How the translation was made

The scan had no text layer, so every page was read from its image and translated by hand. The Sanskrit verses are given in meaning, the Hindi lists of commodities and planet pairs are kept as the book gives them, and printed diagrams are described in words. Source page numbers appear in the text so that any passage can be checked against the original.

Things to keep in mind when using it

In this book's typeface the digit 9 prints so that it looks like 6. Wherever a number could be read either way, I used the book's own arithmetic or the real facts to decide, and noted it. Cells or words I could not read with confidence are marked "(?)" or explained in a note, and a few passages are inconsistent or unclear as printed; these were translated literally and flagged. The translation has not been checked by a native speaker of Hindi. The astrological, market, weather and ritual statements are the author's, reported as he states them, and have not been tested or endorsed.
